Hi Travis,

The project went through QAQC review, and three minor errors were resolved. Attached is a courtesy copy. No further action is needed from you.

1. The permit face (WDP pg.1) was updated to correct the site name since it appeared twice.
2. The original Term & Condition 8 regarding periodic monitoring was removed since the site is not subject to periodic monitoring, only CAM.
3. Page numbers were updated.

Best,

Gaby

Hi Travis,

I just wanted to notify you that I noticed the updated WDP I sent on 8/15 had a minor PBR error on the NSR Authorization References by Emission Unit table. I corrected the PBR entry from '106.352/11/22/2012' to '106.511/03/14/1997' based on the updated OP-PBRSUP submitted on 8/18. See update highlighted below. Thanks!

Hi Travis,

Great, thank you. The updated OP-PBRSUP was received on 8/18. I updated the OP-PBRSUP date in special term and condition 9 in the WDP to match the date of the submittal of the latest OP-PBRSUP as shown below. I will proceed with the next review process steps and prepping the PNAP.

New Source Review Authorization Requirements

9. Permit holder shall comply with the requirements of New Source Review authorizations issued or claimed by the permit holder for the permitted area, including permits, permits by rule (including the terms, conditions, monitoring, recordkeeping, and reporting identified in registered PBRs and permits by rule identified in the PBR Supplemental Tables dated **August 18, 2025** in the application for project 38445), standard permits, flexible permits, special permits, permits for existing facilities including Voluntary Emissions Reduction Permits and Electric Generating Facility Permits issued under 30 TAC Chapter 116, Subchapter I, or special exemptions referenced in the New Source Review Authorization References attachment. Hi Travis,

Thanks for working on the form. As mentioned, the OP-PBRSUP form requires to list PBRs, not PBR subsections, so if what you provided is accurate for the units and you are claiming those PBRs, then the form looks good, and you can go ahead and submit to Title V STEERS.

I granted a short deadline extension. Please submit the following by **3pm August 20, 2025**.

- **Submit the updated OP-PBRSUP** in Title V STEERS with the RO or DAR e-signature.
- I updated the New Source Review Authorization References by Emissions Unit table and the Major NSR Summary table with your edits in the WDP (see attached). Please review and **provide a response to the WDP updates** even if you have no further comments. Since this is a follow-up review to the previously submitted and reviewed WDP, only comments concerning changes since the last WDP may be considered by TCEQ. Any comments outside the scope of the most recent changes should be submitted as a separate project.

Gaby

Hi Travis,

Please leave the (I) out of the PBR No. You should not specify the section of the PBR on the OP-PBRSUP form. PBR 106.352 has the following valid version dates that you can use if you are claiming PBR 106.352 for the unit: 2/27/2011, 2/2/2012, and 11/22/2012.

Note that the updated OP-REQ1, pg. 89 sent on 8/8/2025 in STEERS specifies that the version no./date for PBR 106.352 is 11/22/2012. If you need to make updates to the PBRs in the OP-REQ1, pg. 89, please also resubmit the page 89 to STEERS. The OP-REQ1 and OP-PBRSUP forms need to be consistent with each other.

Best,

Gaby

Morning Gaby,

I just want to get some clarification on something. We use 106.352(l) (this is the letter "l", not the number "1") to represent new projects or related facilities on or after April 1, 2011 not in the Barnett Shale as per 106.352(a)(1) as Carthage 2 Compressor Station is in Panola County. We understand section letter "l" of 106.352 has a different amendment effective date as the rest of 106.352. Please clarify if you want us to use the 106.352 with it's latest effective date and ignore using the letter "l" section for amendments as per 106.352(a)(1). Upon confirmation, I can send the appropriate edits to OP-PBRUP.

Thanks!

Good morning,

Thanks. The OP-PBRUP form just needs a few updates.

- Table B
 - Correct the Version No./Date for PBR 106.352 (units C-11, C-12, C-13). 12/15/2003 is not a valid version no./date. The updated OP-REQ1 submitted on 8/8/25 specifies that 11/22/2012 is the version no./date.
 - Unit EG-4 is missing from the table.
- Table D: Correct the Version No./Date for PBR 106.352 in this table as well.

Please notify me when the updated OP-PBRUP is fully e-signed and submitted in STEERS. Will you be able to meet tomorrow's deadline to submit in STEERS?

Hi Travis,

Thanks, I appreciate your work on this. Our system shows that the only registered PBR is PBR registration 116381, which aligns with what you said. Since this is the only registered PBR, it needs to be entered on OP-PBRSUP, Table A. The rest of the PBRs are not registered, but you are claiming them, so those get entered in OP-PBRSUP, Table B. The OP-PBRSUP form is used to list only registered PBRs and claimed (unregistered) PBRs. NSR and Title V permit numbers should not be entered in the OP-PBRSUP.

Please submit the OP-PBRSUP with the following updates to the OP-PBRSUP sent yesterday to Title V STEERS by **COB Friday August 15, 2025:**

- Table A: List registered PBR 106.359 (registration number 116381) only.
- Table B: List all other claimed (not registered) PBRs with correct Version No./Date. These PBRs do not have a registration number. Also, unit T-7 is not in our system or the UA forms submitted, but unit T-6 is, so please correct the unit ID in the form.
- Table C: If 106.511 is a claimed, not registered PBR for insignificant sources, then leave as is.
- Table D: Remove the "(1)" from PBR 106.352.

Please note that even though you are claiming unregistered PBRs, they are still required to be listed on the NSR References by Emissions Unit table in the WDP. Once I receive the updated OP-PBRSUP, I will update the table in the WDP and send it back to you for review.

I hope this clears up the confusion. Please let me know if you have further questions. If you would like to email me the OP-PBRSUP form first to check before submitting to Title V STEERS, you may do that.

Best,

Gaby

Afternoon Gaby,

We've gotten mixed answers on these PBR-SUP forms for what information is needed. NSR 76079 does authorize emissions from the units authorized in those PBRs. The only other permit 116381 which is an MSS permit authorization. I tried reaching out to you to clarify what you're looking for but what I've come up with in the meantime to satisfy deadlines is that we will use the FOP itself as the authorization of the PBRs. To stay consistent with that approach, I pulled the other units into the 76079 registration and the MSS IDs into the 116381 registration. Hopefully this is what you were looking for. I've also attached the requested Working Draft Permit edits as well. Let me know if there's anything else that you require.

Travis,

After reviewing the updated forms submitted in STEERS, additional corrections are needed as well.

Please resubmit the following in Title V STEERS **as soon as possible or by COB Friday August 15, 2025.**

- 76079 is not the registration number for the PBRs specified in the OP-PBRSUP Table A. Resubmit the full OP-PBRSUP form with the correct PBR registration numbers for the registered PBRs in Table A. Ensure only registered PBRs are identified in Table A and unregistered but claimed PBRs are identified in Table B. Hi Travis,

Apologies, my phone service is having technical issues at the moment and is being worked on. Thank you for reviewing the WDP and for submitting the requested updated forms. They have been received in Title V STEERS. There is still one item missing.

Please email the following by **COB tomorrow August 12, 2025**.

- To clarify, please **add the corresponding Special Condition numbers** found in the latest NSR special conditions document into the Major NSR Summary table located in Appendix B in the WDP. Update using the track changes tool in Word and send the WDP back with the special conditions added to the Major NSR Summary table.

Hi Gaby,

I have drafted a response to your request regarding the Project listed in the header. I tried giving you a call earlier today but I wasn't successful. Most of our senior management is out and wasn't available to sign (the DAR may not be available to submit the documents in STEERS) the OP-CRO1 but I am attaching all of your requested documents into this email here as well as STEERS. With the acknowledgement that Condition 9 will change with the next review, I have no comments on the working draft permit, thank you. I've drafted the following responses to your email requests as well:

- Using track changes update the Special Conditions in the Major NSR Summary Table that is included in the WDP in Appendix B. I also attached the latest NSR special conditions document that was issued on 10/16/2024 for NSR permit 76079 and PSDTX211 for your reference. **No changes necessary, thanks for the notes within the WDP/NSR**
- Resubmit OP-REQ1, pgs. 88-89 with the following updates:
 - For PSDTX211, the date 03/19/2014 is not the latest issuance date. Provide the latest issuance date for PSDTX211. **Updated.**
 - NSR permit 76079 is missing from the form. Include NSR permit 76079 with the latest issuance date. **Updated.**
 - For PBR 106.352, the version date of 03/14/1997 provided is not a valid version date. Provide a valid version date for the PBR. Note that the version date for the PBR will be updated in the WDP's NSR Authorization References table and NSR Authorization References by Emission Unit table once the updated form is submitted. **Updated and acknowledged**

- Since the OP-REQ1 indicates the site has PBRs, submit a full OP-PBRSUP form for all registered and unregistered PBRs at the site. An OP-PBRSUP form is required for all renewal applications submitted on or after August 1, 2020. Refer to the [OP-PBRSUP form instructions](#) for more information on filling out the form. Note that special term and condition 9 in the WDP will be updated with the OP-PBRSUP date once I receive the form. **The form is attached.**
- The OP-2 form is missing from the application. The form is required for all Title V renewal applications. Submit the OP-2 form and specify any updates, including updates to the PBRs. The effective permit contains PBR 106.511 with version date 09/04/2000 but it is not included in the submitted OP-REQ1, pg.89 and the submitted version date for PBR 106.352 in OP-REQ1 is not valid. Refer to the [OP-2 Instructions](#) for more information on filling out the form. **The form is attached. The OP-CRO1 is also attached but I will wait until instructed to have it signed and submitted.**

Please include myself in any further correspondence regarding this project. Let me know if there's any way I can help with your review.

Subject: Technical Review -- FOP O109/Project 38445, Gulf South Pipeline Company LLC/Carthage 2 Compressor Station
Attachments: SOP - O109 Gulf South Pipeline Company LLC (Renewal, 38445).docx; AIR NSR_76079-363707_Permits_Public_20241016_Conditions_7293610_.docx

Good morning,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O109 for Gulf South Pipeline Company LLC, Carthage 2 Compressor Station. This application has been assigned Project No. 38445. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

Please note that there will be shorter deadlines during the review process in order to issue the permit prior to the expiration of the effective permit, December 22, 2025. Your cooperation is greatly appreciated.

I have conducted a technical review of this application, and I have attached an electronic copy of the Working Draft Permit (WDP) for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have regarding it by COB August 8, 2025. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. Note that any application updates necessary to make requested changes must accompany the WDP comments.

In addition to the WDP, additional information was found to be needed or missing. **Please submit the following to Title V STEERS by the WDP deadline stated above.**

- Using track changes update the Special Conditions in the Major NSR Summary Table that is included in the WDP in Appendix B. I also attached the latest NSR special conditions document that was issued on 10/16/2024 for NSR permit 76079 and PSDTX211 for your reference.
- Resubmit OP-REQ1, pgs. 88-89 with the following updates:
 - For PSDTX211, the date 03/19/2014 is not the latest issuance date. Provide the latest issuance date for PSDTX211.
 - NSR permit 76079 is missing from the form. Include NSR permit 76079 with the latest issuance date.
 - For PBR 106.352, the version date of 03/14/1997 provided is not a valid version date. Provide a valid version date for the PBR. Note that the version date for the PBR will be updated in the WDP's NSR Authorization References table and NSR Authorization References by Emission Unit table once the updated form is submitted.
- Since the OP-REQ1 indicates the site has PBRs, submit a full OP-PBRSUP form for all registered and unregistered PBRs at the site. An OP-PBRSUP form is required for all renewal applications submitted on or after August 1, 2020. Refer to the [OP-PBRSUP form instructions](#) for more information on filling out the form. Note that special term and condition 9 in the WDP will be updated with the OP-PBRSUP date once I receive the form.
- The OP-2 form is missing from the application. The form is required for all Title V renewal applications. Submit the OP-2 form and specify any updates, including updates to the PBRs. The effective permit contains PBR 106.511 with version date 09/04/2000 but it is not included in the submitted OP-REQ1, pg. 89

and the submitted version date for PBR 106.352 in OP-REQ1 is not valid. Refer to the [OP-2 Instructions](#) for more information on filling out the form.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process, application updates, WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified submittals, including application updates supporting the WDP comments is required to be submitted with the WDP response. After final review of the WDP, additional changes, supported by application updates, may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that were not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Gaby

 Gulf South Pipeline Company, LLC – Carthage No. 2 Compressor Station
 Primary TCEQ Account Number: PB-A006-F
 Regulated Entity Number: RN104625264
 Operating Permit Number: O109**

Dear Sir/Madam:

This letter and its enclosure constitute Gulf South Pipeline Company, LLC's (Gulf South's) application to renew the FOP for the above referenced facility.

This FOP renewal application has been prepared in accordance with 30 TAC Chapter 122, Subchapter C, Division 4, and TCEQ guidance for preparing such applications. A list of the TCEQ forms included in this submittal can be found in Attachment 1. We believe this submittal constitutes a complete application to renew the above referenced permit.

The current FOP was issued on December 22, 2020 and expires on December 22, 2025. Pursuant to 30 TAC 122.241, the facility can continue to operate under its current FOP following its expiration as long as a complete renewal application is submitted under 30 TAC 122.133(2), which requires the application to be submitted at least six months prior to the permit expiration date. Since this renewal application is being submitted prior to June 23rd (June 22nd fell on a weekend), the submittal is timely, and the station will continue to operate in accordance with the current FOP until TCEQ renews the permit.

The attached forms provide all necessary information for a renewal to the permit as no revisions have been made to the emission units at the site. Pursuant to 30 TAC 122.134(b)(2), resubmittal of information relating to existing emission units that have not undergone any regulatory changes is not provided herein. The existing emission units remaining in service are accurately represented in the current FOP.

The enclosed application has been certified by a Responsible Official for this site, Ms. Kimberly Tarr. The signed OP-CRO1 form is included in the attached forms. If you find during your review that additional information is required, or if you have any questions, please contact me at (903) 692-0843, or Travis Lee at (502) 424-2742.

Sincerely,

A handwritten signature in black ink, appearing to read "David Nickel".

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

THE HONORABLE BRYAN HUGHES
TEXAS SENATE

Dear Senator Hughes:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.337222,32.139722&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Bryan Hughes
