Good morning,

I hope this email finds you well.

I am preparing the public notice package for permit O2674 and noted that previous issuances have had a Spanish notice published in Hispanic Guide. However, the Form OP-1 that was submitted indicates that the site is not subject to bilingual notice as documented in section VIII., Question D.

The city of Abeline is also subject to Spanish notice requirements for public notices under Title V. Therefore, please confirm if the site is subject to bilingual notice requirements with the alternate language being Spanish. Please confirm this information as soon as possible, but no later than **February 6, 2026**.

If you have any questions or concerns, please do not hesitate to contact me. ‘

Thank you for your continued cooperation.

Sincerely,

Samantha Mendez

Good afternoon,

I have made the updates requested and have attached a courtesy copy of the updated Working Draft Permit.

Please provide Form OP-CRO1 by **November 17, 2025** to certify all updates supporting the WDP comments from the time-period of October 14, 2025, through October 21, 2025.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Good afternoon,

Thank you for your prompt response.

PBR 106.183 is now added to the permit per its inclusion on Forms OP-REQ1 and OP-PBRSUP. Additionally, the following PBRs have been deleted from the permit per your response: 106.102, 106.103, and 106.476.

I wanted to notify you that the emission units listed on the Form OP-SUMR, that have Form OP-PBRSUP documented as their applicable form, will not be documented in the permit. These PBR sources that were included on the Form OP-PBRSUP do not need to be documented in the permit if they do not have Title V requirements.

The PBRs are documented in the New Source Review Authorizations list, but the individual units are not since they have no Title V requirements. If the following emission units do not have Title V requirements, then they should not be documented in the Title V permit. The emission units are HTR-AA1, HTR-AA2, HTR-AA3, HTR-AA4, HTR-HULL, HTR-DECK, HTR-PAINT, HTR-MOLD, WELD, HAND, DEGREASER, respectively.

Please do not hesitate to contact me if you have any questions or concerns regarding this matter.

Thank you for your cooperation.

Hi Samantha,

In response to your question, 106.102 is not applicable to the site, as the comfort heaters are now being authorized under 106.183 due to the combined heat rates of the units. The WDP does not include 106.183, so we request that it be added as it is represented in the submitted OP-PBRSUP.

106.103 previously authorized the air conditioning but no longer exists due to air conditioning having been classified as de minimis. 106.476 also is not applicable to the site, as the resin storage tanks are authorized via NSR Permit No. 72398. Therefore, no updates to the OP-PBRSUP are needed for these Permit by Rules.

TANK2 needs to be added to the Permit Shield as is represented in the submitted application, and it also needs to be added to the New Source Review Authorization References by Emissions Unit table along with all of the PBR sources that were included on the OP-SUMR as well. Please see all requested updates under track changes in the attached WDP document.

Thank you,

Hunter Lohrenz

Good morning,

I have conducted a technical review of this application, and I have attached an electronic copy of the Working Draft Permit (WDP) for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have regarding it by **October 24, 2025.** Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. Note that any application updates necessary to make requested changes must accompany the WDP comments.

Additionally, please review the following deficiency noted during technical review by **October 24, 2025**.

- The effective permit documents Permits by Rule (PBR) which were not documented on Forms OP-REQ1 Page 89 and OP-PBR SUP included in this application submittal.
 - Please confirm if the following PBRs are active at the site: 106.102, 106.103, and 106.476. If so, please provide an updated Form OP-PBR SUP.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process, application updates, WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified submittals, including application updates supporting the WDP comments is required to be submitted with the WDP response. After final review of the WDP, additional changes, supported by application updates, may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that were not previously certified. I will advise you of this requirement prior to sending the Public

Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Mr. Garrard,

I have been assigned to the Federal Operating Permit (FOP) Renewal issuance application of Permit No. O2674 for Tige Boats Inc., Tige Boats, Abeline Facility. This application has been assigned Project No. 38463. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Dear Senator Perry:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-99.68,32.428611&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.
