TEXAS SENATE

Re: Accepted Federal Operating Permit Renewal Application

Regulated Entity Number: RN100229905

Dear Senator Middleton:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.087777,29.716944&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

## 1. PROJECT INFORMATION

Gemini HDPE LLC (Gemini) owns and operates a high-density polyethylene production plant in La Porte, Harris County, Texas. Facilities at the site are operated under Site Operating Permit (SOP) O3758. The purpose of this application is to renew the SOP.

As part of this renewal application, the following revisions are requested:

- ◆ Update the preconstruction authorizations for EPN PE-FUG to include PBR Registration No. 175907 and remove PBR Registration Nos. 156176, 160744 and 164776, as the emissions previously authorized under these three PBRs were consolidated into Permit No. 106824 in 2023.
- ◆ Remove the requirements of MACT Subparts A and VVVVV since the flare PE-FLARE2 and the chemical manufacturing process unit (CMPU) under discussion are not subject to these rules.
- ◆ Update the permit shield to include the inapplicability of MACT VVVVV to the CMPU and MACT A to the flare PE-FLARE2.
