Subject: Working Draft Permit -- SOP O4820 / Project 38984, ET Genco LLC/Greywolf Power Generation

Good morning,

I have conducted a final technical review of the initial application for Site Operating Permit (SOP) Permit No. O4820 for ET Genco LLC, Greywolf Power Generation. An electronic copy of the updated Working Draft Permit (WDP) is attached for your review and approval. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

*Please review the WDP and provide comments by **04/07/2026**. Since this is a follow-up review to the previously submitted and reviewed WDP, only comments concerning changes since the last WDP may be considered by TCEQ. Any comments outside the scope of the most recent changes should be submitted as a separate project.*

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at

R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Hi Ifeoluwa,

Sorry for the late response. I guess I forgot to hit send on Friday.

There are no applicable rules to the Unit ID FUG. That is why we did not submit the OP-UA12 with the application. The Unit ID was listed in the OP-SUM for completeness as it is a listed EPN in the NSR permit. Hopes this answers the question.

Thanks,

Good morning,

The applicable citations for the GRP-ENG and the updated date for the PBR Supplemental Table were missing in the Working Draft Permit (WDP) due to my error. This deficiency has been resolved and the WDP has been updated to reflect these changes, apologies for the confusion.

After further review, I noticed the Unit ID FUG was listed as one of the units on the submitted Form OP-SUM, however, there appears to be no Unit Attribute (UA) forms submitted in this application to document the rule to which this unit is subject to and/or its potential applicability. In your previous response, you referred to Form OP-UA2 for GRP-ENG which is different from my request. Please submit all the necessary forms required to document the Unit ID FUG. Fugitive emission sources are typically documented on FORM OP-UA12.

Please submit the requested documents as soon as possible but not later than **03/27/2026**.

Please let me know should you have any questions.

Ifeoluwa,

The application submitted through STEERS included OP-UA2 for the GRP-ENG in pages 108 through 110 of the pdf. The applicable citations for the GRP-ENG are missing in the draft Title V permit. Why do I have to resubmit something that was already submitted?

I reviewed the draft permit and It looks like the draft permit is missing the requirements for the engines. Was there a reason these were left out? I also noticed the reference to the PBR Supplemental table was not updated. See snip below:

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) initial issuance application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-103.358055,31.794444&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Subject: NOD/RFI - Technical Review -- SOP O4820 / Project 38984, ET Genco LLC/Greywolf Power Generation

Good afternoon,

I have completed the technical review of the renewal application for Federal Operating Permit (FOP) Permit No. O4820 for ET Genco LLC, Greywolf Power Generation. Please submit the following requested information as soon as possible but no later than **01/23/2026:**

- 1) There appears to be some discrepancies regarding the dates on the submitted application. The dates on the forms in application are written as “November 2025” indicating just the month and the year. The correct date format should indicate the day, month, and year i.e., DD/MM/YYYY. You do not have to resubmit the whole application but please submit an updated Form ACPS, Form OP-1, and Form OP-PBRSUP with the correct date format since the dates on these forms needs to be referenced in the application.
- 2) The latitude and longitude that was documented on Form OP-1 Page 5 is provided as a decimal degree (i.e., 31.794522 and -103.257971) rather than the requested format of DDD:MM:SS (Degrees, Minutes, Seconds). Please submit an updated page 5 of the Form OP-1 to document the proper format for latitude and longitude.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO or DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. However, application updates that are provided through email or physical mail will require certification using an original signature OP-CRO1. I will request the final OP-CRO1 submittal at the proper time.

Please be sure to notify me whenever any updates are submitted via STEERS.

As indicated on Form OP-1, question IV.D, please remember the Federal Operating Permit (FOP) application and all application updates must be submitted to both EPA Region 6 at R6AirPermitsTX@epa.gov, and to the TCEQ regional office having jurisdiction over the facility. Related information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your cooperation.

Sincerely,

Ifeoluwa Babarinde

1.0 Introduction

ET Genco LLC (ETG) is submitting an initial Title V Standard Operating Permit (SOP) application for the Greywolf Power Generation Site authorized under Texas Commission on Environmental Quality (TCEQ) Standard Permit Number 177171. This application is being submitted following up the abbreviated application submitted on 9/11/2025 (TCEQ Project No. 38984). This permit was assigned Permit No. O4820.

1.1 Project Overview

This application is being submitted to authorize the operations of the Greywolf Power Generation (Site). The Site consists of four (4) natural gas fired, spark-ignition (SI) reciprocating internal combustion engines (RICE). Each EGU is a 3,628-horsepower (hp) Caterpillar G3520 engine (Emission Point Numbers ([EPNs] ENG-1 through ENG-4). The site produces electricity for sale to the grid.

1.2 Application Summary

TCEQ forms required for this application are included in Appendix A. The application overview is as follows:

1. Appendix A includes all TCEQ Forms, including the following:
 - TCEQ Form OP-CRO1

2. Appendix B includes an Area Map, Plot Plan, and Process Flow Diagram.

2.0 Project Description and Facility Information

The Site is an electric generation facility that will consist of four natural gas, SI RICE that will combust natural gas to produce electricity for sale to the grid. The generating units will only fire sweet natural gas, which will be received by pipeline. The site includes two 520-gallon storage tanks, one for lube oil and another for coolant, authorized under Permit By Rule (PBR) 106.472. Additionally, the Site conducts Planned Maintenance, Startup, and Shutdown (MSS), as specified in PBR 106.263. Fugitive emissions from the site's operations are also authorized under the Standard Permit Number 177171.

2.1 Area Map

An area map depicting the site location, geographic features, and significant landmarks is provided in Appendix B. No schools are located within 3,000 feet of the site boundary.

2.2 Process Flow Diagram

A process flow diagram is included in Appendix B.

Subject: Technical Review -- SOP O4820/Project 38984, ET Genco LLC/Greywolf Power Generation

Good morning,

I have been assigned to the Federal Operating Permit (FOP) abbreviated initial application for Site Operating Permit (SOP) Permit No. O4820 for ET Genco LLC, Greywolf Power Generation. This application has been assigned Project No. 38984. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to help facilitate tracking.

As the original application submittal was an abbreviated application, please be advised that a request for the full application will be issued soon.

I will advise you should I have any more questions or require additional information during the review process.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO or DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. However, application updates that are provided through email or physical mail will require certification using an original signature OP-CRO1. I will request the final OP-CRO1 submittal at the proper time.

Please be sure to notify me whenever any updates are submitted via STEERS.

As indicated on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to both EPA Region 6 at R6AirPermitsTX@epa.gov, and to the TCEQ regional office having jurisdiction over the facility. Related information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#)

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on one or more of the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.

- c. High-level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items, or think you need to provide any additional updates, please let me know and we can discuss further.

Please do not hesitate to contact me should you ever have any questions about the guidelines, the project schedule, or any other details regarding your application, the review process, or the permit.

Thank you for your cooperation. I look forward to working with you during this project.
