Lance,

Clint Cowan is currently listed as the RO for the Sunray Compressor Station – Permit 2519.

An OP-CRO2 will need to be submitted in STEERS (New Appointment Action Type) to appoint David Minielly as RO for permit 2519.

I will not be able to process the request as an Administrative Information Change, since Mr. Minielly is not the current RO for that permit.

Thanks,

**Sheila Monroe**

January 26, 2026

THE HONORABLE KEVIN SPARKS  
TEXAS SENATE  
PO BOX 12068

Re: Accepted Federal Operating Permit Renewal Application

Hansford Compressor Station  
Gruver, Hansford County  
Regulated Entity Number: RN102549359  
Customer Reference Number: CN600131817

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-101.220833,36.476111&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Renewal Application for Title V Operating Permit No. O-2504  
TCEQ Account: HD0031P  
Customer Number: CN600131817  
Regulated Entity Number: RN102549359

Dear Reader:

Panhandle Eastern Pipe Line Company LP (Panhandle), owns and operates Hansford Compressor Station (Facility). The Facility is a natural gas transmission compressor station responsible for the compression of gas into a pipeline. The Facility operates under Texas Commission on Environmental Quality (TCEQ) Title V Operating Permit Number O-2504 (Permit) which was most recently issued on August 11, 2021. The Permit requires a renewal application be submitted at least 6 months prior to expiration of the Permit. To meet this requirement Panhandle is submitting the attached Title V Site Operating Permit (SOP) renewal and revision application forms.

### **CAM and PM Analysis**

A review of Continuous Air Monitoring (CAM) requirements is required as part of the renewal application. No units at the Hansford Compressor Station are equipped with an emissions control device. Therefore, CAM does not apply to any source at this Facility.

The TCEQ has added periodic monitoring (PM) to the requirements of the SOP through the tabulated index codes, based on the claimed regulatory applicability. No changes to the existing PM are being requested in this renewal application.

- OP-1
- OP-2
