**COMMENTS:** I'm requesting a public meeting as soon as possible concerning this batch plant application. There are already four batch plants at this site, which most likely already exceeds emission limits for one location. This needs a closer look with greater care regarding the surrounding area and the cumulative affects of combining so many batch plants in one place.

**COMMENTS:** I would like to respectfully request a Public Meeting be granted and held for Metroplex Gunite LP CBP Permit #164838. This is Gunter's 11th concrete batch plant permit. Metroplex's plant at 150 cubic yards per hour concrete production rate will sit on the same site as four other plants. While the standard permit allows up to 300 cubic yards per hour, I am confident that with the four other batch plants already on site the 300 cu-yds/h have already been exceeded, but are circumventing the permit limitations by separating each batch plant into separate companies. For

perspective, Ameritex, a large concrete pipe company less than a mile from these four batch plants, is being limited to 290 cubic yards per hour on the same site bc of the standard permit all because they are one company. Allowing five batch plants at the same address, within feet of each other, to exceed production limits of the standard permit because they are different company seems like yet another flaw in the standard permit. Please hold a public meeting so these issues and concerns can be addressed. Thank you, Milann Guckian

**COMMENTS:** The building of multiple new plants will continue to negatively impact the health and well being of everyone and everything in our small town. Not only do these plants pollute the air with contaminants, but also the ground water and soil. This will also increase the noise pollution in the entire county.

**COMMENTS:** I am requesting a public meeting for permit #164838. Adding additional particulates and CO2 emissions to the four facilities already on this site places neighbors at high risk for debilitating health effects including asthma, cancer, heart disease, dementia, and birth defects. The cumulative effects of airborne contaminants from this application and surrounding CBPs have not been addressed in this application. A public meeting is indicated to allow residents to

consider their individual health risks. As the situation now stands it seems that approving this application without a public meeting would be contrary to the TCEQ's mission statement.

**COMMENTS:** I support having another public meeting to discuss Gunter's 11th concrete batch plant permit. This plant will be located on the same site as four other plants each having a concrete production rate of 150 cubic yards per hour. The standard permit allows a plant operator to process up to 300 cubic yards per hour per location. Allowing five batch plants within 50 feet of each other to exceed the total 300 cubic yard production limit appears contrary to the intent of the standard permit to limit production at a single location, even if the plants are owned by different companies.

**COMMENTS:** I would like to request a public meeting to discuss this permit in light of the fact that there are already 4 other batch plant "companies" at the same address! There needs to be assurance that these batch plants (which are within feet of each other) combined will not exceed the standard permit production limit of 300 cubic yards per hour.
