Hi Sara,

Please find attached the working draft permit (WDP) for Aker Plant with Midcoast's comments to be incorporated into the final draft permit.

Since the comments are only for page numbers and not substantive changes, neither a signed OP-CRO1 or submittal of the comments on STEERS should be required to certify the requested changes. Please confirm this and that this e-mail with the attached WDP with Midcoast's comments is sufficient to move the project forward, as well as what/when we should expect the next step in the process.

Please let me know if you have any questions.

Thanks.

[EXTERNAL]
Good morning, Jeffrey,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3854 for Midcoast G & P (East Texas) L.P., Aker Plant. This application has been assigned Project No. 40340. Please address all correspondence pertaining to this

permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.

b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.

c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.

d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

I have conducted a technical review of this application, and I have attached an electronic copy of the Working Draft Permit (WDP) for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have regarding it by June 29, 2026. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. Note that any application updates necessary to make requested changes must accompany the WDP comments.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process, application updates, WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified submittals, including application updates supporting the WDP comments is required to be submitted with the WDP response. After final review of the WDP, additional changes, supported by application updates, may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that were not

previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at Where to Submit FOP Applications and Permit-Related Documents.

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Sara Norman

Dear Senator Schwertner:

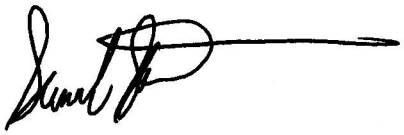

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.221111,31.909722&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

To Whom It May Concern:

Midcoast G & P (East Texas) L.P. (Midcoast) is submitting the enclosed Title V Site Operating Permit (SOP) renewal application to the Texas Commission on Environmental Quality (TCEQ) for Midcoast's Aker Plant (Plant) located near Streetman, Texas in Freestone County. The Plant is currently authorized under Standard Permit No. 81650 and one Permit by Rule (PBR) claim. No changes in equipment or operations have occurred at the Plant since the SOP was last renewed on December 6, 2021. However, the application includes complete unit attribute (UA) forms, as applicable, for the Plant's existing equipment (not including off-permit sources) and the OP-REQ1 form, because the forms have been revised since the last SOP renewal.

The application includes the following attachments:

- Attachment 1 – Administrative Forms
- Attachment 2 – Unit Attribute Forms
- Attachment 3 – Applicability Determination Form

Midcoast would like to thank you in advance for the review and approval of this SOP renewal application. If you have any questions or comments regarding this letter and enclosure, please contact me at (903) 323-4350 or via e-mail at jeffrey.white@momentummidstream.com.
