Chapter 4 – Submitting Entity and Collecting Entity Codes

Submitting Entity and Collecting Entity Codes are assigned by DM&A at the request of TCEQ Programs—CRP, SWQM, TMDL, Standards, NPS. These codes are used to identify entities responsible for submitting the data, and for performing the monitoring. The Submitting Entity is a 2-character code that identifies the entity responsible for submitting the data to the TCEQ. The Collecting Entity is a 2-character code that identifies the entity responsible for performing the monitoring or collecting the data.

Request a new entity code by sending a Submitting Entity/Collecting Entity/Monitoring Type/Tag Prefix Request and Review Checklist to DM&A.

Existing codes are listed on the following pages.

**Submitting Entity Codes**

The entity responsible for submitting the data to the TCEQ.
