Investigation Information

Complaint Date(s): N/A **Complaint Information:** N/A **Date(s) of Investigation:** October 6, 2020 through December 9, 2020, October 15, 2020 through January 5, 2021, November 5, 2020 through January 28, 2021, April 8, 2021 through April 23, 2021, April 22, 2021 through April 28, 2021, May 11, 2021, and November 8, 2021

Date(s) of NOE(s): December 18, 2020, January 7, 2021, February 1, 2021, May 21, 2021, May 27, 2021, July 12, 2021, and December 6, 2021

Violation Information

1. Failed to prevent unauthorized emissions. Specifically, the Respondent released 2,666.00 pounds ("lbs") of volatile organic compounds ("VOC") and 3.00 lbs of carbon monoxide ("CO") as fugitive emissions, during an emissions event (Incident No. 342811) that began on September 13, 2020 and lasted five hours. The emissions event occurred when a pump seal failed that caused Pump P-973 to leak, resulting in the release to the atmosphere. Since the Respondent did not comply with the emissions event reporting requirements, the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator, and the emissions event could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), New Source Review Permit ("NSR") No. 53313, Special Conditions ("SC") No. 1, Federal Operating Permit ("FOP") No. 01893, General Terms and Conditions ("GTC") and Special Terms and Conditions ("STC") No. 29, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

2. Failed to submit a final record for a reportable emissions event no later than two weeks after the end of the emissions event. Specifically, the final record for Incident No. 342811 was due by September 28, 2020, but was not submitted until October 6, 2020 [30 Tex. ADMIN. CODE §§ 101.201(c) and 122.143(4), FOP No. 01893, GTC and STC No. 2.F, and Tex. HEALTH & SAFETY CODE § 382.085(b)].

3. Failed to prevent unauthorized emissions. Specifically, the Respondent released 5,318.00 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 343333) that began on October 5, 2020 and lasted 14 hours and 22 minutes. The emissions event occurred when a 3/8-inch tubing at the base of the compression fitting broke that caused a leak, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 52041, SC No. 1, FOP No. O1893, GTC and STC No. 29, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

4. Failed to prevent unauthorized emissions. Specifically, the Respondent released 349.92 lbs of hydrogen iodide, 347.18 lbs of iodine, 121.76 lbs of sulfur dioxide ("SO2"), and 10.22 lbs of methyl acetate from the Acetic Acid Unit Flare, Emissions Point Number ("EPN") 49MN138ST, during an emissions event (Incident No. 345121) that occurred on October 29, 2020 and lasted nine hours and 30 minutes. The emissions event occurred due to plugging in the steam system during a process unit startup, resulting in flaring. Since the emissions event was not caused by a sudden

unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 53313, SC No. 1, FOP No. O1893, GTC and STC No. 29, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

5. Failed to identify all required information on the final record for a reportable emissions event. Specifically, the Respondent did not identify the estimated total quantities of 121.76 lbs of VOC, 20.96 lbs of nitrogen oxides ("NOX"), 852.15 lbs of CO, 0.67 lb of SO2, and 10.22 lbs of methyl acetate on the final record for Incident No. 345121 [30 Tex. ADMIN. CODE §§ 101.201(b)(1)(G) and (H) and 122.143(4), FOP No. O1893, GTC and STC No. 2.F, and Tex. HEALTH & SAFETY CODE § 382.085(b)].

6. Failed to prevent unauthorized emissions. Specifically, the Respondent released 199.04 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 353288) that occurred on March 25, 2021 and lasted 35 minutes. The emissions event occurred due to a slow valve response and level indication error that caused a loss of lean absorbent to the residual Ethylene Oxide ("EO") Absorber T-34, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. 01986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

7. Failed to prevent unauthorized emissions. Specifically, the Respondent released 35.66 lbs of VOC from EO Absorber T-111. EPN 32T111ST. 5.98 lbs of VOC from EO Absorber T-168, EPN 32T168ST, 76.00 lbs of VOC from the Utilities Flare, EPN 26UTLFLR, and 673.79 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 284706) that occurred on May 26, 2018 and lasted two hours and 33 minutes. The emissions event occurred when localized heating at the connection in the cooling water pump motor terminal junction box caused an insulation failure that led to the single substation main breaker supplying electrical power to all of the Plant's air compressors to trip during the startup of a cooling water pump in the Utilities area, resulting in the releases to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 Tex. ADMIN. CODE § 101.222 [30 Tex. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. 01986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

8. Failed to prevent unauthorized emissions. Specifically, the Respondent released 344.32 lbs of VOC as fugitive emissions, during an emissions event (Incident No.

302843) that occurred on February 16, 2019 and lasted seven minutes. The emissions event occurred due to an incorrect set point entry that caused the EO Storage Tank Valve V-193 to overpressure when the process control system introduced more nitrogen to the tank than what was required, resulting in Pressure Safety Valve PSV-2945 to lift and in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

9. Failed to prevent unauthorized emissions. Specifically, the Respondent released 136.30 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 329872) that began on February 8, 2020 and lasted 19 hours and six minutes. The emissions event occurred due to plugging from solids buildup in the flow indicators that caused the flow indicators to send inconsistent values to the Safety Instrument Systems, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222 [30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b)].

Corrective Actions/Technical Requirements

Corrective Action(s) Completed:

The Respondent implemented the following corrective measures:

a. On October 6, 2020, submitted the final record for Incident No. 342811;

b. By December 21, 2020, implemented a procedure to respond to a high-methyl iodide alarm, trained all unit personnel, and recalibrated the high limit for one of the two methyl iodide analyzers in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 345121;

c. By January 6, 2021, implemented a repair plan to facilitate the immediate repair of tubing and to restore process data for the reactor, configured an alarm to provide indication of a future tubing failure on top of the reactor, implemented an awareness tool to assist with identifying potential defects, and updated the reliability training program for installing tubing and support in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 343333;

d. By January 19, 2021, updated the guidance for estimating and reporting emission events and implemented internal guidance to distinguish emissions events from authorized releases in order to ensure that the final records for reportable emissions events are submitted in a timely manner;

e. On January 20, 2021, provided the estimated total quantities for the VOC, NOx, CO, SO2, and methyl acetate that were released during Incident No. 345121;

f. By February 3, 2021, examined alternatives for seals that use water, implemented processes for deviation recognition and mitigation of round sheet data, implemented periodic technical review of round sheet data, and implemented a maintenance plan for isolation valves in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 342811; and

g. By May 15, 2021, upgraded the flow transmitter and added piping to allow the V-156 vent line to route to the EO Flare during upsets in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 329872.

Technical Requirements:

1. The Order will require the Respondent to implement and complete a SEP (see SEP Attachment A).

- 2. The Order will also require the Respondent to:
- a. Within 30 days:

i. Implement measures and/or procedures designed to ensure that all of the required information is identified on the final records for reportable emissions events;

ii. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 353288;

iii. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 284706; and

iv. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 302843.

b. Within 45 days, submit written certification to demonstrate compliance with a.

Description: Failure to prevent unauthorized emissions. Specifically, the Respondent released 686.24 pounds of ethylene and 4.33 pounds of ethylene oxide from the Carbon Dioxide Vent, Emissions Point Number 32V176, during an emissions event (Incident No. 266268) that began on August 27, 2017 and lasted 38 minutes. The emissions event occurred when Analyzer AT4261 failed due to inclement weather and caused a false high ethylene concentration reading, resulting in the isolation of the Carbon Dioxide Vent

B. Criminal convictions:

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

IN THE MATTER OF AN ENFORCEMENT ACTION CONCERNING CELANESE LTD. RN100227016 BEFORE THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

AGREED ORDER DOCKET NO. 2021-0113-AIR-E

<u>s</u> <u>s</u> <u>s</u> <u>s</u> <u>s</u> <u>s</u>

§

I. JURISDICTION AND STIPULATIONS

On _______, the Texas Commission on Environmental Quality ("the Commission" or "TCEQ") considered this agreement of the parties, resolving an enforcement action regarding CELANESE LTD. (the "Respondent") under the authority of TEX. HEALTH & SAFETY CODE ch. 382 and TEX. WATER CODE ch. 7. The Executive Director of the TCEQ, through the Enforcement Division, and the Respondent together stipulate that:

- 1. The Respondent owns and operates a chemical manufacturing plant located at 9502 Bayport Boulevard in Pasadena, Harris County, Texas (the "Plant"). The Plant consists or consisted of one or more sources as defined in Tex. HEALTH & SAFETY CODE § 382.003(12).
- 2. The Executive Director and the Respondent agree that the TCEQ has jurisdiction to enter this Order pursuant to TEX. WATER CODE §§ 7.002, 7.051, and 7.073, and that the Respondent is subject to TCEQ's jurisdiction. The TCEQ has jurisdiction in this matter pursuant to TEX. WATER CODE § 5.013 because it alleges violations of TEX. HEALTH & SAFETY CODE ch. 382 and the rules of the TCEQ.
- 3. The occurrence of any violation is in dispute and the entry of this Order shall not constitute an admission by the Respondent of any violation alleged in Section II ("Allegations"), nor of any statute or rule.
- 4. An administrative penalty in the amount of \$57,641 is assessed by the Commission in settlement of the violations alleged in Section II ("Allegations"). The Respondent paid \$27,309 of the penalty and \$3,023 of the penalty is deferred contingent upon the Respondent's timely and satisfactory compliance with all the terms of this Order and shall be waived only upon full compliance with all the terms and conditions of this Order. If the Respondent fails to timely and satisfactorily comply with any of the terms and conditions contained in this Order, the Executive Director may demand payment of all or part of the deferred penalty amount.

Pursuant to TEX. WATER CODE § 7.067, \$27,309 of the penalty shall be conditionally offset by the Respondent's timely and satisfactory completion of a Supplemental Environmental Project ("SEP") as defined in the attached SEP Agreement ("Attachment A", incorporated herein by reference). The Respondent's obligation to pay the conditionally offset portion of the penalty shall be discharged upon full compliance with all the terms and conditions of this Order, which includes the timely and satisfactory completion of all provisions of the SEP Agreement, as determined by the Executive Director.

- 5. The Executive Director and the Respondent agree on a settlement of the matters alleged in this enforcement action, subject to final approval in accordance with 30 TEX. ADMIN. CODE § 70.10(a). Any notice and procedures, which might otherwise be authorized or required in this action, are waived in the interest of a more timely resolution of the matter.
- 6. The Executive Director may, without further notice or hearing, refer this matter to the Office of the Attorney General of the State of Texas ("OAG") for further enforcement proceedings if the Executive Director determines that the Respondent has not complied with one or more of the terms or conditions in this Order.
- 7. This Order represents the complete and fully integrated agreement of the parties. The provisions of this Order are deemed severable and, if a court of competent jurisdiction or other appropriate authority deems any provision of this Order unenforceable, the remaining provisions shall be valid and enforceable.
- 8. This Order shall terminate five years from its effective date or upon compliance with all the terms and conditions set forth in this Order, whichever is later.
- 9. The Executive Director recognizes that the Respondent implemented the following corrective measures at the Plant:
 - a. On October 6, 2020, submitted the final record for Incident No. 342811;
 - b. By December 21, 2020, implemented a procedure to respond to a high-methyl iodide alarm, trained all unit personnel, and recalibrated the high limit for one of the two methyl iodide analyzers in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 345121;
 - c. By January 6, 2021, implemented a repair plan to facilitate the immediate repair of tubing and to restore process data for the reactor, configured an alarm to provide indication of a future tubing failure on top of the reactor, implemented an awareness tool to assist with identifying potential defects, and updated the reliability training program for installing tubing and support in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 343333;
 - d. By January 19, 2021, updated the guidance for estimating and reporting emission events and implemented internal guidance to distinguish emissions events from authorized releases in order to ensure that the final records for reportable emissions events are submitted in a timely manner;
 - e. On January 20, 2021, provided the estimated total quantities for the volatile organic compounds ("VOC"), nitrogen oxides ("NOx"), carbon monoxide ("CO"), sulfur dioxide ("SO2"), and methyl acetate that were released during Incident No. 345121;
 - f. By February 3, 2021, examined alternatives for seals that use water, implemented processes for deviation recognition and mitigation of round sheet data, implemented periodic technical review of round sheet data, and implemented a maintenance plan for isolation valves in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 342811; and

g. By May 15, 2021, upgraded the flow transmitter and added piping to allow the V-156 vent line to route to the Ethylene Oxide ("EO") Flare during upsets in order to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 329872.

II. ALLEGATIONS

- 1. During a record review for the Plant conducted from October 6, 2020 through December 9, 2020, an investigator documented that the Respondent:
 - Failed to prevent unauthorized emissions, in violation of 30 Tex. ADMIN. CODE a. §§ 116.115(c) and 122.143(4), New Source Review Permit ("NSR") No. 53313, Special Conditions ("SC") No. 1, Federal Operating Permit ("FOP") No. 01893, General Terms and Conditions ("GTC") and Special Terms and Conditions ("STC") No. 29, and Tex. Health & SAFETY CODE § 382.085(b). Specifically, the Respondent released 2,666.00 pounds ("lbs") of VOC and 3.00 lbs of CO as fugitive emissions, during an emissions event (Incident No. 342811) that began on September 13. 2020 and lasted five hours. The emissions event occurred when a pump seal failed that caused Pump P-973 to leak, resulting in the release to the atmosphere. Since the Respondent did not comply with the emissions event reporting requirements, the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator, and the emissions event could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 Tex. ADMIN. CODE § 101.222.
 - b. Failed to submit a final record for a reportable emissions event no later than two weeks after the end of the emissions event, in violation of 30 TEX. ADMIN. CODE §§ 101.201(c) and 122.143(4), FOP No. 01893, GTC and STC No. 2.F, and TEX. HEALTH & SAFETY CODE § 382.085(b). Specifically, the final record for Incident No. 342811 was due by September 28, 2020, but was not submitted until October 6, 2020.
- 2. During a record review for the Plant conducted from October 15, 2020 through January 5, 2021, an investigator documented that the Respondent failed to prevent unauthorized emissions, in violation of 30 Tex. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 52041, SC No. 1, FOP No. O1893, GTC and STC No. 29, and Tex. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent released 5,318.00 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 343333) that began on October 5, 2020 and lasted 14 hours and 22 minutes. The emissions event occurred when a 3/8-inch tubing at the base of the compression fitting broke that caused a leak, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 Tex. ADMIN. CODE § 101.222.
- 3. During a record review for the Plant conducted from November 5, 2020 through January 28, 2021, an investigator documented that the Respondent:

CELANESE LTD. DOCKET NO. 2021-0113-AIR-E Page 4

- a. Failed to prevent unauthorized emissions, in violation of 30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 53313, SC No. 1, FOP No. O1893, GTC and STC No. 29, and TEX. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent released 349.92 lbs of hydrogen iodide, 347.18 lbs of iodine, 121.76 lbs of SO2, and 10.22 lbs of methyl acetate from the Acetic Acid Unit Flare, Emissions Point Number ("EPN") 49MN138ST, during an emissions event (Incident No. 345121) that occurred on October 29, 2020 and lasted nine hours and 30 minutes. The emissions event occurred due to plugging in the steam system during a process unit startup, resulting in flaring. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222.
- b. Failed to identify all required information on the final record for a reportable emissions event, in violation of 30 Tex. ADMIN. CODE §§ 101.201(b)(1)(G) and (H) and 122.143(4), FOP No. 01893, GTC and STC No. 2.F, and Tex. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent did not identify the estimated total quantities of 121.76 lbs of VOC, 20.96 lbs of NOx, 852.15 lbs of CO, 0.67 lb of SO2, and 10.22 lbs of methyl acetate on the final record for Incident No. 345121.
- 4. During a record review for the Plant conducted from April 8, 2021 through April 23, 2021, an investigator documented that the Respondent failed to prevent unauthorized emissions, in violation of 30 Tex. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and Tex. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent released 199.04 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 353288) that occurred on March 25, 2021 and lasted 35 minutes. The emissions event occurred due to a slow valve response and level indication error that caused a loss of lean absorbent to the residual EO Absorber T-34, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 Tex. ADMIN. CODE § 101.222.
- 5. During a record review for the Plant conducted from April 22, 2021 through April 28, 2021, an investigator documented that the Respondent failed to prevent unauthorized emissions, in violation of 30 Tex. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and Tex. Health & SAFETY CODE § 382.085(b). Specifically, the Respondent released 35.66 lbs of VOC from EO Absorber T-111, EPN 32T111ST, 5.98 lbs of VOC from EO Absorber T-168, EPN 32T168ST, 76.00 lbs of VOC from the Utilities Flare, EPN 26UTLFLR, and 673.79 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 284706) that occurred on May 26, 2018 and lasted two hours and 33 minutes. The emissions event occurred when localized heating at the connection in the cooling water pump motor terminal junction box caused an insulation failure that led to the single substation main breaker supplying electrical power to all of the Plant's air compressors to trip during the startup of a cooling water pump in the Utilities area, resulting in the releases to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been

avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 Tex. ADMIN. CODE § 101.222.

- 6. During a record review for the Plant conducted on May 11, 2021, an investigator documented that the Respondent failed to prevent unauthorized emissions, in violation of 30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent released 344.32 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 302843) that occurred on February 16, 2019 and lasted seven minutes. The emissions event occurred due to an incorrect set point entry that caused the EO Storage Tank Valve V-193 to overpressure when the process control system introduced more nitrogen to the tank than what was required, resulting in Pressure Safety Valve PSV-2945 to lift and in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222.
- 7. During a record review for the Plant conducted on November 8, 2021 an investigator documented that the Respondent failed to prevent unauthorized emissions, in violation of 30 TEX. ADMIN. CODE §§ 116.115(c) and 122.143(4), NSR Permit No. 55046, SC No. 1, FOP No. O1986, GTC and STC No. 20, and TEX. HEALTH & SAFETY CODE § 382.085(b). Specifically, the Respondent released 136.30 lbs of VOC as fugitive emissions, during an emissions event (Incident No. 329872) that began on February 8, 2020 and lasted 19 hours and six minutes. The emissions event occurred due to plugging from solids buildup in the flow indicators that caused the flow indicators to send inconsistent values to the Safety Instrument Systems, resulting in the release to the atmosphere. Since the emissions event was not caused by a sudden unavoidable breakdown of equipment or process beyond the control of the owner or operator and could have been avoided by better design and/or better operational and maintenance practices, the Respondent is precluded from asserting an affirmative defense under 30 TEX. ADMIN. CODE § 101.222.

III. DENIALS

The Respondent generally denies each allegation in Section II ("Allegations").

IV. ORDERING PROVISIONS

NOW, THEREFORE, THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY ORDERS that:

1. The Respondent is assessed a penalty as set forth in Section I, Paragraph No. 4. The payment of this penalty and the Respondent's compliance with all of the requirements set forth in this Order resolve only the allegations in Section II. The Commission shall not be constrained in any manner from requiring corrective action or penalties for violations which are not raised here. Penalty payments shall be made payable to "TCEQ" and shall be sent with the notation "Re: CELANESE LTD., Docket No. 2021-0113-AIR-E" to:

CELANESE LTD. DOCKET NO. 2021-0113-AIR-E Page 6

> Financial Administration Division, Revenue Operations Section Attention: Cashier's Office, MC 214 Texas Commission on Environmental Quality P.O. Box 13088 Austin, Texas 78711-3088

- 2. The Respondent shall implement and complete the SEP as set forth in Section I, Paragraph No. 4. The amount of \$27,309 of the assessed penalty is conditionally offset based on the Respondent's implementation and completion of the SEP pursuant to the terms of the SEP Agreement, as defined in Attachment A. Penalty payments for any portion of the SEP deemed by the Executive Director as not complete shall be paid within 30 days after the date the Executive Director demands payment.
- 3. The Respondent shall undertake the following technical requirements at the Plant:
 - a. Within 30 days after the effective date of this Order:
 - i. Implement measures and/or procedures designed to ensure that all of the required information is identified on the final records for reportable emissions events;
 - ii. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 353288;
 - iii. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 284706; and
 - iv. Implement measures and/or procedures designed to prevent the recurrence of emissions events due to the same or similar causes as Incident No. 302843.
 - Within 45 days after the effective date of this Order, submit written certification, and include detailed supporting documentation including photographs, receipts, and/or other records to demonstrate compliance with Ordering Provision No.
 3.a. The certification shall be signed by the Respondent and shall include the following certification language:

"I certify under penalty of law that I have personally examined and am familiar with the information submitted and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations." CELANESE LTD. DOCKET NO. 2021-0113-AIR-E Page 7

The certification shall be submitted to:

Enforcement Division, MC 149A Texas Commission on Environmental Quality P.O. Box 13087 Austin, Texas 78711-3087

with a copy to:

Air Section Manager Houston Regional Office Texas Commission on Environmental Quality 5425 Polk Street, Suite H Houston, Texas 77023-1452

- 4. All relief not expressly granted in this Order is denied.
- 5. The duties and provisions imposed by this Order shall apply to and be binding upon the Respondent. The Respondent is ordered to give notice of this Order to personnel who maintain day-to-day control over the Plant operations referenced in this Order.
- 6. If the Respondent fails to comply with any of the Ordering Provisions in this Order within the prescribed schedules, and that failure is caused solely by an act of God, war, strike, riot, or other catastrophe, the Respondent's failure to comply is not a violation of this Order. The Respondent shall have the burden of establishing to the Executive Director's satisfaction that such an event has occurred. The Respondent shall notify the Executive Director within seven days after the Respondent becomes aware of a delaying event and shall take all reasonable measures to mitigate and minimize any delay.
- 7. The Executive Director may grant an extension of any deadline in this Order or in any plan, report, or other document submitted pursuant to this Order, upon a written and substantiated showing of good cause. All requests for extensions by the Respondent shall be made in writing to the Executive Director. Extensions are not effective until the Respondent receives written approval from the Executive Director. The determination of what constitutes good cause rests solely with the Executive Director. Extension requests shall be sent to the Enforcement Division at the address listed above.
- 8. This Order, issued by the Commission, shall not be admissible against the Respondent in a civil proceeding, unless the proceeding is brought by the OAG to: (1) enforce the terms of this Order; or (2) pursue violations of a statute within the Commission's jurisdiction, or of a rule adopted or an order or permit issued by the Commission under such a statute.
- 9. This Order may be executed in separate and multiple counterparts, which together shall constitute a single instrument. Any page of this Order may be copied, scanned, digitized, converted to electronic portable document format ("pdf"), or otherwise reproduced and may be transmitted by digital or electronic transmission, including but not limited to facsimile transmission and electronic mail. Any signature affixed to this Order shall constitute an original signature for all purposes and may be used, filed, substituted, or issued for any purpose for which an original signature could be used. The term "signature" shall include manual signatures and true and accurate reproductions of manual signatures created, executed, endorsed, adopted, or authorized

by the person or persons to whom the signatures are attributable. Signatures may be copied or reproduced digitally, electronically, by photocopying, engraving, imprinting, lithographing, electronic mail, facsimile transmission, stamping, or any other means or process which the Executive Director deems acceptable. In this paragraph exclusively, the terms: electronic transmission, owner, person, writing, and written, shall have the meanings assigned to them under TEX. BUS. ORG. CODE § 1.002.

10. The effective date of this Order is the date it is signed by the Commission. A copy of this fully executed Order shall be provided to each of the parties.

For the Executive Director

Date

I, the undersigned, have read and understand the attached Order. I am authorized to agree to the attached Order, and I do agree to the terms and conditions specified therein. I further acknowledge that the TCEQ, in accepting payment for the penalty amount, is materially relying on such representation.

I also understand that failure to comply with the Ordering Provisions, if any, in this Order and/or failure to timely pay the penalty amount, may result in:

- A negative impact on compliance history;
- Greater scrutiny of any permit applications submitted;
- Referral of this case to the OAG for contempt, injunctive relief, additional penalties, and/or attorney fees, or to a collection agency;
- Increased penalties in any future enforcement actions;
- Automatic referral to the OAG of any future enforcement actions; and
- TCEQ seeking other relief as authorized by law.

In addition, any falsification of any compliance documents may result in criminal prosecution.

Attachment A

Docket Number: 2021-0113-AIR-E

SUPPLEMENTAL ENVIRONMENTAL PROJECT

Respondent:	CELANESE LTD.
Payable Penalty Amount:	\$54,618
SEP Offset Amount:	\$27,309
Type of SEP:	Contribution to a Third-Party Pre-Approved SEP
Third-Party Administrator:	Houston Regional Monitoring Corporation
Project Name:	Houston Area Air Monitoring Project
Location of SEP:	Harris County

The Texas Commission on Environmental Quality ("TCEQ") agrees to offset a portion of the administrative penalty amount assessed in this Agreed Order for the Respondent to contribute to a Supplemental Environmental Project ("SEP"). The SEP Offset Amount is set forth above and such offset is conditioned upon completion of the project in accordance with the terms of this Attachment A.

1. Project Description

a. Project

The Respondent shall contribute the SEP Offset Amount to the Third-Party Administrator named above. The contribution will be to the **Houston Regional Monitoring Corporation** for the *Houston Area Air Monitoring Project* SEP. The contribution will be used in accordance with the SEP between the Third-Party Administrator and the TCEQ (the "Project"). Specifically, the SEP Offset Amount will be used to operate a network of ambient air monitoring stations that continuously measure and record concentrations of ambient air pollutants. This network includes the Houston Regional Monitor ("HRM") 617 Wallisville Road site, the HRM 615 Lynchburg Ferry site, and the HRM 3 Haden Road site. The Third-Party Administrator shall use the SEP Offset Amount to report data from these three existing sites in the Houston Regional Monitoring Corporation ambient air quality monitoring network in the Houston-Galveston Air Quality Control Region No. 216. The SEP will be performed in accordance with all federal, state, and local environmental laws and regulations.

All dollars contributed will be used solely for the direct cost of implementing the Project, including but not limited to supplies, materials, and equipment. Any portion of this contribution that is not spent on the specifically identified SEP may, at the discretion of the Executive Director ("ED"), be applied to another pre-approved SEP.

The Respondent's signature affixed to this Agreed Order certifies that it has no prior commitment to make this contribution and that it is being contributed solely to settle this enforcement action. The Respondent shall not profit in any manner from this SEP.

b. Environmental Benefit

This SEP will provide TCEQ with near real-time access to high quality, short time resolution volatile organic compound, nitrogen oxide, ozone, and meteorological data sets that can be used to evaluate and track air pollution emission events as they occur, conduct source attribution studies, and to assess potential ambient community exposure to a limited number

CELANESE LTD. Docket No. 2021-0113-AIR-E Agreed Order - Attachment A

of hazardous air pollutants. Data from the monitors can be used with data from other monitors to provide critical information that can be used to evaluate the effectiveness of current and proposed emission control strategies aimed at achieving compliance with the 8hour ozone National Ambient Air Quality Standards. It also provides a key source of information that is essential to furthering our overall understanding of those emission sources that contribute to ambient community exposure to toxic air contaminants. Because the information is available in near real-time, it can be used to provide both agency staff and industry personnel with time critical information to investigate emission events in a timely fashion. Another key benefit is the ability to measure the change in the ambient air concentration of the individual target species and quantify control measure effectiveness. Data from these monitors will be publicly accessible through the TCEQ's website and will be used in evaluating air quality in the area, in ozone forecasts, and ozone warnings. Thus, the public will directly benefit by having access to the data and the forecasting and notification tools which can be used for public awareness.

c. Minimum Expenditure

The Respondent shall contribute at least the SEP Offset Amount to the Third-Party Administrator and comply with all other provisions of this SEP.

2. Performance Schedule

Within 30 days after the effective date of this Agreed Order, the Respondent must contribute the SEP Offset Amount to the Third-Party Administrator. The Respondent shall make the contribution payable to **Houston Regional Monitoring Corporation SEP** and shall mail the contribution with a copy of the Agreed Order to:

Houston Regional Monitoring Corporation c/o Christopher B. Amandes Amandes PLLC 1800 Post Oak Boulevard, Suite 400 Houston, Texas 77056

3. Records and Reporting

Concurrent with the payment of the SEP Offset Amount, the Respondent shall provide the Enforcement Division SEP Coordinator with a copy of the check and transmittal letter indicating full payment of the SEP Offset Amount due to the Third-Party Administrator. The Respondent shall mail a copy of the check and transmittal letter to:

Texas Commission on Environmental Quality Enforcement Division Attention: SEP Coordinator, MC 219 P.O. Box 13087 Austin, Texas 78711-3087 CELANESE LTD. Docket No. 2021-0113-AIR-E Agreed Order - Attachment A

4. Failure to Fully Perform

If the Respondent does not perform its obligations under this Attachment A, including full expenditure of the SEP Offset Amount and submittal of the required reporting described in Sections 2 and 3 above, the ED may require immediate payment of all or part of the SEP Offset Amount.

In the event the ED determines that the Respondent failed to fully implement and complete the Project, the Respondent shall remit payment for all or a portion of the SEP Offset Amount, as determined by the ED, and as set forth in the attached Agreed Order. After receiving notice of failure to complete the SEP, the Respondent shall include the docket number of the attached Agreed Order and a note that the enclosed payment is for the reimbursement of a SEP; shall make the check payable to "Texas Commission on Environmental Quality"; and shall mail it to:

Texas Commission on Environmental Quality Litigation Division Attention: SEP Coordinator, MC 175 P.O. Box 13087 Austin, Texas 78711-3087

5. Publicity

Any public statements concerning this SEP made by or on behalf of the Respondent, must include a clear statement that **the Project was performed as part of the settlement of an enforcement action brought by the TCEQ**. Such statements include advertising, public relations, and press releases.

6. Recognition

The Respondent may not seek recognition for this contribution in any other state or federal regulatory program.

7. Other SEPs by TCEQ or Other Agencies

The SEP Offset Amount identified in this Attachment A and in the attached Agreed Order has not been, and shall not be, included as a SEP for the Respondent under any other Agreed Order negotiated with the TCEQ or any other agency of the state or federal government.
