COMMENTS: Would like to ask for A public meeting/hearing on the permit. The land owners didn't know about the water discharge running over their property. Also during research we have discovered that the route that the water runs is different for the route that is permitted. The map that was submitted with the application is incorrect and was brought to the schools and TCEQs attention before the permit renewal was submitted. Why wasn't this checked before

the permit was issued or renewed. We would also like to ask questions about the pipeline routing and the water that stands in the stock pond on Judy Melvin's property. The water has been piped to the westside of hwy 114 with a 6" pipe, why was it piped to this point and not to the river. The way that the water stands in the pond and doesn't run to the river until we receive a large rain concerns us. This is just a few of the questions that we would like to receive some information about.
