

Biography: Laurie Fleet
Water Quality Division
Texas Commission on Environmental Quality

Current Position

Laurie is currently a Program Specialist for the Wastewater Permitting Section in the Water Quality Division. In this capacity she serves as the Project Manager for several grant contracts issued by the Water Quality Division. She also develops and amends rules and general permits administered by the Water Quality Division.

Prior Experience and Education

Laurie received her Bachelor and Master of Science degrees in Biology from Tarleton State University. She began her career at TCEQ in 2001. During her tenure at TCEQ, she has served as a permit writer and work leader for the Concentrated Animal Feeding Operation team and as an aquatic scientist for the Water Quality Assessment Team.

She has participated in numerous rulemakings, developed 3 statewide general permits, and presented information to the public and regulated community at numerous public speaking events.
