Type/Objective/Measure	2025 Target	2025 YTD	Percent of Annual Target	Target Range
<u>1-1 REDUCE TOXIC RELEASES</u>				
1 % POLLUTION REDUC/NONATT AREAS	3.00 %	(4.40)%	(146.67)% *	
<u>Explanation of Variance:</u> Performance is below the target for the percent of stationary and mobile source pollution reductions in ozone nonattainment areas . This measure compares the percent changes in volatile organic compounds and nitrogen oxides emitted in ozone nonattainment areas from point, area, on-road mobile, and non-road mobile sources. Performance was below the target due to increases in mobile source emissions resulting from EPA updates to the MOVES model, which states are required to use to calculate mobile source emissions.				
<u>Prior YTD:</u>				
3 % TEXAS/AIR QUALITY FED STANDARDS	43.00 %	42.20 %	98.14 %	
<u>Prior YTD:</u>				
5 % SURFACE WATER MEETING STANDARDS	55.00 %	54.00 %	98.18 %	
<u>Prior YTD:</u>				
7 % DECREASE/TOXIC RELEASES	2.00 %	5.15 %	257.50 % *	
<u>Explanation of Variance:</u> Performance is above the target for the annual percent decrease in the toxic releases in Texas. This measure indicates the annual percent decrease in total on-site disposal releases (air, water, land, and underground injections) of the 1988 core chemicals from all industries in Texas subject to the Toxics Release Inventory (TRI) reporting requirements. From reporting year 2022 to reporting year 2023, toxic releases decreased by 3.63 million pounds due primarily to a decrease of 2.41 million pounds in total air emissions. Specific chemicals contributing to this decrease include cyanide compounds and ethylene.				
<u>Prior YTD:</u>				
9 % DAMS INSPECTED W/IN 5 YRS	100.00 %	90.00 %	90.00 % *	
<u>Explanation of Variance:</u> Performance is below the target for the percent of high and significant hazard dams inspected within the last five years. This is due to a continued increase in the number of high hazard and significant hazard dams added to the inventory as a result of increased downstream development near dams. Limited inspections in FY2020 contributed to the lower five-year average. TCEQ saw a significant increase from last FY and expects this trend to continue.				
<u>Prior YTD:</u>				
<u>2-1 INCREASE SAFE DRINKING WATER</u>				

* Varies by 5% or more from target.

<u>Prior YTD:</u>				
4 % NONCOMPLIANT W/ ACTION TAKEN	85.00 %	58.00 %	68.24 % *	
<u>Explanation of Variance:</u> Performance is below the target for the percent of identified noncompliant sites and facilities for which timely and appropriate enforcement action is taken. This measure represents the timeliness of enforcement actions by the agency from initiation to completion. Performance is due to delays in the development, completion of settlement, and post-settlement phases of enforcement cases. Staffing vacancies and backlog complexities are the primary factors affecting this performance measure.				
<u>Prior YTD:</u>				
7 % ADMIN PENALTIES COLLECTED	82.00 %	90.00 %	109.76 % *	
<u>Explanation of Variance:</u> Performance for the percent of administrative penalties collected exceeds the target. This measure reflects the success of administrative penalty collection efforts by the agency. Increased collection rates for air violations contributed to exceeding the target this fiscal year.

ACTUAL PERFORMANCE FOR EXPLANATORY MEASURES

Type/Strategy/Measure	2025 Target	2025 YTD	Percent of Annual Target

Explanatory/Input Measures

1-3-1 RADIOACTIVE MATERIALS MGMT

2 VOLUME LLRW ACCEPTED

184,750.00	41,703.00	22.57 % *
------------	-----------	-----------

Explanation of Variance: Performance is below the target for the volume of low-level radioactive waste accepted by the State of Texas for disposal at the Texas Compact Waste Facility. Lower performance is desired and favorable. This measure represents the volume of low-level radioactive waste permanently disposed of in the Texas Compact Waste Facility. Estimating disposal volume is difficult due to the wide range of types of generators as well as the generators' ability to store waste as radioactive materials. The volume of waste accepted by the facility is not expected to be evenly distributed across fiscal years.

4-1-2 HAZARDOUS MATERIALS CLEANUP

1 # SUPERFUND SITES IN POST CLOSURE

45.00	41.00	91.11 % *
-------	-------	-----------

Explanation of Variance: Performance is below the target for the number of state and federal sites in post-closure care. This measure reflects the number of sites that require continued state funding during post-completion care. While the desired performance is above projections as it typically reflects sites cleanup progress on the clean up of sites, a lower number of sites is also supportive that fewer sites are in need of post-closure care than anticipated or that post closure care is funded with alternatives to state funding, which is desirable. The program estimated two additional sites would transfer to post-closure care upon remedial action completion, but post-closure care was not necessary. Additionally, remedial activities for one site that transitioned into post-closure care was funded entirely with federal funds, so this site was not counted for reporting purposes.

* Varies by 5% or more from target.
