

**Wastewater:
Hurricane Harvey Related Sanitary Sewer Overflows and Other WW Discharges
TCEQ Dataset 12.28.2017**

This table is tracking Sanitary Sewer Overflows (SSOs) and other Wastewater (WW) discharges being reported by regulated facilities in the counties impacted by Hurricane Harvey. This report provides segregated volumes for SSOs and Industrial Discharges where previous reports aggregated all types of discharges into one total. Due to the extreme flooding that occurred, some SSOs and other WW discharges included in the incident numbers do not have an associated volume reported.

Totals for SSOs:	1522 Incidents Reported	25,007,527 gallons
Totals for Industrial Discharges:	45 Incidents Reported	125,173,271 gallons
