

First Submission of the 2018 Texas Integrated Report - Water Bodies Evaluated

Explanation of Report Headings

SegID and Name:	The unique identifier (SegID), segment name, and location of the water body. The SegID may be one of three types of numbers. The first type is a classified segment number (4 digits, e.g. 0218), as defined in the Texas Surface Water Quality Standards (TSWQS). The second type is a water body described in Appendix D of the TSWQS, or an unclassified water body, not defined in the TSWQS, though associated with a classified water body in the same watershed. The third type include special Segments for Oyster Water Use (e.g. 2421OW) and Beach Watch Use (e.g. 2481CB) special areas. The segment name and description follow SegID.
Segment Type:	The type of water body (e.g. Reservoir, Estuary, Freshwater Stream, Tidal Stream, etc.)
AU_ID:	Identifies the assessment unit (AU_ID, six or seven digits, e.g., 0101A_01) and describes a specific area within a classified or unclassified water body. The AU descriptions immediately follow the AU_ID. This report includes all AUs identified for each Segment, including those without assessments.
Flow Type:	Type of flow regime (perennial, intermittent, intermittent with perennial pools) for streams. For non-stream water bodies, Flow type and Segment Type are typically the same.
Flow Type Source:	This is the reference source used to determine the flow type of an AU.
ALU Designation:	This is the designated Aquatic Life Use associated with the AU (exceptional, high, intermediate, limited, and minimal).
ALU Designation Source:	This is the reference source of the ALU designation.
Station ID(s):	Station IDs are the numbers that identify specific monitoring sites associated an AUID, but do not necessarily indicate data were available from that station for the period of record. Some assessment units do not have monitoring stations; other information may have been evaluated to determine support status for those AUs.

2018 Texas Integrated Report - Water Bodies Evaluated

SegID: 1008 Spring Creek

From the confluence with the West Fork of the San Jacinto River in Harris/Montgomery County to the confluence with Kickapoo Creek in Harris/Waller County

Segment Type Freshwater Stream

AU_ID: 1008_02 Kickapoo Creek confluence to SH 249

Flow Type
Perennial

Flow Type Source
TSWQS Appendix A

ALU Designation
High

ALU Designation Source
TSWQS Appendix A

Station ID(s): 11314; 11315; 11323; 18868

AU_ID: 1008_03 SH 249 to IH 45

Flow Type
Perennial

Flow Type Source
TSWQS Appendix A

ALU Designation
High

ALU Designation Source
TSWQS Appendix A

Station ID(s): 11313; 17489; 18198

AU_ID: 1008_04 IH 45 to the confluence with Lake Houston

Flow Type
Perennial

Flow Type Source
TSWQS Appendix A

ALU Designation
High

ALU Designation Source
TSWQS Appendix A

Station ID(s): 11312
