TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

September 22, 2026

THE HONORABLE TAN PARKER
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Significant Revision Application
Project Number: 40958
Permit Number: O910
EnLink Midstream Services, LLC
Bridgeport Gas Plant
Bridgeport, Wise County
Regulated Entity Number: RN100223619
Customer Reference Number: CN604592295

Dear Senator Parker:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) significant revision application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.920833,33.196388&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Tan Parker

Heater EH-22 was authorized in NSR 16926 based on a maximum firing rate of 62 MMBtu/hr with a CO emission factor of 84 lb/MMCF (equivalent to approximately 0.08 lb/MMBtu). A December 21, 2016 stack test conducted pursuant to 30 TAC §117.435(a)(1) measured CO emissions of 0.23 lb/MMBtu. 4. Corrective Action Plan Description		
Conduct a new stack test pursuant to 30 TAC §117.435(a)(1) to establish representative emission factors for Heater EH-22. If necessary, amend NSR Permit No. 16926 to correct the representations for Heater EH-22.

16926	Permit recordkeeping required under Special Condition 18	Electronic records of site equipment
3. Non-compliance Situation Description		
A review of available records could not confirm whether compressors C-E-11 and C-E-12A comply with the requirement to route vapors from the wet seal fluid degassing system through a closed vent system to a control device or back to the process.		
4. Corrective Action Plan Description		
Compile additional design drawings and conduct additional field reviews to determine whether compressors C-E-11 and C-E-12A comply with the requirement to route vapors from the wet seal fluid degassing system through a closed vent system to a control device or back to the process. If the evaluation determines the compressors do not comply with this requirement, obtain any necessary air permit authorizations and implement the design modifications necessary to achieve compliance.		
5. List of Activities/Milestones to Implement the Corrective Action Plan		
Complete a review of available design drawings, operating information, and field conditions to determine whether compressors C-E-11 and C-E-12A comply with the requirement to route vapors from the wet seal fluid degassing system through a closed vent system to a control device or back to the process by December 31, 2026.		

Part 2**A. Compliance Schedule**

If required based on the compliance evaluation, submit applications for any necessary air permit authorizations and implement any necessary design modifications to achieve compliance by December 31, 2027.
