Stephanie,

Thank you for your phone call clarifying the line item for PRO-BRGPNT on the original OP-2 submittal. Attached is a corrected version of the draft permit for your records. To confirm, the PBRs have been removed for process ID PRO-BRGPNT, which is authorized by 22106 only. Since this change was part of the original application submission, no additional forms or certification is needed at this time.

Good morning, Stephanie.

A question came up during our internal review process that needs clarification. Is PRO-BRGPNT still authorized by PBRs?

Our database and the draft permit list the following authorizations:

PRO-BRGPNT	BARGE PAINTING	22106, 106.227/09/04/2000, 106.265/09/04/2000, 106.433/09/04/2000 [91856], 106.452/09/04/2000 [91856]
------------	----------------	---

If these PBRs are correct, then please submit an updated OP-PBRSUP that includes the process ID PRO-BRGPNT and the relevant PBRs on Tables A, B, and D.

You may send the form to me for review before certifying, but please plan to certify the updated form by May 11, 2026.

Emily,

Good afternoon! Regarding the Title V working draft permit (WDP) for Texas Barge & Boat, we have one (1) comment:

1. On the NSR Authorization references by Emissions Unit: Revise the NSR authorization for TK-14 to "106.472/09/04/2000" to be consistent with the representation in the permit renewal application.

Thank you.

Emily,

Good afternoon! In response to your email inquiry dated March 26, 2026 and follow-up correspondence, below are responses (in **bold**, [blue](#)).

The following items surfaced which need additional information/clarification:

1. Periodic monitoring is required for the following units. Please submit an updated OP-REQ1 page 83/section K and form OP-MON with PM selection for:
 - a. RCV-TK-NON: Index numbers R5112-1 & R5112-2 for 30 TAC 115 Storage of VOCs
 - b. RCV-TK-HAL: Index number R5112-2 for 30 TAC 115 Storage of VOCs

Per phone and email correspondence, it was confirmed that the responses on the Form OP-UA3 were inadvertent oversights and updates to the OP-REQ1 and a periodic monitoring summary are not required. Attached is the revised Form OP-UA3, updated to reflect responses consistent with the effective permit and the respective method of control.

2. OP-PBR SUP

- a. Table A associates NSR Registration Number 91856 with PBRs 106.452 and 106.433, however 91856 only authorizes 106.452. Please move 106.433 to Table B or provide additional information.

Per phone and email correspondence, it was confirmed that both PBRs 106.452 and 106.433 are authorized under PBR Registration 91856. No further action is necessary.

Good afternoon! Regarding the Title V working draft permit (WDP) for Texas Barge & Boat, we have one (1) comment:

1. On the NSR Authorization references by Emissions Unit: Revise the NSR authorization for TK-14 to “106.472/09/04/2000” to be consistent with the representation in the permit renewal application.

Thank you.

Good afternoon! In response to your email inquiry dated March 26, 2026 and follow-up correspondence, below are responses (in **bold, blue**).

 - b. RCV-TK-HAL: Index number R5112-2 for 30 TAC 115 Storage of VOCs

Good afternoon.

I have conducted a technical review of the renewal application for Texas Barge & Boat Inc/Freeport Facility. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

- Please note that Special Term and Condition 9 will be updated pending receipt of an updated OP-OBRSUP form.
- For PRO-BRGPNT, please confirm that the list of PCAs on page 22 in the NSR References by Emission Unit Table are correct.

Please review and submit to me any comments you have on the working draft permit by **April 27, 2026**.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Hi Stephanie,

Can you please address the following issues with form OP-PBR SUP Table D:

1. 106.263 for ID MSS should be included on Table D.
2. Rather than list registration numbers on Table D for IDs BLAST and PAINT, please list the applicable PBRs and version dates with appropriate monitoring requirements.
3. Please provide monitoring requirements which meet the guidelines as described in the [OP-PBR SUP form instructions](#) on page 4.
 - a. As an example: PBR 106.472 "Maintain record of contents."
 - i. Monitoring requirements should address all requirements of the individual PBR. PBR 106.472 specifies that no visible emissions result and the chemicals loaded, unloaded, or stored are limited to the list numbered (1)-(9).
 - ii. Monitoring requirement must include frequency of monitoring. Per [Chapter 106.8](#) recordkeeping minimum frequency is 12 months, if another minimum monitoring frequency based on the periodic monitoring guidance document does not apply.
 - iii. See other requirements in form instructions as applicable; note that all PBRs require compliance with the general terms of [Chapter 106.4](#) in addition to the individual PBR terms.
4. To submit an updated OP-PBR SUP with these corrections, please submit all 4 tables with the new date matching on each page.

Please provide your response and any necessary updated forms at your earliest opportunity, but please no later than **April 10, 2026**.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application updates is required to be submitted. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Emily,

Good afternoon! In response to your email inquiry dated March 26, 2026 and follow-up correspondence, below are responses (in **bold, blue**).

The following items surfaced which need additional information/clarification:

1. Periodic monitoring is required for the following units. Please submit an updated OP-REQ1 page 83/section K and form OP-MON with PM selection for:

a. RCV-TK-NON: Index numbers R5112-1 & R5112-2 for 30 TAC 115 Storage of VOCs

b. RCV-TK-HAL: Index number R5112-2 for 30 TAC 115 Storage of VOCs

Per phone and email correspondence, it was confirmed that the responses on the Form OP-UA3 were inadvertent oversights and updates to the OP-REQ1 and a periodic monitoring summary are not required. Attached is the revised Form OP-UA3, updated to reflect responses consistent with the effective permit and the respective method of control.

2. OP-PBRSUP

a. Table A associates NSR Registration Number 91856 with PBRs 106.452 and 106.433, however 91856 only authorizes 106.452. Please move 106.433 to Table B or provide additional information.

Per phone and email correspondence, it was confirmed that both PBRs 106.452 and 106.433 are authorized under PBR Registration 91856. No further action is necessary.

Emily,

Thank you for the prompt response and clarification. Considering this information, we propose submitting a revised Form OP-UA3 to reflect responses consistent with the effective permit and the respective method of control. The responses listed on the Form OP-UA3 for this current renewal application were inadvertent oversights.

Please let us know if submitting an updated Form OP-UA3 will satisfy your initial inquiry regarding the receiver tanks.

Kindly,

Subject: Follow-up to period monitoring question.

Hi Stephanie,

I am following up on your call this morning to provide more information about why PM is now required for units RCV-TK-HAL and RCV-TK-NON when it is not included in the effective permit.

For the effective permit:

In looking at the effective permit, the previous 3 index numbers for RCV-TK-HAL with SOP Index Number 115B-3 indicate that the tank was using a carbon adsorption system (CAS) meeting 115.115(a)(3)(A) which requires continuous monitoring of the exhaust gas VOC concentration from the CAS which satisfies periodic monitoring. The other 2 Index Numbers 115B-1 and 115B-2 were for exemptions which do not require periodic monitoring.

The permit had 6 index numbers for RCV-TK-NON. SOP Index Numbers 115B-1, 115B-2, 115B-4, and 115B-5 were for exemptions that did not need monitoring. Index Number 115B-3 and 115B-6 were for the use of a flare which includes 60.18 for the continuous monitoring of the flare pilot flame which does not require periodic monitoring.

For the renewal application and submitted OP-UA3 form:

Since the unit attributes changed to indicate that the storage tank is using a submerged fill pipe for VOC control for vapor pressures that exceed 1.5 psia, the rule does not have any monitoring to ensure that the fill pipe is submerged or for a visual inspection for the structural integrity of the fill pipe. This is why periodic monitoring is now required.

Please let me know if you have any further questions.

Good morning, Mr. Higgins.

I am conducting the technical review for the submitted SOP renewal application for Texas Barge & Boat Inc/Freeport Facility (Project 39502, Permit O1698). During the technical review, the following items surfaced which need additional information/clarification:

1. Periodic monitoring is required for the following units. Please submit an updated OP-REQ1 page 83/section K and form OP-MON with PM selection for:
 - a. RCV-TK-NON: Index numbers R5112-1 & R5112-2 for 30 TAC 115 Storage of VOCs
 - b. RCV-TK-HAL: Index number R5112-2 for 30 TAC 115 Storage of VOCs
2. OP-PBRSUP
 - a. Table A associates NSR Registration Number 91856 with PBRs 106.452 and 106.433, however 91856 only authorizes 106.452. Please move 106.433 to Table B or provide additional information.

Please provide your response and any necessary updated forms at your earliest opportunity, but please no later than **April 2, 2026**.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application updates is required to be submitted. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Application updates may now be submitted through Title V STEERS. Any application

updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Mr. Higgins:

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O1698 for Texas Barge and Boat, Inc., Freeport Facility. This application has been assigned Project No. 39502. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.383055,28.901666&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Dear Representative Vasut:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.383055,28.901666&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site.

This letter is being sent to you for information only and no action is required. If you need further information, please contact me at (512) 239-1250.

Sincerely,

A handwritten signature in black ink, appearing to read "Samuel Short", with a long horizontal line extending to the right.
