Attachments: [Spanish PN Draft_20457.docx](#)

Ok, I think I have it right this time. The [Tech Name] threw me off but I'm guessing it means Technology Name? I switched it out with the following from the English draft and completed the two other edits.

English draft - Building 31 ozonators within the semiconductor equipment assembly and testing facility

Spanish draft - ozonizadores del Edificio 31 dentro de la instalación de ensamblaje y prueba de equipos semiconductores

Thank you so much for your help!

Importance: High

Hi Alex,

I have reviewed the Spanish PN draft.

Please update the facility description and address (highlighted). It should match your Spanish Example B.

Additionally, add the site location link (from the English draft) right after the highlighted sentence beginning with "Para...".

Everything else looks good.

Thanks,

Sheila Monroe

Hello Sheila,

I have entered all the appropriate information into the Spanish PN draft and included Example B in page 3. I have also reviewed the English version and had no edits. Both are attached. As this is my first time submitting a renewal for our Austin branch would you please let me know if you have any edits on your end? Any guidance is appreciated.

Thank you,
Alex Crooks

Importance: High

Good afternoon,

We have attached a draft portion of the Notice of Receipt of Application and Intent to Obtain a Permit (NORI) and the Alternative Language Spanish template. The NORI approval and Alternative Language Spanish template must be completed and returned **within 2 business days** before we can issue the NORI and post to the agency's website. This is in accordance with [Title VI Compliance](#). For the Spanish template, all italic notes should be replaced with the corresponding Spanish translations based on the English notice and all brackets should be removed. You may utilize the [Spanish Tools for Air Permitting Public Notices](#) to help with air contaminant translation. You are responsible for ensuring that the publication in the alternative language is complete and accurate for the required languages. Complete instructions on publishing the bilingual notice and posting

signs will be available in the public notice package once issued.

The NORI is a legally approved document and only the items listed below are subject to approval/correction. Please review carefully and provide corrections including a revised application as needed:

- Street address or driving directions to the facility
- Hyperlink for the map to facility - please confirm the map shows the general vicinity location of the facility
- Contaminant's list
- Public viewing place (must be in the same county as the facility and may be required to have internet access)
- For renewal applications, check all previous permitting actions since initial issuance or last renewal to make sure they are listed in Example A
 - Incorporation / consolidation of registrations for PBRs (Permit by Rule) (Permits by Rule) and Standard Permits being included with this application
 - Emission factor changes
 - Qualified facility changes
- Public Notice Technical Contact information
- Big or small business status (Small businesses will not receive Example B)

Please do not publish until you receive an email containing an administratively complete letter and public notice package.

Your prompt assistance is appreciated.

Thanks,

Sheila Monroe
