TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

THE HONORABLE KEVIN SPARKS
TEXAS SENATE

Re: Accepted Federal Operating Permit Initial Issuance Application

Regulated Entity Number: RN107218521
Customer Reference Number: CN605687474

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) initial issuance application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-101.930277,32.146666&level=13>.

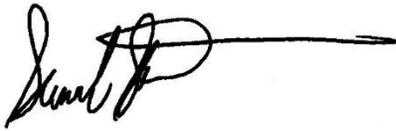

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Kevin Sparks

**RE: Title V Site Operating Permit (SOP) Initial Application
ETC North Permian Midstream LLC (CN605687474)
Goodrich Booster Station (RN107218521)
Stanton, Martin County, Texas**

Dear APIRT:

ETC North Permian Midstream LLC (ETC) owns and operates Goodrich Booster Station (The Station) in Stanton, Martin County, Texas. The Station is identified by Customer Reference Number (CN) 605687474 and registered under the TCEQ Regulated Entity Number (RN) 107218521. The Station is currently authorized under the TCEQ Air Quality Standard Permit registration number 119161.

In November 2025, the Station became a major source of nitrogen oxides (NO_x) emissions due to increased operational demands on ten (10) Caterpillar G3516 LE compressor engines (Facility Identification Numbers [FINs]: EN-101 through EN-110) and three (3) Waukesha L7042GSI compressor engines (FINs: EN-111 through EN-113). The resulting increase in NO_x emissions was approved by TCEQ on November 17, 2025, under project number 399884. Subsequently, ETC submitted an initial abbreviated Title V Site Operating Permit application to the TCEQ pursuant to §122.130 (b)(1). The TCEQ acknowledged the initial abbreviated SOP application on January 16, 2026, and requested ETC to submit a complete SOP application by February 16, 2026.

In accordance with TCEQ's request, GHD Services, Inc. (GHD) is submitting the enclosed complete initial SOP application for the Station on behalf of ETC. This initial SOP application submittal contains all the required forms, according to the TCEQ guidance for SOP applications.

If you have any questions regarding this submittal, please contact James VanAssche at (214) 840-5217 or james.vanassche@energytransfer.com.

1. Introduction

GHD Services, Inc. (GHD), on behalf of ETC North Permian Midstream LLC (ETC), is submitting the enclosed initial Title V Site Operating Permit (SOP) application for the Goodrich Booster Station (The Station) located in Stanton, Martin County, Texas. ETC operates under the Texas Commission on Environmental Quality (TCEQ) Customer Number (CN) 605687474. The Station has been assigned the TCEQ Regulated Entity Number (RN) 107218521. The Station is currently permitted under Standard Permit No. 119161.

2. Purpose of Application

The Station became a major source of nitrogen oxides (NO_x) emissions in November 2025 due to increased operational demands on ten (10) Caterpillar G3516 LE compressor engines (FINs: EN-101 through EN-110) and three (3) Waukesha L7042GSI compressor engines (FINs: EN-111 through EN-113). The TCEQ approved the resulting increase in NO_x emissions on November 17, 2025, under project number 399884. Pursuant to §122.130 (b)(1), ETC submitted an initial abbreviated Title V Site Operating Permit (SOP) application to the TCEQ. The TCEQ acknowledged the initial abbreviated SOP application on January 16, 2026, and requested ETC to submit a complete SOP application by February 16, 2026.

In accordance with the TCEQ's request, GHD is submitting the enclosed initial Title V SOP application for the Station on behalf of ETC. The initial SOP application submittal contains the following required TCEQ forms according to the TCEQ guidelines for initial SOP applications.

3. Process Description

The Station is located in the Martin County System. Incoming residue gas is compressed and sent to the sales pipeline for transmission. Natural gas from the Martin County Gas Plant enters the Goodrich Booster Station where the gas pressure is boosted by ten (10) Caterpillar G3516 LE natural gas fired compressors (FINs: EN-101 through EN-110) and three (3) Waukesha L7042GSI natural gas fired compressors (FINs: EN-111 through EN-113). The compressed gas is transported via the sales pipeline to customers and/or local distribution centers.

Other emissions at the Station are from two (2) wastewater storage tanks (FINs: TK-1301 and TK-1302), four (4) lube oil storage tanks (FINs: TK-1303, TK-1304, TK-1308, and TK-1310), and four (4) antifreeze storage tanks (FINs: TK-1305, TK-1306, TK-1307, and TK-1309). Additionally, fugitive emissions from equipment components such as piping fittings,

pumps, and compressor seals (FIN: FUG) and emissions from routine maintenance, start-up, and shut-down activities (FIN: MSS), authorized under 30 TAC §106.359, are present at the Station.

The Station's area map is included in **Attachment 1** as **Figure 1**, the plot plan depicting the Station's layout is included in **Attachment 2** as **Figure 2**, and the simplified process flow diagram depicting the operations described above is included in **Attachment 3** as **Figure 3**.
