TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

THE HONORABLE BRYAN HUGHES
TEXAS SENATE

AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Carthage, Panola County
Regulated Entity Number: RN104625264
Customer Reference Number: CN605383652

Dear Senator Hughes:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.337222,32.139722&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Bryan Hughes

**SUBJECT: Renewal for Federal Operating Permit (FOP)
 Gulf South Pipeline Company, LLC – Carthage No. 2 Compressor Station
 Primary TCEQ Account Number: PB-A006-F
 Regulated Entity Number: RN104625264
 Operating Permit Number: O109**

Dear Sir/Madam:

This letter and its enclosure constitute Gulf South Pipeline Company, LLC's (Gulf South's) application to renew the FOP for the above referenced facility.

This FOP renewal application has been prepared in accordance with 30 TAC Chapter 122, Subchapter C, Division 4, and TCEQ guidance for preparing such applications. A list of the TCEQ forms included in this submittal can be found in Attachment 1. We believe this submittal constitutes a complete application to renew the above referenced permit.

The current FOP was issued on December 22, 2020 and expires on December 22, 2025. Pursuant to 30 TAC 122.241, the facility can continue to operate under its current FOP following its expiration as long as a complete renewal application is submitted under 30 TAC 122.133(2), which requires the application to be submitted at least six months prior to the permit expiration date. Since this renewal application is being submitted prior to June 23rd (June 22nd fell on a weekend), the submittal is timely, and the station will continue to operate in accordance with the current FOP until TCEQ renews the permit.

The attached forms provide all necessary information for a renewal to the permit as no revisions have been made to the emission units at the site. Pursuant to 30 TAC 122.134(b)(2), resubmittal of information relating to existing emission units that have not undergone any regulatory changes is not provided herein. The existing emission units remaining in service are accurately represented in the current FOP.

The enclosed application has been certified by a Responsible Official for this site, Ms. Kimberly Tarr. The signed OP-CRO1 form is included in the attached forms. If you find during your review that additional information is required, or if you have any questions, please contact me at (903) 692-0843, or Travis Lee at (502) 424-2742.

Sincerely,
