\*The Design and Construction Technology Plan is required ONLY where:

There are threatened and endangered or otherwise protected federal, state, or tribal species, or critical habitat for these species, within the hydraulic influence of the cooling water intake structure; or

Based on information submitted by any fishery management agency or agencies, or relevant information, there are migratory, sport, or commercial species of impingement concern that pass through the hydraulic zone of influence of the cooling water intake structure; or

It is determined, based on information submitted by any fishery management agency or agencies, or other relevant information, that the proposed facility, after meeting the technology-based performance requirements in *40 CFR §125.84(b)(1), (2), and (3)*, would still contribute unacceptable stress to the protected species, critical habit of any species of concern.
