Idowu,

I don't think I submitted any UA forms with the current permit revision. Is this issue from previous permit process?

Waste Heat Boiler is a heat recovery boiler which uses heat from tail gas after combustion. No emissions associated with that source itself. Combustion gas after heat recovery goes to air pollution controls and go to stack. Therefore it is appropriate to describe E-6BN as Waste Heat Boiler Stack.

We used to have standard permit that is rolled into existing NSR permit. I am attaching revised OP-REQ1 form.

Thanks

Good afternoon, Ms. Valluri,

Project 39587 has gone through QA/QC and the following deficiencies surfaced which need additional information/clarification:

- Unit ID E-6BN's Unit Description on Form OP-UA6 is Waste Heat Boiler, but the Unit Description on Form OP-UA15 is Waste Heat Boiler Stack. Kindly confirm which Description to use on both Forms.
- Form OP-REQ1 Questions XII. B. 1 and 2 were answered "YES", meaning the application area includes at least one "State Pollution Control Project" Air Quality Standard Permit NSR authorization. I cannot find any active Standard Permit Registration for RN100209659; Standard Permit 164021 has been voided. Kindly confirm if the response to Questions XII. B. 1 and 2 on OP-REQ1 are "No" and update OP-REQ1 for your records or provide a NSR Standard Permit.

Please provide your response at your earliest opportunity, but no later than **April 29, 2026**.

Thank you for your cooperation.

Sincerely,

Idowu Ologeh

Subject: Working Draft Permit -- FOP O1661/Project 39587, Orion Engineered Carbons LLC/ Borger Carbon Black Plant

Good afternoon, Ms. Valluri,

I have conducted a technical review of the minor revision application for Orion Engineered Carbons LLC, Borger Carbon Black Plant. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **March 25, 2026**.

Additionally, please provide the following requested information:

- PBR numbers 106.123 and 106.244 are listed in the permit but are not listed on page 89 of Form OP-REQ1 that was submitted with the application. Kindly confirm if you want to remove them.
- Form OP-PBRSUP is required to be submitted if any changes are occurring to PBRs documented in the Title V permit. In this project, many PBRs are being added to the site-wide preconstruction authorization list due to being provided on Form OP-REQ1 Page 89 so Form OP-PBRSUP is required to be submitted.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_facsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Idowu Ologeh

Good morning, Ms. Valluri,

I have been assigned to the Federal Operating Permit (FOP) revision application of Permit No. O1661 for Orion Engineered Carbons LLC, Borger Carbon Black Plant. This application has been assigned Project No. 39587. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3)

VOC	- volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
NO _x	- total oxides of nitrogen
SO ₂	- sulfur dioxide
PM -	total particulate matter, suspended in the atmosphere, including PM ₁₀ and PM _{2.5} , as represented
PM ₁₀	- total particulate matter equal to or less than 10 microns in diameter, including PM _{2.5} , as represented
PM _{2.5}	- particulate matter equal to or less than 2.5 microns in diameter
CO -	carbon monoxide
H ₂ S-	hydrogen sulfide
COS	- carbonyl sulfide
CS ₂ -	carbon disulfide
HCN	- hydrogen cyanide
BZ -	benzene
Al -	aluminum
Cl -	chlorine
MSS	- planned maintenance, startup and shutdown
EPN	- emission point number
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) The total combined annual emissions of all sources combusting tail gas shall not exceed these allowable emission rates. The short-term emission rates for each source are listed separately. Short term and annual emission rates of natural gas combustion during startup and/or shutdown are authorized in the tail gas combustion cap in NSR Permit No. 8780.
- (6) VOC includes (but is not limited to) acetylene (C₂H₂), COS, CS₂, HCN and BZ.
- (7) Startup and shutdown emissions of products of natural gas combustion are captured in the emission rates for this source / EPN.
- (8) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (9) MSS emissions from the waste heat boiler startup do not occur simultaneously with production emissions and are captured by EPN E-6B.
- (10) PM/PM₁₀/PM_{2.5} emissions from bagfilter changeouts do not occur simultaneously with production emissions from the corresponding unit and are captured by the following corresponding unit EPNs: E-10FL, E-20FL, and E-40FL.
- (11) PM/PM₁₀/PM_{2.5} emissions from re-bricking are captured by EPNs E-10FL, E-20FL, and E-40FL. Production rate will be reduced to stay within the PM/PM₁₀/PM_{2.5} emission limits.
- (12) Flare EPNs E-10FL, E-20FL, and E-40FL shall not be used to combust materials once Flare EPN CFL is operational. Once EPN CFL is operational Flares stacks E-10FL, E-20FL, and E-40FL shall no longer be used to combust materials and only shall be used as vent stacks for Reactor Heat Load operations.

- Part 1 of this form must be submitted with all initial FOP applications and renewal applications.
- The Responsible Official must use Form OP-CRO1 (Certification by Responsible Official) to certify information contained in this form in accordance with 30 TAC § 122.132(d)(8).

Part 1

A. Compliance Plan — Future Activity Committal Statement	
The <i>Responsible Official</i> commits, utilizing reasonable effort, to the following: As the responsible official it is my intent that all emission units shall continue to be in compliance with all applicable requirements they are currently in compliance with, and all emission units shall be in compliance by the compliance dates with any applicable requirements that become effective during the permit term.	
B. Compliance Certification - Statement for Units in Compliance* (Indicate response by entering an "X" in the appropriate column)	
1. With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	☒ YES ☐ NO
2. Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	☐ YES ☒ NO
3. If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122. Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.
