TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

January 4, 2012

Re: Alert for Permitted State Surface Water Diversions in the Sabine River Basin

Dear Water Right Holder:

By letters dated April 11, 2011 and August 22, 2011, you were alerted that diversions of state surface water may be suspended or curtailed due to drought conditions. The Texas Commission on Environmental Quality (TCEQ) has now received a priority call on surface water from a senior water right holder. In accordance with the Texas Water Code (TWC), §5.013(a)(1), the TCEQ is responsible for enforcing water rights, which requires protecting senior and superior surface water rights, and must take action in response to the priority call.

With no immediate relief forecasted, the TCEQ has suspended certain diversions in the Little Sandy Creek Watershed of the Sabine River Basin. Suspended water rights include water right permits with a priority date of January 1, 1903 and later (excluding those for municipal uses and power generation), term water right permits, and temporary water right permits. Domestic and livestock diversions are not subject to this suspension. Water right permits issued with multiple uses may continue to divert water for municipal, domestic, and power generation purposes only. Junior permit holders with impoundments are not required to release any previously stored water and may continue to use that water; however, new inflows to impoundments must be passed downstream in order to meet senior needs.

These actions are guided by the priority doctrine, established in TWC §11.027. The most senior water rights are served first during times of drought with domestic and livestock uses superior to any appropriated rights. Water rights are suspended or curtailed by priority date, with the most recently issued – or “junior” – priority users suspended before senior water rights in the area.

The TCEQ continues to monitor the situation closely and strives to balance protection of the senior surface water rights while attempting to minimize the impact to junior water right holders, within TCEQ’s authority. Should senior needs not be fulfilled as a result of suspension of these diversions, please be aware that TCEQ may take additional actions in order to protect the senior priority call. If conditions improve, we may be able to lift the suspensions.

You may find additional drought information on TCEQ’s drought web page, located at: <http://www.tceq.texas.gov/agency/drought.html> or by contacting the TCEQ Drought Hotline at 1-800-447-2827. You may also contact Ms. Amy Settemeyer, Water Rights Liaison, at the TCEQ Central Office in Austin at 512-239-2588 should you have additional questions on this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Zak Covar".
