1.0 Executive Summary

SI Group, Inc. (SI Group) operates a chemical manufacturing facility in Freeport, Brazoria County, Texas. The Freeport Facility operates under Title V Federal Site Operating Permit (SOP) O1431.

SI Group is submitting this significant revision to update and revise SOP O1431. On August 12, 2024, New Source Review (NSR) Permit 2341 was issued and included construction authorization for emission sources that are included on the SOP Compliance Schedule. The construction of these sources is complete, therefore the Compliance Schedule(s) should be removed from the permit. SI Group has recently performed an audit (investigation number 1988229) under the State of Texas Environmental, Health, and Safety Audit Privilege Act (TAPA). This application provides regulatory applicability updates for F-401, as disclosed under the TAPA.

The following changes are included:

- Updated regulatory applicability related to Tank F-401 (Title 40 Code of Federal Regulations [40 CFR] Part 60 Subpart Kb and 30 TAC Chapter 115),
- Remove emission units that are no longer operating (Flare X-601 and Flare X-401),
- Updated the OP-PBRSUP Form,
- Updated OP-ACPS

Section 2 includes all the required forms.

Public Involvement Plan Form for Permit and Registration Applications

The Public Involvement Plan is intended to provide applicants and the agency with information about how public outreach will be accomplished for certain types of applications in certain geographical areas of the state. It is intended to apply to new activities; major changes at existing plants, facilities, and processes; and to activities which are likely to have significant interest from the public. This preliminary screening is designed to identify applications that will benefit from an initial assessment of the need for enhanced public outreach.

All applicable sections of this form should be completed and submitted with the permit or registration application. For instructions on how to complete this form, see TCEQ-20960-inst.

Section 1. Preliminary Screening

- ☐ New Permit or Registration Application
☒ New Activity - modification, registration, amendment, facility, etc. (see instructions)

If neither of the above boxes are checked, a Public Involvement Plan is not necessary. Completion of the remaining sections not required.

Section 2. Secondary Screening

- ☒ Requires public notice,
☐ Considered to have significant public interest, **and**

Tank F-401 has been tied to Flare X-602, and emissions from F-401 have been authorized under the amendment for NSR 2341 issued on August 12, 2024. Similarly, Distillation Column E-833 has been tied to Flare X-794 and associated emissions have been authorized under the NSR amendment. The TAPA audit (investigation number 1817394) included a finding that pressure vessels (F-411, F-412, F-532 through F-634, F-737 and F-738) routinely depressure to the flare; during the preparation of the NSR 2341 amendment it was confirmed that these pressure tanks do not vent and therefore have no emissions. No corrective action was required; Permit O1431 correctly represents these tanks.

TCEQ Customer Reference No. (CN) 603119280
TCEQ Regulated Entity No. (RN) 100218999
TCEQ Account No. BL-0048-R

Dear Sir or Madam,

The SI Group, Inc. (SI Group) chemical manufacturing complex located at 702 FM 523 in Freeport, Brazoria County, Texas is submitting the enclosed application for a significant revision of Title V Federal Site Operating Permit (SOP) No. O1431.

SI Group is submitting this significant revision to update and revise SOP O1431. On August 12, 2024, New Source Review (NSR) Permit 2341 was issued and included construction authorization for emission sources that are included on the SOP Compliance Schedule. The construction of these sources is complete, therefore the Compliance Schedule(s) should be removed from the permit. SI Group has recently performed an audit (investigation number 1988229) under the State of Texas Environmental, Health, and Safety Audit Privilege Act (TAPA). This application provides regulatory applicability updates for F-401, as disclosed under the TAPA. Per the requirements of Title 30 of the Texas Administrative Code (30 TAC) §122.122, SI Group is submitting the enclosed significant revision to SOP No. O1431.

The Public Involvement Form is included in the submittal. As indicated in the Secondary Screening step, a Public Involvement Plan is not required.

A copy of this notification has been forwarded to the Texas Commission on Environmental Quality (TCEQ) Region 12 office in Houston, Texas, the Environmental Protection Agency (EPA) Region 6 office in Dallas, Texas, and TCEQ Region 12 office.

If you have any questions or require further information, please contact me at (281)664-2801 or lpullin@spiritenv.com.

Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) significant revision application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.341111,28.975555&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.
