

# First Submission of the 2018 Texas Integrated Report Water Bodies with Concerns for Use Attainment and Screening Levels

## Explanation of Column Headings

- SegID and Name: The unique identifier (SegID), segment name, and location of the water body. Items may be one of three types of numbers for SegID. The first type is a classified segment number (4 digits, e.g. 0218), as defined in the Texas Surface Water Quality Standards (TSWQS). The second type is an unclassified water body (e.g. 0218A), not defined in the Standards and associated with a classified water body because it is in the same watershed. The third type includes special Segments for Oyster Water Use (e.g. 2421OW) and Beach Watch Use (e.g. 2481CB) special areas. The segment name and description follow SegID.
- AU\_ID: Identifies the assessment unit (AU\_ID, six or seven digits, e.g., 0101A\_01) and describes the location of the specific area within a classified or unclassified water body for which one or more water quality standards are not met.
- Parameter(s): Pollutants or water quality conditions that assessment procedures indicate do not meet assigned water quality standards or screening levels
- Level of Concern: **CN** - Concern for near-nonattainment of the TSWQS based on numeric criteria  
**CS** - Concern for water quality based on screening levels

### **SEG ID: 1008 Spring Creek**

From the confluence with the West Fork of the San Jacinto River in Harris/Montgomery County to the confluence with Kickapoo Creek in Harris/Waller County

<u>Parameter(s)</u>	<u>Level of Concern</u>
<b>impaired fish community</b>	<b>CN</b>
1008_02 Kickapoo Creek confluence to SH 249	
<u>Parameter(s)</u>	<u>Level of Concern</u>
<b>nitrate</b>	<b>CS</b>
1008_03 SH 249 to IH 45	
1008_04 IH 45 to the confluence with Lake Houston	
<u>Parameter(s)</u>	<u>Level of Concern</u>
<b>total phosphorus</b>	<b>CS</b>
1008_03 SH 249 to IH 45	
1008_04 IH 45 to the confluence with Lake Houston
