Good afternoon, Jon:

Two issues. Please see attached.

1. The RO cannot be the DAR at the same time and vice versa. So, you need to **submit Form OP-DEL with sections I and IV filled out requesting Mr. Ernesto Reyes be removed as the DAR.** Here is the link for the form and instructions: [Responsible Official Forms - Texas Commission on Environmental Quality - www.tceq.texas.gov](#)
2. In your email dated 06/25/2026, you provided updated deviation limits as per my request
 - a. Unit IDs EBS, LSTBS, & LWS – The citation in the deviation limit is incorrect. Instead of 30 TAC 111.151(a), you provided 30 TAC 11.151(a). It was a typo. But wanted to bring it to your attention and confirm the same.
 - b. The second sentence which was very generic, carried over from the effective permit should have removed. Just wanted to let you know and you to confirm that.
 - c. I have not yet received the OP-CRO1 with the wet signature.

A prompt response will be very much appreciated.

Sincerely,

Tusar Swami, P.E.

Good afternoon, Jon:

Please note that our guidance states that if you are going to email a copy of Form OP-CRO1 to the reviewer it must be followed up by the wet ink signature original either mailed in or submitted through STEERS. This information can be found here: [Where to Submit FOP Applications and Permit-Related Documents](#). Please pay special attention to the following:

- Application updates can be submitted through STEERS, mailed, or emailed to the permit reviewer.
- Any application updates submitted by the RO/DAR through STEERS are certified and do not require the submission of an original signature OP-CRO1.
- **Any application updates submitted through email or physical mail require certification using an original signature OP-CRO1. The OP-CRO1 can be mailed or attached in STEERS.**

So please submit a hard copy mailed with the wet signature. My Team Leader, Elizabeth Moorhead, has forwarded your information to our Section Manager, Rhyan Stone. He is out of the office until Monday.

Thanks for the note, Tusar. I understand your request for us to submit the CRO1 form via STEERS, I'll let you know that (1) every permit reviewer for the last several Title V projects we've worked on have accepted the SCRO1 form via email; and (2) as we mentioned on the phone last week, STEERS does not recognize the draft permit number and, so, will not allow us to submit the form for an existing permitting project. I'm happy to discuss this further with your section leader on a phone call, but a precedent appears to have been set by TCEQ to accept the OP-CRO1 form through email.

The PNAP is under management review. Please see attached STEERS guidance. It will help to trouble shoot. Typically, a soft copy of the OP-CRO1 is followed by a hard copy mailed with a wet signature. I will recommend submitting the OP-CRO1 through STEERS. You may call subject matter expert/Team Leader John Walker @ 512.239.1277. By submitting through STEERS documents are auto certified.

Those two pbrs are not associated with any Unit ID listed on a UA form, so we've given them short, descriptive IDs for maintenance and portable emergency generators in Tables B and D. Attached for your review.

Please see attached recreated from database. No OP-SUM was submitted with the application. Earlier this year there is stand alone OP-SUM/OP-SUMR is retired. They are now associated with the OP-UAs. Please note that the PBRs 106.263/11/01/2001 and 106.511/09/04/2000 does not have to be associated with any Unit ID in OP-SUM. You can give a generic short ID/Description to indicate what is covered. We may need to talk on Monday to close this.

Subject: RE: Working Draft Permit -- FOP O3660/Project 39222, TPCO America Corporation/TEDA TPCO America - Respond by 6/15/2026

Good afternoon, Jon:

See attached draft. I am working on the finalize the Public Notice Authorization Package (PNAP) and found issues.

- (1) For the following Unit IDs (having CAM) – Need specific deviation limits (see pages 24-28).
 - a. EAF and PROSCRAP – 40 CFR Part 63, Subpart YYYYY – CAM-FF-001
 - b. EBS - 30 TAC Chapter 111, Nonagricultural Processes – CAM-FF-001
 - c. LSTBS, LWS - 30 TAC Chapter 111, Nonagricultural Processes – CAM-FF-002.As per an old note in the effective permit the deviation limits were not specified because the control device has not begun operation yet.
- (2) The OP-PBRSUP (dated 12/10/2025) have following issues which needs to be corrected.
 - a. Table A – Since there is no PBR Registration numbers it can be marked N/A and all the units there in can move to Table B.
 - b. Table D – In the Monitoring Requirement column – ‘None’ is not acceptable. The responses need to be specific enough to indicate what is being monitored and/or recorded in order to satisfy periodic monitoring for compliance with the PBR and 106.4 general limits. Please add more detail.
 - c. Please submit all the 4 Tables even if some of them are N/A. Change the date at the top in all pages.

Sincerely,

Tusar Swami, P.E.

Jon:

Good afternoon. I have conducted a technical review of renewal application for TPCO America Corporation/TEDA TPCO America. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **March 13, 2026**.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_facsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all

submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit. A prompt acknowledgement to this email will be very much appreciated. Thank you for your cooperation.

Sincerely,

Tusar Swami, P.E.

Subject: Technical Review -- FOP O3660/Project 39222, TPCO America Corporation/TEDA TPCO America

Jon:

Good afternoon. I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3660 for TPCO America Corporation/TEDA TPCO America. This application has been assigned Project No. 39222. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking. Just had a quick review. You need to the following.

1. **Form OP-PBRSUP:** please provide this form, as it was not submitted as part of the original application. This form is required since this project is a renewal and PBRs are used. The purpose of Form OP-PBRSUP is to document what is being done to sufficiently demonstrate compliance with the PBR requirements so that it is easily readable to both the EPA and the public. Please submit the OP-PBRSUP in full, including tables A, B, C, and D with matching dates on each table. (No table should be blank, but "none" or "NA" can be used on a table as appropriate, this allows the public to know a table was not inadvertently left out and that the site is not using any insignificant PBRs). I have attached the OP-PBRSUP instructions

[TCEQ Form 20875 - OP-PBRSUP - Instructions Permit By Rule Supplemental Table](#)

2. Please update the OP-UA6 as many attribute values are changed. Please follow the instructions closely.

[All Unit Attribute Forms - Texas Commission on Environmental Quality - www.tceq.texas.gov](#)

Please submit these by 12/10/2025.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_f

[actsheet.pdf](#). This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Dear Senator Hinojosa:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.266944,27.918611&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.
