

About TXWARN

Our mission is to support and promote statewide emergency preparedness, disaster response, and mutual assistance matters for public and private water and wastewater utilities.

TXWARN is free to all utilities in the State of Texas, both public and private systems of any size.

TXWARN provides its members with emergency planning, response and recovery information before, during and after an emergency. TXWARN works closely with the TCEQ and the State Emergency Operations Center to coordinate response to utilities when outages overwhelm your ability to recover in a reasonable length of time.

The TXWARN program provides its member utilities with:

- A standard omnibus mutual assistance agreement and process for sharing emergency resources among members statewide.
- The resources to respond and recover more quickly from a disaster.
- A request and resource tracking system to gather data when needed including for reimbursement needs.
- A mutual assistance program consistent with other statewide mutual aid programs.
- A forum for developing and maintaining emergency contacts and relationships.
- New ideas from lessons learned in disasters.
- Training to assist utilities to be better prepared for disaster response and recovery.
