Carolyn/Sheila,

Thank you for the phone call today. Please see explanation below and attached screenshots. Feel free to give me a call if you have any questions, the history of the site is a bit confusing.

Current Owner/Operator Info

- Site Name: South Texas Gateway Terminal (RN110369758)
- Physical address: 248 FM 1069, Ingleside, TX 78362 (per San Patricio County)
- Operator/Customer: Gibson Energy Infrastructure LLC (CN606208536)
- Owner: South Texas Gateway Terminal LLC

The address "200 FM 1069" was possibly an address used during construction, but San Patricio County does not appear to recognize this address.

Past Owners/Operator Info

- Buckeye entities (acquired the property in the 2019 timeframe and began construction of the terminal)
- Gulf Marine Fabricators (held the property prior to 2018 for several years)

Thanks,

Casey Krause, *Senior Environment & Regulatory Specialist*

Dear Senator Hinojosa:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.192777,27.826944&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

SOP Renewal/Revision Application
South Texas Gateway Terminal – RN110369758
Title V Permit # 4220
San Patricio County, Texas

Air Permits Division,
Gibson Energy Infrastructure, LLC (Gibson) is submitting this SOP renewal/revision to the Texas Commission on Environmental Quality (TCEQ) for the South Texas Gateway Terminal located in San Patricio County, Texas. The permit expires July 23, 2026, and Gibson is submitting a timely renewal at least six months, but no earlier than 18 months, before the date of permit expiration per 30 TAC §122.133.

Three storage tanks (TK-1009, TK-3005, and TK-3006) were authorized on May 24, 2024, via PBR registration No. 176252. These tanks were initially authorized by NSR registration no. 151476 on April 23, 2021, but were never built. The PBR has been listed on the Form-PBRSUP, but the tanks have not been added to this Title V Renewal as new units.

Since the issuance of the facility's Title V permit in 2021, the TCEQ has developed rule flowcharts and unit attribute forms that address MACT EEEE. This application includes the following newly-issued UA forms:

- OP-UA3 for Storage Tanks (MACT EEEE), Table 29
- OP-UA12 for Fugitive Sources (MACT EEEE), Table 23

This permit application includes a minor revision to remove MACT EEEE applicability from the chemical additive tanks, GRPADDTK.

This renewal/revision application contains the following forms:

- OP-2 Application for Permit Renewal/Revision
- OP-1 Site Information Summary
- OP-REQ1 Application Area-Wide Applicability Determinations and General Information
- OP-REQ3 Applicable Requirements Summary
- OP-UA3 Storage Tank Vessel Attributes
- OP-UA12 Fugitive Emission Attributes
- OP-ACPS Application Compliance Plan and Schedule
- OP-SUMR Individual Unit Summary for Revisions
- OP-PBRSUP Permits By Rule Supplemental Table
- OP-CRO1 is not submitted since the submittal is certified online via STEERS.

Title V Renewal/Revision

South Texas Gateway Terminal

Permit No. O-4220

San Patricio County

September 2025

Prepared by:
Bright Sky Environmental, LLC
11701 FM 2244, Suite 215B
Bee Cave, TX 78738

Introduction

The South Texas Gateway Terminal Title V initial application (Permit No. O-4220) was initially approved July 23, 2021. At the time of the initial Title V application and issuance, TCEQ had not yet incorporated MACT EEEE into its applicability flow charts and Title V forms. As part of the renewal process, Gibson Energy Infrastructure, LLC (“Gibson”) is submitting an OP-UA3 Table 29 for storage tanks and OP-UA12 Table 23 for fugitive sources to address MACT EEEE. Please remove/void the existing OP-UA1 form since all sources are now described in the new OP-UA3 Table 29 and OP-UA12 Table 23.

Minor Revision applicability: The current Title V permit lists GRPADDTK (EPNs T-3, T-4, T-5, and T-6) as being applicable to the emissions limits, monitoring and testing, recordkeeping, and reporting requirements of MACT EEEE. An NSR permit amendment submitted July 2020 revised the size of the Additive Storage Tanks to less than 1,000 gallons. Due to the revised tank sizes, MACT EEEE is not and has never been applicable to the Additive Storage Tanks since their actual construction. Through this minor revision, Gibson is updating the Title V permit to remove MACT EEEE requirements from the GRPADDTK in the newly issued OP-UA3 form and in the OP-REQ3. This revision is considered to be a minor revision because it meets the criteria outlined in 30 TAC §122.215, example: “Deletion of a unit and its applicable requirements from the permit when such action does affect or impact the applicable requirements for other emission sources listed in the permit.”¹

There are no other requested changes to the Title V permit.

This application includes the following forms:

- OP-1
- OP-2
- OP-REQ1
- OP-REQ3
- OP-UA3
- OP-UA12
- OP-ACPS
- OP-SUMR
- PBRSUP
- OP-CRO1 (electronic only)

¹ TCEQ - (APD-ID151v1.0, revised 05/22) SOP Revision Application Guidance

Process Description

The South Texas Gateway Terminal transports and stores crude product (crude oil and condensate), conducts crude blending activities, accommodates outbound product transport via ship and barges, and includes the capability for pipeline receipt and delivery. All product tanks at the facility are able to supply all docks and pipelines.

The South Texas Gateway Terminal receives and loads out crude product at marine docks controlled by four (4) MVCUs. Product is stored in twenty (20) IFR product storage tanks and one (1) surge relief IFR tank. Pipelines are used throughout the terminal to transport product to and from the terminal and throughout the terminal as well as crude blending activities.

The South Texas Gateway Terminal operates one (1) fire water pump powered by diesel compression ignition engines. The diesel equipment is supported by one (1) diesel fuel tank. There are also four (4) authorized chemical additive storage tanks (less than 1,000 gallons each) on-site.

There are two 500-gallon fuel storage tanks used to fill various equipment and vehicles onsite which are authorized via unregistered PBR.

Fugitive emissions include equipment leaks from piping components, such as connections flanges, and valves. Components in gas/vapor, light liquid, and heavy liquid service emit fugitively.

MSS activities are performed periodically on terminal equipment. The frequency of maintenance activities varies for different equipment types.

Control devices (MSS vapor combustion unit, portable flare, scrubbers, and/or carbon canisters) are used at the terminal to control emissions from storage tank roof landings and cleaning activities, as well as frac tank and vacuum truck loading and temporary on-site storage.
