We will be applying for continuing education credits for Texas drinking water and wastewater operators.

The U.S. Environmental Protection Agency (EPA) and the Texas Commission on Environmental Quality (TCEQ) will conduct a virtual Texas Water and Power Resilience Workshop. The workshop will focus on power outages and how they affect both water and electric utilities. The target audience is drinking water, wastewater and electric utilities. The workshop will include morning presentations by regulatory agencies and water, wastewater, and electric utilities and an afternoon tabletop exercise designed to foster ideas about how to better prepare for, respond to, and recover from power outages. The exercise will enable all participants to better evaluate their preparedness for power outages, identify challenges, and learn from the experiences of others.

Please register for this free workshop at:
