Good afternoon,

After reviewing the submitted OP-REQ1, an updated OP-REQ1, pg.86 was found to be needed. Since Question XII.B.1 is answered 'No', Question XII.B.3, should be answered 'No' as well because the site is not authorized by a standard permit. Please resubmit OP-REQ1, pg.86 only with Question XII.B.3 also answered 'No' to Title V STEERS by **COB June 19, 2026**.

Once this is submitted and received, we can proceed with scheduling the RVN-5 for mailout.

Thanks,

Gaby

Good afternoon,

The project has completed the next level of review by the technical specialist. Upon the technical specialist's review, it was noted that Standard Permit No. 167460 was voided on 09/05/2025. This should be removed from the permit. Attached is the updated WDP with the following updates completed:

1. Standard Permit No. 167460 was removed from the New Source Review Authorization References table and from Unit IDs TANK 83, TANK 84, and TANK 85 in the New Source Review Authorization References by Emissions Unit table.
2. Original site wide term and condition 15 for Air Quality Standard Permits was removed.
3. Page numbers were updated.

Please provide a response to the WDP updates and submit a full OP-REQ1 form (with the response to Question XII.B.1.(pg.86) answered 'No' and the Standard Permit No. 167460 removed from pg.89) to Title V STEERs by **COB June 5, 2026**.

Once the response to the updated WDP and certified OP-REQ1 form are received, the project will proceed to final review so the RVN-5 can be sent out.

Thank you,

Gaby

Subject: Working Draft Permit -- FOP O1254/Project 39635, Sasol Chemicals USA LLC/Greens Bayou Plant

Good morning,

I have conducted a technical review of minor revision application for Sasol Chemicals USA LLC, Greens Bayou Plant. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Per the OP-2 form, the issuance date, 09/05/2025, for NSR permit no. 20686 was incorporated and added to the WDP.

Please review the WDP and submit to me any comments you have on the working draft permit by **COB June 1, 2026**.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through **Title V STEERS**. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Gaby

Good morning,

I have been assigned to the Federal Operating Permit (FOP) minor revision application of Permit No. O1254 for Sasol Chemicals USA LLC, Greens Bayou Plant. This application has been assigned Project No. 39635. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.
