Dear Senator Hughes:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) initial issuance application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.6522,33.5336&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Good morning,

Hello, I am Zach Gilmore the current Air Program manager at RRAD. Attached are the corrected forms that you have requested from Audry and Kenny. I have corrected them with your directions specified in the first email.

As for the acid rain section, I thought we had checked “NO” in any boxes referring to acid rain as RRAD is not an acid rain site. Sorry for any of the confusion in that regard.

For the message about the date on the REQ1 form, what date would you like us to put, as we are a little confused on what is being asked of us.
