## **1.0 INTRODUCTION**

The Bland Lake Saltwater Disposal Well Facility (Bland Lake SWD) is an existing site located in San Augustine County, TX . The facility is owned and operated by Brahma Service LLC (Brahma) located under TCEQ PBR Registration # 174345. The facility co-exists with the Bland Lake Amine Plant (RN 110905486), operated by Kudu Midstream LLC (Kudu) which is currently permitted as a minor source under a Standard Permit for Oil and Gas Facilities with Permit #159343.

The Bland Lake SWD and Amine Plant have been aggregated for Title V Purposes based on legal review obtained from TCEQ with regards to Applicability Determination for aggregation of sites. Based on the aggregated site-wide total emissions, the Bland Lake Amine Plant & SWD will be a major source of criteria pollutants, specifically for Carbon Monoxide (CO). A Title V SOP application was submitted on July 11, 2024, by Aethon United BR LP (AUBR) which is currently under review (Project #36857) with SOP Permit #O4658.

After a brief discussion with Mr. Rhyen S. Stone (TCEQ Operating Permit Manager) and the options outlined in the email dated October 9, 2025, it was determined that a separate Title V SOP Application would be submitted to represent the SWD area of the site. For operational and ownership liabilities, while the sites would be under different Customer Numbers that is Brahma Services LLC for the SWD area and Kudu Midstream LLC for the amine plant, the two sites would be consolidated under one Regulated Entity that is RN110905486. The Title V SOP permits when issued will represent separate areas and be issued to both Kudu for the Amine Plant and Brahma for the SWD area but both permits would be for the same site for Title V purposes.

Brahma is submitting the full version of the Initial Title V Site Operating Permit application for the Bland Lake SWD well facility via STEERS prior to the extended deadline of November 14, 2025.

### **1.1 Facility & Process Description**

The Bland Lake SWD is located near San Augustine, San Augustine County, Texas. The Bland Lake SWD is located within ¼ mile of the amine plant. An area map is included in Figure 1. The process description for both the amine plant and the SWD facility are provided below.

#### **Bland Lake SWD Process Description**

The Bland Lake SWD facility equipment consists of one (1) 400-bbl condensate storage tank, one (1) 400-bbl water offload tank, two (2) 1000-bbl gun-barrel tanks, four (4) 750-bbl produced water storage tanks, four (4) 650 hp Generator Engines, Oil Truck Loading, one (1) Flare and piping and valves. Produced water and condensate from surrounding facilities are transferred via pipeline to the Bland Lake SWD. The water received at Bland Lake SWD is produced from lean natural gas wells in a shale formation. The gas produced is very lean

and the associated liquids are produced water with only a trace of liquid hydrocarbons. The co-mingled condensate and produced water from the pipeline are sent to the gun-barrel tanks for separation. From the gun-barrel tanks, condensates are sent to the condensate tank and produced water to the water storage tanks. The produced water is injected into the SWD well. Condensate is unloaded from the storage tank into tanker trucks on a periodic basis for off-site transfer.

## **1.2 Emission Sources & Estimation Methodologies**

Emission estimates from the Bland Lake SWD are conservatively based on the highest anticipated production rate. Emissions have been estimated using manufacture data, API/EPA/TCEQ emission factors and EPA/TCEQ approved software. Emission calculations were generated using the current version of the TCEQ Oil and Gas Emissions Spreadsheet. A summary of emission sources for both the sites are provided in Appendix A.

## **1.3 Regulatory Applicability**

The Bland Lake SWD is subject to state and federal regulations. Brahma shall comply with all applicable control monitoring, reporting and recordkeeping requirements. as stated in this application.

## **2.0 APPLICATION CONTENTS**

This submittal contains the required forms and supporting documentation for the Bland Lake SWD to obtain a Title V SOP. A compilation of all the applicable TCEQ forms is provided in the following Appendices. Brahma is providing all the necessary forms required for the initial SOP application in accordance with 40 CFR Part 70 and 30 TAC Chapter 122. The forms include OP-1, OP-CRO1, OP-ACPS, OP-REQ1, OP-REQ2, OP-REQ3, OP-PBRSUP, Core Data Form, OP-SUM, and OP-UA forms.

Brahma is requesting the Bland Lake SWD be issued a separate Title V SOP Permit to cover the SWD area.
