

TCEQ Analysis of TCEQ Contractor Surface Water Quality Sampling Data Collected on April 20, 2019 (Final Lab Results)

The Texas Commission on Environmental Quality (TCEQ) received final surface water quality data for 129 constituents at five (5) different sites. One sample was collected at each site on April 20, 2019 by the TCEQ's contractor. The constituents consist of inorganics, organics, metals, nutrients, chemical oxygen demand (COD), carbonaceous biochemical oxygen demand (CBOD), total suspended solids, and oil and grease in water. The sampling sites were the following:

- Mouth of Tucker Bayou & Buffalo Bayou
- Tidal Rd @ Gate #13
- Tidal Rd @ Gate #13 - #2
- Tidal Td @ Tucker Bayou
- Upstream Tucker Bayou Clean

This assessment is based on final results received from the laboratory. As additional water quality sampling is completed, the data will be assessed, and results made available.

The TCEQ used the Texas Water Quality Standards and the Texas Risk Reduction Program as references for determining the known health protective concentration levels (PCLs) in surface water. PCLs are very conservative and below levels where we would expect any health impacts. The TCEQ is using these PCLs to evaluate impacts to aquatic life and human health. No public drinking water system draws its source water from the Houston Ship Channel. This methodology was also used for previously reviewed data from samples collected by ITC and will be used to review samples from the TCEQ contractor. The TCEQ used the PCLs listed in the tables below to assess the surface water quality data.

Table 1: Assessment of Final Laboratory Results

	Mouth of Tucker Bayou @ Buffalo Bayou	Tidal Rd @ Gate #13	Tidal Rd @ Gate #13 - #2	Tidal Rd @ Tucker Bayou	Upstream Tucker Bayou Clean
Number of Constituents	129*	129	129	129*	129*
Number of constituents analyzed but not detected (not detected above the method detection limit or quantitation limit)	120	113	114	117	120
Number of constituents detected above the method detection limit or quantitation limit	8	16	15	11	8
Number of constituents detected but below their known PCLs	3	6	5	6	4
Number of constituents that exceeded their known PCLs	0	3	3	0	1
Number of constituents that are still pending further TCEQ evaluation	0	0	0	0	0
Number of constituents that do not have a PCL or are assessed with other constituents**	5	7	7	5	3

*Two constituents, Phenolic, collected at the Tidal Rd @ Tucker Bayou site and Total Xylenes collected at the Mouth of Tucker Bayou & Buffalo Bayou and Upstream Tucker Bayou Clean sites, included samples where the MS/MSD recoveries were found to be outside of the laboratory control limits due to possible matrix/chemical interference, or a concentration of target analyte high enough to affect the recovery of the spike concentration. This condition could also affect the relative percent difference in the MS/MSD. Therefore, they were excluded from the assessment of preliminary laboratory results.

**The water quality parameters ammonia nitrogen (as N), total Kjeldahl nitrogen, total phosphate, total organic nitrogen, and total suspended solids are not related to human health; therefore it is not appropriate to develop human health comparison values to evaluate these parameters. Three chemicals on the laboratory target analyte list (4-bromophenyl phenyl ether, 4-chlorophenyl phenyl ether, and benzo(g,h,i)perylene) do not have surface water comparison values and consequently will not be evaluated. These water quality parameters and chemicals are not directly related to the ITC incident, and the TCEQ is evaluating the chemicals that are directly related to the ITC incident (benzene and toluene, for example). C6-12, C12-28 and C28-35 range hydrocarbons, as well as total petroleum hydrocarbons, are included in the assessment of oil and grease. Therefore, these constituents are not assessed individually.

Below are tables of the constituents that exceeded their known PCL at the sampling site(s).

Table 2: Tidal Road @ Gate #13

Constituent	Maximum (micrograms/L)	PCL (micrograms/L)
Benzene	1200	581
Oil and Grease, HEM	143000	28000
Phenolic	43.7	0.29

Table 3: Tidal Road @ Gate #13 - #2

Constituent	Maximum (micrograms/L)	PCL (micrograms/L)
Benzene	1140	581
Oil and Grease, HEM	63400	28000
Phenolic	43.1	0.29

Table 4: Upstream Tucker Bayou Clean

Constituent	Maximum (micrograms/L)	PCL (micrograms/L)
Phenolic	17	0.29
