Tusar,

We are currently experiencing difficulties accessing the initial Title V Permit Application that was submitted through STEERS, and are therefore unable to upload the updated forms directly. To advance the permit to the management review, I am attaching the updated forms along with a scanned copy of the OP-CRO1 form signed by the Responsible Official.

Please advise whether TCEQ will accept these updated forms as submitted.

Raul:

Following correction needs to be made to

- (1) OP-PBR SUP, Table B. Since Table A has AUX-4 (associated with PBR Registration number 47119) it should be removed from Table B which is for claimed (not registered.)

**Form updated, included in the attachment.**

- (2) OP-SUMR for Unit ID you need to update the Preconstruction Authorization reflecting the PBR Registration no. It should be represented as follows:  
106.512/06/13/2001[47119]

**Form updated, included in the attachment.**

- (3) Please confirm that you do not have further comments and you accept the updated draft submitted on 1/23. You can send an email or cover letter while submitting through STEERS.

**We received the updated draft submitted on 1/23 and we have no further comments.**

- (4) OP-CRO1 dated (used time period 1/20/2026 thru the current date) will certify all. Please submit final updated OP-PBR SUP, OP-UA15, OP-SUMR and OP-CRO1 through STEERS. No physical signature is needed if submitted through STEERS.

Please review the updated forms attached and confirm that you have no further comments or questions. Once we receive your confirmation, we will proceed with submitting the updated forms.

Once I get confirmation email from you, I will go ahead and prepare the PNAPackage for management review. If they find some mistakes it will be corrected.

Sincerely,

Raul:

Good morning. I have conducted a technical review of *renewal* application for Transcontinental Gas Pipe Line Company LLC/Compressor Station 40. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application dated June 5, 2025.

Please review the WDP and submit to me any comments you have on the working draft permit by **January 29, 2026**.

Following issues came up during the review process which needs to be addressed.

- (1) OP-PBR SUP – PBR Registration No. 47119 (Registration Date 03/30/2001) is missing from Table A.
  - a. PBR 106.511 is in OP-REQ1 (page 89), but missing from OP-PBR SUP

- b. Table C – Add N/A and N/A if not applicable.
  - c. All the items in Table A and B must be in Table D
  - d. All the 4 Tables needs to be re-dated and re-submitted as a set. Also, the information in OP-PBR SUP must be consistent with information provided in OP-REQ (XII.I – page ~89) and OP-SUMR. The new date will update the date is Terms and Condition No. 7.
  - e. Please follow the instructions closely. [TCEQ Form 20875 - OP-PBR SUP - Instructions Permit By Rule Supplemental Table](#)
- (2) OP-REQ1 – (page 89, XII.I) – For PBR 106.512 the Version date is provided is 03/14/1997 but in OP-PBR SUP the date is provided is 6/13/2001. In the effective permit the date is 06/13/2001. Please represent the PBRs as 106.xxx
- **For the standard exemptions that predate the PBRs, do we need to update them in Table I of the OP-REQ1 (page 89) to reflect your comment above (106.XXX) if the emission sources claimed under those standard exemptions have not changed since the original claim (i.e., if they predate the more recently issued PBRs)?**
- a. Page 1, item I.A.4 – The response needs to change to NO. There are no vents (Typically identified by OP-UA15) addressed on a unit specific basis.
    - **In our submission, the vents were identified on Form OP-UA15, so our understanding is that the appropriate response to this item should be “Yes.” Could you please clarify this comment?**
  - b. You may submit the needed pages.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_facsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_facsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit. A prompt acknowledgement to this email will be very much appreciated. Thank you for your cooperation.

Sincerely,

*Tusar Swami, P.E.*

Raul:

Good afternoon. I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3168 Transcontinental Gas Pipe Line Company LLC/Compressor Station 40. This application has been assigned Project No. 38307. Please address all correspondence pertaining to this permit application dated June 5, 2025, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.

d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.  
If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

TEXAS SENATE

Re: Accepted Federal Operating Permit Renewal Application

Compressor Station 40  
Sour Lake, Hardin County  
Regulated Entity Number: RN100211838  
Customer Reference Number: CN603452400

Dear Senator Nichols:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.504444,30.176666&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

## Process Description

---

Transcontinental Gas Pipe Line Company, LLC (“Transco”) is a subsidiary of The Williams Companies, with offices located in Houston, Texas. Transco owns and operates a bidirectional natural gas pipeline transmission system extending from Texas to New York. Transco’s system is regulated at the federal level by the Federal Energy Regulatory Commission under the Natural Gas Act, and by the U. S. Department of Transportation under the Natural Gas Pipeline Safety Act. Compressor Station 40 is located near Sour Lake, Hardin County, Texas. The station (SIC Code 4922 / NAICS Code 486210) is part of Transco’s interstate natural gas pipeline transmission system.

Compressor Station 40 is a major source of VOC, NO<sub>x</sub>, CO and HAPs (Formaldehyde) and operates under VERP 49008 and several Permits-By-Rule (PBRs). Sources of air pollutant emissions are the natural gas-fired reciprocating IC engines, an auxiliary generator, a natural gas (NG) condensate storage tank, glycol tank, lube oil storage tanks, wastewater tank, a jacket water surge vessel, NG condensate truck loading, and piping component fugitive VOC emissions.

The facility’s primary function is to compress natural gas for transmission along the pipeline system. It maintains six (6) Cooper-Bessemer GMW-10 reciprocating IC engines. The rating of each engine is 2,500 HP. The engines are fueled by pipeline quality natural gas supplied from Transco's mainline transmission system. Fuel is metered upstream of the engines. Dry scrubbers are upstream of the compressors to remove particulate. Any condensate, which is very little, is sent to a small fixed roof condensate tank. This is trucked offsite about once per year. The engines are equipped with an Altronic Ignition System and are water-cooled. The Jacket Water Cooling system consists of five (5) 25 HP electric pumps. The Jacket Water Cooling system utilizes a surge tank to prevent an air lock in the water system. Each engine drives a compressor. The purpose of the compressor is to move the natural gas further downstream by increasing the pressure. This process is repeated about every 40 miles along the pipeline system.

An emergency generator is maintained onsite in case of loss of purchase power. Small storage tanks are used to hold glycol, oil and water for engine lubricating and cooling. Pipes and engines are blown down or purged of gas before maintenance is conducted as a safety precaution.
