COMMENTS: I have an extreme concern regarding the placement of more concrete plants within the city limits of Gunter, TX due to the fact that my grandkids live in that same area. Not only are there potential health issues resulting from the chemicals but the added traffic on an already busy 2-lane road puts my family in harms way by encountering additional traffic and even more heavy trucks to try to avoid. Please evaluate the placement of the plant and move it

away from a family high-traffic area. These types of areas should be quarantined to areas that will be sadly considered 'industrial' in the future.

COMMENTS: This matter needs to be discussed in person. We already have enough batch plants for all of North Texas in our backyard already. Does the health and wellness of Gunter and the families who reside here mean nothing to you? I'm appalled that a year later we are here again having to request that our concerns be heard in person. Covid is no longer an issue so there is no excuse this time. You have the ability to right a wrong this time around.

COMMENTS: Hey all you pencil pushers and twerps at the TCEQ, I'm writing you to inform you that I'd like to request a public meeting for permit #164317. You can't hide behind your computers for another year. The public deserves a say so in this matter. Just so you cronies know, we share a property line with four batch plants and three of them are exceeding their allotted permit amount to the point of flooding our property with process water. Ameritex has already developed their property to drain from every point into buck creek. All that process water will end up in our pasture. If you can

read a topographic map you'll realize that our property will receive process water from every single one of your pencil whipped permits in the last four years. Just because someone's house is x number of feet from a batch plant doesn't mean that they don't go outside and work on their property 50 feet from an emission source/boundary line. Your rules/laws are antiquated and they don't protect Texans. I'd like to congratulate the county commissioners for inviting all these companies to one street. Share the wealth, this type of county planning will create undevelopable property on wall street road. Mike Annani(developer of the batch plants that border our south property line) owes our family thousands of dollars in damages (dead livestock, destroyed fence, building a lake and making the outbound runoff unnaturally flow across our property.) and his new permit for BIG D concrete doesn't meet your requirements. There is a house less than 100 yards from this new plant and that house is occupied.

COMMENTS: Our home is located in Tioga on the border of Gunter. Our roads and community have been impacted by the increased number of batch plants moving into our small town. I, along with our community, request an in person meeting regarding these plants. We were denied all requests for an in person meeting during 2020. Now that mandates have been lifted, we request an in person meeting with the TCEQ. Thank you! Janelle

COMMENTS: As an impacted citizen from a concrete batch plant application, TCEQ should be more inquisitive and initiate more scrutiny about the need for additional batch plants in this region that continue to emit particulate matter into the air in this growing metropolitan area. More families with children that have health issues and environmental impacts should be taken into consideration with this and all air quality applications. I oppose this application for the sake of the quality of life for those living in this region now and in the future and for the stewardship of our lands.

COMMENTS: Please consider the cumulative impacts of concrete and aggregate facilities on nearby communities and respect the contribution of Grayson County residents to the public participation process. This is their community and they have a right to have their voices heard and questions answered in a public forum. Their desires should have some influence over the outcome of environmental decisions that affect their lives. Please grant the residents of Grayson

County a meaningful public meeting in which TCEQ staff and the applicant participate with intent to improve the situation and not just to deflect and defend a rubberstamped decision.
