COMMENTS: I am a Parker City councilwoman and I am writing today to express my concern and opposition to the proposed development and municipal utility district (MUD) which will be located within Parker's ETJ. Particularly, the wastewater plant is of particular concern to me as well as numerous other Parker residents who will be affected if this development is approved. Many residents moved to Parker due the "uniquely country" lifestyle our city affords, compared to many other surrounding cities in the DFW metroplex. Numerous residents in Parker have lived here for

decades or a good portion of their lives where they have raised their children and even grandchildren, in addition to livestock, cattle, horses, and other agriculture and farm animals. As such, the addition of a MUD in our ETJ will pose a significant environmental impact to the livestock and wildlife within our city, including harm to various threatened species such as the Bald Eagle and Texas tortoise, as well as protected species such as the great horned owl and red tail hawk to name a few. The wastewater treatment plant will also cause significant pollution in Parker creeks and ponds, causing a domino effect on livestock and horses who regularly use these areas as water sources. Please understand the impact on the lives and lifestyle that approval of this MUD will have on Parker and its many residents. I oppose this development and will stand with our residents in conveying this to state and local authorities until it is stopped. Thank you. Diana Abraham Parker City Councilwoman

COMMENTS: I oppose the construction of a wastewater treatment facility close to neighborhoods. This is not the right place to have this facility and another site should be considered. Please completely understand the reasoning behind this request before proceeding. I would find it hard to believe that this is being built for the benefit of the community versus the future profit that can be made by a developer/land owner.

COMMENTS: A waste water treatment plant on this strip of land will severely impact the resale value of the homes in Rolling Ridge to the south, along Gregory to the north and along Dublin to the west. These areas average over \$700K in value and none of these residents could have expected anything less than 1 acre lots to be developed there just like the rest of Parker. That would have clearly impacted their decision to purchase originally. The terrible odors produced from

this type of facility will carry with the wind much further than the adjoining properties. I'm also not sure who would want to purchase a new house next to it. It's very risky and doesn't benefit anyone.

COMMENTS: This permit represents a huge risk to the water, air, and wildlife quality of the area. There active water wells in the area. The MUD will discharge into Maxwell Creek which will change the ecosphere of the area. Air quality will suffer as is evident with other MUD's in the area. This air quality impact will force area resident to make life changing accommodations for an unwanted and unneeded development. Residents will lose current water, air, and wildlife qualities of the area, as well as suffer health and financial impact if the permit and build is allowed.

COMMENTS: My husband and I vehemently OPPOSE this proposed water treatment facility. Located less than a mile from our home. It will decrease our property values which will decrease Collin County tax revenues overall. The plan to divert run-off into Maxwell Creek will destroy that beautiful natural feature and consequently the popular (and expensive) Murphy Community Commons. This proposal is short sided and will negatively affect the quality of life for many Murphy residents.

COMMENTS: Please do not allow this wastewater treatment plant to come into Parker! My concerns are air quality, pollutants from the plant, and definitely our property values being diminished. Parker is consistently ranked one of the top suburbs to live in in DFW by D magazine, Niche, and others due to our air quality, safety, and ambience, just to name a few applicable categories! I strongly urge and request that this permit be denied. Please let us keep our quality of life in our lovely city of Parker clean and free of odors, damage, and pollutants! Thank you for your serious consideration.

COMMENTS: I do not approve the proposed waste water treatment plant at location North Murphy Road and Rolling Ridge intersection (see attached file). My understanding us that the treatment plant is expected to treat up to 200,000 gallons of wastewater per day, sending discharge flowing to Maxwell Creek. Everyday Maxwell Creek would have to handle that amount of discharge cause catastrophic damage to our ecosystem of Maxwell Creek and the surrounding

area with the potential pollutants entering our community. This would deteriorate the air quality with pollutants and smell from the facility impacting our established neighborhoods. Lastly, this will negatively impact the property values, decrease the market value for the neighborhood.

ATTENTION AREA RESIDENTS of Murphy, Parker, Wylie, Sachse, Lucas, Richardson:

A Dallas company wants to put a wastewater treatment plant just 0.4 miles northwest of the North Murphy Road – Rolling Ridge Road intersection to accommodate a new development being proposed within Parker.

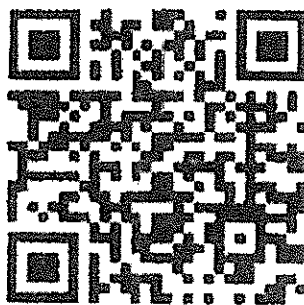

TIME IS OF THE ESSENCE to lodge a complaint against the planned facility that's expected to treat up to 200,000 gallons of wastewater per day, sending discharge flowing to Maxwell Creek. The Newspaper Notification has been received by TCEQ!

If you:

- DON'T WANT our city's ecosystem damaged
- DON'T WANT potential pollutants from the plant entering our community
- DON'T WANT our air quality to suffer

COMMENTS: I am against the planned facility of a wastewater treatment plant (0.4 miles) northwest of the North Murphy Road – Rolling Ridge Road intersection. The treatment plant is expected to treat up to 200,000 gallons of wastewater per day, sending discharge flowing to Maxwell Creek. Everyday Maxwell Creek would have to handle that amount of discharge. This would cause catastrophic damage to our ecosystem of Maxwell Creek and the surrounding area with the potential pollutants entering our community. It would impact our air quality negatively, again with

pollutants and smell from the facility impacting our already established neighborhoods. According to research from Purdue University, "When discharged in large quantities, it can raise the temperature of receiving streams locally and disrupt the natural balance of aquatic life. The acidity or alkalinity of wastewater affects both treatment and the environment. (<https://engineering.purdue.edu/~frankenb/NU-prowd/disease.htm>)" Regarding health concerns, The Journal of Environmental and Toxicology studies report that, "the wastewater treatment plants emit methane, carbon dioxide and nitrous oxide directly into the atmosphere. (<https://sciforschenonline.org/journals/environmental-toxicological-studies/article-data/JETS-2-114/JETS-2-114.pdf>)". This would pollute the air and impact the health and well being to the community. As a result, property values will decrease due to the smell, pollutants, poor air quality and negative impact to the environment.

COMMENTS: Please do not grant application for building of the waste water treatment plant near the maxwell creek. All of the houses in vicinity have septic systems and do not have a use for the sewage treatment plant. The residents will suffer from odor emanating from the plant and this will cause significant environmental and health issues for current and future residents. Releasing the treated water in to maxwell creek will pollute not only the creek but also the water table near the creek

COMMENTS: I am against having a sewage treatment center in Murphy, TX. Not only will the airborne chemicals dissipate and effect the air quality in our area and surrounding areas. If this allowed the community will no longer be one of the best places to live, house prices will go down and there will be a rise in cancers and other health ailments; such as a rise in asthma and allergies. I vehemently oppose a sewage treatment being added to our community or surrounding communities. There was one in Plano and we could smell it when the air blew a certain direction. I am sure

if people start having health issues which can be correlated to this installation it will be devastating. Also if the city knows of these issues prior to implementation it would definitely be debilitating for the city's finances if they are sued.

COMMENTS: Murphy is one of the fastest growing cities in DFW and a water plant would completely ruin the air quality. My family moved to Murphy back in 2003 when most of it was just farmland and to see what it's become today, this water treatment plant would completely destroy its positive progress this city has made all these years. The positive progress that's made people from all over want to live in this amazing city. It would be a HUGE mistake to allow a

company to build a water treatment plant when the city of Murphy could use that land to build more homes or retail space instead that would continue to improve the city's environment and its profits.

COMMENTS: As a resident of Murphy, TX I am concerned about the proposed water treatment plant being considered less than a mile from my home. Having spent the last 15 years advocating for a childhood cancer organization, it is very distressing to think a plant using toxic chemicals could be located so close to homes with children as well as an elementary school with hundreds of children. In addition, this plant seems to only be important to one developer for monetary gain. This doesn't benefit the greater community and our most precious commodity, the children. We will be

watching this process very closely to ensure the greater good of the community prevails. Best regards, Carolyn Alvey,
Rolling Ridge Resident

COMMENTS: We oppose the proposed sewage plant because of the harm it will cause to Maxwell Creek, the adjoining park areas and our water supply. There are a number of children who take advantage of the creek and parks. If the sewage plant is allowed to dump into the creek, those children will loose use of the play areas.

COMMENTS: Please deny this request. Having a wastewater treatment facility bordering our neighborhood will affect us in many negative ways. We don't want to have our city's ecosystem damaged with the discharge flowing into Maxwell Creek, not to mention the possibility of flooding. We don't want potential pollutants from the plant entering our community. We don't want our air quality to suffer and our quality of life negatively impacted. This will also cause our property values to be diminished.

COMMENTS: Lived in Murphy for 21 years. Moved to Rolling Ridge 16 years ago because of its beauty and upscale neighborhood. A waste treatment plant in our backyard is toxic and will destroy everything this neighborhood is all about not to mention the decrease in property value and attractiveness. The Lois Rios plant smell every time it rains is enough evidence that a treatment plant here is a VERY BAD choice and we in Rilling Ridge don't want it near us!!!

COMMENTS: We would like to submit our concerns about the wastewater treatment facility proposed for Parker adjacent to Murphy. We are concerned about the smell and the environmental effect of the treated wastewater to people and wildlife nearby and downstream in Parker and Murphy. It is so close to an elementary school and many valuable homes, some of which already experience flooding from that creek. We all paid a premium to be in a beautiful neighborhood with a small-town feel. We did not worry about potential development because of Parker's zoning for

acre lots with septic systems. Such a dramatic change is a gross betrayal of public trust. This is a greedy landowner courting greedy developers. Please do not destroy our towns, neighborhoods, schools, and home values for this! Thank you!!

COMMENTS: I am writing to let you know that I strongly oppose this MUD. The detrimental effect on home values would be immense. My family and I live in Murphy because we value the country feel, and I am very concerned about the effect this would have on local wildlife as well as whether it might cause flooding issues. I am also concerned about the environmental impacts, including air quality. The proposed location is very close to an elementary school and I fear that it would be inadvisable for children to engage in outdoor activities if this MUD is approved. My understanding is

that the city of Murphy has the capacity to provide wastewater services for this development if necessary. Please understand how strongly opposed I am to this facility.

COMMENTS: My husband and I have been a resident in Parker, Texas, since 2002. We have seen a lot of growth in the cities surrounding us. We however remain in Parker as Parker has kept its country feel. To add a waste water treatment facility will take our community away. We do not want to smell the treatment nor run the risk of the nearby creek to be a dumping ground for it. I understand that this is all about money for the developers. Please look at the community as a whole and the legacy that this will leave. Our family is against this project.

COMMENTS: "Stop the process. TCEQ should be following Regionalization. "According to NTMWD the proposed wastewater treatment plant permit WQ0016003001 would interfere with NTMWD's **statutory right, privilege, and economic interest** as the TCEQ-designated regional entity to collect, transport, treat, and discharge wastewater within the Regional Area. ** Specifically**, the Application indicates that the proposed WWTP will allow the Applicant to collect, transport, and treat wastewater from a proposed 101-acre tract that will be developed into single-family

residential subdivision, in close proximity to the towns of Parker, Lucas, Murphy, and Plano, in Collin County, which is located in the watershed area of the East Fork Trinity River in Collin County, and therefore falls within the Regional Area designated to NTMWD. In short, ****granting the TPDES permit to the Applicants violates applicable statutory requirements**** pertaining to the state's regionalization policy in Texas Water Code ("TWC") Chapter 26 as well as the TCEQ's own regionalization regulations at 30 TAC Chapter 351, Subchapter C. I support the State's Regionalization policy and EXPECT TCEQ to follow their own policy. The permit should not be granted and never should have reached this phase. We are aware that NTMWD's treatment process is state of the art compared to a WWTP. It is now time to show that TCEQ's mission is to Protect Texas by Reducing and Preventing Pollution." permit # WQ0016003001

COMMENTS: As a resident, I am unequivocally against the approval of this permit to allow the MUD in our city. The environmental concerns are the most prominent for me: the harm to wildlife, including protected species, harm to livestock, pollution of surrounding creeks and ponds, and increased flooding in the proposed areas flood plane. Additionally, the decrease in property value would be devastating to the homeowners surrounding this property. Please deny this permit.

COMMENTS: I am against the building of a wastewater plant! It will destroy the beauty of the creek not only directly next to the waste water plant but also down stream. It will make the localized flooding worse in heavy rains. The reason people move out to Parker, Tx is for the country feel and adding a waste water plant will destroy all that country feeling. Also, the smell from a waste water plant is not appealing. Don't let the wastewater plant be built!

COMMENTS: I strongly protest the building of a waste plant so close to my residential neighborhood where the values of the homes go from \$500,000 and up. I purchased my lot and built my home in 2005 with the understanding this area remain residential or agricultural. A waste plant is neither and will SEVERELY impact the value of our home. We are retired and our home represents a sizable amount of our retirement savings. Building this plant so close to my neighborhood will cause an extreme hardship on the people who built here with the same expectations we had. This

type plant should be built in a commercial area, NOT a primarily residential area. This infringes on the rights and expectations of my neighbors and my family.

COMMENTS: I oppose this ... we have lived here in Murphy for 11 years. We decided to move here because of the country feel it had, the land, the value of our home, the family environment, and the serenity of the city. I feel that with this water treatment plant there will be added pollution, traffic, and more importantly the wildlife will be driven further and further away and potentially driven into our neighborhoods. I am worried that my kids will be playing outside and have to smell the smells from this treatment center and The chemicals that are used will leech into our environment and

into the air. The runoff into Maxwell creek is disgusting this creek is used by many families as a place to go explore, walk around, and children playing. There is an elementary school less than a half mile from the proposed location, these kids will be outside at recess playing and have to have the smell of the treatment plant. Please do not let this treatment plant be built in Parker and Murphy.

COMMENTS: Is the 200k gallons per day what the residents use or what they use plus runoff from rain, sprinklers etc? What happens if the amount is over 200K gallons per day? Fines? system shut down? or just more water down the creek? Have there been studies done to see what happens with 200K gallons per day going down a creek of this size? If so, what is the conclusion for the erosion for this type of soil, rock, grass and trees? what happens when we have heavy rain? does the sewage come out thru man holes? is there an over flow tank? does sewage go into the creek? Is this

adding taxes or fees to the residents in the homes that this is servicing? if so, are the fees sustainable for the maintenance and repair for the future? How are the resident getting drinking water?

COMMENTS: As a local Murphy resident that lives close to this proposed area I strongly OPPOSE this permit. Having a sewage waste facility so close to several existing neighborhoods will cause major environmental issues, potential health hazards and lower quality of life for the surrounding residents and the city of Murphy. The sewage discharge being dumped into Maxwell creek could severely damage the native ecosystem. The EPA states that dumped wastewater from water treatment plants contain nitrogen and phosphorus from human waste, food and certain soaps and detergents.

Once the water is cleaned to standards set and monitored by state and federal officials, it is typically released into a local water body (Maxwell Creek), where it can become a source of nitrogen and phosphorus pollution. This plant will present airborne hazards. In 2017, Cornell University published a paper titled "Health Hazard Manual: Wastewater Treatment Plant and Sewer Workers". Per the paper, chemicals from wastewater treatment facilities become airborne when they're air-stripped. Air-stripping occurs when organisms, chemicals or particles in water find their way into air, where they can subsequently be inhaled. The water must be splashed or somehow moved through the air for this to take place, something that occurs in the aeration and dewatering processes, which put droplets and particles into the air. Studies have shown that coliform bacteria and total organisms are more prevalent at night, and they're highest when it's windy or the humidity is above 35 percent. With the exception of mercury, hazardous metals can't be air-stripped. This water treatment plant could cause Respiratory and Gastrointestinal Infections for local residents. The Cornell paper goes on to state that if particles, organisms or pathogens that are air-stripped are inhaled, they go through the bronchial tubes and lungs, are cleared from the lungs, and then swallowed. This can cause respiratory and gastrointestinal exposure. Some organisms pass directly into the bloodstream. The effects of inhaled organisms vary from upper respiratory irritation accompanied by eye irritation to depression, central nervous system damage and severe systemic poisoning. The proposed plant is very close to lots of Murphy residents. This will put thousands of people at risk. This water plant will greatly lower the quality of life for surrounding communities. In addition to health hazards, lower air quality and environment damage, residents who live near this facility will experience diminished quality of life, lower property values and be constantly exposed to the smell of the plant. Hunt Elementary is only .5 miles away from the proposed site. Imagine all of the young children out at play for recess having to breath in the air from the plant down the road. The city and residents have worked hard to keep Murphy a safe, clean and family friendly city. Allowing this treatment plant to be built so close would be a disaster for our residents and the city. Based on the very close proximity to existing neighborhoods and schools, the permit for this waste treatment plant should be DENIED!

COMMENTS: I have lived in Murphy since 2008 and enjoy the community. If this is truly a permit to build a water treatment area much like what resides on Los Rios and will have sewage smells, damaging chemicals in the air and area, I do not accept this and will begin process to seek the financial loss I experience on my property along with any other health related issues I or family members begin to experience. Really, can't believe this would even be considered in our community. Looks like we may need to also look at elected members.

COMMENTS: I live approximately one-half mile south of the proposed wastewater treatment plant. I oppose this plant for all the usual reasons cited by most of the people in the surrounding neighborhoods. We don't want the potential damage to our ecosystem from normal or accidental discharges, particularly, the Maxwell Creek ecosystem which has shown to be delicate in the past. We don't want our air quality to suffer, and we know that all of these types of plants produce varying degrees of terrible odors. We've all been around other plants. We believe that because of these

negative issues, the quality of our lives and the values of our properties would be significantly diminished. In addition, I have looked on Google Maps at a dozen or so wastewater treatment plants near us. At least ten of them are not as close to a neighborhood or school as the proposed plant would be to ours. Two of the plants I examined are close to neighborhoods, but those neighborhoods have nothing like the high density proposed by the Harrington Turner Enterprises development. I believe the high density of the development would make the problems cited in our objections even more likely. Thanks.

COMMENTS: The proposed wastewater treatment plan is inappropriate so close to an established residential neighborhood. I am a City Planner and a home owner in adjoining Rolling Ridge subdivision. My experience tells me that this type of land use is detrimental to the quality of life for residents who live within 3 miles of proposed wastewater plant. It will pollute water in nearby Maxwell Creek, pollute air for the residents living in my subdivision and reduce our

property values. I whole heartedly oppose this establishment at the proposed location. I request TCEQ to deny the permit to build a large waste water plant.

COMMENTS: I like many others moved to Murphy because of its small town feel that is just far enough away from busy metro area. Another reason was because of the lack of industry plants or facilities which mean the area around our home would be less polluted and that's how we want to keep it. It is baffling to think such a facility would be built by a near by elementary school and risk the air these young kids would be breathing while outside, much less the odor. Yes I

know there are limits on the amount of odor that can be released as well as safeguards but those do not eliminate it 100%. With this being said I request this permit be denied. Sincerely, Tim Billingham

COMMENTS: Under Texas Water Code, Section 26.081 and 26.0282 which is referred to as "regionalization," provides Texas' regionalization policy for wastewater treatment. It states that TCEQ is to implement a policy to "encourage and promote the development and use of regional and area-wide waste collection, treatment, and disposal systems to serve the waste disposal needs of the citizens and to prevent pollution and maintain and enhance the quality of the water in the state". In furtherance of that policy TWC Section 26.0282 authorizes TCEQ, when considering issuing a permit to

discharge waste, to deny or alter the terms and conditions of a proposed permit based on need and the availability of existing or proposed area-wide or regional waste collection, treatment, and disposal systems. *The Mayors of Parker and Murphy can come together and work out an agreement with the developer to have the development tap into the Murphy sewer system. The Mayor of Murphy when asked if the city has the capacity stated, "easily."

COMMENTS: The building of a waste water treatment facility on this property is unnecessary and harmful to everyone living in the surrounding neighborhoods. It will potentially introduce pollutants into our local ecosystem, negatively impact our local air quality, thus negatively impacting our quality of life and diminishing our property values. The new development can easily tap into the Murphy sewer system if the mayors of Parker and Murphy can come to an

agreement. Please do not allow our currently wonderful community to be ruined by this development. Thank you for your concern.

COMMENTS: It has come to the Rolling Ridge community's [of which I am a part] attention that a waste treatment plant is scheduled for construction just north of the sub-division. Current infrastructure management in the area has been excellent; however, recent events such as February 2021 Freeze scenario has proven that things will not be managed correctly with such a facility. I must actively lodge my complaint that it should be moved further east into open

farming and cancelled at its present location. Any further action initiated by the community will be joined by my number in a move to prevent the construction at its current location. It is simply too close to an occupied sub-division.

COMMENTS: I am a resident of Murphy Tx, and I am opposed to this facility. I do not want our environment impacted with that much waste water running through it. I do not want our city's air quality to be affected with it. I do not want our home values to be negatively impacted. This if for development that is planned for Parker, it should be placed someplace not so near to large communities already in place.

COMMENTS: Dear TCEQ, Please deny the building of this wastewater treatment plant in the Parker/Murphy area. This is not a rural area and there are hundreds of homes (including mine) that will be impacted by the environmental devastation this will cause. The smell alone will drive potential buyers away and many residents. When moving to Murphy, we anticipated that developments would come, but we did not anticipate atonal water treatment plants would be built next door. We already have a water treatment plant nearby and suffer the consequences of it regularly. I can

hardly go outside without vomiting when the wind blows our direction. We cannot have another added even closer next to multiple high end homes already built. We cannot let our waterways that run past homes with children playing in the creek be contaminated by this plant. There will be devastation to the wildlife nearby and down stream and potential flooding issues. Above all, there is no need to add another water treatment plant as Murphy has the capacity to cover the needs of this development without building the additional plant. Please don't trash my home by allowing this water treatment plant to be built. A very concerned neighbor, Jaymie Bryson

COMMENTS: I can't say strongly enough how we are against this proposal. Placing a treatment plant in the proposed location would have a terrible impact on the local communities of both Parker and Murphy. I have questions about how this installation would affect flooding in those areas that currently are prone to flooding, as well as the impact to areas not currently affected by flooding. I'm also very concerned about the effect on residents quality of life - we all know that the stench from these plants can not be contained, and placing it so near to an established Murphy neighborhood will

impact hundreds of families. The financial impact can't be understated either. Home values for these established neighborhoods would drop significantly, and we would see a decline in the desirability of a Murphy/Rolling Ridge address. Finally, I am very concerned with the environmental impact to the surface water and groundwater. There has never been a wastewater treatment plant built that had zero environmental impact, and this proposal wants to place one right in the midst of an area zoned for and built out as residential. These types of plants are typically built on the outskirts, far away from family homes, for a reason. I strongly encourage you to reject this permit for the sake of Murphy and Parker residents.

COMMENTS: Any plans for waste treatment plants should NOT be in close proximity to any residential homes/developments. I have lived in another state where the homes and the plant were in the same neighborhood. The stench that would permeate the air several times a week was horrendous. Still not sure if the high rate of cancers is related to this or not. But, I can only imagine the smell and other toxins being released if this discharge is flowing into a

creek that is close to neighborhoods...As a Parker Resident, I request that this company find a location "NOT" in close proximity to residences. Preferably somewhere miles away from people.

COMMENTS: This is a hazard to the elementary, middle and high schools within a half a mile and actually in Hunt Elementary back yard. Our roads not made for all this heavy traffic. A lot of homes will lose value, adjacent neighborhoods are 1 plus acre lots. Surrounded by farmland and cattle also. What would this look like when tourists come see Southfork ranch ?????

COMMENTS: I object this proposed wastewater treatment plant. I want additional time given to review alternatives to the proposed plant. Discharge from the plant will flow to Maxwell Creek (which flows through the city of Murphy to Muddy Creek and Lake Ray Hubbard in Segment 820 of the Trinity River Basin). The impact will not only affect Murphy and Parker but Sachse, Wylie, Rockwall and also the protected ecosystem, Preserve at Maxwell Creek (which is teaming with life from fish, reptiles, amphibians, birds, mammals and countless insects) The area also includes a High School

,Middle School, and Hunt Elementary School which is directly adjacent to the wastewater treatment plant. Not only will this increased waterflow disrupt the delicate ecosystem in Maxwell Creek, chlorine from the plant's chlorine contact basin will also make its way into Maxwell Creek.

COMMENTS: Parker is a country city by definition. Adding over 500 apartments or town houses with over a 1000 people at our doorstep is like an invasion into our city. And we live near where the proposed sewage treatment plant would be and that is not acceptable. Maxwell creek is known to flood every few years and adding up to 200,000 gallons to a flood event on the creek would add to the danger to our home.

COMMENTS: I would to voice my opposition to the construction of the water treatment plant in Murphy Texas. I am concerned over the effects on the environment and the health of the community. As a resident that is right off of a Greenbelt against Maxwell Creek I'm concerned about runoff flooding and or effects on the wildlife and park area that we all love and enjoy. Not only this but the air quality for our beautiful community would be horrible. People move to this community because it's outside of the big city and there is a more country feel on fresh air. This plant would

completely change the community. This would also affect that was moving to the community and the home values. No one wants to move to a tainted community. This plant should not come to our area period!

COMMENTS: As an eleven year resident of the city of Parker with a child attending Hunt elementary, I am vehemently opposed to the wastewater treatment plant being built on that property. The environmental impact to this community would be tremendous and the children of that school do not need the exposure to the smell while they are outside for recess or walking to and from school. Parker and Murphy have a lot of livestock and the runoff into the creek could

cause a significant and unfortunate environmental impact to our community. Please do not allow this to be built. Thank you

COMMENTS: High Density Development with a Wastewater treatment plant (MUD) is proposed on Murphy Road just north of Betsy Lane MUD will discharge 200,000+ to 800,000 gallons of treated water in Maxwell Creek. (describe a water tank 33 foot diameter X 32 feet high holds 200k gallons). Cities affected – PARKER, MURPHY, SACHSE (wherever Maxwell Creek flows) Concerns include - a. Decrease in property value b. Decrease in taxes City of Murphy will collect to provide services c. Harm to wildlife (only naming a few) i. THREATENED Species - Bald eagle, Texas tortoise, ii.

PROTECTED Species - Great Horned Owl, Redtail Hawk, Turkey vultures d. Harm to livestock e. Polluting of our creek & ponds f. Flooding – Review of flood plane along Maxwell & Muddy Creek support this concern g. Negative impact of water odor quality on neighboring residences

COMMENTS: As someone who lives near the creek downstream from the proposed wastewater treatment facility in Parker's ETJ, I am strongly opposed. I am concerned about what this facility would do to the quality of the water in the creek and for any smells from the facility in the area. I am also concerned about flooding in the creek. I am STRONGLY opposed to the construction of this facility.

COMMENTS: The proposed water treatment plant close my community will cause too much smell and cause significant health issues. It will also cause significant decrease in my life earning in my house value. There is also nearby elementary school. The exposure to the smell and all the airborne chemicals used in the treatment is highly undesirable. I have been near water treatment plants several times. The smell goes up to 2-3 miles from the location. Please do not pollute my pristine environment with this sewage treatment plant.

COMMENTS: The proposed wastewater/sewage treatment near my community is only going to bring issues to us. Strong odor (which I can smell from 2 miles away in the existing sewage treatment in Collin County), impact on Hunt Elementary and all the children, my property value, health hazards, groundwater pollution and Maxwell Creek pollution are just some of the issues. I am going to be just half a mile from this proposed treatment plant. This permits needs to be rejected at all cost.

COMMENTS: My husband, Robert Clary, and I reside in Maxwell Creek North. We are totally opposed to the proposed sewage plant and municipal utility district that will be located just north of the Murphy/Parker boundary. This plan will result in a significant depreciation of our property and negative environmental effects since wastewater will run down Maxwell Creek through Murphy. Moreover, a nearby treatment plan is going to result in noxious odors in our neighborhood. Most important, wastewater might leak into our drinking supply causing significant health issues.

COMMENTS: I have serious concerns about the proposed wastewater processing facility. My home faces Maxwell Creek so this directly impacts me. Further I am drawing from experience being near large scale plants, the Back River Sewage treatment plant (Middle River, MD) <https://publicworks.baltimorecity.gov/pw-bureaus/water-wastewater/wastewater/back-river> and smaller scale Treatment facility in Catonsville MD now discontinued. Concern #1: Inflows into the proposed plant would include wastewater and storm water streams. Overflows during serious

storms of large water volume have been known to cause sewage overflows into the waterways. There are trails that run along side the creek that are used for biking and hiking. These trails cross through the waterways in several places. These trails routinely get flooded several times a year. I don't need potential sewage overflows also occurring during those routine flood events. Concern #2: Higher levels of bacteria and nutrient discharge into the creek. This potentially can cause algae blooms, odors and make the trail off limits similar to how beaches sometimes need to be closed. Concern #3: My home is right next to the AE flood zone. It is bad enough I need to worry about storm water flooding... now I need to add sewage overflow on top of that. In short, Parker needs the facility, it should be built in Parker. If it discharges into Maxwell Creek At least it will be further upstream allowing for more dissipation, then nearer of my property. Thank you for your time.

COMMENTS: I am 100% against a sewage/water treatment plant of any kind that is being proposed in Murphy. This will drastically lower our property values. Not to mention the horrific smell it will put in our neighborhood, possibly contaminate our water supply which can cause disease to spread and it would be very harmful to our wildlife.

COMMENTS: We oppose the proposed water plant in Murphy, Texas just north of the intersection of Rolling Ridge and Murphy Road. This is not good for our property values or our health. It is also unnecessary as any proposed building near the site can be handled by services already in place. We do not want toxic

COMMENTS: I am completely opposed to this request to build a MUD district (waste treatment) for neighborhood development in Parker. I understand the treated water from the intended development will flow into Maxwell Creek, which happens to run in our Murphy neighborhood. This proposal is totally unacceptable from an environmental perspective and self-serving for the developer. Dumping waste treatment water into the Maxwell Creek will be harmful to people and animals. Please do the right thing and reject this proposal.

COMMENTS: I find it difficult to imagine why anyone would consider placing a treatment plant this close to an elementary school and residential neighborhood. My children have walked home from that school for years. My boys play football in that playground. Our family has taken pictures every year in the wildflowers that grow along the side of Rolling Ridge Drive. Please do not approve the placement of waste treatment plant within a 100 yards of my home and my children's school.

COMMENTS: I could not be more opposed to this permit. It is absurd to put a waste management facility within a residential neighborhood. Almost worse than that, is for the wastewater to be funneled to Maxwell Creek. If you aren't going to give 10's of thousands of dollars to the families that live along and around Maxwell Creek, you should look forward to the law suits that will inevitably follow. Be smarter.

COMMENTS: I object to the proposed installation of a wastewater plant at this proposed location. Our property issues downstream and downwind from this site and it would have a negative impact on both quality of life issues. The construction traffic would impact the local infrastructure as well. An alternative to this site would be a better pipeline to the existing facility in Wylie.

COMMENTS: I strongly disagree with this plant proposal and I do not want this in my community. I have serious concerns that this plant will effect our local air quality, change downstream water quality of Maxwell creek, lower our property values, permanently damage our city ecosystem, and negatively impact Murphy residence quality of life. Please DO NOT approve this permit. Thank you!

COMMENTS: WQ0016003001 and EPA TX0141381 Being a resident of Murphy, I wish to file a complaint voting against this. We have a hard enough time just driving down Los Rios and that water treatment plant, building another one will only add odor To our city, lower our property values and it isn't necessary. There must be an alternative to assisting the environment that can be done in a more natural way than this proposed project. Thank you, Robin Craven

COMMENTS: It's very scary that wastewater treatment plants allow an acceptable level of a pollutant" like fecal coliform, ammonia and nitrates into our creeks and lakes that are natural habitats for our birds, animals, fishes, and every form of living element in our biosphere. They will also release aerosol contaminants into the very air we breath . Wastewater treatment plants cannot remove antibiotics or filter out household chemicals and other contaminants that flow into storm sewers. Reporting out of Austin indicate that 80% of the treatment plants have exceeded the permit

limits and that 15 of 48 plants in Central Texas have exceeded pollutant limits between 50 and 500 days. Mostly with ammonia nitrate and E-coli concerns. As a local resident I am terrified that there will be concerns with possible increase in gastro intestinal issues and respiratory ailments as most studies indicate when researching hazards of living near a waste water treatment plant.

COMMENTS: Why is a sewer plant being proposed in Murphy? It's a smaller highly residential area that is mostly developed. We object to having a plant that will vent into the local air. We have lived close enough to plants in the past to disagree with this permit. I believe many local residents will agree that this will reduce property values and expect that the annual city appraisers need to agree.

COMMENTS: I understand that a waste water disposal plant is proposed to be built in Parker Texas, just north of and practically on the city limit between Parker and Murphy, TX. That same city limit line is the north boundary of the Rolling Ridge subdivision in Murphy, TX. I also understand that treated water would be dumped into the creek at the same location. The creek runs through much of Murphy, not Parker as the water moves south and east. The Rolling Ridge subdivision has homes from \$400,000 to approx. \$1million. The city of Murphy does not need the smell and discharge

from a waste water treatment plant reducing our home values. I am not sure, but I think Parker students might go to school in Murphy (Plano school district) as well. This plant should be somewhere where new homes are not already built. Thank you. E. Bruce Deelaney

COMMENTS: I do Not support the placement of this water treatment facility in Murphy. The environmental impact potential and quality of life impact for Murphy residents is negative. As a Murphy resident, I don't want to deal with the potential airborne chemicals or sewage smells that a facility like this creates, especially living where I would mostly be "downwind" of it. Please consider a different location or alternate plans that would not affect Murphy residents and our environment in a negative way.

COMMENTS: This would be too close to current homes in this area and the smell could be overwhelming! There are other areas further away that would be more suitable. The trucks carrying the solid waste leak and spray cars and streets. This was witnessed with the Los Rios plants in the 90's. It was awful! Maxwell creek CAN NOT handle any thing more! South Maxwell Creek floods and can handle the flow during storms much less with anything additional!

COMMENTS: As a resident of the Maxwell Creek neighborhood in Murphy, I am vehemently opposed to the Waste Water Treatment Facility being considered for construction near North Murphy Road and Rolling Ridge Drive. Aside from the potential impact on the water quality in Maxwell Creek, I have grave concerns regarding the effect this project will have on possible oxygen impurities inhaled by residents, contaminants consumed by wildlife as well as the probability of unpleasant odors associated with a plant such as this. We lived in South Garland while the City dragged their feet trying

to rectify these exact issues, and the poor residents in close proximity to the Treatment Plant had to endure the ongoing stench for many, many years until it was finally fixed. Murphy residents do not want to find themselves in a situation like that. Restore the Grasslands LLC and Harrington/Turner Enterprises LP need to find a less resident-intrusive location for their project. We do not want it here.

COMMENTS: All my family and I are against a wastewater treatment plant just 700 yards northwest of the North Murphy Road - Rolling Ridge Road intersection that is planned to send discharge flowing to Maxwell Creek. We do not want our city's ecosystem damaged. We do not want pollutants from the plant to enter our community. We do not want our air quality to suffer. We do not want negative impact on our lives. We do not want our property value diminished. So, please, STOP any plans to put a wastewater treatment plant here. Thank you!

COMMENTS: I am writing to oppose the pending permit for a waste water treatment plant in Parker for a new high density development. This waste water treatment plant will have the following negative impact on Murphy and surrounding communities: - increased traffic - increase pollution - decrease property value of all surrounding communities - Over crowd local schools - Harm livestock - Harm wild life - create flooding risk Thank you for allowing me to voice concerns over this waste water treatment plant.

COMMENTS: We are OPPOSED to this permit request. I am sure you have many other responses listing the multiple reasons why residents in the area are opposed (air quality, water quality, property values, to list a few). We ask that you bear in mind that this permit would be to the DETRIMENT OF MANY neighboring residents and businesses, while only benefitting a very few, the developer and possibly a few future residents. This MUD in no way benefits any existing

neighbors in the surrounding area, and should not be approved against the wishes of an overwhelming number of existing residents and the affected local governments. Thank you for your consideration.

COMMENTS: I live in Dublin Creek Estates. The size and scope of the water treatment plant proposed (200000 gallons per day) by WQ0016003001 will certainly have a negative effect on our neighborhood. The site is about a quarter of a mile from my house (and the other houses in my neighborhood). The creek being proposed for the dumping of treated sewage runs through our neighborhood. It will be impossible to escape the smell from where we are. Some of the houses in our neighborhood already have the creek backing up into their back yards during heavy rain. Adding treated

sewage to those back yards would certainly add insult to injury. I believe that a site should be chosen that is not right on the edge of the boundary between Parker and the ETJ. We live with and maintain our own septic systems in Dublin Creek Estates, we would rather not add the sight and smell of another 200000 gallons of sewage a day so close. Arthur E. Edwards (Parker,Tx)

COMMENTS: As a resident of Murphy, Texas and Member of the Chamber of Commerce in Murphy, I am very much against the proposed wastewater treatment facility that Restore the Grasslands LLC and Harrington/Turner Enterprises LP are seeking to build. There are great concerns in our City of Murphy including the purity and safety of the water in Maxwell Creek and how that may affect the quality of life for the residents of Murphy, including the wildlife that enjoy that creek, and the children that play in that creek. I have grandchildren that play in that nearby Park, go over the

bridge, and watch the fishes and turtles play there. Please take this into consideration when you make a decision on this wastewater concern, it is very Real to the residents of Murphy! thank you, Mary Pat and Dwayne Elledge, Murphy, Tx.

COMMENTS: This is a complaint about this proposed water treatment plant. It's too close to residential and dumps waste water into a residential parks and recreation creek in Murphy TX. Whoever even brought this idea up is tone deaf to the environmental impact on a small town. Please deny any form of approval for this permit.

COMMENTS: Please don't allow a waste water treatment plant so close to the creek and our neighborhood. Air quality will suffer and will change the eco system in that area. Our property values will likely go down and after living here for 17 years it could affect our future retirements.

COMMENTS: I tremendously DISAPPROVE of building a wastewater treatment plant in the proposed location. The pollution it would create, would simply DEVESTATE our precious community. Families will not want to send their children to an elementary school, let alone live in a housing area with million dollar homes, that is right next to the proposed treatment center location. The negative effects of the proposed wastewater treatment plant right next to our beautiful town of Murphy would DESTROY our wonderful community, which is characterized as highly affluent area

dominated by single-family residences, and known as a wonderful place to raise a family because of all of the outdoor community events. My daughter is horrified by the idea of the proposed water treatment center because she is disgusted and nauseated by the smell of the wastewater treatment center in East Plano every time we have to drive past it. Ultimately, she had to stop playing soccer because the soccer fields are right next to that same wastewater treatment plant which make her nauseous. How will the kids tolerate PE or recess or sports, how will we enjoy outdoor family activities and gatherings, and how will we hold outdoor community events, when the pollution is constant? It's obviously an UNACCEPTABLE LOCATION to place the wastewater treatment plant, so I PLEAD with you to DENY THE REQUEST.

COMMENTS: I am deeply disturbed by the proposal to build a sewer treatment plant next to our neighborhood elementary school here in Murphy, TX. The plant would poison our creek, where we all fish, and pollute the air we breath daily. The proposal puts the plant right next to our elementary school, where our young children would be breathing these toxic fumes regularly during recess and PE. Therefore, if the sewer treatment plant is built, there will be numerous lawsuits due to the toxic fumes, which cause suppression of the respiratory center in the brainstem, severe

systemic poisoning, upper respiratory irritation along with eye irritation and depression. The pathogens that are transferred through houseflies, cockroaches and other pests, will also add to the medical bills and ensuing lawsuits. I plead with you to deny this permit. Thank you for your time.

COMMENTS: Three years ago, we made the decision to move out of Dallas due to air quality and a disappearing ecosystem that was destroyed by overdevelopment. We chose Parker specifically for the lack of wastewater treatment and the commitment to preserve the air quality and ecosystem. We absolutely oppose the proposed wastewater treatment facility due to its assured negative impact on the local ecosystem, air quality, and local quality of life. There are so many other local communities that have been set up in similar fashion to what's being proposed here. Parker is a

small community and nearly every resident purchased their property with the local commitment to maintaining a specific quality of life. Although we are few, surely air quality and quality of life in this small area count for something. Please deny this proposal and allow us to save this ecosystem and way of life. Thank you.

COMMENTS: To Whom It May Concern: I wish to file my complaint and stop the proposed Parker Extraterritorial Jurisdiction ETJ Wastewater Plant on Murphy Road into Maxwell Creek. It would be a disruption to the serene neighborhoods (one main reason I moved to Murphy, TX), it would bring unwanted smells, and it would bring down the

value of our homes. You cannot convince me otherwise because I know what has happened to people living near Parker and Los Rios in Plano, TX. Sincerely, Marilyn J. Ferguson 542 Wyoming Dr. Murphy, TX 75094

COMMENTS: There are two creeks intersecting on the back of our house and we're deeply concerned about the negative impact the water treatment will surely have. Not only we won't be able to be outside freely because there would a horrible smell but also our kids' daily outdoor activities will be certainly restricted since the air quality will regrettably be diminished. Nobody wants their children to be breathing a polluted and disgusting air indeed. In fact, we moved into Murphy because of the beauty of its parks, neighborhoods and nature that is all around. The water

treatment plant will negatively and undoubtedly affect Murphy and the cities nearby. The value of houses will depreciate and residents will be forced to move adding stress to a society who is already undergoing economic struggles. Even more, I can't shake the idea that the water in the area will not just smell badly but also damage our ecosystem and kill many animals. Finally, I simply cannot fathom how a reasonable person could accept such a plan with the sole purpose of gaining money at the expense of making families, children and wildlife suffer.

The value of houses will depreciate and residents will be forced to move adding stress to a society who is already undergoing economic struggles. Even more, I can't shake the idea that the water in the area will not just smell badly but also damage our ecosystem and kill many animals. Finally, I simply cannot fathom how a reasonable person could accept such a plan with the sole purpose of gaining money at the expense of making families, children and wildlife suffer.

COMMENTS: There are two creeks intersecting on the back of our house and we're deeply concerned about the negative impact the water treatment will surely have. Not only we won't be able to be outside freely because there would a horrible smell but also our kids' daily outdoor activities will be certainly restricted since the air quality will regrettably be diminished. Nobody wants their children to be breathing a polluted and disgusting air indeed. In fact, we moved into Murphy because of the beauty of its parks, neighborhoods and nature that is all around. The water

treatment plant will negatively and undoubtedly affect Murphy and the cities nearby. The value of houses will depreciate and residents will be forced to move adding stress to a society who is already undergoing economic struggles. Even more, I can't shake the idea that the water in the area will not just smell badly but also damage our ecosystem and kill many animals. Finally, I simply cannot fathom how a reasonable person could accept such a plan with the sole purpose of gaining money at the expense of making families, children and wildlife suffer.

COMMENTS: Hello, I am Stephanie Figueroa one of the residents in Murphy. I would like to put in a complaint against the development of wastewater treatment plant near the city of Murphy. I feel this wastewater plant will affect my family negatively. Placing a wastewater plant can potentially cause pollutants affecting the air quality and therefore being a health hazard to all residents. Having a wastewater treatment will also increase pests in our community. Please do not approve the wastewater treatment plant in our community. Thank You

COMMENTS: I am vehemently opposed to the wastewater treatment facility proposed for Rolling Ridge. The discharge into Maxwell Creek would be a blasphemous insult to Nature. That creek supports wildlife and sustains our community. Our families walk, play, and bike along the banks. Our children frolic in the surrounding green spaces, recharging after endless hours behind screens. This asset to our community must be preserved against corporate exploitation. Not to do so would rob us all of a natural resource that helps sustain us.

COMMENTS: Please do not approve this permit. The creek runs along my niece's property, and it has flooded into her yard on numerous occasions. She and her neighbors also have young children, as well as chickens on their land, and wastewater possibly leaking into the creek could cause illness to the children, and could possibly cause illness or death to the chickens. I fear that building the wastewater plant so close to a creek near housing developments will pose a threat to the safety and land values for these communities. Thank you. Susan Lynn Friedrich

COMMENTS: Please deny this permit as it would be of tremendous detriment to this community. The idea of having a sewage treatment plant within eyesight of an elementary school is bad enough, but the proposal to completely pollute our communities natural water feature is insane. This project would not benefit this community in any way, and I have yet to speak to a single resident that is seeing any upside to it. The end result would be the downgrade of a pleasant

residential area to an open toilet, and would have huge environmental impacts. Please force this developer to look into other alternatives to utilize and existing treatment plant in the area so that negative impacts can be avoided.

COMMENTS: as a resident living right next to the Maxwell Creek in the Maxwell Creek community, I'd like to oppose this request to build sewage treatment that will discharge foul odor treated water into the creek. The area by the creek is one I and my children frequent often. It is of note that it is also close to city parks and schools. Please consider an alternate location for this water treatment facility. Thanks - Italo

COMMENTS: I am strongly against the building of this waste water plant. It will damage the city's ecosystem, there are potential pollutants from the plant that will enter our community, our air quality will suffer, the potential smell from the plant and it's drainage will be something that will not be controlled because of prevailing winds, our quality of life damaged and goes against why we moved out to Parker. My property value will be diminished, run off could have negative impact to Maxwell Creek and the downstream environment and wildlife as well as smell and potential flooding.

This are does not need a waste water treatment plant and it goes against why people have moved out to Murphy and Parker. Please do not allow the building of this plant. Thank you, David Fronk

COMMENTS: To whom it may concern: I did want to comment on the fact that this potential future sewer waste treatment facility is having and will continue to have an impact not only on Rolling Ridge Estates. Furthermore, this could potentially have a trickle down effect to other subdivisions within and around Murphy and Parker. I am a residential real estate agent and my sellers were recently terminated on a contract due to the fact that buyers (per their agent) coming in the area grew concerned with the potential future waste treatment facility could impact the value of

their home in the future. I do not see how this facility could have any positive impact on the surrounding home owners properties and lifestyles. I truly hope that this future facility does not come to fruition, as I personally think it's a horrible idea.

COMMENTS: This treated wastewater will be put into Maxwell Creek and then directly flow into the heart of the city of Murphy. The city of Murphy was settled on this creek in the 1800's and today it flows right through the middle of it. There are 2 historic cemeteries off of it, multiple parks, trails, backyards, and schools. Kids are always playing in it. It is a jewel in the middle of our town with clear water and natural habitats. Today the water is clear and you can see the rock bottom of the creek at all times of the year. This site would totally eliminate this with more algae and constant flow. I

am concerned about the health of the people and the environmental effects. This could totally change the natural flow of this creek and increase the algae. Any issues with this waste water site would hit our town hard. People are very scared. Please do not allow this.

COMMENTS: This treated wastewater will be put into Maxwell Creek and then directly flow into the heart of the city of Murphy. The city of Murphy was settled on this creek in the 1800's and today it flows right through the middle of it. There are 2 historic cemeteries off of it, multiple parks, trails, backyards, and schools. Kids are always playing in it. It is a jewel in the middle of our town with clear water and natural habitats. Today the water is clear and you can see the rock bottom of the creek at all times of the year. This site would totally eliminate this with more algae and constant flow. I

am concerned about the health of the people and the environmental effects. This could totally change the natural flow of this creek and increase the algae. Any issues with this waste water site would hit our town hard. People are very scared. Please do not allow this.

COMMENTS: "Stop the process. TCEQ should be following Regionalization. According to NTMWD the proposed wastewater treatment plant permit WQ0016003001 would interfere with NTMWD's statutory right, privilege, and economic interest as the TCEQ-designated regional entity to collect, transport, treat, and discharge wastewater within the Regional Area. ** Specifically**, the Application indicates that the proposed WWTP will allow the Applicant to collect, transport, and treat wastewater from a proposed 101-acre tract that will be developed into single-family

residential subdivision, in close proximity to the towns of Parker, Lucas, Murphy, and Plano, in Collin County, which is located in the watershed area of the East Fork Trinity River in Collin County, and therefore falls within the Regional Area designated to NTMWD. In short, granting the TPDES permit to the Applicants violates applicable statutory requirements pertaining to the state's regionalization policy in Texas Water Code ("TWC") Chapter 26 as well as the TCEQ's own regionalization regulations at 30 TAC Chapter 351, Subchapter C. I support the State's Regionalization policy and EXPECT TCEQ to follow their own policy. The permit should not be granted and never should have reached this phase. We are aware that NTMWD's treatment process is state of the art compared to a WWTP. It is now time to show that TCEQ's mission is to Protect Texas by Reducing and Preventing Pollution

COMMENTS: Hello, the citizens of Murphy, myself included, absolutely oppose any waste water or water treatment facility. Especially one that will emit odors or discharge water into Maxwell creek. Maxwell creek is a protected no discharge of waste water body of water so this should automatically disqualify. I am unsure of how a proposal of such could even be considered directly behind a neighborhood or community of thousands.

FAX:

COMMENTS: We adamantly oppose this MUD. We do not want to see our home values plummet. We also are not interested in being assaulted by vile fumes every time we step out the door. It is obvious this is just a work around Parker's one acre requirement, which is why people love Parker so much so this obvious move is detested. There is capacity available from the City of Murphy for proposed development. I am concerned about the drastic change that would result in the community of Murphy & Parker. I know this would have a negative effect on the wildlife and it would

increase flooding potential since we have that issue in some of the areas. We have purchased homes in Murphy & Parker due to the environment (ranches and lots with acreage as well as nice size lots providing a backyard) and schools. While we all anticipated homes will go up in the Parker area, we never anticipated a MUD. Please do not allow this atrocity to take place and ruin the amazing community we have here. There are enough families struggling in the past few years from covid, the last thing people need is for the value of their homes to decrease.

COMMENTS: I strongly oppose this permit. I live in the Rolling Ridge subdivision of Murphy which is .5 miles away from the proposed site. I do not want a water treatment plant nor MUD. It could have potential environmental impacts such as flooding and driving out wildlife, not to mention decreasing our property values or that Murphy is already at capacity for a big development such as this. It will have a strong odor and is too close to existing homes. Erin Griffin

COMMENTS: As homeowners is the City of Murphy and along Maxwell Creek where the proposed plant would discharge through, we do not want something like this being in our city or running through the creek near our home. It will not be good for our home values, it is not good for the wild life, and we don't want to deal with the other negative potential side effects that could occur from a plant like this being placed in our city.

COMMENTS: I live in Murphy, approximately 1 mile south of proposed wastewater treatment plant. I oppose the placement of this plant that will benefit only the developers of this land, while being a detriment to the surrounding communities. The odors that would undoubtedly emanate from this plant will decrease our ability to enjoy time outdoors, whether our own backyard or nearby parks. Proximity to this plant would also likely have a negative effect on our ability to sell our house.

COMMENTS: I sincerely oppose the installation of a MUD waste water treatment facility in North Murphy for a development in Parker, TX. This is an area already impacted by a wastewater treatment facility located just southwest of the proposed, and an area already heavily impacted by suburban sprawl on one of the few small creeks in the area servicing multiple parks and green spaces. Efforts to try to restore to some extent the environmental impact have been done over the years and this installation does nothing but two put a unnecessary strain on an ecosystem that's been

heavily impacted. This development is in no way essential to this area. It borders already heavily dense neighborhood developments and brings no value beyond the desires of one property development. This is not an essential nor Community benefit in development and only impacts existing problems in our area.

COMMENTS: Dear Sir/Madam, I am writing this letter of objection for the construction of proposed Wastewater treatment plant in City of Parker which is in close vicinity to our neighborhood. This is very close to the Rolling ridge community, the stench it causes, the harmful chemicals that will be used in the water treatment. This is very harmful to humans as chemical reactions can get airborne with the associated germs and bacteria and it would detrimental to

general health of the public in the surrounding areas. This would also decrease the property values in our community. We hereby object to the construction of the wastewater treatment plan. Thank you for your time and consideration. We would hereby request not to approve of the proposed project to construct the wastewater treatment plant. Sincerely,
Surendra. H

Dear Sir/Madam,

I am writing this letter of objection for the construction of proposed Wastewater treatment plant in City of Parker which is in close vicinity to our neighborhood. This is very close to the Rolling ridge community, the stench it causes, the harmful chemicals that will be used in the water treatment. This is very harmful to humans as chemical reactions can get airborne with the associated germs and bacteria and it would detrimental to general health of the public in the surrounding areas. This would also decrease the property values in our community. We hereby object to the construction of the wastewater treatment plan. Thank you for your time and consideration.

We would hereby request not to approve of the proposed project to construct the wastewater treatment plant.

Sincerely,

Surendra. H

COMMENTS: I am a resident of Maxwell Creek community and recently became aware of the sewage plant being developed. I am very concerned about the development of this plant in the vicinity and fully opposed any such development. I moved to Texas and in particular bought and settled in Murphy, TX after doing research about the any environment and presence of any such industrial plants. I urged the city of Murphy to take actions against such and

reject the development of such. This will create an nonliving smell and unsanitary conditions. I beg to city officials to please come forward and reject this development near our area.

COMMENTS: As a resident of Murphy who would be negatively affected, I am commenting to oppose this application. The application proposes building a water treatment facility that would discharge 200,000 gallons per day into Maxwell Creek. Murphy lies immediately downstream of the proposed location and would bear the vast majority of negative consequences of this development. The proposed water treatment facility would negatively affect the quality of life and property value of Murphy residents. The noise and smell would be a daily nuisance. My house is located approximately

1.3 miles southeast of the proposed site. I would be negatively affected if it is approved. Maxwell Creek Trail is the major outdoor recreation area in Murphy. Maxwell Creek runs through the center of this area and is the key feature of the trail. The Maxwell Creek Trail and the surrounding parks are heavily utilized by Murphy residents. In addition to walking and biking trails, there are playgrounds, fields, and athletic facilities utilized for youth sports. My wife and I spend at least 4 hours weekly walking or biking along the trail. It is common to see children playing down along the creek. It is common to see mountain bikers riding on dirt paths down near the creek. It is the only trail of sufficient length for biking in Murphy that is free from vehicle traffic. Proximity to Maxwell Creek Trail was one of the main reasons our family decided to purchase a home in Murphy. Allowing the wastewater plant to discharge into Maxwell Creek would negatively affect flora and fauna and would ruin the beauty of one of the few green spaces in Murphy. The proposed development is in the city of Parker. Parker stands to reap the gains in tax revenue from this development. The developer stands to make money from building the development. Under the proposal, Parker and the developer receive all the net positives while the residents of Murphy are burdened with the negative consequences. It seems only fair that Parker and the developer should shoulder the burden of providing sewer service to the proposed development. Surely, there is a more equitable solution than the current proposal. Thank you for your consideration.

COMMENTS: We are strongly opposed to the MUD being proposed in the Parker City ETJ. We have owned and lived in our home in Murphy for 40 years. The proposed multifamily housing with the MUD is located right next to Murphy residential homes and is in conflict with our surrounding SF-20 zoned homes. Please do not approve the request for the water treatment plant and the MUD.

COMMENTS: I adamantly object to the proposed plans to develop a water treatment facility/plant along Murphy Road and Rolling Ridge Dr. This is less than .4 miles from our homes!! Per our mayor, the city of Murphy infrastructure is more than sufficient to support any potential new buildings in the area. The city of Murphy TX (adjacent to the city of Parker) is a small 4 square mile city, which is built out with no room for additional growth. As history has proven, waste water treatment plants devalue surrounding properties substantially. As property values go down, Murphy's tax base will

diminish too, causing a shortage of operational funds, which in turn causes tax increases to make up for those losses. A better suited area would be somewhere with an abundance of open undeveloped property! We are adamantly against anything that destroys our limited natural resources and affects our property values.

COMMENTS: A water treatment plant should not be permitted in this area! All of our home values will drop, many of us will be forced to sell our homes and move. The smell will ruin our lovely neighborhoods and this will be the beginning of the downfall to this area. Many people are talking and complaining on the next door app and some have already stated they're selling their houses ASAP. There's a facility like this off of Los Rios that has destroyed those neighborhoods. We work way too hard to be able to live in a nice safe neighborhood. Please don't push this through. Several neighbors of

mine are already talking about selling their homes before they drop too low in value to be able to get out. Thanks,
Eastan Harris

COMMENTS: The proposed wastewater treatment plant 0.4 miles northwest of the North Murphy Road – Rolling Ridge Road intersection to accommodate a new development being proposed within Parker is a blatant disregard to the health of the residents of the City of Murphy. Wastewater treatment plants are a major source of aerosols and constitute an important health risk for all surrounding inhabitants. Bioaerosols contain different types of microorganisms such as viruses, pathogenic bacteria, and fungi, capable of causing skin, digestive system, respiratory, and nervous system

diseases and human allergies. These are real, significant, and imminent risks of harm that you will be exposing our children and families to.

COMMENTS: This application has been filed by an organization that does not legally exist. For that reason alone this permit should be denied. In addition, approving the TPDES permit to the Applicants violates applicable statutory requirements pertaining to the state's regionalization policy in Texas Water Code ("TWC") Chapter 26 as well as the TCEQ's own regionalization regulations at 30 TAC Chapter 351, Subchapter C. There are absolutely zero reasons for this MUD to be built when there are other facilities that service the region.

COMMENTS: There is a proposed waterwaste treatment plant proposed on Murphy Road just north of Betsy Lane. This will discharge 200000-800000 gallons of treated water in Maxwell Creek. This plant will directly affect the City of Murphy, TX. I am very concerned as a homeowner in Murphy that this will grossly reduce my home value, it will be extremely harmful to wildlife surrounding the area, deer, raccoons, birds, rabbits, etc and specifically some of the protected species like the bald eagle, great horned owl, and red tail hawk. It will continuously pollute the creek and

ponds near by and be harmful to nearby livestock. Finally the concern of flooding which can be dangerous to the residents and homes in all affected areas. This plan needs to be dismissed immediately.

COMMENTS: This request should be denied. Adding such dense housing in an area with very large lots is a bad idea, or the city would have planned for such a community. At the very least, the location of any waste treatment facility must be moved to the furthest point of the development away from existing neighborhoods or the developer required to acquire adjacent land farther from existing developments to which the waste from any development could be piped.

COMMENTS: We live less than 2 miles South East of this location. This puts us downwind from the chemicals and smells. Our yard is pesticide free and we work hard to protect the environment and our family's health. When we chose our home 11 years ago we searched fo a home away from treatment plants. To have one put into our "backyard" without the local nearby cities input is very concerning. Health risks and lower home values make me opposed to this treatment plant.

COMMENTS: I oppose this permit based on the proximity to my home and the schools that my children attend would be too close to this treatment center. It would negatively impact them through atmospheric emissions and through liquid effluents. Additionally, the building of this type of facility will reduce my home value as it has in many other neighborhoods which is unacceptable. Please have the developer and the cities of Murphy and Parker work out a mutually beneficial agreement that does not involve constructing the new treatment facility.

COMMENTS: I do not want our local creek contaminated, pollutants both in the air and water will diminish the quality of our community and adversely affect property values. Having lived near the Rowlett treatment plant, I am familiar with the foul odors that come from the plant that makes being outdoors on some days intolerable. I do not want that in our community where we pride ourselves on our park spaces and outdoor events. Our greenspace along the creek and the

creek itself must be protected Visitors from around the world stop at Southfork to take pictures, let's not have a plant that gives that experience a sour note with smelly air. Please do not allow this in our small community!

9th November 2021

Texas Commission on Environmental Quality

PO Box 13087
Austin, TX 78711-3087

Dear Commission Members,

Thank you for listening to my concerns. I am writing to you regarding the Parker ETJ Wastewater Treatment Plant (TCEQ Permit ID: WQ0016003001). I ask you to reject this permit both for the health and safety of the citizens of Murphy and for the well-being of our natural areas and parks.

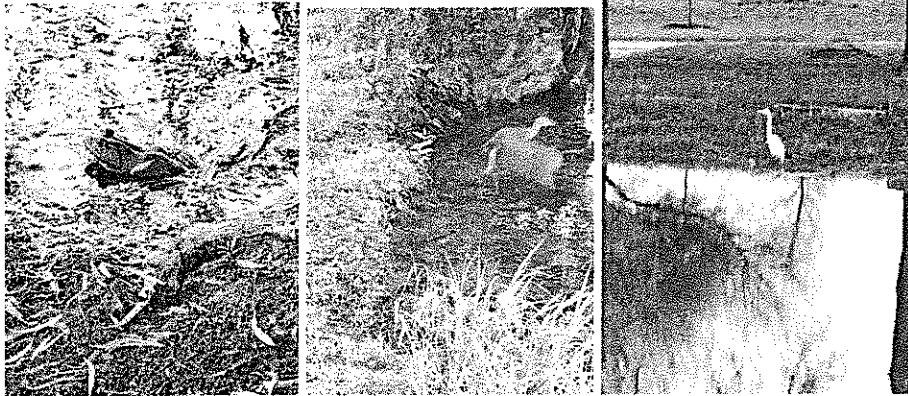

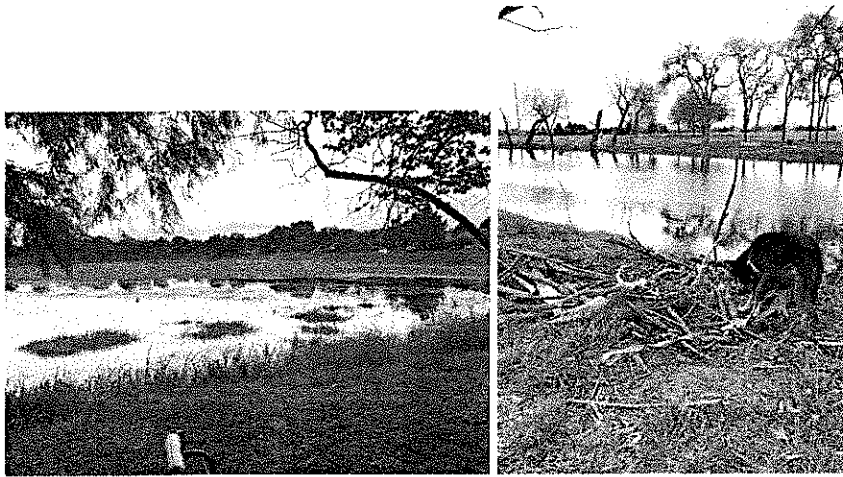

The output from this sewage plant would flow into Maxwell Creek. This creek flows through several city parks. I have specific concerns as it flows adjacent to the Timbers Nature Preserve. My wife and daughter and I spend a great deal of time there. It hosts a surprising variety of wildlife including beavers, coyotes, hawks, herons, egrets, several species of ducks, turtles and frogs. The creek supports this rich web of life.

It gives me great joy to see other families there fishing, picnicking, exercising and birding. The park has been invaluable to the community during the COVID pandemic. Many of our neighbors spend more time there now because they discovered its resources during periods of closures and social distancing. Intersections of suburban life and native flora and fauna are precious. We are obliged to give them as much protection as we can.

What touches the creek touches adjacent waterways and ponds and those of us that enjoy them. Spring and winter rains bring the creek into the park. Please keep my community, my family and me and our green spaces safe.

Regards,

Daniel Hill

Sunset after a heavy rain that flooded back towards the neighborhood;
Penny (my dog) exploring a beaver's den; a bullfrog, a camera-shy great
blue heron and an egret

COMMENTS: I DO NOT SUPPORT THE SEWAGE PLANT PROPOSED FOR MURPHY, TEXAS!! We live in Maxwell Creek and often walk the trails with my family. We do not want sewage waste in our back yard for our family or the wildlife that resides in the area. This is cancer and other health-issue causing contaminants and it should not be allowed in such a populated area.

COMMENTS: I am commenting against the proposed wastewater treatment plant projected to be located near Maxwell creek. This area's ecosystem is incredibly delicate, and discharge from the plant will run into this area and cause immense damage. I enjoy using these trails and the Lake Ray Hubbard area for recreation, and would hate to see any harm come to it. We need to preserve these areas so others can enjoy them, not treat them as a dumping grounds for treating wastewater.

COMMENTS: I'd like to go on record to say we are adamantly opposed to the proposed water treatment plant in Murphy. The plant would adversely affect the quality of life in our neighborhoods. For the past 13 years we've lived in Murphy, the city fathers have been touting Murphy as an upscale area offering "country living in the city". Nothing could be further from the truth. A wastewater treatment plant so close would cause property values to decline and cause

further damage to our ecosystem and air quality. Please do not allow this to happen so close to densely populated neighborhoods.

COMMENTS: I am strongly against this water treatment plant going forward . The negative effects on the environment both in the immediate location and also downstream would be a disaster to animal and plant life alike.

COMMENTS: As a resident that lives in Rolomg Ridge estates we moved here because of the quality if this water treatment and community are out in our backyard it diminishes what makes this city so great. Please anyone that can make a decision take a look at the long term future of the quality of town that we have worked so hard to live in. This will back up to the most expensive homes and sit across from the beautiful south fork Ranch which is historical. People are already looking at moving and the internet is growing crazy- please don't lose the quality of residents by letting a

private company literally allow our ecosystem to become full of waste. The residents deserve better and if not will move taking tax money away replaced by the masses that will dilute This great city

COMMENTS: While I do not live in a home directly affected by this proposal, I do have a son who attends Hunt Elementary, which adjacent to the project. This project has the potential of drastically affecting the ability of the kids to enjoy their time outside (smell, because no matter what they say, it will). Additionally, kids play in the area parks surrounding Maxwell Creek and the risk of that area becoming less than welcoming is concerning to me as a parent and a citizen who lives near this area.

COMMENTS: This proposed MUD district is planned to dump into Maxwell Creek which runs through several Murphy neighborhoods. Along this creek are various parks and walking trails. The dispensing of waste into this creek shed will have a negative impact to not only the enjoyment of these areas but the wildlife that utilizes the undeveloped area. The next concern is property values of homes in the vicinity of the creek as well. Please have the permit applicants provide economic and environmental impact studies to the general public.

COMMENTS: I don't believe this type of facility should be located in the vicinity of an elementary school and an existing and thriving neighborhood. The impact on air quality and simply the quality of life is far too significant. People should be given the choice whether they would want to live nearby such a facility rather than it being dropped into their daily life. An entire neighborhood made a conscious choice to move into a place that is at least 15 minutes removed from major

highways and densely populated areas for the quality of the air and the relative calm of a more rural and relaxed lifestyle. This choice should be respected and the benefit of one at the cost of many should not stand.

COMMENTS: I am a 20+ year citizen of the City of Murphy, and I am opposed to the proposed water treatment facility that is proposed to be built only right outside our city limits. There are numerous concerns of the resulting negative impacts to our air quality, chemical/sewage runoff into Maxwell Creek, and overall impact to the quality of life. This area is too densely populated with schools and residential developments, to realistically accommodate such a treatment plant. Thank you for considering my concerns.

COMMENTS: I oppose (vote against) the proposal of waste water treatment facility at this site. It will directly affect the air quality and reduce my property value. Moreover, it will pollute the water creek, makes surrounding area of Parker, Murphy, and Wylie less desirable, and reduce property value. Furthermore, 100s of elementary students at Martha Hunt Elementary (PISD) will breathe polluted air every day. My family will breathe and smell foul chemical from the facility.

COMMENTS: I would like to file a formal complaint against the proposed wastewater treatment plant to be built 0.4 miles northwest of the North Murphy Road and Rolling Ridge Road intersection in Parker, Tx. I object to this facility being built close to my neighborhood and polluting my community.

COMMENTS: My Family and I strongly oppose the proposal and planned construction of a such an environmentally obtrusive water treatment plant in the City of Murphy. The significant negative impact to our air quality with the harsh chemicals utilized in such a facility as well as the sewage smells emitted create a harmful and hazardous environment for our families, friends and communities.

COMMENTS: Seriously, you want to put a wastewater treatment plant in a residential area? If that is the case, please put the wastewater treatment plant in your back yard. I just can't imagine that this will help home values. I'm sure it won't increase the value of anyone's home. I guess you have an environmental impact statement; how could that be a positive influence on the ecosystem. The, of course, you want to dump into Maxwell Creek? That is a sickness just waiting to happen, and that creek runs nearby numerous homes, mine included. this plant would only screw up air

quality. We don't want more pollutants in this area. This is one reason I moved here; to get away from pollution and people who want to build wastewater treatments plants near residential areas. This most certainly will negatively impact the quality of life in this area. Right now, the quality of life is pretty darn good. Why do you want to screw it up? If you just have to do this, put it on the property of South Fork Ranch. I'm sure they don't want it either. Please listen to what people have invested in this area are saying. Stop. Now. Ralph C. Jensen

COMMENTS: As a resident of Murphy, TX, I oppose this permit. My house is within .25-.5 miles of Maxwell Creek. My family has been hiking the Maxwell Creek trails and surrounding park area for nearly 20 years. I am concerned about the quality of water for the environment, animals, and people who enjoy this natural recreation area. In such an urban area like DFW, we rely on these stretches of nature for physical and spiritual refreshment, as well as learning opportunities for children who grow up in the city.

COMMENTS: Having just learned about the permit request for the sewage treatment plant, I am requesting that additional time be given to learn more about the project and its impact on nearby neighborhoods. I am now a Rolling Ridge homeowner, but lived in the Los Rios neighborhood for 23 years. I am painfully aware of the impact of wastewater treatment plants on the neighborhoods nearby. The Los Rios plant does not seem to be run well. It frequently stinks and often emitted sewage onto the golf course (which I lived on), especially during heavy rain. These waste water treatment

plants need to be located further from homes. Based on my experience living in Los Rios, I do not trust that this new plant will be odor free and maintained in a manner to prevent a detrimental impact on nearby homes. Please consider denying the permit and requiring that construction be done further from neighborhoods. Thank you for your consideration. Kathy Jones

COMMENTS: I strongly oppose and beseech you to reject a proposal by a developer to build a waste treatment plant in Murphy for the benefit of a neighboring town. This proposal is vehemently opposed by all townspeople as it will be a detriment to our environment and neighborhood. The proposal is outrageous and needs to be rejected.

COMMENTS: Please do not approve this permit. I live in The Ranch subdivision. My family and I spend a lot of time outside and bought our forever home 4 years ago because of its pool, proximity to Maxwell Creek and green spaces. I am very worried about the amount of changes to our life if this permit is approved. Please do not approve a "Poo Poo Plant Permit" in Parker. I do not want to experience a permanent odor that occurs in the vicinity of wastewater treatment plants and have constant worry when we play in Maxwell Creek.

COMMENTS: I have strong opposition to this MUD Waste Water Treatment Facility coming up near my house that is near Maxwell Creek. This will destroy the natural habitat and ecology of this area around Maxwell Creek. Please stop this development and destruction of environment in my neighborhood right now!. Moreover this will cause significant financial harm by reducing the property value of my primary residence located here in Murphy near Maxwell Creek. The

natural habitat of this area is the primary reason I have settled in Murphy. The Waste Water Plant will significantly impact the quality of my life here in Murphy.

COMMENTS: One of the existing uses of Maxwell creek is for recreation. Children play in the waters of Maxwell Creek. The city of Murphy has a "Preserve at Maxwell creek" and residents understand this to mean that the area is not polluted. Adding effluents into the water can be hazardous for humans. If TCEQ claims that the treated effluent water is safe, then I will be satisfied if TCEQ directs that this water be supplied to the new development that is creating this waste water instead of discharging into Maxwell creek. I am sure that this treated water will have a smell which is why it

is not being reused by the new development. TCEQ is not considering all aspects of environmental impact. There is comparatively high population density near Maxwell creek, therefore the impact is larger than areas that are newly developing. Environmental impact to humans is more important than endangered species and minimum water quality that TCEQ is limiting itself to. Air quality is a major concern that this permit does not seem to be addressing. Why is TCEQ not considering all aspects of the environment? Residents along Maxwell Creek have been here first and have a right to be heard before the permit was processed. There was no notice to residents. We found out from neighbors because someone started an awareness movement. There seems to have been a planned effort to keep residents in the dark for fear of opposition. When the residents found out, every one is complaining and wondering how a development like this can happen without input from the public. Flooding possibilities downstream are another concern. TCEQ seems to have limited its study to the facility itself being affected by a flood, not of the facility causing flooding in areas that currently do not flood. I believe that due diligence is not done and TCEQ limited itself to water quality rather than environment.

COMMENTS: The proposed wastewater treatment plant is adjacent to our community. We have parks that have ponds that get water from Maxwell Creek. We object to a water treatment plant right next to residential areas. We object to discharge of treated water to downstream communities due to the associated smell and chemical use. The parks in our community will be less safe for kids. The location is such that it is within the city of Parker, but does not affect city of Parker residents because they are all upstream of the plant. This facility can be moved to somewhere towards the center

of Parker which is the area this plant is likely to serve. It is unfair and discriminatory to Murphy residents having to bear the brunt of the pollution, noise, chemicals when the plant does not benefit them. The fish and turtles in our community ponds will be adversely affected. Maxwell creek is a recreational area that does not deserve to be destroyed with this plant.

COMMENTS: We are absolutely against this Dallas company putting in a waste water treatment plant in Parker behind the rolling ridge neighborhood. This would be detrimental to our quality of life, for those of us who live close to the plant. This would cause harm to the surrounding environment. We cannot begin to describe how this would effect residents and our property value. This cannot happen.

COMMENTS: Please do not build the proposed wastewater treatment facility near our home. The Maxwell Creek community and park would be greatly impacted by the project. My family and I moved to this area almost five years ago, with the Maxwell Creek Park being one of the highlights of our move. The creek that runs through the neighborhood might be impacted by any discharge that might come from the wastewater plant. Please help us keep the bit of nature that we have clean by not building the proposed waste water treatment plant.

COMMENTS: I wish to express my extreme contempt for the proposed construction project in southern Parker TX, east of Murphy Road butting against the Murphy city limit. I have been a Murphy resident since 2007 in this area and strongly believe the proposed wastewater treatment plant will diminish our homeowner quality of life in the following ways: Total destruction of the rural ecosystem and all of its beauty. Suffered air quality. Odor from treatment plant effluents, biowaste, and relevant chemicals. Constant noise and light pollution from pumps and area lights running

24/7/365. Significantly deteriorated property values. The construction of this project contradicts everything that I love living in Murphy for (and I suspect the same of all north Murphy residents) and I wish for it to be denied. Regards, Chris Kelley

COMMENTS: I oppose the wastewater treatment plant discharge permit and the development of a municipal utility district (MUD) to TCEQ for approx 100 acres of undeveloped land not located in Cities of Murphy or Parker. It's directly north of the Murphy Rolling Ridge neighborhood. POTENTIAL ISSUES: Facility failure and untreated water dumping. Stinky creek in your backyard. Increased risk of flooding (Maxwell Creek is in a flood zone) according to the FEMA Flood

Zone map. Threat to wildlife. Unsafe water conditions near the creek (parks). Unsafe air and algae. Impact towards home values Thank you for your help in disallowing this

COMMENTS: Oppose the waste treatment plan due to flooding issues of Maxwell Creek. Our property backs up to Maxwell creek and we are in the 50 year flood zone, however, several neighbors houses have flooded at least two times in the last 27 years we have owned our home. We do not need additional water dumped into Maxwell Creek causing more flooding and increased dangers to the elderly living in the homes along the creek. The noise and smell from the waste treatment plan will not allow us to enjoy our property as we have done so for the past 20+ years. The wildlife we

observe such as coyotes, bobcats, and birds will be impacted by this wastewater treatment plant. This permit should be denied.

COMMENTS: I totally against the construction of wastewater treatment facility. This is absolutely wrong as it would change the way residents would live their life outdoor and indoor. This would also affect the well being and cause tremendous stress for residents when such treatment facility or compound is built close to such a beautiful neighborhood. There is a elementary school. How someone would propose the construction of such without thinking the effects. Think about the creek that supports wildlife and others. The peoples - who are "For" this proposal should

buy a house in RollingRidge community and then build the wastewater treatment. The selfish, careless governing bodies only talk and think about numbers and their pocket. We as residents of RollingRidge strongly oppose such and will fight against it.

COMMENTS: I do not support this development as it will negatively impact our neighborhood and the elementary school. This development will destroy local wildlife and bring property values down. There is zero benefit to the residents or the community from adding a WWTP in this area and offers only negative consequences. Neither Patker nor Murphy will have any advantage from this and neither city wants it. This development should not be allowed as the cities have not planned neighborhoods in accordance with have a waste treatment facility in this area.

COMMENTS: The proposed location is .4 miles northwest of north Murphy Rd and Rolling Ridge Dr. This is a RESIDENTIAL area, in case anyone has bothered to look. Wastewater treatment plants do NOT go into residential areas, they are placed at the edge of any city, in remote locations, to prevent issues involving the prevalent odor of sewage, impact on the local wildlife, insect proliferation, and noise. Every single wastewater treatment plant I've ever seen in 66 years has had these issues, and that's WHY these things get built FAR OUTSIDE of residential developments. Not to

mention they look terrible and would obliterate our home values. In addition, there is still available capacity from the City of Murphy for proposed development. Why on EARTH would anyone want to place this monstrosity in a residential area? Placing a treatment plant in the proposed location would have a terrible impact on the local communities of both Parker and Murphy. I have questions about how this installation would affect flooding in those areas that currently are prone to flooding, as well as the impact to areas not currently affected by flooding. Finally, I am concerned with the environmental impact to the surface water and groundwater. There has never been a wastewater treatment plant built that had zero environmental impact, and this idiotic proposal wants to place one right in the midst of an area zoned for and built out as residential. If this beast is even needed, a far, FAR better location would be at the edge of town, where there are NO HOMES and NO RESIDENTIAL developments.

COMMENTS: I am not in favor of the proposed 800,000GPD sewage treatment plant near Hunt Elementary. Smaller treatment plants are NMITC desirable for residential areas and are not as effective in removing bacteria and solid matter as larger tertiary treatment plants. I spend time weekly in the downstream watershed in the Maxwell Creek preserve and fear that the Maxwell Creek would be negatively impacted. I regularly see fish, mammals and even swimming children in this riparian zone, which would be impacted with upstream effluent being injected into this watershed. A

better solution downstream of the 1.5 mile linear park frequented by families is strongly requested from this longstanding outdoorsman.

COMMENTS: Where I went to college there a water treatment near by the college. When the wind blew out of a certain direction the smell was terrible. I feel the construction of a water treatment in our neighborhood will destroy the neighborhood appeal for present & future habitat. The value of the homes will also go down drastically. BAD IDEA for Murphy! I would be looking to move, sooner than later, if this is going to happen!

COMMENTS: I'm extremely angry about a developer's plan to put in a waste water treatment plant as part of a residential development near the intersection of Murphy Road and Rolling Ridge Drive in Murphy. I have owned a home at 1319 Overland Drive in Murphy for 11 years. I am two houses south of the Overland Drive and Rolling Ridge intersection. On the other side of Rolling Ridge is the land where this plant could be built. It will be impossible for residents in the neighborhood to live with the odors, air and water pollution from this plant. It will also pollute nearby

Maxwell Creek. Hunt Elementary School is on Rolling Ridge Drive. The students shouldn't be subjected to the odors and pollution from this plant while they're playing outside. The plant will cause our properties values to decrease and I will leave Murphy if this is approved. I expect a lot of other homeowners will do the same and the city of Murphy will lose tax revenue. It will ruin the quality of life for our neighborhood. People are always out jogging, walking their dogs, riding bikes etc. The odors and pollution are potential public health threat. I urge the TCEQ to deny a permit for this project!

COMMENTS: I live in Rolling Ridge Phase 5 and my home sits next to the land that is being proposed for the wastewater treatment plant. I am adamantly opposed to the development of a wastewater treatment facility being right next to my home. There are multiple issues involving the development of the wastewater treatment facility. 1) The horrid smell that cannot be controlled and is unbearable on hot or windy days. 2) The proposed site is next to an elementary school. It is not right nor fair for 600+ students and staff to have to endure their day of smelling human waste while trying to learn

or work. 3) Reduction in air quality. I personally am very sensitive to chemicals and smells. I cannot live in an environment where day to day I could have a reaction to the point of making me bed bound and not be able to go to work or have any kind of social interaction. 4) Reduction in property values. WHO would want to live next to a wastewater treatment plant? Those of us who live in Rolling Ridge chose our locations for specific reasons which set these homes apart from other surrounding towns and neighborhoods. The homes of Rolling Ridge are the most luxurious and expensive homes for all of Murphy and being next to a wastewater treatment facility would cause the tax values to decline which would greatly reduce the revenue for the city and schools. 5) I will move from the town that I put so much pride into. Before I built my home in 2010, I researched every town within a 25 mile radius and spent over five years reviewing developments, builders, schools and the overall quality of the towns. I chose to move to Murphy and then I further chose to move to Rolling Ridge. I have loved my home that I built from ground up for 11 years, love my Rolling Ridge neighborhood, and love living in Murphy. 6) Across the street from Southfork Ranch. Southfork Ranch draws thousands of tourists and many large events every year which brings in large tax revenue for the county. The last thing Southfork Ranch needs is the tourists and events to disappear because people cannot stand the smell while posing for pictures along the fence on Murphy Road or sitting outside during the rodeo events. 7) Cross Creek Ranch and Karma Ridge Stables back up to the proposed site. Cross Creek Ranch is the perfect gem for Parker, TX, in providing a beautiful location for outdoor weddings and events. Karma Ridge Stables is a beautiful spread of land with prize winning Thoroughbred horses. Building a wastewater treatment facility next to Cross Creek Ranch would destroy their business because who would want to rent the venue for an outdoor wedding if all anyone can smell is human waste? Who would want to be outside riding horses if the air quality is too unbearable? 8) Impact on Global Warming. Studies show that wastewater treatment facilities impact Global Warming by depleting an ozone layer. The photochemical oxidation and human toxicity have a great impact on the fresh water ecotoxicity, soil ecotoxicity and respiratory organics. Do not destroy what thousands of us have chosen to be our home and our safe haven. The long term detriments far exceed the short term financial greed.

COMMENTS: I'm sorry but this is a horrible idea, too many people are against it. No one wants to live next to this and parker isn't a city where people don't take care of their land and property, it is a place where people help each other out and move their to get away from city noise and chaos. To put this in the middle of that will cheapen the land and open up a door that will lead to more development of more things that don't blend with the beautiful country living that oarker has to offer. Some spaces just need to be left alone, there aren't many left.

COMMENTS: I am worried about the impact of the runoff from this proposed facility as well as the smell. There is a similar facility on Los Rios which is a problem for the area - especially in terms of smell. It seems very unnecessary as well - both Murphy and Parker have sewage treatment capacity and are close to tie in - why add another facility and the additional risk involved. This permit should be refused and handled through sewer tie in to one of the adjacent cities.

COMMENTS: As a resident of Murphy, TX living in close proximity to the proposed location, I oppose this permit. This area is already over saturated with residential developments and there is no need to build an additional neighborhood and certainly not at the cost of adding a water treatment plant that will discharge into our local creeks. This proposed site of the water treatment plant is in a high density neighborhood with a local elementary school. I am concerned about the health and safety concerns associated with the chemicals and the quality of life for residents in this area including

myself. I am also concerned for my children who attend the elementary school next to the proposed site, especially when they are outdoors during PE and recess. Please reject this permit as there is no need for an additional neighborhood in this area and an accompanying water treatment plant. If the developers really want to add the unnecessary neighborhood, I would urge a septic system approach like Parker, TX rather than a MUD.

COMMENTS: I am writing to oppose this water treatment plant. Have you ever watched your kid play soccer at The Pit in Plano, Texas, or shop at the Kroger on 14th and Los Rios? If you have, you can attest to the horrible smell from the water treatment plant that is close by. The plant off Los Rios is as close to a housing sub-division as the proposed plant, but the smell it generates is horrible. I can't imagine living near a plant the puts out the sort of smells that come from a water treatment plant. A few years back, Lake Lavon was polluted with run off from the nearby waste water plant. It was due

to heavy rains that caused flooding. Well, check out where the run off from this plant would go...right into an elementary school zone and a housing sub-division. I can only imagine the illnesses that would develop from sewage waste going into your playground or backyard. With as many Erin Brochovich type people who live close by, it could become a legal and social media nightmare for the State of Texas and this local entity. But the smell and potential run off are not the only reasons we do not want this plant close to our homes. There is a park close to this area. These are a few other reasons why this plant should not be placed in the proposed location. The property values would go down. The ecosystem would be damaged in a way that it would not recover. What about the effect on the surface and ground water? What about the the air quality, or the animals/wildlife that would be affected. The list goes on and on and on. It is my understanding that the City of Murphy has the capacity to accommodate the waste water without building another plant. It is really interesting how I can not find 1 person or entity in the area affected that desires or would benefit from this plant. The mayors oppose the plant, our State Representative Candy Noble opposes this plant, the citizens of Murphy and Parker oppose this plant. So why? Why this plant in this location? It seems that this is not a logical or even reasonable location for such a plant. Thank you for reading and considering my comments. Jolene Leask

COMMENTS: As a homeowner here, I am opposed to this proposed MUD. This is a drastic change to our community, including the adjacent Hunt Elementary, where our daughter currently attends 5th grade. The playground for the school would be immediately next to the proposed HUD. Most of the families in our area walk to/from school and this would destroy the community environment. Additionally, we specifically chose the Murphy/Parker area for its positive outdoor environment, which our family enjoys on a daily basis. I am also concerned about the impact of this MUD specifically for

this area due to the known flooding issues that frequently occur here. There is capacity available from the City of Murphy for the proposed development so there is no need to destroy our environment and community with this HUD. Please do not allow this to be built here.

COMMENTS: "According to NTMWD the proposed wastewater treatment plant permit WQ0016003001 would interfere with NTMWD's ****statutory right, privilege, and economic interest**** as the TCEQ-designated regional entity to collect, transport, treat, and discharge wastewater within the Regional Area. **** Specifically****, the Application indicates that the proposed WWTP will allow the Applicant to collect, transport, and treat wastewater from a proposed 101-acre tract that will be developed into single-family residential subdivision, in close proximity to the towns of Parker, Lucas, Murphy, and

Plano, in Collin County, which is located in the watershed area of the East Fork Trinity River in Collin County, and therefore falls within the Regional Area designated to NTMWD. In short, ****granting the TPDES permit to the Applicants violates applicable statutory requirements**** pertaining to the state's regionalization policy in Texas Water Code ("TWC") Chapter 26 as well as the TCEQ's own regionalization regulations at 30 TAC Chapter 351, Subchapter C. I support the State's Regionalization policy and EXPECT TCEQ to follow their own policy. The permit should not be granted and never should have reached this phase. We are aware that NTMWD's treatment process is state of the art compared to a WWTP. It is now time to show that TCEQ's mission is to Protect Texas by Reducing and Preventing Pollution."

COMMENTS: We protest whole heartedly to this project. Our neighborhood Rolling Ridge subdivision is considered the nicest subdivision in Murphy with multiple young families and good quality of life. Putting a water treatment facility next to this neighborhood will lead to foul smells and unhealthy air quality. Negatively impact resale value and deface this beautiful neighborhood.

COMMENTS: When we made the decision to build a home in Murphy 8 years ago, we never anticipated a MUD being down the street from this RESIDENTIAL area! The proposed location is directly next to Hunt Elementary where HUNDREDS of school children walk to and from school each day. These students should NOT have to look at or, worse—SMELL, a wastewater plant while walking to/from school and being outside at recess! Additionally, property values will decrease immensely! Other reasons I am strongly opposed to this MUD: 1. There is capacity available from the City of

Murphy for proposed development. 2. Concern regarding the drastic change that would result in the community of Murphy & Parker. 3. Concern with the effect on the wildlife. 4. Concern with the flooding potential since we already have flooding concerns in some of these areas. 5. Concern with the environmental impact to the surface water and groundwater. This MUD is not welcome here – please do not ruin our community.

COMMENTS: Please do not ruin this beautiful community by adding townhomes, apartments in or condominiums. Group housing does not belong in the Murphy/Parker area. Most people moved here for the larger lots, country feel and higher end housing selections. The home values that have grown and blossomed in such an area will most definitely plummet and completely devalue all of the surrounding homes and area establishments. The impact of this water treatment facility will have far reaching, negative effects across the board. Such as: 1. Local schools would be subjected

to heavy odors caused by the facility. 2. Surroundi homes and communities would be subjected to heavy odors caused by the facility. 3. Local schools would be subjected to associated dispersed chemicals caused by the facility. 4. Surrounding homes and communities would be subjected to associated dispersed chemicals odors caused by the facility. 5. Both odors and chemicals could and would dramatically diminish the home values in the area. 6. Huge loss of home ownership in the local communities. People would leave the area rapidly leaving numerous empty homes in the area. 7. Loss of live animals and their impacted homes. Eventual extinction of local wildlife. 8. Unbelievable traffic on an already dangerous and busy roadway Murphy Rd. 9. Rules for the area should be retained and standards upheld for compliance purposes. 10. Profitability should bot be the only consideration for the city or the developers. For all of these reasons and more - this should be denied.

COMMENTS: I am truly concerned to hear this proposal is being considered as this will have major impacts on our community in Murphy and surrounding communities. Most homeowners moved here for the quality of life it would provide combined with the increasing value of the investment we made in moving here. Multiple times Murphy has been voted a top community and that would dramatically change should this be approved. If this new facility was constructed, not only would the quality of life be significantly impacted (odor, potential for flooding, groundwater

impacts, wildlife impact), but the value of homes would decrease as well. This means less tax dollars available to the community for improvements for all to enjoy. If nothing else, I would think the expected decreased tax funds in the future would raise alarms amongst city council and community members. I strongly vote against approval of this permit.

COMMENTS: This treatment plant needs to be in the city of Parker, NOT Murphy. As a Murphy resident I want to keep Murphy as "natural" as possible. Murphy itself is almost maxed out for new residential construction and retains the small town feel that drew us all here. Our town does NOT need to provide property for a waste water facility for another community. Maxwell Creek does not need the additional volume or contamination this proposed new facility would bring. Please do NOT build this treatment plant in Murphy.

COMMENTS: I am writing you in opposition to the proposed TCEQ wastewater plant in the Murphy, Parker, Lucas, Plano, Wylie, and Sachse area. Not inly would this plant have a huge negative environmental impact by wastewater dumping into Maxwell Creek, killing natural species, and causing even more flooding to the area, but it will have a health impact as well. All of the waste will negatively affect my son who not only has asthma, but has eczema and has horrible

allergies. Dumping wastewater into Maxwell Creek would be a detriment to the natural species who live there as well as the people who live close by.

COMMENTS: As a resident of Murphy, I strongly oppose this proposed wastewater treatment plant. The city of Murphy does not want the odors during the process of treating waste, the discharge of treated wastewater into Maxwell Creek or any other remnants of chemicals used in the process. People use Maxwell Creek water on their properties for many reasons - some for drinking for people, pets and livestock. This would be a huge detriment to our community and I am not alone when I say we do not wish to see this come to fruition. Please do not destroy our community with this.

COMMENTS: I'm a member of the Murphy, TX community and there are many unanswered questions regarding this permit. The meeting earlier this month wasn't productive as the TCEQ reps weren't prepared to answer most of the questions. When can we expect a follow-up public forum to ensure the TCEQ takes into account the concerns of the Murphy/Parker/Lucas/Plano community?

COMMENTS: I am submitting this comment in opposition to the proposed Sewage Treatment Plant under Wastewater Permit WQ0016003001 (the "Project"). The proposed sewage treatment facility borders an existing residential community and would result in a peak discharge of 800,000 gallons of treated wastewater into Maxwell Creek per day. The solids generated by the facility at peak flow would be 175 lbs of digested dry sludge, 8,757 lbs. of wet sludge, and 1,050 gallons of wet sludge and would require weekly sludge removal. The Project's proposed sewage treatment plant

and discharge into Maxwell Creek would materially and irreparably harm the neighboring properties and communities. The Project's Sewage Treatment Facility is proposed to be located immediately north of an existing residential neighborhood. Hunt Elementary School, which serves more than 600 Plano ISD students, will be within 0.2 miles of the site. McMillen High School is less than a mile downstream of the proposed discharge site into Maxwell Creek and has several sports fields near the creek, including Tom Kimbrough Stadium. Murphy Middle School is slightly farther downstream on the other side of the stadium. Thousands of Plano ISD students will be near the treatment facility and the discharge daily during the school year. Maxwell Creek is also bordered by residential properties, parkland, playgrounds, and has multiple bridges and nature trails all less than three miles downstream of the proposed Project site. These public spaces will be irreparably harmed by the wastewater discharge. A PSA sports complex, with several outdoor soccer fields, Murphy's City Hall, Central Park, and an outdoor amphitheater are also near the creek and would all be adversely affected by the Project. The Project proposal omitted mention of these properties and activities in the permit application. Maxwell Creek is generally a low-volume creek, but during spring storm season it occasionally floods and can inundate the bordering properties. The sewage treatment facility will include at least:

- 3 aeration basins, each with the dimensions 40' x 12' x 13.2' (length x width x depth)
- 1 32' diameter clarifier
- 3 aerobic digesters, each with the dimensions 20' x 12' x 13.2'
- 1 contact basin with the dimensions 15' x 12' x 12'

This is a large sewage treatment facility that will neighbor existing residential properties and an elementary school. The Project's proposal includes a 20-year-old wind rose plot from DFW that shows the prevailing wind coming from the south and south east. However, this is outdated and incomplete data. A review of current wind rose plots from Addison Airport and McKinney (the two nearest measurement locations) show that during the months from September through February the wind in the area is more likely to blow strongly from the north and northwest, which would directly affect the properties and communities mentioned above. The adverse consequences of being in such proximity to the sewage treatment facility and wastewater discharge will materially and irreparably harm the local community.

COMMENTS: As a Murphy residence, to be blunt, I am OPPOSED to the addition of the water waste treatment plant. There are several obvious reasons: -Health concerns from airbourne chemicals, impact of safe/quality water and foul smells. -Decreased property values in all impacted and neighboring communities. -Negative impact on wildlife and ecosystem. -Negative impact on recreational usage. -Flooding is also a major concern. Being in the insurance industry, flood waters are devastation to quality of life. From the extremely harmful pathogens in the water to the total loss of

personal property personal and destruction of real property. I would guarantee the parties involved in preparing this permit would never allow such a process to occur in their own community knowing the potential hazards and devaluing of ones property. Why bring these safety issues and operational issues of a plant in my community. I contest the permit to construct a waste water treatment plant.

COMMENTS: Our home is approximately 1-2 miles from the proposed site of this waste processing plant. We have adequate facilities around our land locked city and there is no need to add unnecessary environmental concerns to our area. There is a beautiful subdivision near ours that would devalue immediately. The schools that are close by would be negatively impacted as well. Please DO NOT make this addition to our city that I have grown up in when it is completely unnecessary. Thank you for your consideration.

COMMENTS: I am strongly opposed to the installation of this water treatment plant in Murphy, TX. The use of chemicals at this site that would be on the air are a health hazard for those who live nearby and those are in the area on occasion or often. The odor would be off-putting as well and keep me and others from shopping or spending any time in Murphy, Tx. Additionally, this facility would harm the value of homes in the community. Please consider another site to the north where there is a less dense population. Thank you.

COMMENTS: Thank you for your attention to our community concerns regarding a facility that would be high on no one's wish list for their neighborhood. Clearly, treatment plants are a necessary evil. That said, I have to wonder how advance planning for water treatment wasn't a higher priority as our area has continued to develop over the past 20 years. That oversight has us now facing a permit request for a location directly adjacent to our homes. We're all concerned about the impact on property values, the ecosystem, pollutants, air quality, and overall quality of life! No

more outdoor BBQs, no more picnics... because, well, who wants to smell what treatment plants bring while they try to eat? Outdoor concerts venues with stinky air blowing through are not exactly sought after. No more kids playing outside, no more dog-walks, no more outside anything "when the wind blows." So, how about seeking property "in the country" BEFORE we all buy/build our homes then get a water-treatment plant plunked down in our backyard? I'm sure city/county/municipality planners are good at their jobs and are able to forecast such things. At least that way, as houses build up around such a facility, buyers know what they're getting in to. That's fair, right? And, worst case scenario is the land ends up not being needed for water treatment and is later sold at a profit. Everybody wins! Thanks for your time, attention, and consideration!!

COMMENTS: Hi, This is really horrifying and devastating to build a sewage treatment plant close to a highly populated residential area and the waste water from the sewage treatment is let into the Maxwell creek. This is going to cause many harmful health issues to the growing kids and the elderly/senior citizens living in the area. The creek flows very close to homes, schools, parks and common area of the community. This also causes danger to the wildlife animals, birds, reptiles and fish in and around the creek. This must be stopped.

COMMENTS: I wholeheartedly oppose this gross violation of our wonderful neighborhood. To the TCEQ Commissioners, please imagine approving such a wastewater treatment plant close to where you live. Imagine the noxious smells, the health hazards, and the potential for spillover and contamination less than half a mile from where kids go to school. The

builder has the option to build elsewhere, but many of us dont have the option to move out of our homes. Please do not approve this permit.

COMMENTS: I am against establishing a waste treatment plant and MUD in Parker's ETJ land. This high-density neighborhood development plan with its sewage treatment facility in the ETJ land is contrary to the interests of Parker and Murphy residents, and it is disruptive and harmful to our environment. The building of this plant would damage the ecosystem, introduce pollutants into the ground, water, and air, impact health and way of life, and diminish property value. As a resident of Parker I am against its development.

COMMENTS: I am a homeowner in the Rolling Ridge neighborhood that is adjacent to the proposed wastewater treatment facility. I am highly concerned about the effect on the quality of life of myself and my neighbors being so close to what is sure to be a pungently obtrusive neighbor. I am also concerned about the effect on the resale value of our homes. I would personally be highly reluctant to purchase a home near a water treatment facility. Not just because of

the smell, but the chance of airborne chemicals and increased pests which have been shown to occur around these facilities.

COMMENTS: I am adamantly opposed to the development of a wastewater treatment facility being by my home. As well it will be next to a creek that runs right next to 4 schools and a daycare facility with in 1.5 miles from the facility and 2 more schools with in 5 miles. Which is a lot of kids that have to deal with smell and run off in the creek next to their schools that they go to almost everyday a year for 12 years. There are multiple issues involving the development of the wastewater treatment facility. 1) The horrid smell that cannot be controlled and is unbearable on hot or windy days. 2)

The proposed site is next to an elementary school. It is not right nor fair for 600+ students and staff to have to endure their day of smelling human waste while trying to learn or work. 3) Reduction in air quality. I personally am very sensitive to chemicals and smells. I cannot live in an environment where day to day I could have a reaction to the point of making me bed bound and not be able to go to work or have any kind of social interaction. 4) Reduction in property values. WHO would want to live next to a wastewater treatment plant? Those of us who live in Rolling Ridge chose our locations for specific reasons which set these homes apart from other surrounding towns and neighborhoods. The homes of Rolling Ridge are the most luxurious and expensive homes for all of Murphy and being next to a wastewater treatment facility would cause the tax values to decline which would greatly reduce the revenue for the city and schools. 5) I will move from the town that I put so much pride into. Before I built my home in 2010, I researched every town within a 25 mile radius and spent over five years reviewing developments, builders, schools and the overall quality of the towns. I chose to move to Murphy and then I further chose to move to Rolling Ridge. I have loved my home that I built from ground up for 11 years, love my Rolling Ridge neighborhood, and love living in Murphy. 6) Across the street from Southfork Ranch. Southfork Ranch draws thousands of tourists and many large events every year which brings in large tax revenue for the county. The last thing Southfork Ranch needs is the tourists and events to disappear because people cannot stand the smell while posing for pictures along the fence on Murphy Road or sitting outside during the rodeo events. 7) Cross Creek Ranch and Karma Ridge Stables back up to the proposed site. Cross Creek Ranch is the perfect gem for Parker, TX, in providing a beautiful location for outdoor weddings and events. Karma Ridge Stables is a beautiful spread of land with prize winning Thoroughbred horses. Building a wastewater treatment facility next to Cross Creek Ranch would destroy their business because who would want to rent the venue for an outdoor wedding if all anyone can smell is human waste? Who would want to be outside riding horses if the air quality is too unbearable? 8) Impact on Global Warming. Studies show that wastewater treatment facilities impact Global Warming by depleting an ozone layer. The photochemical oxidation and human toxicity have a great impact on the fresh water ecotoxicity, soil ecotoxicity and respiratory organics. Do not destroy what thousands of us have chosen to be our home and our safe haven. The long term detriments far exceed the short term financial greed.

COMMENTS: As a resident of Murphy, TX, I would like to express my displeasure at the proposed waste water treatment plant near our residential neighborhoods. This will cause irreversible damage to Maxwell Creek, a local waterway that provides not only drainage but also outdoor recreation for residents of this area. This waste water treatment does not belong in our residential area, and has no business being proposed in our community.

COMMENTS: The proposed facility is unduly close to residential properties, as well as an elementary school. As such, its construction would be ill-advised and possibly subject to legal challenges. Especially in light of its proposed location in an outlying, extra-territorial jurisdiction, which would negatively impact another adjacent municipality, without providing any of the purported benefits to that same municipality.

COMMENTS: We moved to Murphy, TX/Maxwell Creek to live in a safe community. This includes clean drinking water and a creek where our kids could safely play without having to worry about waste water in Maxwell Creek. I have grave concerns about the proposed waste water treatment plant. This will damage the ecosystem of the Maxwell Creek Area along with adding additional environmental impacts and detriments to human health. Along with the health concerns of clean drinking water and safety for our kids, this would greatly diminish the home/property values of the area.

COMMENTS: This proposed location is surrounded by residential areas and the identified waterway runs downstream through the entire city of Murphy. I do not support this request and ask that it is DENIED. •DON'T WANT our city's ecosystem damaged •DON'T WANT potential pollutants from the plant entering our community •DON'T WANT our air quality to suffer •DON'T WANT our quality of life negatively impacted •DON'T WANT your property value diminished

COMMENTS: I am opposed to permit number WQ0016003001 passing. I live in Maxwell Creek and my children play along the creek. The idea of anything being dumped into this area angers me. It's been a place for our children to explore nature and play safely. I am joining forces with my fellow neighbors to say no to this passing. We specifically purchased in this neighborhood because of our proximity to the creek and the benefits that gave us. I don't even want to think about what could end up in the creek or what smells this could cause. Thank you.

COMMENTS: I strongly oppose the wastewater treatment facility to be built at this location. I live in the Rolling Ridge subdivision in Murphy adjacent to the proposed location of the wastewater treatment facility. Rolling Ridge is the premier development in Murphy and this proposed facility will have a negative impact on our quality of life and property values, not to mention it will be in very close proximity to Hunt Elementary School. Wastewater treatment facilities come with airborne chemicals and sewage odors, and should never be built close to residential areas. Any time we drive

past the water treatment facility near Los Rios and 14th Street in Plano we can smell the terrible odor and feel sorry for the residents of the surrounding neighborhoods. Do not bring this to the citizens of Murphy and Parker!

COMMENTS: I understand that there is a pending permit for a Wastewater Treatment Facility adjacent to the Rolling Ridge neighborhood. I am concerned that the location of this facility will have a negative impact to the students who attend Hunt Elementary School. My son is a kindergartner and enjoys playing outside at the school during recess, fitness, and gym class. He also enjoys riding his bike and scooter around the school and neighborhood on the evenings and weekends. By allowing this facility to be built this close to a residential neighborhood and proximity to the elementary

school it will create an environment where the kids will not want to play outside due to the smell from the facility, not just at recess and during school hours, but also enjoying family walks to the park and practicing soccer, baseball, and football at the Liberty Ridge park. I am requesting your assistance to consider the negative impact this facility will have on the current students of Hunt Elementary School and also the children who live in Rolling Ridge Estates. Thank you for your consideration in not allowing the permit for the wastewater treatment plant to go forward and protect our children and future students attending Hunt Elementary School. COMMENTS: This project is a concern to our community, our environment, ecosystem, and property values. The potential pollutants from the plant enter in our community will negatively impact our air quality. With this project, our Community will stop enjoying the current amazing green areas we have for our children to be outdoors and explore nature. In addition, the ecosystem of Maxwell Creek is the home of significant number of wild life and this project will

impact its balance leaving wild animals wondering in our community. Furthermore, having this project in our community will diminish our property value leading to less tax revenue. As a member of this community, I am against this project.

COMMENTS: This is a water permit application. Has TCEQ reviewed the odor control at the plant? What odor control will this plant have to minimize odors? Will the air from the head works be captured and scrubbed with a scrubbing liquid sufficient to react the odors out of the air? What chemical will be used to scrub the air - hydrogen peroxide or another oxidizer? One of the problems with wastewater treatment plants is that they emit foul odors. I moved from my previous home in Garland because the Rowlett Creek Wastewater Treatment Plant (a TCEQ fully regulated wastewater treatment

plant) could not control sewage odors from the site. Ask anyone that lives in this area or drives by the plant on Highway 66 or Centerville Road. It will make you throw up it is so noxious. The City of Garland invested \$5 million to control the odors and it still smells awful. At the time, the use of treatment chemicals was too expensive. Drive by Los Rios Wastewater Treatment plant (a TCEQ fully regulated wastewater treatment plant) and you will smell the typical odors from a wastewater treatment plant, all the time. Very annoying. The odors travel where the wind takes them. The odors can easily be smelled at East Plano Parkway and Los Rios. If the Los Rios plant and the City of Garland plant can not control it's air emissions what makes anyone think that this new plant will? Without significant scrubbing of the air emissions from the head works of this plant with a solution of chemicals that reacts with the odor, the residents in this area can expect sulfide and other noxious odors...but the plant will meet it's water quality standards. On a night with very little wind speed, expect that the odors will linger and smell horrible. TCEQ has already reviewed and determined that this plant meets the TCEQ water quality requirements and is moving forward to the approval stages. Without a contested case hearing by an affected person, TCEQ will end up approving this permit. If the plant meets the TCEQ water discharge permit requirements, it will eventually be approved no matter how many complaints or concerns that they receive. The applicant has surely made sure that the application shows that it will meet the wastewater permit requirements. The problem with odors is that they are subject to interpretation. The odors from a wastewater treatment plant are difficult to quantify but you know when it smells like sewage. It is quantifiable but very expensive to test for this odor. There is no regulation that addresses low level odors from a wastewater treatment plant that I am aware of. Typically, these are "nuisance odors" that a municipality is left to deal with. Once the plant is designed and built, it is too late. The chemicals are costly on an ongoing basis for the plant to pay for. That's why municipalities don't want to use use them!! Will TCEQ require odor control equipment and the maintenance of this equipment to prevent foul odors from the plant? The odor from a wastewater treatment plant is not a "nuisance" odor. It is an odor that will result in decreased home values all through this area. Odors will destroy the enjoyment of our homes when we are outside. If you are an affected person, you must file a contested case hearing. I do not think that TCEQ waste water permitting has the authority to control air emissions from this site and it may ultimately be approved without any air emission controls.

COMMENTS: Please think about what you would want to have done if you lived directly across from this area. These type of facilities need to be built further away from neighborhoods. This will have a large negative impact on all of the homes in this area. There is no upside besides providing a waste treatment facility to a neighborhood that hasn't been built yet. That developer can find a different piece of property with an existing sewage system that can support it. Please don't turn our beautiful neighborhood into the place that is known for smelling like sewage... :(

COMMENTS: As a Community, Murphy Texas Residents are against the installation of a Waste Water Treatment Plant within our small community. As a resident, I am against and concerned of the hazards of a Waste Water Treatment Plant in my neighborhood. Concerns are that bioaerosols may contain different types of microorganisms such as viruses, pathogenic bacteria, and fungi, capable of causing skin, digestive system, respiratory, and nervous system diseases and

human allergies. Specifically, bioaerosols emitted can impact the air quality for our children, wildlife and residents of Murphy, TX.

COMMENTS: I strongly oppose this water treatment facility based on the reduction of property value it will bring. The potential for pollutants to the environment exists not to mention the horrible smell. I personally drive down Los Rios every day and endure the awful smell (windows rolled up). Hard to fathom two facilities this close to such a wonderful city - Murphy.

COMMENTS: I am opposed to this project. The completion of this water treatment plant will result in pollution to our creek and have a detrimental affect on the value of my property that I have owned for the 16 years. The smell from the water treatment plant on Los Rios is awful. Some days you can smell that treatment plant 5 miles away. I avoid going any closer to that plant as much as possible because I can't stop gagging from the smell. I don't want to smell that at my house. I also don't the value of my house to decrease. I worked to hard and too long(16 years) to have the value of my

house and quality of life destroyed. That land is more suitable for properties with acreage, like the other properties around it. I don't want to pay the price for developer's bad investment. Please do not allow this treatment plant to be built. Thank you

COMMENTS: I want to express opposition to this permit on the basis that this sort of facility does not belong in a residential area. Having lived near one of these facilities the smells and the resulting impact on property values and quality of life are known to be very problematic. We moved into a residential area to avoid this and there is plenty of land available in the area not near residential homes that would be far better. We would certainly consider selling our home in Rolling Ridge should this project come to fruition.

COMMENTS: I oppose to this project due to the following reasons: Several studies show that wastewater treatment plants may constitute a health risk for surrounding inhabitants due to compromised air quality and increased pollution. This water treatment plant is planed to be built in direct proximity to Martha Hunt Elementary School. To me, it is absolutely irresponsible to built a plant like this in close proximity to am elementary school. Secondly, I am again concerned about water quality of the affected creeks which are planned to be used to dispose the treated water. My

family and I spend a lot of time near the effected creeks. I am not only concerned about the negative impact the wildlife, but also the health risk. Lastly, this plan will negatively impact the quality of living. I pass by the Rowlett Creek Waster Water Plant twice a day and experience the smell first hand. Unlike this planned development, the Rowlett Creek facility is not built in the middle of a neighborhood, right next to an elementary school. The health risk and negative impact will ultimately also impact property values and with that, property tax.

COMMENTS: I respectfully object to the proposed MUD being constructed .4 miles from my residence. A simpler, more cost effective solution would be to simply extend the sewer lines into Parker. With that said, let me further detail some concerns my neighbors and I wholeheartedly share. 1. There is capacity available from the City of Murphy for proposed development. i.e. extended sewer lines. 2. Concern regarding the drastic change that would result in the community of Murphy & Parker. 3. Concern with the effect on the wildlife. 4. Concern with the flooding potential since we have that

issue in some of the areas. 5. Concern with the environmental impact to the surface water and groundwater. 6. Concern with property values plummeting. Thank you.

COMMENTS: Please consider the ramifications of the proposed wastewater treatment facility on a far a greater number of residents than the facility will serve. I live downstream of this facility, in the neighborhood directly adjacent to the proposed building location. I purchased my home two years ago in the Rolling Ridge subdivision specifically with property value in mind, as the location is near an elementary school and in a desirable and picturesque location within town. With the wastewater treatment facility being located within a mile all of homes in Rolling Ridge, within yards for

some, our property values will plummet due to the location, smell, air quality, and overall undesirable nature of the treatment facility. Residents in the subdivision and kids attending the elementary school should not be subject to unhealthy or unpleasant odors or air quality as a result of treating sewage in the direct vicinity. The treated wastewater will flow south in Maxwell Creek, affecting so many other residents in other neighborhoods downstream. In all, the effects of the wastewater treatment facility will manifest negatively for most residents of Murphy, because ALL residents live downstream of Maxwell Creek. Please further consider that a developer who is simply trying to take an easy, and CHEAP way of out of providing sewer facilities for the homes to be developed is not a problem that the residents of Murphy should be subjected to the disgusting, negative, and financial effects of. The developer's ONLY reason for this proposal is one manifesting from greed and profit. If the developer cannot or will not respect the 1 acre lots with septic systems as originally zoned for this plot of land, they should have not purchased that land. They purchased the land knowing the septic and acreage zoning, and now they are merely trying to save a buck at the expense of many (even most) Murphy residents. Please consider the ramifications this wastewater treatment facility will have on homeowners, elementary school children, and all townsfolk and businesses located downstream of this facility in the city of Murphy. There are other options that won't degrade our air quality, Maxwell Creek water quality, or property values, and that solution is that the developer be held to building 1 acre plots with septic systems as understood when the property was purchased. Please don't let us citizens suffer at the hands of corporate greed. Thank you for your time. Respectfully, Samantha Nickerson

COMMENTS: I would like to express my concern regarding this MUD or waste water treatment plant. I know I did not personally move here to deal with the smell or the traffic this type of entity will create. This type of plant must not be allowed. Thank you.

COMMENTS: Hi, I want to state my opposition to this proposed waste water treatment plant. As a citizen of Parker, I am a taxpayer and I have concerns about the impact that this treatment plant could have on all the property along Maxwell creek, including the Parker City Hall. Our current City Hall is located adjacent to Maxwell Creek and resides immediately adjacent to the 100 year flood plain. My concern is that if this waste water treatment plant were to be approved and built, it would begin to pump a high volume of water into the creek downstream from our City Hall. What impact does

that have in the event of a flood? I would assume that since the downstream creek is partially full due to the water sourced by the treatment plant, that the capacity to handle flood water would be reduced. Then in turn, water coming from heavy rains and runoff upstream would become backed up due to reduced capacity for the creek to handle the water downstream. Have you assessed any impact study to the 100 year flood plain based on the proposed permanent alteration of the creek's ability (capacity) to move water in the event of a flood? If so, please kindly provide the analysis. If not - please deny this permit. I am a taxpayer of the City of Parker and this proposal directly impacts my City Hall, for which I partially fund. Thanks kindly for your attention to this matter. Sincerely, Amanda Noe

COMMENTS: The site of the proposed treatment facility is on land (1) adjacent to large established neighborhoods (to the south) with full city services that technically can be tied in to and (2) within the ETJ of a community where the status quo is homes spread out on large lots which use septic tanks. Additionally, this proposed facility could potentially cause odor issues to the hundreds of homes in the adjacent neighborhood.

COMMENTS: I am filing a complaint against the location of this sewage plant. This facility is way too close to an established neighborhood. There is an elementary school less then a mile away. The odor and toxic fumes that will be present in the air should not be forced on long standing residents. Adding a structure like a sewage plant to an area should be considered by ALL of the people who will be effected by it's usage (not just the ones getting the positive effects from it). Please consider an alternate location for this plant or a different solution to reason for its use.

COMMENTS: I am writing to express my displeasure with the decision to allow a treatment facility like this be placed so close to our community and schools. The property values of homes in the area decreasing is a concern, but also the proximity to an ELEMENTARY school. A place kids play outdoors daily, walk home with friends. We don't allow bars and other type of establishments at this close of proximity, but a treatment facility is okay. It makes no common sense.

COMMENTS: It has come to my attention only today that a large waste treatment plant is permitted within a short distance of my home. I heartily oppose such construction. Maxwell Creek runs directly behind my home, downstream of the proposed waste processing plant. The smell from the plant and the creek will be a constant distraction. The smell alone will devalue my home an unacceptable amount. When I was looking for a home, I passed-up homes within odor distance of waste processing plants and I don't want one near the home I have chosen. Further, the plant will dump

waste water into Maxwell Creek. On occasions when the plant malfunctions, as all machines do, raw sewage can be expected to run down the creek within yards of my back yard. Please do not permit construction of this waste plant near my home.

COMMENTS: I am against this MUD proposal. I am sure most of us that purchased homes in Murphy & Parker due to the environment (ranches and lots with acreage as well as nice size lots providing a backyard) and schools. While we all anticipated homes will go up in the Parker here are just a few reasons: 1. There is capacity available from the City of Murphy for proposed development. 2. Concern regarding the drastic change that would result in the community of

Murphy & Parker. 3. Concern with the effect on the wildlife. 4. Concern with the flooding potential since we have that issue in some of the areas. 5. Concern with the environmental impact to the surface water and groundwater.

COMMENTS: Good afternoon my name is Chris Pasarew I have been a proud a resident of Murphy Tx for 8 years. I'm against the proposed sewage plant. Myself along with many community members are concerned about the environmental impacts on Maxwell creek could be catastrophic. I believe a facility of this type doesn't belong near established neighborhoods . Toxic gases and potentially hazardous effluents pose a health risk to our wildlife . It can threaten livestock and protected species such as Great Horned Owl, Redtail Hawk, Turkey vultures, Bald eagles and

Texas tortoise and among countless others. Health risks can effect our community members,especially children playing outside near the plant or in parks close to the creek. In addition to odor and unsightliness a facility like this can harm property values and decrease in taxes City of Murphy will collect to provide services-even though that's the least of my concern. MUD will discharge 200,000+ to 800,000 gallons of treated water in Maxwell Creek. Polluting of our creek & ponds and flooding is a concern as well. Thank you for your time -Chris Pasarew

COMMENTS: The placement of a wastewater treatment plant in the proposed location will cause irreparable damage to the ecosystem due to flow of water of Maxwell Creek. We have abundant bird populations, skunks, squirrels, coyotes, etc. Further, it will potentially cause damage to children who play alongside its banks in park neighborhoods downstream. Additionally, property values will significantly decrease- and the lone attraction in the area, Southfork Ranch, will also be negatively impacted, leading to a downturn in economic value in our area. Although additional

properties lead to potentially a higher population, taxable property value decline will hinder its returns. We will sell should this plan go through, and we know many others who plan the same. I would highly encourage relocation of this proposed wastewater treatment plant.

COMMENTS: My understanding of this waste water treatment plan is that it will be very close to residents of Murphy, Texas homes and discharge from the plant would flow into Maxwell Creek, which I live next to. As a resident of the area I do not want our ecosystem damaged, pollutants entering our community, air quality to suffer, and other side effects of this kind of plant so close to residential/family communities. Thank you for your consideration.

COMMENTS: I am concerned with the effects on the wildlife with this project. I moved to Murphy 17 years ago for the country feel. We have bobcats, rabbits, and other wildlife that would be drastically harmed by this project. I am also concerned with the effects on flooding and runoff. Several years ago, it was proposed that my land was to be realigned into a flood plain. This would have required me to purchase expensive flood insurance. If I were to try and sell my land later, the resale value would be drastically reduced.

COMMENTS: I reject this proposal My family has been in Murphy for 23 years I do not want the POLLUTION , TRAFFIC, or DESTRUCTION of our community from this plant. I have lived in Plano` as well, moved there in 1974- and the area around south fork ranch has ALWAYS been a beautiful haven for events and a place to come and visit For tourist Such a mess developed WILL RUIN THE TRANQUILITY OF OUR NEIGHBORHOODS AND TOWN. There is zero benefits for our community . It is SICKENING that someone thinks they can sneak in a destroy what so many have enjoyed for years.

WHERE DO YALL LIVE ANYWAYS????? Maybe you should be required to live next door to such a shit hole you are proposing!????? With everything going on in the world right now, WHY would you choose to destroy more and make a small town ruined? DO NOT put your project in our town- find some land elsewhere .

COMMENTS: Hello. My family is VERY much against the waste water facility proposed for the Parker EJT. In addition to overcrowding the land with a commercial grab for money, this plant will do major damage to the surrounding environment. I know families who live next to Maxwell Creek. Their kids play in that area and routinely see thriving wildlife. Polluting that creek would kill the wildlife and render the area unsuitable for kids to play there. Nobody in our

surrounding area wants to deal with the constant odor that would arise with such a facility. Again, VERY much against the building of this plant!

COMMENTS: The environmental impacts on Maxwell creek could be catastrophic and a facility of this type doesn't belong near established neighborhoods and schools (Hunt Elementary) due to odor, unsightliness. Most importantly the negative environmental impact on air quality and natural resources such as Maxwell creek. We are vehemently opposed to this development Hi Everyone! Its super simple and quick to file a complaint with the TECQ so please do if you can. Tip from my brother in law (he is an environmental studies professor and very active in state government in Iowa – yes I

know different state/different rules etc. BUT) he said it's best to focus your complaints NOT on your personal home value (they DO NOT CARE if your home goes down in value) but on the fact that the environmental impacts on Maxwell creek could be catastrophic AND then focus on the fact a facility of this type doesn't belong near established neighborhoods (odor , unsightliness, etc.). Again, no guarantees, but he said complaints that take holistic views versus individual fears for your property usually hold more weight in these situations, plus, use enough buzz words and the EPA may take notice.

COMMENTS: We live in Maxwell Creek subdivision which is bordered by Maxwell Creek-where the liquid effluent from this facility will be discharged. This creek runs through walking paths, woods that children play in, and next to the schools. I vehemently oppose the building and operation of this facility as it will put this natural area and the people and children who use it at potential risk and it will change the environment in this area.

COMMENTS: NO! OPPOSED!!! My child and her friends like to walk in and explore in Maxwell Creek creek and I don't trust that there will be individuals watching over this, who will not be lazy, with a "not my problem" attitude who will not ever think it's okay to not allow run-off or chemicals to be disposed of properly and not lazily or hap-hazardly dump it into our creek. We see how society is today. No one wants to do the RIGHT thing, only whatever they have to do to get their work done and earn a paycheck. NO! NO!! NO!!! NOT IN MY BACKYARD!!!

COMMENTS: This area is made up of neighborhoods that are meticulously maintained and properties in these neighborhoods are highly sought after because "pride of ownership" is clearly a priority. Property values will be severely impacted in the most negative way by allowing a project of this type to be approved and developed. This project will be a blemish on the City of Murphy. As leaders for this community, it is your responsibility to ensure our neighborhoods are not put in jeopardy. There is plenty of undeveloped land away from established neighborhoods that may be used, the

city of Murphy is NOT one of them. Giving any consideration to this project is an insult to the people in these neighborhoods! I leave you with these questions ... to those who are in favor of this project: Are YOU willing to buy the house within a mile of the plant and move in with your family? Will you look forward to the stank smell every day? Will you proudly say "I live in Murphy, you know where the water treatment plant is? Right there across the street." When asked if you voted for the plant will you say "YES, I let the people of Murphy down". The idea is very bad and not seeing that is really just putting on blinders to the truth.

COMMENTS: I am fully against this sewer/treatment plant moving to the proposed area. There are several reasons why this plant should not be near Murphy, but two top reasons on my list center around environmental issues and the economic downturn. This is highly unsanitary. We have a plant nearby already and can smell the sewage from miles away. Not healthy! As well, this proposed plant will definitely bring down our home values. Murphy is a city on the map for having nice, reputable quiet living, making it an attractive place for businesses and for new residents. Our economic

development depends on this plant not coming to Murphy. Potential businesses will shy away as the numbers show from my research! We do not want this plant anywhere near Murphy, TX. Take it away, far away!

COMMENTS: I am strongly opposed to this permit being approved. The waste water treatment center will be located next to relatively high density housing, which is inappropriate in the city of Parker that has many wide open spaces. In addition, all of the homeowners in the area purchased their property with the understanding that no waste water treatment center would ever be located near their property. This type of significant change to the surrounding area of their properties is completely unacceptable.

COMMENTS: I am writing to express my concern with the proposed WWTP very near to the Rolling Ridge neighborhood. I have BS, MS, and Ph.D in chemical engineering and have nearly 30 yrs experience in dealing with WWTPs. The very high likelihood is that this will negatively impact the Rolling Ridge community through potential runoff pollution, odor issues, and potentially light and noise pollution. This will negatively impact property values. This should be located much further away from residential property than the proposed location.

COMMENTS: Hello, I'm writing to oppose the water treatment plant decision. Maxwell Creek has a series of dirt trails next to it that my daughter and I visit weekly to enjoy nature. If this treatment plant is built, this will be the third dirt trail path that has been completely ruined for us. There is already a sewage smell that filtrates both Rowlett Creek Preseve and Squabble Creek trails. Please don't run us away from the only scenic and enjoyable series of dirt trails we

have available to us within a 20 mi radius. Currently this location is our favorite place to go to relax and breath fresh air that isn't polluted with toxic fumes in the air or water.

COMMENTS: Please consider this "NO" vote from me personally and as the Board President of the Aviary HOA in Murphy, Texas. The Board Members of the Aviary HOA APPOSE Collin Co. MUD #7 WWTP, permit WQ0016003001. Under no circumstances, do I or our Board of Directors want a water treatment plant in Murphy, Texas. We can already smell the one at 544 and Los Rios on bad days. The North Texas Water District can't keep the one plant from smelling up

the neighborhood most days, so I am sure they will do as bad a job with new plants. Put the plant in Parker, Texas as far away from Murphy as possible since they will be the ones using it.

COMMENTS: I object to having this waste development in our city. This will have such a huge environmental impact. The waste that will be let into our Maxwell creek where we go hiking with our families and where our pets and kids run through the water. All of this and then we also have the smell we will have to deal with any time we want to enjoy the outdoors with our families. This has a direct negative impact on everyone living in Murphy.

COMMENTS: Please see the approved Resolution Number 21-R-1007 approved by the City of Murphy City Council on October 19, 2021, opposing the approval of TCEQ Permit WQ0016003001 (EPA I.D. No. TX 0141381).

RESOLUTION NUMBER 21-R-1007

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MURPHY, COLLIN COUNTY, TEXAS, IN OPPOSITION TO THE PROPOSED DOMESTIC WASTEWATER TREATMENT FACILITY PERMIT APPLIED FOR BY RESTORE THE GRASSLANDS LLC AND HARRINGTON/TURNER ENTERPRISES, LP IN COLLIN COUNTY, TEXAS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City of Murphy, Texas being located within Collin County and adjacent to the extraterritorial jurisdiction of Parker, Texas; and

WHEREAS, the City of Murphy has become aware of an application by Restore the Grasslands LLC and Harrington/Turner Enterprises, LP to the Texas Commission on Environmental Quality ("TCEQ") for a proposed Texas Pollutant Discharge Elimination System Permit No. WQ0016003001 (EPA I.D. No. TX 0141381) to discharge treated wastewater at a volume not to exceed a daily average flow of 200,000 gallons per day; and

WHEREAS, this domestic wastewater treatment facility is proposed to be located 0.4 mile northwest of the intersection of North Murphy Road and Rolling Ridge Drive, in Collin County, which is located in the extraterritorial jurisdiction of Parker, Texas and adjacent to residential subdivisions within the City of Murphy; and

WHEREAS, according to the August 25, 2021, Notice of Receipt of Application, which is attached as Exhibit 1 and incorporated herein, "the discharge route will be from the plant site to Maxwell Creek, hence to ..."; said Maxwell Creek flows through the City of Murphy and any inadequately treated wastewater within such creek will adversely affect the public health, safety and quiet enjoyment of the citizens and visitors of Murphy; and

WHEREAS, the City of Murphy is highly concerned regarding quality of water to be discharged from the proposed wastewater plant and adverse impacts on recreational activities of the residents of Murphy, and therefore Murphy stands opposed to this new wastewater treatment facility.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MURPHY, TEXAS, THAT THE CITY:

SECTION 1. That the foregoing recitals are hereby found to be true and correct legislative findings of the City of Murphy, Texas, and are fully incorporated into the body of this resolution.

SECTION 2. That the City Council of the City of Murphy is opposed to the discharge by this potential wastewater treatment facility into Maxwell Creek.

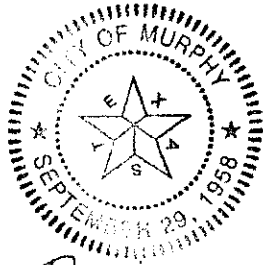

SECTION 3. That the City Council of the City of Murphy stands in support of its sister cities, including Parker, and adjacent homeowners and business owners who stand in opposition to this new wastewater treatment facility.

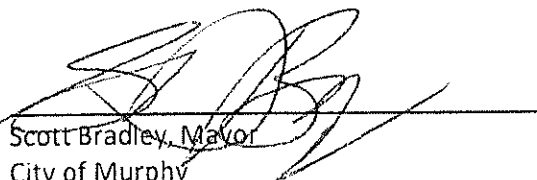

SECTION 4. That the City Council of the City of Murphy requests the TCEQ to add the City to its mailing list regarding this matter and to accept this resolution as public comment on the proposed permit.

SECTION 5. This Resolution shall become and be effective on and after its adoption and publication as provided by law.

SECTION 6. It is hereby found and determined that the meeting at which this Resolution was passed was open to the public as required by law, and that a public notice of the time, place, and purpose of said meeting was given, all as required by Section 551.041 Texas Government Code.

PASSED, APPROVED AND ADOPTED by the City Council of the City of Murphy, Texas, on this the 19th day of October 2021.

Scott Bradley, Mayor
City of Murphy

ATTEST:

Susie Quinn, City Secretary
City of Murphy

APPROVED AS TO FORM:

for Wm. Andrew Messer, City Attorney

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN WATER QUALITY PERMIT

PROPOSED PERMIT NO. WQ0016003001

APPLICATION. Restore the Grasslands LLC and Harrington/Turner Enterprises, LP, 4801 West Lovers Lane, Dallas, Texas 75209, have applied to the Texas Commission on Environmental Quality (TCEQ) for proposed Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0016003001 (EPA I.D. No. TX0141381) to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 200,000 gallons per day. The domestic wastewater treatment facility will be located approximately 0.4 mile northwest of the intersection of North Murphy Road and Rolling Ridge Drive, in Collin County, Texas 75002. The discharge route will be from the plant site to Maxwell Creek; thence to Muddy Creek; thence to Lake Ray Hubbard. TCEQ received this application on May 26, 2021. The permit application is available for viewing and copying at Rita & Truett Smith Public Library, 300 Country Club Road, #300, Wylie, Texas. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For the exact location, refer to the application.

<https://tceq.maps.arcgis.com/apps/webappviewer/index.html?id=db5bac44afbc468bbddd360f8168250f&marker=-96.616388%2C33.041666&level=12>

ADDITIONAL NOTICE. TCEQ's Executive Director has determined the application is administratively complete and will conduct a technical review of the application. After technical review of the application is complete, the Executive Director may prepare a draft permit and will issue a preliminary decision on the application. **Notice of the Application and Preliminary Decision will be published and mailed to those who are on the county-wide mailing list and to those who are on the mailing list for this application. That notice will contain the deadline for submitting public comments.**

PUBLIC COMMENT / PUBLIC MEETING. You may submit public comments or request a public meeting on this application. The purpose of a public meeting is to provide the opportunity to submit comments or to ask questions about the application. TCEQ will hold a public meeting if the Executive Director determines that there is a significant degree of public interest in the application or if requested by a local legislator. A public meeting is not a contested case hearing.

OPPORTUNITY FOR A CONTESTED CASE HEARING. After the deadline for submitting public comments, the Executive Director will consider all timely comments and prepare a response to all relevant and material, or significant public comments. **Unless the application is directly referred for a contested case hearing, the response to comments, and the Executive Director's decision on the application, will be mailed to everyone who submitted public comments and to those persons who are on the mailing list**

for this application. If comments are received, the mailing will also provide instructions for requesting reconsideration of the Executive Director's decision and for requesting a contested case hearing. A contested case hearing is a legal proceeding similar to a civil trial in state district court.

TO REQUEST A CONTESTED CASE HEARING, YOU MUST INCLUDE THE FOLLOWING ITEMS IN YOUR REQUEST: your name, address, phone number; applicant's name and proposed permit number; the location and distance of your property/activities relative to the proposed facility; a specific description of how you would be adversely affected by the facility in a way not common to the general public; a list of all disputed issues of fact that you submit during the comment period and, the statement "[I/we] request a contested case hearing." If the request for contested case hearing is filed on behalf of a group or association, the request must designate the group's representative for receiving future correspondence; identify by name and physical address an individual member of the group who would be adversely affected by the proposed facility or activity; provide the information discussed above regarding the affected member's location and distance from the facility or activity; explain how and why the member would be affected; and explain how the interests the group seeks to protect are relevant to the group's purpose.

Following the close of all applicable comment and request periods, the Executive Director will forward the application and any requests for reconsideration or for a contested case hearing to the TCEQ Commissioners for their consideration at a scheduled Commission meeting.

The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. **If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material water quality concerns submitted during the comment period.**

MAILING LIST. If you submit public comments, a request for a contested case hearing or a reconsideration of the Executive Director's decision, you will be added to the mailing list for this specific application to receive future public notices mailed by the Office of the Chief Clerk. In addition, you may request to be placed on: (1) the permanent mailing list for a specific applicant name and permit number; and/or (2) the mailing list for a specific county. If you wish to be placed on the permanent and/or the county mailing list, clearly specify which list(s) and send your request to TCEQ Office of the Chief Clerk at the address below.

INFORMATION AVAILABLE ONLINE. For details about the status of the application, visit the Commissioners' Integrated Database at www.tceq.texas.gov/goto/cid. Search the database using the permit number for this application, which is provided at the top of this notice.

AGENCY CONTACTS AND INFORMATION. Public comments and requests must be submitted either electronically at <https://www14.tceq.texas.gov/epic/eComment/>, or in writing to the Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105, P.O. Box 13087, Austin, Texas 78711-3087. Please be aware that any contact information you provide, including your name, phone number, email address, and physical address will become part of the agency's public record. For more information about this permit application or the permitting process, please call the TCEQ Public Education Program, Toll Free, at 1-800-687-4040 or visit

Exhibit 1

their website at www.tceq.texas.gov/goto/pep. Si desea información en Español, puede llamar al 1-800-687-4040.

Further information may also be obtained from Restore the Grasslands LLC and Harrington/Turner Enterprises, LP, at the address stated above or by calling Ms. Ashley Broughton, P.E., Project Manager, LJA Engineering, Inc., at 713-380-4431.

COMMENTS: This would make not just that area smell bad but schools, parks and neighborhoods are nearby. If builder wants to build then do one acre lots and do septic like all other builders. Murphy is not a big city like Parker, wylie or Sachse. Please do not pass this bill.

COMMENTS: I am opposed to the proposed location for the water treatment plant. The location will have significant negative ramifications to the surrounding area neighborhoods. Examples include: Increased pests to the neighborhoods (e.g., flies, cockroaches, etc.) Higher concentration of airborne pathogenic microorganisms. Overall health decrease from headaches, more skin diseases, and increased risk of respiratory issues. Please do not approve this permit as it is irresponsible to subject the many children and families to the increase risks and issues.

COMMENTS: I live in Rolling Ridge. We don't want a sewage plant backing up to our neighborhood. It will bring down our property value. We do not want the smell associated with this . We don't want our ecosystem damaged and the don't want the potential pollutants from the plant entering our community. This is a terrible thing to put near my neighborhood.

COMMENTS: I am writing to voice my strong opposition to the proposed MUD. My family lives in the Rolling Ridge and would be detrimentally affected by the Wastewater Treatment Facility. This would negatively affect not only our property values but our quality of life. Rolling Ridge is a beautiful neighborhood with an elementary school and an active community. Not only would this have an environmental impact but several areas in the neighborhood are already

facing flooding issues and this would add to the problem. This is an underhanded attempt by a developer to circumvent the original intent of the land and the wishes of the community in this area.

COMMENTS: I am highly opposed to the water treatment facility that has been proposed by the developer. It is ironic that the plan calls for the facility to be built right on the border of the City of Murphy and will impact mainly Murphy residents. The City of Parker has always required a minimum lot size in order to allow each resident to have their own

septic system on the property. There should not be an exception made for this particular developer in light of the fact that the land was purchased with the understanding that was the requirement in the City of Parker. The City of Murphy has Municipal water facilities available and this development should be annexed by the City of Murphy if it moves forward with the proposed smaller lot sizes - common-sense fix. Finally, I would like to call your attention the following study that discussed the ill effects of waste water treatment facilities to nearby residents. It is also included in the attachment. <https://www.hindawi.com/journals/jep/2016/8467023/> The negative impact to residents should be paramount to the corporate interest in this matter. Especially when the developer purchased the land knowing the requirements for building in the City of Parker.

Impact on the Quality of Life When Living Close to a Municipal Wastewater Treatment Plant

Abstract

The objective of the study was to investigate the impact on the quality of life of people living close to a municipal wastewater treatment plant. A case control study, including 235 inhabitants living within a 500 m radius by a municipal wastewater treatment plant (cases) and 97 inhabitants living in a different area (controls), was conducted. A standardized questionnaire was self-completed by the participants which examined the general health perception and the overall life satisfaction. Also, the concentration of airborne pathogenic microorganisms in aerosol samples collected around the wastewater treatment plant was investigated. Significant risk for symptoms such as headache, unusual tiredness, and concentration difficulties was recorded and an increased possibility for respiratory and skin diseases was reported. A high rate of the cases being irritable and moody was noticed. Significantly higher gastrointestinal symptoms were also reported among the cases in relation to the controls. The prevalence of pathogenic airborne microorganisms originating from the wastewater treatment plant was reported in high numbers in sampling points close to the wastewater treatment plant. More analytical epidemiological investigations are needed to determine the cause as well as the burden of the diseases to inhabitants living surrounding the wastewater treatment plant.

1. Introduction

Air quality and its pollution (physical, chemical, and biological) significantly influences the health and good living of humans, animals, or plants inhabiting it [1, 2]. Despite the fact that the air is an unfavourable environment for microorganisms to grow, it is merely a place which temporarily occupy and move in. The air is very often called “transport environment” because microorganisms may be present and often can be transported over considerable distances [1]. Microorganisms move in the air as a consequence of wind movement, which “sweeps” them away from various habitats and surroundings (soil, water, waste, plant surfaces, animals, and other), or are introduced during the processes of sneezing, coughing, or sewage aeration [2].

Wastewater treatment plant (WTP), due to its working conditions, is considered as a major source of aerosols and may constitute an important health risk for plant workers as well as the surrounding inhabitants [2–5]. Various bacterial and fungal communities have been isolated from all types of aerobic and anaerobic WTPs [6]. Several studies have shown that bacteria contained in droplets of WTPs were 10–1000 times more than that in a water source, depending on the droplet size [3]. A number of atmospheric factors such as temperature, wind velocity, smog, and specific humidity influence the aerosol spread as well as the ability of microorganisms to survive in the air. At very low humidity and high temperature, microbes face dehydration, whereas high humidity may give cells protection against the solar radiation [3, 4, 7]. It has also been reported that UV radiation, oxygen content, specific ions, various pollutants, and air-associated factors are also responsible for the decrease of the biological activity in a WTP [7, 8].

Bioaerosols may contain different types of microorganisms such as viruses, pathogenic bacteria, and fungi, capable of causing skin, digestive system, respiratory, and nervous system diseases and human allergies [9]. Specifically, bioaerosols emitted by WTPs can impact the air quality. In the past, microbial concentrations in the surrounding air from the aeration tanks of WTPs, at different heights and different distances, have been reported [10–12].

Waste management facilities generate atmospheric emissions and liquid effluent, which may be hazardous to human health. The potential health hazards related to WTP aerosols are documented commonly for occupational exposure. Effects including respiratory and digestive symptoms have been reported in workers exposed to particulate matter and bioaerosols [9]. Similar health problems may occur in people living near such plants who may be exposed to this release. To guide the implementation of waste management policies, decision-makers need information about their potential effects on public health.

In the city of Patras, south western Greece, a municipal wastewater treatment plant receiving domestic sewage from approximately 250,000 citizens is located in a densely inhabited area. The WTP effluents flow to the Patraikos gulf through a submarine pipe delivering the treated effluents in approximately 100 m from the coastline. Within a radius of 100–500 m around the WTP, 800 to 1000 inhabitants are permanently living. In order to assess the impact on the quality of life of citizens living close to the WTP, an observational case control study, as well as a microbiological analysis of air close to the living areas, was performed. It is the first time that such an observational survey has been performed in Greece. It is one of the very few studies

combining microbiological and epidemiological data in an area close to a wastewater treatment plant.

2. Materials and Methods

The Patras' wastewater treatment plant (WTP) has a mean inflow of 45,000 m³/d receiving municipal waste from 250,000 inhabitants. It is a secondary WTP which includes indoor pretreatment with screens and coarse bubble aerated grit clammers, outdoor primary and secondary settling tanks, outdoor chlorination, and indoor sludge processors with belt filter presses.

2.1. Study Population

The study population was comprised of inhabitants living in the surrounding area of the WTP (up to 500 m radius) considered as cases. A case included any resident, living permanently for more than eight hours per day in an area (<500 m) from the WTP. As a control was considered a resident living permanently in an area located more than 5 km from the WTP. The participants, cases and controls, were matched according their demographic, socioeconomic, ethnic, and occupational background. Inclusion criteria in the study were the permanent residency in the region, the age above 18 years, and the agreement to complete the questionnaire. Cases travelled and stayed abroad as well as individuals who were working far from their house for more than 10 hours every day or who resided in the regions for less than a year were excluded from the study (Figure 1).

Figure 1

Microbiological sampling stations and results as well as questionnaire locations in a perimeter of a radius of 500 m.

2.2. Study Design

Study participants completed a structured self-administered validated questionnaire distributed at their homes [13]. Participation was on a voluntary basis. The questionnaire was divided into three parts and contained 60 questions.

The first part (23 questions) assessed baseline characteristics including sociodemographic variables such as age, sex, family status, education, occupation, place of work, socioeconomic status, life habits (tobacco and/or alcohol), and general health perception. The health status was indicated by a distinction between poor and good health. The exact wording and response option of current health question is consistent with recommendations of the WHO [14] and the EURO-REVES 2 group [15]. Participants were asked, "In general how would you describe your current health status." Those who responded "very good" "good" or "satisfying" were considered to be

in good health, while those who responded “poor” or “bad” health were considered to be in poor health.

The second part (10 questions) was concerned with the medical history of participants: presence and frequency of gastrointestinal and respiratory symptoms, joint pains, and central nervous system symptoms (including headache, unusual tiredness, and concentration difficulties). Special questions were related to physician diagnosed allergy, eczema, and asthma. The grouping of symptoms was as follows: respiratory (asthma, chronic bronchitis, and chronic sinusitis), gastrointestinal (abdominal pain and bloating, nausea, vomiting, diarrhoea, constipation, and jaundice), skin (skin rash, ulcer on the skin) or systemic (headache, fever, chest pain or discomfort, muscle spasms, chills, irritability, insomnia, fatigue, weakness, and vague general discomfort or feeling of illness), allergies at last year (drugs, powder, materials, etc.), blood diseases (thalassemia, leukaemia), and musculoskeletal diseases (osteoporosis, backache).

The third part (27 questions) related to health-related quality of life and overall life satisfaction. The questions assessed the occurrence of four subjective physical and psychological health complaints, namely, being moody, irritable, bad tempered, and unhealthy.

The questionnaire has been piloted into 20 respondents before its use. Also, a test-retest system was used to assess the reproducibility of the responses, 20 subjects being required to complete a second questionnaire after one-month interval.

2.3. Air Sampling Strategy

Sampling of aerosols was performed once a week for four consecutive weeks during summer period, from 6 sampling stations in an area of 500 m radius around of the Patras' WTP. The sampling points were recorded using a GPS instrument (Magellan Explorist, Aachen, Germany). Three samplings were performed at different times of each sampling day (morning 8.30 a.m., afternoon 18:00 p.m., and night 22:00 p.m.) from each sampling station, in order to monitor the presence of microorganisms during the whole day. Microbiological investigation was carried out during ordinary workdays when biological treatment plant was normally working. Throughout the studied period, during air sampling, air temperature, relative humidity, wind direction and speed, and solar radiation were measured.

During each sampling period, an average of three readings of humidity and temperature was recorded. The temperature (expressed in °C) and the relative humidity (expressed in %) were measured with a portable instrument (Opus 10 Lufft, Germany).

Aerosol samples were collected using a sampler (International PBI Surface Air System, SAS, Italy). Petri dishes (55 mm diameter) containing 25 mL of Tryptic Soy Agar medium, (TSA Merck, Darmstadt, Germany) were placed into a special support of the sampler. The sampling flow rate was 90 L/min. A 15 min sampling time (volume of air > 1000 L) was used and samples were transported to the laboratory within 2 hours for further analysis. The air sampler was disinfected with 70% denaturated ethanol (CarloErba, Milano, Italy) after each sampling. Petri dishes were incubated at 36°C ($\pm 1^\circ\text{C}$) for 24 hours. After the incubation period, one experienced

analyst enumerated bacterial colonies on each plate based on their cell morphology. Bacterial colonies were differentiated on the basis of colony morphology, Gram staining, and catalase and oxidase test. Following Gram staining, at least three characteristic and distinctive Gram negative colonies from each plate were identified using the API system (bioMerieux, Marcy l'Etoile, France). Also *Staphylococcus* spp. (ISO 6888-2:1999), *Enterococcus* spp. (ISO 7899-02:2000), and total coliforms/*Escherichia coli* (ISO 9308-1:2000) were identified. The concentration of airborne bacteria was finally expressed as colony forming units (CFU)/m³. No major environmental problems were reported at the sampling stations during the survey period. Concentrations on a limited number of days were considered representative of the annual microbial concentrations.

2.4. Statistical Analysis

All statistical analysis was conducted with SPSS 21.0, while, for the mapping, Arc-GIS 9.2 software was applied (ESRI, USA). Data were analysed using descriptive statistics (Chi-test) and logistic regression to determine odds ratios and statistical significance. Differences in selected demographic variables, as well as smoking and health status, between the cases and the controls were evaluated by the Chi-square test. Student's *t*-test was used to evaluate continuous variables, including age and pack-years of cigarette smoking. Unconditional multivariate logistic regression analysis was employed to examine the association of living near the WTP and the development of health problems by estimating odds ratio (ORs) and 95% confidence intervals (95% CI).

The baseline characteristics were compared between the two study groups using the Chi-square and *t*-tests. Multivariate analyses, using a logistic regression model, were conducted to compare the prevalence of the investigated chronic diseases, adjusted for demographics and health-related habits. Comparisons of the questionnaire components were performed with Mann-Whitney test, and for multivariate analysis linear regression models were computed. The independent variables for the models were demographics, health-related habits, and chronic conditions.

Nonparametric statistics were usually used to test for relationships between pathogen concentration and other factors, because total airborne bacteria (TAB) were not normally or log-normally distributed. A nonparametric Mann-Whitney test was used to determine whether there were significant differences in microorganism concentrations based on the factors evaluated in this study. Spearman's correlation analyses were used to examine the relationship between microorganism concentration and the other factors. A nonparametric Kruskal-Wallis test and analysis of variance were also performed to determine whether there were differences in microorganism concentration by sampling location and date. A *p* value lower than 0.05 was considered significant, for all statistical analyses. All values are expressed as mean (SD).

3. Results

3.1. Questionnaire Validation

3.1.1. Acceptability

Ten subjects (4.2%) refused to complete the questionnaire.

3.1.2. Feasibility

Three subjects (1.3%) failed to complete the questionnaire owing to poor eyesight.

The average time for completion was 15 minutes (range 10 to 20 minutes). The completion rate for the questionnaire was 90% of all questions.

3.1.3. Reproducibility

In both groups (case control) the test-retest study showed that only one answer (1.75%) was altered in one questionnaire (0.4%).

3.2. Epidemiological Survey Study

A structured questionnaire was administered to the 235 cases and 97 controls (Table 1) to obtain information on demographics, knowledge of their general health status, and determination of frequency of physical symptoms that they have experienced in the study period. All respondents were asked to give complete answers. The participants (cases and controls) self-filled in the study questionnaire and returned it anonymously indicating only the address (Figure 1).

Table 1

Demographic characteristics of the study population.

The 86.8% of the cases were staying at home for more than 8 hours. The smoking habits of cases and controls were reported in Table 2. The 26.8% of the cases considered their healthy status as nonsatisfactory (average and bad) compared to 17.8% of the controls (.). A statistically significant negative relationship (,) between cases living near the WTP and their general perception about their health status was also noted.

Table 2

Comparison between cases and controls concerning smoking habits.

The incidence of allergies among the cases reached the 27.8% and most of them were allergic to dust and pollen. Questionnaires showed that 8.7% had iron deficiency anaemia and 27.5% were suffering from migraine headache. 7.2% had asthma and 12.9% gastritis. Dermatitis occurred in 9.3% and the medicine use reached 41.1%. The mood as well as the perception about their health between cases and control is shown in Table 3.

Table 3_

Frequency of feelings from the inhabitants close to the WTP, compared to the controls.

There was no increased rate of gastrointestinal disorders or myoskeletal diseases. Similarly, there were no significant increases in the rates for respiratory, allergic, and blood diseases. However, there was a significant increase in the rate of neural disorders (Table 4). The frequency of the symptoms is reported in Table 5. Almost all cases (79.6%) complained about strong odors coming from the WTP during the evening (40.4%), during the afternoon (20.8%), during the midday (10.7%), and during the morning (28.1%). Odors were more intense in spring (28%) and summer (36.4%) (Table 6). Cases emphasized problems due to the presence of the WTP as follows: odors (50.9%), air suspensions (1.1%), and different health problems (6.3%). It should be mentioned that 72.8% of the residents found the presence of the WTP indispensable, but 17.4% believed that it was dangerous for their health.

Table 4_

Health symptoms associated with the distance living of WTP.

Table 5_

Frequency of symptoms and medical consultation.

Table 6_

Odors existence and frequency of occurrence (235 cases).

3.3. Air Microbiological Study

Forty-seven (47) measurements of temperature (°C) and humidity (%) were carried out during the sampling period (Figure 2). The mean temperature was 13.6°C varying from 7 to 20°C and the mean relative humidity was 57.3%, varying from 38% to 74%. During the evening sampling campaigns, the ambient temperature ranged from 10.8 to 14.9°C and the relative humidity was approximately 67%.

(a)

(b)

(a)

(b)

Figure 2_

Measurements of humidity (a) and air temperature (b) during the study period.

Eighty-three (83) randomly selected isolated bacterial colonies were isolated and identified. Depending on their Gram staining, the microorganisms were initially mainly characterized as cocci (79.5%), as Gram positive bacilli (7.2%), and as Gram negative bacilli (13.3%).

Summarized microbiological data are shown in Table 7. Twenty-four strains (29%) were identified as *Staphylococcus aureus*, 30 (36%) as *Streptococcus* spp., 4 (4.9%) as *Enterococcus* spp., and 7 (8.5%) as *Escherichia coli*. Eighteen (21.7%) strains of bacteria could not be typed. The detected loads of airborne microorganisms at the six different sampling stations were, in general, low, but a few higher concentrations were found at the two closest sampling stations, (Locations number 1, number 3). Concentrations of airborne bacteria at each sampling station are shown in Figure 3. Among the sampling locations, Location 1 had the highest concentration of culturable airborne bacteria, with 340.89 CFU/m³. As the distance increased from the center of the WTP, the concentration of culturable bacteria gradually decreased. Mean concentrations were found lower, while the distance from the center of the WTP was increased more than 800 m. None of the collected air samples was found positive for *Salmonella* spp.

Table 7
Types of identified bacteria.

Figure 3
Average microbial count per sampling location (CFU/m³).

Triplicate samples of bacteria (*Streptococcus* spp., *Enterococcus* spp.) were collected at each sampling time. The airborne microbial concentrations (CFU/m³) corresponding to the three campaigns in all locations are summarized in Figure 4. The average microbial load per sampling location per day (CFU/m³) is shown in Figure 5, respectively.

Figure 4
Average microbial count per sampling station (location) and sampling period (CFU/m³).

Figure 5
Average microbial count per sampling station (location) and sampling period (CFU/m³).

4. Discussion

In the present study, the impact on the quality of life of inhabitants living close to a WTP as well as the evaluation of the air microbiological quality was reported.

Air microbiological analyses have commonly been conducted close to sewage treatment plants [3]. Sawyer et al. [12] measured concentrations of 126–4840 bacterial CFU/m³ at different heights above the water surface of the aeration tank of wastewater treatment plants. Brenner et

al. [10] recorded concentrations of 86–7143 bacterial CFU/m³ air at a distance of 25 m from the surface of an aeration basin well. Another study showed that the air densities of total aerobic bacteria-containing particles, total coliforms, faecal coliforms, faecal streptococci, total count bacteria, and coliphages increased significantly within the perimeter of the plant during operation of the wastewater treatment plants [11]. Other studies have shown that a percentage of the emitted bacterial contamination can be transported over considerable distances [10]. In our study the highest microbial numbers have been reported in the locations close to the WTP.

In order to evaluate the results of the air microbiological analyses, it should be considered that the recorded microbial loads represent only a “picture” of the sampling time. In connection, with the physicochemical properties of the air, the degree of contamination at a given point can significantly change within a few minutes [16]. An important issue of the study was the season in which the study was performed, which is known to play a significant role in the dispersion of aerosols and odors in the air, as well as microbes, especially during specific seasons of the year. Complaints related to the odors were increased during the summer months and especially during early the morning or evening, when the percentage of humidity was higher at the sampling stations. It is suggested that the seasonal variations of bacterial loads might be related to the contingent meteorological conditions (humidity, temperature) and to the intrinsic sensitiveness of different bacteria genera to these factors [17].

Some WTPs produce higher concentrations of bioaerosols compared to others. In previous studies, using personal samplers, it was shown that sewage treatment plant employees that have a higher incidence of headache, tiredness, and nausea were exposed to culturable bacteria. Exposure to rod-shaped bacteria and total number of bacteria was significantly higher in workers reporting headache during work than in workers not reporting headache [11].

A few studies have shown that blood tests of workers who were subjected to aerosol inhalation indicated an increased level of antibodies against Gram negative bacteria and intestinal viruses. The condition has been described as “the sewage worker’s syndrome,” which has a viral origin and manifests itself with a despondency, overall weakness, catarrh, and fever [11, 18]. Main characteristics of the disease included general malaise, weakness, acute rhinitis, and fever [19], accompanied by gastrointestinal symptoms. In accordance with these studies, we recorded increased odds for the inhabitants who lived near the WTP to develop neurological and myoskeletal symptoms at 3.37 and 1.98 times, respectively. Moreover, sewage workers and those who live in the vicinity of a WTP have higher morbidity with intestinal and respiratory system illnesses [11, 20]. In order to ensure public health, health of workers, and good quality of life, it is necessary to determine the composition and concentration of microorganisms in the air. Skin contact, ingestion, and inhalation are the three major routes of exposure to airborne particles [20]. Microorganisms that are associated with intestinal infections such as *Salmonella* spp. and enteric viruses are thought to be transmitted through inhalation [4, 21].

Also, a nationwide survey in Sweden showed that an increased risk for headache, concentration difficulties, unusual tiredness, and head heaviness was reported in workers compared to the controls [18]. Similarly, in our study, feelings like tiredness and sickness were more reported by

the cases compared to the controls. Interestingly, our study showed an increased rate in mental disorders to the population living near the WTP. There was no significant correlation of the WTP and the occurrence of gastrointestinal or myoskeletal symptoms to the residents. Also, this study showed no significant correlation concerning gastrointestinal, allergic, and respiratory symptoms although the study sample of the controls was rather small due to the refusal of controls (people in the city) to participate in the study.

In our study, there is a significant presence of possible pathogenic microorganisms in the aerosols close to WTP and this concentration depended on the distance. There is indication of the burden of microorganisms in air according to the distance of the inhabitants. To establish aerosols impact on the human health, more extensive studies are needed including medical examinations in inhabitants. Such studies have not been performed to the area of the WTP.

In order to lower the impact for public health, in areas like this, retaliatory preventive measures should be taken by the authorities in order to protect inhabitant's health. Such measures could be considered the tree growing around the WTP as well as the appropriate function of the WTP with protective equipment for the aerosols.

Competing Interests

The authors declare that they have no competing interests.

COMMENTS: I am a resident of Murphy living less than one mile from Maxwell Creek, and I am opposed to the wastewater treatment plant project currently under consideration. As the population in Collin County increases and the housing market continues to thrive, we need to be very intentional about maintaining green spaces and protecting wildlife areas within our communities. The additional water discharge into Maxwell Creek would inevitably damage the creek and the plants and wildlife there. It also increases the probability of flooding in the surrounding areas. I believe it

is also important to address the negative impact that the noise and odors of a wastewater treatment plant pose to surrounding neighborhoods. It is my understanding that building this plant is not the only option open to the developer. Larger lots with septic systems would allow for continued home building in the area without the impact and burden on surrounding established communities. Please do not allow this wastewater treatment plant to be built.

COMMENTS: I live within 1 mile of the proposed facility and object to the approval of this permit. The draft permit does not provide adequate provisions to protect the health of nearby residents and their families, aquatic and terrestrial wildlife. While this is not a "rural" area, I moved here because of the natural landscape intermingled within and around the neighborhoods. My neighborhood has Maxwell Creek flowing through and is a common place for my son and I to take a walk or play beside. This draft permit claims that an average of 200,000 gallons will be discharged into this creek

per day. The degradation to the water quality cannot be ignored. Currently this water is storm water and not overly polluted with chemicals. Treating sewer water introduces chemicals that are not found naturally within storm water. This will introduce odors and other dangers such as flooding that have negative impacts on my family, my neighbors, and the community. The community I live in is a community where kids come home from school and play outside together. Now we have to worry about what hazards they might encounter. The area where the proposed water treatment plant is planned is not part of my City but primarily impacts my City and neighborhood. As stated before this is not an extremely rural area. There are plenty of City utilities that the applicant should be implored to explore before polluting streams in a community they are not required to be a part of. I work in the commercial real estate market and it's not uncommon for developers to be required by municipalities to upgrade or install new city utilities that were not needed but for the load of the development. The TCEQ should do the right thing and protect what little fresh, undisturbed landscape still exists in DFW.

COMMENTS: This would be very near residential homes and would significantly reduce property values in the area. These facilities smell and do not bring benefit to the city of Murphy where it would be located. As I understand it, this facility would be for the benefit of Parker but they will not allow it.

COMMENTS: I am completely opposed to this request to build a MUD district (waste treatment) for neighborhood development in Parker. I understand the treated water from the intended development will flow into Maxwell Creek, which happens to run very close to our home in Murphy in the green space next to our home. This proposal is totally unacceptable from an environmental perspective and self-serving for the developer. Dumping waste treatment water into the Maxwell Creek will be harmful to people and animals. Please do the right thing and reject this proposal.

COMMENTS: I, as well as my family, and community firmly OPPOSE this proposal. 1. Adjacent to an elementary school with 400+ K-5th graders whom primarily walk to and from school plus they have recess and other outdoor activities on a daily basis for 10 months out of the year. Would you want you small children exposed to this daily, be honest when you think of this. 2. There is capacity from the City of Murphy for proposed development. 3. Concern with the impact to local wildlife 4. Concern with the impact to safety of groundwater and surface water 5. Property values will decrease

significantly 6. Air quality WILL suffer 7. Maxwell Creek runs through two major parks for the City of Murphy-these parks hold countless soccer practice/games, festivals for our community, families gather for birthdays and picnics, walking/jogging/biking trails and SO much more. Again, citizens of surrounding areas, Murphy, Wylie, Parker do NOT support this and will fight to keep our community safe and most importantly keep our children and family in a safe environment.

Re: CEQ Municipal Wastewater Discharge Draft Permit Number WQ0016003001

Dear Ms. Gharis:

The Texas Parks and Wildlife Department (TPWD) appreciates the opportunity to provide comment on the proposed municipal wastewater discharge permit for the Restore the Grasslands LLC and Harrington/Turner Enterprises, LP wastewater treatment plant (TPDES Permit No. WQ0016003001). TPWD is the agency with primary responsibility for protecting the state's fish and wildlife resources (Texas Parks and Wildlife Code §12.0011(a)). Furthermore, we are charged with providing information on fish and wildlife resources to any local, state, or federal agency or private organization that make decisions affecting those resources (Texas Parks and Wildlife Code §12.0011(b)(3)). Please be aware that a written response to this comment letter is required by Texas Parks and Wildlife Code Section 12.0011(c)-(d).

TPWD has reviewed the permit application as well as the draft Texas Pollutant Discharge Elimination System (TPDES) wastewater discharge permit for the Restore the Grasslands LLC and Harrington/Turner Enterprises, LP to discharge treated wastewater at a volume not to exceed a daily average flow of 0.2 million gallons per day to Maxwell Creek, thence to Muddy Creek, thence to Lake Ray Hubbard (Segment 0820) in Collin County. The proposed final effluent limits for this facility are 10 mg/L carbonaceous biological oxygen demand (CBOD), 15 mg/L total suspended solids (TSS), and 3 mg/L ammonia-nitrogen.

Upon review of this permit application, it was noted in Section 4.B Flow Characteristics (Figure 1, attached) that Maxwell Creek was characterized as intermittent (dry for at least one week during most years) with no perennial pools based on personal observation of the applicant. The USGS topographic map for Maxwell Creek shows it to be a solid blue line indicating perennial flow. According to USGS, solid blue lines indicate perennial streams and are defined as, "A body of flowing water that contains water throughout the year, except for infrequent periods of severe drought." Additionally, a review of several years of orthoimagery and information from local residents indicate that Maxwell Creek maintains perennial flow throughout the year that would support aquatic life downstream of the

4200 SMITH SCHOOL ROAD
AUSTIN, TEXAS 78744-3291
512.389.4800

www.tpwd.texas.gov

To manage and conserve the natural and cultural resources of Texas and to provide hunting, fishing and outdoor recreation opportunities for the use and enjoyment of present and future generations.

discharge. TPWD requests additional information from TCEQ and the applicant, such as photographs of a dry channel or other evidence used by the applicant in making that intermittent determination. There is an existing known spring in Rowlett Creek (Heitmuller and Reece 2003) in an adjacent watershed and it is possible that similar spring flow occurs in Maxwell Creek. In light of conflicting information as to the nature of flow in Maxwell Creek, TPWD recommends that a Receiving Water Assessment or similar effort be made on Maxwell Creek to generate physical, chemical, and biological data to be used in identifying the appropriate aquatic life use and the associated dissolved oxygen criteria. TPWD would be willing to assist in such an effort.

TPWD supports minimizing the need for new point source discharges when alternatives are feasible, especially in streams such as Maxwell Creek that do not already receive treated effluent. The proposed municipal wastewater treatment plant and residential development (Turner Tract) is immediately adjacent to a City of Murphy residential area (Rolling Ridge), which is part of the city's sewage collection system that is routed to the North Texas Municipal Water District (NTMWD) Muddy Creek Wastewater Treatment Facility (WQ0014216001). With an existing sewage collection system immediately adjacent to the proposed Turner Tract development, TPWD recommends the applicant work with the City of Murphy to develop a plan for the new residential development to connect to the City's sewage collection system. Connecting to the existing collection system would be the most protective option for the aquatic life in Maxwell Creek. The application indicates that letters requesting connection to existing WWTPs within three miles of this proposed facility were sent to several municipalities including the cities of Murphy and Parker, but responses from these municipalities were not included in the copy of the application that TPWD reviewed. The permit application requires that responses from these requests be included in the application and TPWD requests that these responses be made available as per application requirements.

If connecting to an existing wastewater treatment plant is not feasible, additional alternatives to direct discharge include Beneficial Reuse Authorization under Chapter 210 of Title 30 of the Texas Administrative Code and utilizing land irrigation as an option under a Texas Land Application Permit. TPWD recommends these options be considered as a way minimize the direct discharge of treated effluent to Maxwell Creek.

TPWD recommends a total phosphorus effluent limit be applied to the permit. Increased nutrients, such as nitrogen and phosphorous, can lead to increased algal biomass, which can decrease dissolved oxygen levels, thereby negatively affecting aquatic life. This increase in algae also contributes to the eutrophication process and deteriorates aesthetics in aquatic systems. Maxwell Creek has no existing point source discharges. Many streams in Texas are phosphorus-limited and research has

Ms. Laurie Gharis, Chief Clerk
Page 3 of 4
November 10, 2021

shown that such streams are especially sensitive to even small amounts of phosphorus inputs. Instream phosphorus levels above 0.02 mg/L have been shown to hasten the eutrophication process (King et al 2009). For this reason, TPWD recommends adding a total phosphorus limit of at least 0.5 mg/L as has been applied to similar permits in Collin County, such as WQ0014935001 (Wylie Northeast Special Utility District).

We appreciate the opportunity to offer comment and look forward to working with TCEQ, the applicant, and other stakeholders on this matter. If you have questions or need more information, please contact me at anne.rogers@tpwd.texas.gov or (512) 389-8687.

Sincerely,

Anne Rogers Harrison
Water Quality Program Leader

B. Flow characteristics

If a stream, man-made channel or ditch was checked above, provide the following. For existing discharges, check one of the following that best characterizes the area *upstream* of the discharge. For new discharges, characterize the area *downstream* of the discharge (check one).

- Intermittent - dry for at least one week during most years
- Intermittent with Perennial Pools - enduring pools with sufficient habitat to maintain significant aquatic life uses
- Perennial - normally flowing

Check the method used to characterize the area upstream (or downstream for new dischargers).

- USGS flow records
- Historical observation by adjacent landowners
- Personal observation
- Other, specify: _____

Figure 1. Excerpt of Section 4.B Flow Characteristics from permit application for WQ0016003001.

COMMENTS: I, Mee Ross, am filing a formal complaint regarding the proposed wastewater treatment plant. I am a resident of the Ranch Subdivision, in the city of Murphy. I do not want our city's ecosystem to be damaged or potential pollutants from the plant flowing into the Maxwell Creek that is literally behind my house. I am deeply concerned that our air quality will suffer and we would not be able to enjoy a peaceful walk in our neighborhood. Our property value is sure to be diminished with the awful smell. Please search for a less populated area.

COMMENTS: Hello. My name is Amy and I'm a 9 year old student at Hunt elementary and live in Rolling Ridge. My mom and dad were so proud to move us here and I love our neighborhood and friends. We live on Parkview and am afraid you will hurt the many animals and people I'm growing up in and it makes everyone around here sad. Please don't put a waste area in our backyard because we want to live here and maybe I'm not a grownup yet but I do understand that this

is bad for us being so close. Daddy says that this will not add value and people will move from the nice homes and just wanted to ask you to think about us and the kids so we oppose- please do what's right

COMMENTS: I would like to lodge a complaint against the planned wastewater treatment plant proposed within Parker. The wastewater treatment plant will have a negative impact on the area in many ways, including the ecosystem and the quality of life of the families (children) of our community. Please do not allow the wastewater treatment plant to be built in Parker.

COMMENTS: WQ0016003001 I am very concerned about the potential for a water waste system to be put in place. I'd like to file a formal complaint/comment against this. Im concerned for several reasons - the first of which is potential flooding which is a serious issue in our community. Our house gets run off from the creek and our house has been damaged in the past 2 years by water coming into the house due to flooding. When water levels are high, the plant will unload water into the creek which will flow to us and exacerbate an already terrible flooding zone. I'm addition to this,

I'm deeply concerned that this will cause environmental issues that could change the habitat and ecosystem in the area in unforeseen ways forever. I'm also concerned about noise pollution and odors from this plant. Please please please do not allow this proposal to move forward. Brittany Ryan

COMMENTS: My wife and I moved here for the long term to raise our children. We strongly oppose this treatment plant and highly recommend not putting it so close to the nicest neighborhood in Murphy. I've seen this before. People will sell and houses will drop in price and in 10 years this community will not only lose residents but the surrounding areas like Parker and Lucas will take the prominent doctors and professionals that create a balance of what Murphy is. I understand it's business but if Murphy wants to compete then why hurt the last area left for a treatment plant that

backs up to the highest per sale neighborhood and more importantly the South fork Ranch. Please don't do this- if you look already people are talking about relocating and it will hurt the air quality and surrounding areas that are the gem that makes our city great.

COMMENTS: I am opposed to the proposed wastewater treatment plant in Parker/Murphy, Tx. I worry about the potential pollutants being released into our environment. I do not want the air quality and odors from the wastewater treatment plant affecting residents and young students at nearby elementary schools. The plant could also have a negative environmental impact on the ecosystem, such as Maxwell Creek and surrounding wildlife. Please do not approve the permit for the building of the treatment plant in this area. Thank you for your consideration.

COMMENTS: I respectfully request this permit be DECLINED by TCEQ. I have reviewed the plans and background on this request and find it to be highly inconsistent with the surrounding development, and at odds with the stated use restrictions for Maxwell's Creek, and lacking any long term vision for sustainability. The need for this WWTP exists ONLY because the developer's plans for housing development are inconsistent with the City of Parker which requires enough space per residential lot to support it's own septic system. The developer is attempting to work through the loop hole of

this area being in Parker's ETJ for their own profit, without concern for surrounding neighborhoods. The discharge of liquids from the WWTP would be in conflict with Maxwell Creek's designation as a non-discharge waterway. Maxwell Creeks runs through the majority of the town of Murphy and is integral to a significant portion of Murphy's recreational areas. During strong rains and floods, how are residents to be assured that this WWTP will not create issues of excessive pollution in Maxwell Creek? The WWTP would be extremely close (<200 ft!) from several single family homes in the Rolling Ridge development and also very to Hunt elementary school. The noise, and smell would have a significantly detrimental effect on the lifestyle of those residents, students and teachers. It also seems unprecedented that a WWTP would exist solely for the benefit of limited number of homes, comprising a small corner of a town or municipality. The long term economics of how this plant is funded and maintained should be carefully scrutinized. Who is accountable for the long term maintenance and operation of this facility? I believe the TCEQ can see clearly that this development is poorly conceived and inconsistent with the surrounding developments. The haphazard planning of this WWTP is nothing more than a desperate attempt by the developer to maximize their profits, while dumping the long term impacts of cost and ecological disaster on the cities of Parker, Murphy and other Collin County residents. Again, I respectfully request this permit be DECLINED by TCEQ.

COMMENTS: I would like to express my strong objection to the construction of a water treatment plant at the proposed location 1/4 mile from the intersection of N. Murphy Road and Rolling Ridge Dr.. This plant is not ON city of Murphy land but is extremely close to Murphy houses. It is actually in the ETJ of Parker on unincorporated land. Creation of this MUD by having one person live on the land who votes for approval has a negative impact on those homes in the surrounding area which then have to deal with the fallout. According to a resident of Rolling Ridge, this wastewater plant will only be

used to develop that particular plot of land. It will NOT benefit residents of the city of Murphy nor those in Parker. It allows the developer to avoid the need (and associated costs) to allocate 1 acre of land to build a septic system for the houses it plans to build on that land. This will have a negative impact on property values in Murphy and surrounding areas and should not be allowed to go forward.

COMMENTS: Permit Number: WQ0016003001 – <https://www14.tceq.texas.gov/epic/eComment> This letter is notice that I am lodging a formal complaint concerning the proposed wastewater treatment plant that will be located near the intersection of North Murphy Road and Rolling Ridge Road and discharge hundreds of gallons of wastewater into Maxwell Creek each day. The proposed location is about a half mile from my house. I strongly object to its construction. While plans always assume optimal operation, plants of this type do malfunction and the downstream City of Murphy

will bear the brunt of these malfunctions. The planned location is located close to the southern border of Parker so as not to impact that city. Maxwell Creek leaves the Parker very near the plant's proposed location Malfunctions do occur. It is a law of nature. There is a wastewater plant near the corner of Los Rios and 544 that has been an ongoing problem for homeowners in the area. The air reeks of sewage almost every time I drive by the plant. I have lived in Murphy for 15 years and the stench from the Los Rios plant has continued. The multiyear ongoing construction projects at that plant have not mitigated the problem. I also lived in the vicinity of another treatment plant some years ago and similar problems routinely occurred. These air quality and overflow/malfunction problems are not easily cured. Technology has not banished them. The discharge will adversely impact the ecosystem of the Maxwell Creek area. Putting this much additional water into the creek will change the course of the waterway and exasperate floods. The proposed location is quite near a City of Plano elementary school. Maxwell creek runs behind another City of Plano elementary school a high school and a football stadium. The potential for air and water pollution near any school is a risk that should not be taken. Maxwell creek also runs through a City of Murphy park which includes playgrounds and nature trails. A mishap could spread pollution over these sensitive areas. In summary the proposed wastewater plant will damage the ecosystem of Murphy parks, endanger the children at three schools located near the creek, impact the air quality at my home and adversely impact my quality of life and the value of my property. If the Dallas developer and Parker want a housing development they should find another way to dispose of the wastewater or locate the plant where the impact born by the residents of Parker and not transferred to another downstream and downwind city. Sincerely, William Salmonsens 406 Nevada Trl Murphy, TX 75094 972-442-0865

COMMENTS: I oppose the idea of the wastewater treatment plant in Parker. This is so close to the Murphy residents and the elementary school! We do not want the pollutants or the smell that comes with these types of facilities. This will in turn diminish the property values in surrounding areas like Rolling Ridge. Do not approve this!

COMMENTS: I am writing to voice my strong opposition to the proposed MUD. My family lives in the Rolling Ridge and would be detrimentally affected by the Wastewater Treatment Facility. This would negatively affect not only our property values but our quality of life. Rolling Ridge is a beautiful neighborhood with an elementary school and an active community. Not only would this have an environmental impact but several areas in the neighborhood are already

facing flooding issues and this would add to the problem. This is an underhanded attempt by a developer to circumvent the original intent of the land and the wishes of the community in this area.

COMMENTS: Hi - I wanted to add this letter I sent to Mayor of City of Murphy to my prior formal opposition to this project. This letter addresses other important issues after gathering more comments from neighbors. Particularly comments on potential impacts this project may have on other domains beyond wildlife - I added a picture of my son fishing in this pond (species abound there), look at the clarity of the water- this will be gone if this project materializes. Please STOP this project, you have no idea how harmful it will be for this community. I invite you to come and look

around. THANK YOU! Dear Mr. Mayor Bradley- With all my due respect, I took the liberty to write to you on the subject matter. We learned this week about this housing project between Parker and Murphy that would bring a wastewater treatment plant right behind our neighborhood Rolling Ridge. I cannot imagine our lives, especially my kids' being disruptive by such a plant dumping wastewater into the creek right next to our communities. Air quality, who knows what chemicals and the whole bunch of pollutants that may bring to the creek and surroundings. Impact on wildlife that makes this area so beautiful, or on our neighborhood. I'm sure you are familiar with Liberty Ridge Park, there is a pond - right next to the playground area- which is connected to creek via street rain water collectors. Kids from this community and many others in the area fish and play there everyday. I cannot imagine life without outdoor leaving and kids on the streets. This can happen if this project materializes. I thought of reaching out to implore you to please get heavily involved on this issue and firmly walk along this community and city of Murphy to REJECT this plan or to look for a solution that won't have such an impact on the quality of life of this wonderful city. We spent 2 years looking for a place like this to live and raise our family. We think this is the BEST city in the metroplex for many reasons: quality of people, schools, public services, diversity, safety and I can go on and on. I'm sure you have helped create all that during the years and I'm VERY thankful to you and your colleagues for that. The sign "Keep Murphy Beautiful" which the city promotes really brought us here 7 years ago, and we MUST protect that vision. I coach at PSA, am a volunteer at school, my 8 and 6 year old have their friends here, we have a dad soccer team in the neighborhood intended to promote camaraderie among families. I cannot imagine the disruption this project will cause to all of us, especially emotional distress to our kids and families as we all look for an alternative city, house, friend community while escaping life marked by bad odors and pollutants right on our backyard. It's really concerning and deeply disturbing. I truly think this project can trigger an exodus from the neighborhood and the city, which of course would have an impact on the community finances. I'm one of the almost 25 nationalities that I could count on my last round I did this week, Murphy is becoming a very reach cultural hub for this area east of 75. We must protect and nurture that, although I envision much of this being lost as eventually people start moving out for better quality of life. This diversity is also enriching to our schools in the area, I've seen it first hand while volunteering at Hunt many times. Let alone property values, financial damage to an already difficult situation for families getting out of a pandemic. Likely with decreasing house values you will see taxes impacted as well, you may have accounted for that already. Yes other people may come to live here under new circumstances but I envision a drastic demographic change in the community, what type of individual would like to live under such air quality environment? I'm sure many would question sanitary conditions or priorities from safety to public health in a worsening demographics situation. I THANK YOU for your service to our community and please HELP us get this project shut down for the good of the communities you and your colleagues serve. Respectfully, Gonzalo Sanchez

COMMENTS: I completely oppose to this project, my house backs up to the location they are intending to use for this water treatment plant. There is plenty of wildlife that will be impacted, same for value of our properties, quality of air and pollutants in the area. I beg you to please STOP this project from happening for the good of Murphy overall and our community, in particular plenty of children live in this neighborhood - playground is by the pond that is connected to Maxwell Creek. This project will harm many. Thank you for listening!

COMMENTS: My name is Hetul Sanghvi. We live at 341 Gene Autry Ln, Murphy TX 75094. Our home is very close to the proposed treatment plant. Me, my wife and kids hike along the Maxwell Creek regularly. My concerns with this development are: 1. The impact of this development on the health & wellbeing of my family. 2. Foul odor from the discharged chlorinated water 3. The impact on the air quality. 4. Flooding of the creek 5. Contamination of the ground water and its detrimental impact to the natural eco system. I strongly oppose this development.

COMMENTS: This communication is in response to the proposed sewage plant on Murphy road in Murphy, TX permit number WQ0016003001. I am a resident of Maxwell Creek Community. My house is within 100 feet of the Maxwell Creek. The city has done an awesome job in supporting community health by developing a walking/hiking trail along the creek. With health issues on the rise, one of the reasons we moved to this community was for the tranquil serene nature

preserve, clean atmosphere, and walking community. This area has offered the ability for me and my family to stay fit in a comfortable and safe environment. We spend many days walking the trail with our golden retriever, playing sports, and hiking Maxwell Creek. If the waste water sewage plant for Murphy Rd is approved by the State of Texas, then the atmosphere will be contaminate with pollutants and toxic waste that will be deposited into Maxwell Creek. It will destroy the serenity of Maxwell Creek and surrounding community, pollute the atmosphere with toxic waste, and diminish the neighborhood. This area will no longer provide the peaceful natural air for mental and physical health it provides today. In fact, there are studies that identify the trauma waste water and pollutants cause on the human body. Please see the two studies below. The following study from ID: 8467023, <https://www.hindawi.com/journals/jep/2016/8467023/> "The concentration of airborne pathogenic microorganisms in aerosol samples collected around the wastewater treatment plant was investigated. Significant risk for symptoms such as headache, unusual tiredness, and concentration difficulties was recorded and an increased possibility for respiratory and skin diseases was reported. A high rate of the cases being irritable and moody was noticed. Significantly higher gastrointestinal symptoms were also reported among the cases in relation to the controls." An additional study from ID: 11494345, <https://pubmed.ncbi.nlm.nih.gov/11494345/> "Employees working at the wastewater plant have also been reported to have health effects. Work in sewage water plants can involve exposure to different types of microorganisms and chemicals. The bacterial exposure is dominated by bacteria that naturally occur in nature. However, different bacteria and viruses that give rise to infections can be present in this environment and thus there exists a risk of infection, especially of hepatitis A. Investigations suggest that gastrointestinal tract symptoms are more common among employees at sewage treatment plants than among controls. Respiratory symptoms, fatigue, and headache have also been reported in several investigations. The cause of the symptoms is unknown, although certain data suggest that they are caused by inflammation. The results suggest that endotoxin in Gram-negative bacteria may be one of the causative agents. As regards cancer, some studies report an increased risk of stomach cancer and a few studies report an increased risk of cancer in the larynx, liver or, prostate or of leukemia." As a community that is concerned about their health, we strongly recommend the permit to build the Wastewater Sewage Plant on Murphy Road in Murphy Texas be denied. We recommend the new construction homes in this area remain on septic tanks for the sake of the serenity of the environment, to save the degradation of the community, and most of all preserve human health.

Lawrence Savage

This area has offered the ability for me and my family to stay fit in a comfortable and safe environment. We spend many days walking the trail with our golden retriever, playing sports, and hiking Maxwell Creek. If the waste water sewage plant for Murphy Rd is approved by the State of Texas, then the atmosphere will be contaminate with pollutants and toxic waste that will be deposited into Maxwell Creek. It will destroy the serenity of Maxwell Creek and surrounding community, pollute the atmosphere with toxic waste, and diminish the neighborhood. This area will no longer provide the peaceful natural air for mental and physical health it provides today. In fact, there are studies that identify the trauma waste water and pollutants cause on the human body. Please see the two studies below.

The following study from ID: 8467023, <https://www.hindawi.com/journals/jep/2016/8467023/>
"The concentration of airborne pathogenic microorganisms in aerosol samples collected around the wastewater treatment plant was investigated. Significant risk for symptoms such as headache, unusual tiredness, and concentration difficulties was recorded and an increased possibility for respiratory and skin diseases was reported. A high rate of the cases being irritable and moody was noticed. Significantly higher gastrointestinal symptoms were also reported among the cases in relation to the controls."

An additional study from ID: 11494345, <https://pubmed.ncbi.nlm.nih.gov/11494345/>
"Employees working at the wastewater plant have also been reported to have health effects. Work in sewage water plants can involve exposure to different types of microorganisms and chemicals. The bacterial exposure is dominated by bacteria that naturally occur in nature. However, different bacteria and viruses that give rise to infections can be present in this environment and thus there exists a risk of infection, especially of hepatitis A. Investigations suggest that gastrointestinal tract symptoms are more common among employees at sewage treatment plants than among controls. Respiratory symptoms, fatigue, and headache have also been reported in several investigations. The cause of the symptoms is unknown, although certain data suggest that they are caused by inflammation. The results suggest that endotoxin in Gram-negative bacteria may be one of the causative agents. As regards cancer, some studies report an increased risk of stomach cancer and a few studies report an increased risk of cancer in the larynx, liver or, prostate or of leukemia."

As a community that is concerned about their health, we strongly recommend the permit to build the Wastewater Sewage Plant on Murphy Road in Murphy Texas be denied. We recommend the new construction homes in this area remain on septic tanks for the sake of the serenity of the environment, to save the degradation of the community, and most of all preserve human health.

COMMENTS: As a North Texas citizen concerned about water quality and the environmental safety of our watershed, I oppose water treatment plant proposed to be built by Restore the Grasslands, LLC managed by John Cox, and the landowner, Harrington/Turner Enterprises, LP approximately 0.4 miles northwest from intersection of N. Murphy Road and Rolling Ridge Drive in Collin County. The planned facility is expected to treat up to 800,000 gallons of wastewater per day. Discharge from the plant will flow to Maxwell Creek (which flows through the city of Murphy to Muddy Creek

and Lake Ray Hubbard in Segment 820 of the Trinity River Basin). The impact will not only affect Murphy and Parker but Sachse, Wylie, Rockwall and also the protected ecosystem, Preserve at Maxwell Creek (which is teeming with life from fish, reptiles, amphibians, birds, mammals and countless insects). The area also includes a High School ,Middle School, and Hunt Elementary School which is directly adjacent to the wastewater treatment plant. I see this project as ecologically destructive and also a health hazard to the community. This permit should be denied.

COMMENTS: I am opposed to the planned wastewater treatment plant just North of Rolling Ridge. The last thing we need here is a smelly industrial facility near our nice neighborhood. Plus the discharge into Maxwell Creek? My kids play and fish in that creek, and this would effectively ruin that too. I understand this is to support a development in Parker. Well, they need to find a place in Parker for this facility, not Murphy. Please represent us well and adamantly oppose this measure.

COMMENTS: My wife (My Le) and I object for a water treatment plant to be built in Murphy's city limits. Because of the awful order produced by such a plant, we believe it should be (and would appreciate it if it was built) in the countryside. We experience the order coming from a treatment plant in Plano (in the area of Los Rios Blvd and 14th St) whenever we go to the Kroger store at that intersection and any time we travel into Richardson or Dallas.

COMMENTS: Having this wastewater project start is a huge endangerment to the natural environment surrounding rolling ridge and Murphy, which a lot of residents enjoy and love having around their home. Our water quality and air quality in Murphy is already pretty bad and unclean compared to other cities and it will degrade our city immensely. Our surrounding residents love the nature that our area has to offer. Please do not cause any further damage to our environment.

COMMENTS: I strongly protest the location of this new water treatment facility so near the residential communities that are already in existence. Especially the impact on our city's ecosystem, the potential of pollutants from the plant entering our community, the danger of our air quality suffering, and our property values diminished. The idea of runoff in our creek is especially concerning as is impact on air quality.

COMMENTS: We are concerned about the flooding the with water treatment facility. We live in Rolling ridge and all of us collectively believe this is not a good idea. It's going to cause a lot of issues not just with flooding but also with the waste going in to our lakes and creeks; and our lake is very popular with kids that go fishing and other wildlife that uses and enjoys that lake as well.

COMMENTS: Please consider the harm this can do to our environment. Not sure if all involved are truly aware of the life inside Maxwell Creek but this would be devastating. Also not sure if it is wise to be a MUD put in without a large majority of citizens aware and their input included. The end result could be very damaging.

COMMENTS: The purpose of these public e-Comments serves to lodge a complaint, as a concerned City of Murphy resident, against the application for the Permit by a Dallas Company to create a wastewater treatment plant near the City of Murphy (in the vicinity north of the North Murphy Road – Rolling Ridge Road intersection) that is apparently being proposed to treat up to 200,000 gallons of wastewater per day in Phase 1 and up to 800,000 gallons of waste water per day in Phase 2, sending discharge flowing to Maxwell Creek. The proposed Permit number is WQ0016003001

(EPA I.D. No. TX0141381). As a concerned City of Murphy resident, I do not want: (a) Our city's ecosystem to get damaged (b) Potential pollutants from the plant entering our community (c) Our air quality to degrade (d) Our quality of life negatively impacted (e) Our property value diminished. In addition, the proposed wastewater treatment plant will be close to several residential neighborhoods.

COMMENTS: Hi! This is to register our concern for setting up the waste water management facility in our community. We do not want that plant here. We have a great eco system in our community and do not want any change in that or any increase in potential pollutants. I hope our concerns are heeded and the plan is shelved. Thanks! Anjana

COMMENTS: It has come to my attention that there is a proposal to allow for a waste water treatment plant to be created on ETJ land for the City of Parker. This sewage would have to discharge into a main creekway that is used throughout the city for both livestock and general enjoyment of the residents. A facility like this would create an undue burden and health risk on our residents and that does not even begin to address the extreme smell and effect on nearby property values. It is my belief that this permit should be denied and this plant should not be allowed to move forward.

COMMENTS: This project is such an awful idea. We live very near the area and just recently purchase our house. We strongly feel this would cause our air quality to suffer, the traffic to be worse, our ecosystem damaged and our quality of life living in this area to me ruined. Not to mention reduce our property value. A project like this needs to be somewhere out farther away from so many homes and schools. This is totally unacceptable and undesirable. Please do it allow this project to begin.

COMMENTS: I oppose this project due to the potential effect it will have on the surrounding property values. There is already an existing water treatment facility within 10 miles of this proposed project that has caused a number of problems in the neighborhoods. There is always an odor in the area, which is obnoxious. In addition, when there are heavy rains, there have been numerous reports of "accidental" releases of untreated waste. This is totally unacceptable. If this is currently occurring, how can you guarantee it will not occur with this project. The discharge would go directly

into Maxwell Creek which runs through a number of neighboring cities potentially harming wildlife and humans alike
There will be a large increase in traffic for this project and the commercial traffic to haul the waste away after the project is completed.

COMMENTS: Rather than build a new wastewater treatment plant, applicants should simply pipe the planned wastewater into nearby existing wastewater collection infrastructure. This is highly preferred over a new wastewater treatment plant adjacent to existing housing and discharging into a virgin creek flowing by numerous existing residential subdivisions in multiple cities. The City of Murphy, which is opposed to this permit, would likely be happy to facilitate this. If for any reason this is not feasible, use of existing infrastructure should be explored with other entities, including

adjacent or nearby cities or the North Texas Municipal Water District. If parties are at an impasse, as a former Plano City Council Member and former liaison to the North Texas Municipal Water District I would be happy to assist in any resolution.

COMMENTS: I write to object to and lodge a complaint against this permit and application to build a wastewater treatment plant that is proposed to be developed immediately north of a residential subdivision and public school and immediately along Maxwell Creek. The proposed treatment plant is intended to service a proposed high density development that is reported to generate between 200,000 and 800,000 gallons of treated water into Maxwell Creek. This is environmentally unsound as it will generate an unwanted smell, will harm or displace threatened or protected

species, potentially harm livestock that live nearby, pollute creeks and ponds, and exacerbate flooding along the flood plain that follows Maxwell and Muddy Creeks. The treatment plant is likely to negatively affect property values in and around the immediate area, which in turn decreases taxes the City of Murphy will collect to provide its citizens services. This is an ill-conceived plan that does not benefit the local residents or any residents living downstream.

COMMENTS: I wish to voice my opposition to this permit moving forward as it will damage the ecosystems of the City of Murphy and surrounding communities and introduce pollution that is not there today. The air quality and property values will also be diminished.

COMMENTS: I am opposed to building a water treatment facility on Murphy Road just north of Rolling Ridge Subdivision. There are over 400 homes in Rolling Ridge this would adversely affect not counting the countless homes south of Betsy Road. This facility is not needed and these homes and schools were built not knowing there would ever be such a facility in the area. Home and property values will be devalued.

COMMENTS: I oppose the construction of a wastewater treatment facility north of betsy lane and south of parker road off of N. Murphy road. There are countless homes just south of the proposed site that will have their property values degraded, along with the odor that will permeate the area. there is a wastewater treatment facility off of FM544 and Los Rios and you can definitely tell it is there by the odor. Why would you need 2 wastewater treatment facilities with under a 5 mile radius. That does not count the wastewater treatment facility in Wylie

COMMENTS: Running waste water through Maxwell Creek for the proposed MUD is an environmental issue. This will kill the local wildlife enjoyed by many. Once the wildlife has been killed off this will become a mosquito infestation which then poses a health threat to the community. The community health will be affected in the form of West Nile virus. Another potential safety issue is the flood hazard this poses to the community. Our creek already floods when it rains let

alone with hundreds of thousands of gallons of water are dumped down the creek. This creek has running water year round.

COMMENTS: I am opposed to approval of this permit. I am a property owner / home owner approximately 1.3 miles from the proposed site, in the Maxwell Creek subdivision. The release of treated waste water into Maxwell Creek is unacceptable for the health of the community. I have resided in this location for five years, and watch numerous children and adults enjoy the trails and waterway of Maxwell Creek. The possibility of any change to the water quality is unacceptable. Additionally, the schedule shown in the application for the permit of sludge removal from the site is

unacceptable, at 7 days when 100% capacity, and certainly at longer intervals up to 29 days as shown in the application. The negative impact on air quality around the site and even up to over 1 mile is unacceptable. Further, Maxwell Creek has a High School and Middle School abutting it just south of Betsy Lane, with one mile of the site. Even a remote possibility of worsening of air quality that impacts two schools and its students and staff is unacceptable. And the possibility of worse air quality and water quality adjacent to those schools, and the already developed scenic trails and history site located in the Maxwell Creek greenbelt park, is unacceptable, as it would ruin the enjoyment of these areas, as well as the playground and soccer fields adjacent to Maxwell Creek.

COMMENTS: My name is Brendan Sturges - my wife and I purchased 3503 Woodcreek Cir (affected land owner 18) last october after falling in love with Parker. It's a great country town that reminds me of where I grew up. We raise chickens, donkeys and hopefully children one day - and a big reason we settled here was because of the peace, quiet and rural lifestyle. I absolutely oppose the construction of this treatment plant, and the townhouse development that it would service. I do not want to have a road directly behind my barn leading to ~500 townhouses.

COMMENTS: Please do not approve this MUD. There is no need for a facility like this in our neighborhood. I don't want our area to start smelling like a sewer like it does around Los Rios in Plano. I oppose the dumping of the "treated" water into the creek that runs in front of my house. This will drastically reduce my property value and will not benefit in any way to existing homeowners.

COMMENTS: I am extremely concerned about the impacts this addition will have to our area. We live in Murphy, with the creek running beside and in front of our house. We love the quiet, country feel and our children often explore the creek area. The fact that they can walk down to the creek and play/explore is a large part of why we are still in Murphy. I'm concerned this ability will be taken from them because the creek area will be unsafe with this addition. I do not understand why this is necessary since the City of Murphy does have capacity for the proposed development. The smell

of the treatment plant alone will drive the value of our homes down and drive our normally active family inside. This area also has a significant wildlife presence and we appreciate, protect and admire all the coyotes, bob cats, frogs, birds and even snakes. Building this MUD will significantly and detrimentally impact all aspects of our community, our lives and our finances. This is all unavoidable since the City of Murphy already has the capacity for this development. Please stop this MUD from coming in - we really love our area and don't want to have to move.

COMMENTS: To: Parker City Council From: Chris Stanfield Company: Willie Venus Enterprises Re: Water Treatment Plant Location This letter is to serve as a complaint, and a rejection of the proposal to place a water waste plant in Parker located north of Murphy, Texas. After consulting with the Murphy city council, it appears there has been no collaboration with adjoining municipalities. This troubling, as the project will have direct effect on the citizens in those cities. There has been to my knowledge, no sharing of information about the long-term effect of the wastewater plant to

the immediate environment. Furthermore, no discussions on the long-term ramifications to our creeks, and streams that run along the Parker/Murphy city boundaries. There needs to a more open platform for ALL other cities surrounding Parker, to discuss the long term detrimental environmental impact that this project will create. I would even be so bold, as to say that most of the residence in Parker would NOT want this wastewater plant to be built in their backyard. The city council should mirror the wishes of the citizens who VOTE for them and decline to move forward with this project. Thank you.

COMMENTS: Running waste water through Maxwell Creek for the proposed MUD is an environmental issue. This will kill the local wildlife enjoyed by many. Once the wildlife has been killed off this will become a mosquito infestation which then poses a health threat to the community. The community health will be affected in the form of West Nile virus. Another potential safety issue is the flood hazard this poses to the community. Our creek already floods when it rains let

alone with hundreds of thousands of gallons of water are dumped down the creek. This creek has running water year round.

COMMENTS: I object to this proposal. When we purchased our home, the current zoning was designated to be 1 acre minimum per city of parker guidelines and building standards. However mismanagement of control by the state has taken that right away from the city. This negatively impacts the historical zoning standards. My principal objection is due to the negative impact to environmental standards. My children practice soccer at the park downstream from this proposed water treatment plant. We actively use the nature trails that are downstream from this plant. Our home is

within smell distance from this plant. We moved to a rural area to avoid this. We should still be afforded the opportunity to maintain the standards that have been set forth for the past 50 years. The developers' profits should not outweigh our basic rights to maintain our standard of living.

COMMENTS: I am opposed to this new treatment plant being placed so close to high-end residential neighborhoods in Murphy. Besides being unsightly, any north winds will certainly bring foul smells to all neighborhoods south of the plant. If it is needed, this plant should be located north of Parker Road and further east at or near McCreary road to service the new developments in that area.

COMMENTS: Wastewater Treatment plant.

11/20/2021

Wilma P. Stephens
603 Mockingbird Drive
Murphy TX 75094

Regarding The Wastewater Treatment Plant:

Under Texas Water Code, Section 26.081 and 26.0282 which is referred to as "regionalization," provides Texas' regionalization policy for wastewater treatment. It states that TCEQ is to implement a policy to "encourage and promote the development and use of regional and area-wide waste collection, treatment, and disposal systems to serve the waste disposal needs of the citizens of the (eliminate words in red?) and to prevent pollution and maintain and enhance the quality of the water in the state".

In furtherance of that policy TWC Section 26.0282 authorizes TCEQ, when considering issuing a permit to discharge waste, to deny or alter the terms and conditions of a proposed permit based on need and the availability of existing or proposed area-wide or regional waste collection, treatment, and disposal systems.

Sincerely,

Wilma P. Stephens

Wilma Stephens

COMMENTS: The placement of a water treatment plant in a community that doesn't have a connection to the water treatment plant (we are on our own septic systems) seems to be an odd choice. You are asking Parker residents to accept a water treatment facility that we cannot use. You will be sending sewage from outside of Parker to be treated in Parker. Why not place the treatment facility in the communities it serves instead of passing it along to the city of Parker? We already treat our water here in the community. Don't ask us to treat water from elsewhere. Exporting someone

else's problems to us seems to be both mean spirited and contrary to good citizenship. We take care of Parker, everyone else should take care of their own community waste.

COMMENTS: I attended the public meeting on Dec 6th and astounded that flooding of the Maxwell Creek was not taken into consideration. Worse yet, was what seemed to be the response from the TCEG staff that flooding was not the responsibility of the TCEQ. If not the TCEQ, then who? Until a full assessment that includes possible flooding this permit should be granted.

COMMENTS: I absolutely do not want a wastewater treatment plant near my city. I take this proposal as a direct threat to me and my household. A wastewater treatment plant near my city is not ok and I do not want my city's eco system nor my quality of life to be impacted in this way. I do not want the risk of potential pollutants from this treatment plant, nor the suffered air quality that goes with having a treatment plant like this in the area. I do not want a wastewater treatment plant so close to my home. I will be contacting my State Senator and my State Representative. This is NOT ok.

COMMENTS: This will adversely impact the agriculture interest of my creek front property which is on 3 acres of Maxwell Creek directly downstream. Moreover recent commercial rezoning by cities of Murphy and Wylie of adjacent parcels have greatly increased flooding in the area. This Parker project will result in wastewater inside of my primary residence. Parker should utilize another approach like futher use of the scaled up Wylie wasterwater facility for processing within the county.

COMMENTS: I strongly oppose the construction of the waste water treatment plant near Murphy. There are plenty of places outside of the city limits that do not effect the property value of property owners that have lived in this area for many years as well as new residents. Even though this proposed site is not in the City of Murphy it is just past the city limits and within a mile of my residence and I don't want to smell the odor it emits or deal with the pollution it dumps into Maxwell Creek.

COMMENTS: No on the sewage waste center being built and dumping 200,000 gallons of treated waste water into Maxwell Creek. Not only is this environmentally irresponsible behavior for suburban dwellings, but it is dangerous to human and animal health. There will also be massive flooding issues to consider. No, do not built this in our community of Collin County.

COMMENTS: Thank you GOD for providing me what I need. I am a Murphy resident since 2020. I love Murphy because it is a nice , clean safe place. I have little kids as well, tha I planed to rise them in this beautiful City. It is sad to hear a location of or neighbor of a wastewater treatment, because I now how harmful could be my community. I am a health professional person. I am very aware about our envirenment polution and its impact the living creatures. That is one evidence that president Joe Biden is working hard to reduce polutants to our earth. As resident of Murphy, I will always

stand for the good of my community. I do not support the Dallas company to build wastewater treatment plan in our neighborhoods. If was told to vot in person, I will be ready all time. Habtom Teweldebrahan

COMMENTS: As a resident of the Maxwell Creek HOA community I am concerned about the environmental impact of a wastewater plant dumping "treated" water into Maxwell Creek. The wildlife that live in and near the creek will be effected by the quality of water. The creek itself could flood and damage roads, land, as well as other wildlife habitats. I am also concerned about the waste water seeping into well water. The health side effects to residence who have well drinking water will drink the chemically "treated" waste water. Please do not allow this to pass.

COMMENTS: To whom it may concern: I am writing to express our great concern for the proposal of the MUD within this permit request. As a resident of the immediate surrounding area of the proposed waste water management system, we are very concerned about the the odor, as well as possible environmental affects this will have. This area being in a FEMA flood zone, along with it's history of flooding several of the homes in this area during heaving rainfall, poses great

concern for contaminated wastewater to become part of flooding problems. We respectfully request that the permit for the waste water management system be denied. Thank you for taking the time to review our concerns.

COMMENTS: As a resident in Rolling Ridge, I am opposed to this permit request for the following reasons: 1. There is capacity available from the City of Murphy for proposed development. 2. I have concern regarding the drastic change that would result in the community of Murphy & Parker. 3. I am concerned with the effect on the wildlife. 4. I have concern with the flooding potential since we have that issue in some of the areas. 5. I am concerned with the

environmental impact to the surface water and groundwater. 6. This is going to be near a school which is not a healthy situation for the children that attend there.

COMMENTS: My comment comes from a concerned property owner. I live on Gregory Lane and drive through Murphy Road on my way to take my children to school. The proposed Pollutant Discharge Elimination System will cause a problem to our neighborhood. The thought of the current wildlife not having a place to continue to blossom and populate. The thought of cattle not having the open space to grace and roam. The thought of soil being interrupted for the benefit of a development is upsetting. We need to protect our wildlife and current nature. I also worry about the

smell that this system may generate or produce. What will that do to families who enjoy walks in their neighborhoods. What will that do to our kids riding bikes down the sidewalks. What if there is a leak? These are concerns that I have and reasons I am opposed to the proposal.

COMMENTS: This will lower property values, pollute the creek and create a smell that will definitely lower our quality of life. We have a pool and are building a covered outdoor kitchen/living area that we are so excited about. I don't want to worry about which way the wind is blowing to enjoy my property. This is so near an elementary school and is not wanted in our wonderful community. We enjoy lots of outdoor activities and this threatens all of our quality of life.

COMMENTS: I have grave concerns about the proposed wastewater treatment plant. This will damage the ecosystem of the Maxwell Creek area along with adding additional environmental impacts and detriments to human health. We need to be able to raise a family in an area that is not filled with toxic chemicals and additional disease carrying pests. Furthermore, the addition of a wastewater plant in a populated area will diminish home values for many in the surrounding areas.

COMMENTS: This facility is expected to treat up to 200,000 of wastewater per day, sending discharge flowing to Maxwell Creek. It is very close to our residential neighborhood, less than 0.5 miles for some of the homes in our neighborhood. It is detrimental to the health and quality of life of our children and the community. We do not want pollutants from this Waste Water treatment plant seep into the air and ground water and damage the ecosystem of our neighborhood. I am opposed to this plant.

COMMENTS: We are successful breeders of National Champion Arabian and miniature horses. We stable and graze our horses on our 25+ acres. Our property does flood during heavy rain and can effect as many as 50 horses. This is very distressing to us because our lively hood depends on our horse production. These animals our our love and life and this can endanger them.

COMMENTS: This water treatment plant isn't wanted. It would be cheaper and better for everyone to just use septic systems per lot. We understand the builder doesn't want to do this because they want to squeeze 3 homes per acr and not 1

COMMENTS: I oppose this permit. The proposed location for this would damage property values of surrounding home. It would cause odor to surrounding homes. It would also increase traffic on Rolling Ridge drive and Murphy road. Rolling ridge is already very congested during mornings and afternoon. Please do not approve this permit.

COMMENTS: I live about 1 mile from the wastewater treatment plant site. I am a girl scout troop leader and we utilize the the creek for recreation and education. I am concerned about the environmental impacts the wastewater will have on the quality of the creek, aquatic life and surrounding bridges and trails. We will not be able to continue our use of the creek for education or recreation if plant is allowed and the discharge is allowed to flow into the creek.

COMMENTS: I greatly oppose the building of a water treatment facility at this location, so that the developer can reap benefits and money at my family's and community's expense. We moved to Murphy, into our current home, because we did not want to live next to a water treatment plant. We looked at homes close to plants in two other cities and could not handle the smell that emanates from them. I am also greatly opposed to the effects that dumping chemically laden, "treated" wastewater into the Maxwell Creek that runs throughout our neighborhoods and community green spaces.

There are cattle that drink from that creek, as well as wildlife living in and along the banks of the creek. My six children play in the water of that creek. If the developer wants to build on lots smaller than an acre because Parker has no sewage infrastructure, the developer would do well to approach Parker to allow Murphy to take over that land and then work with Murphy so that there is benefit for all as opposed to only developers. This entire plan feels sneaky and manipulative—in other words, unethical not to mention not environmentally friendly or good neighborly. Such a plant will also lower the value of my home, should we need to resell. My family of eight vehemently opposes the building of a wastewater treatment plant so close to our home. Thank you.

COMMENTS: The proposed treatment plant would be located right next to neighborhoods and dump into a creek that runs right through a city park. Due to this proximity to neighborhoods and the runoff into the city park, the possibility of chemicals from the plant adversely affecting the park and local neighborhoods is not acceptable. Additionally the odors from the treatment plant would adversely affect the local neighborhoods and park.

COMMENTS: I am strongly opposed to the proposed MUD development and the associated development of a wastewater treatment plant. As a homeowner in the neighborhood directly adjacent to the land under consideration for this development, I am extremely concerned about the negative environmental, ecological and economic impacts that will results if this is approved. To be more specific: • I DON'T WANT our city's ecosystem damaged • I DON'T WANT potential pollutants from the plant entering our community • I DON'T WANT our air quality to suffer • I DON'T WANT

our quality of life negatively impacted • I DON'T WANT my property value diminished (this would have a direct devastating impact on the homeowners in a neighborhood with the most valuable properties in Murphy). -All in the name of lining someone's pockets. I believe that, if this development were allowed to proceed, the concerns above would absolutely be the result. This is a terrible idea that negatively affects all of the qualities that make Murphy a great place to live and raise our families. Many of us have invested significant time and/or money to make Murphy what it is today. This proposal would destroy our current quality of life. The only beneficiaries of this development would be the greedy land developer who could not care less about the negative impacts to our community. They are only concerned about making profits and do not care who is hurt in the process. They don't live here and I'm certain that they would be opposed to a development like this in their "backyard". Please listen to the citizens/homeowners that have the most at stake. We DON'T WANT THIS devastating project to occur. Thank you for your thoughtful consideration.

COMMENTS: Having a plant built north of my neighborhood is a major concern as not only would nauseous odors be problematic and reduce the value of home values, I am worried about the aerosols that would drift in the air and affect my child who has breathing issues. I am strongly against this plant being built. When I bought my house it was because of the area, lack of industrial processing, and clean air.

COMMENTS: Our community is filled with young children and families. We do not want a wastewater facility near our neighborhoods. I, along with my family and many other friends and families, don't want the water quality to diminish, nor do I want any of our property values to be negatively impacted by the presence of this facility. But mostly, I don't want this facility here because it will impact the quality of life for everyone in our city. We should have a say in what does and doesn't get built in our community -- and this is our way of saying, "No Thanks."

COMMENTS: Under no circumstances do I want this waste processing facility within a five miles of my residence. In the winter months it would place my family and neighbors down wind, degrading the quaility of the air we breathe as well as the pleasantries of the surrounding smells of nature that attracted us to Murphy and its surrounding neighborhoods. Discharge from this proposed facility traveling down Maxwell creek increases the potential for contamination of the playgrounds and nature areas with walking distance for my children and their neighborhood friends. It provides no

improvement to the quality of life, or increased values to my family and the residents of Murphy. NO, NO, NO... do NOT approve this permit.

COMMENTS: Please do not approve this permit! Per the TCEQ website: Mission Statement The Texas Commission on Environmental Quality strives to protect our state's public health and natural resources consistent with sustainable economic development. Our goal is clean air, clean water, and the safe management of waste. This project does not follow along with your mission statement. Public health (and education): The Preserve at Maxwell Creek is an important piece of local recreation for all residents in the area, including my own family. We spend a lot of time hiking and biking

the 4.5 miles of single track trails, as well as the countless amount of kids that play in the creek/ waterway itself everyday. I live 400 ft from the center of the waterway. It is one of the main reasons my wife and I chose to build a house where we did. The waterway space is an important place for our children to explore and learn about nature around us, and it will be missed for our lifetime because of this. Clean Water: Maxwell Creek does have flowing water in it 52 weeks of the year. Digging in the creek will change pH levels of the flowing water, kill, and (or) run off the existing wildlife (coyotes, bobcats, birds, snakes, etc.). Clean air: The area will lose trees and other mature vegetation. It will also scar the land, and have a massive trench scar in the middle of the creek. I do not understand how this path / center line is even an option, as the area is deemed a nature preserve. What does the Army Corp of Engineers say about it, as it is a waterway with full time running water in it? Safe management of wastes: There are other routes that the sewer line can be installed and still maintain safe management of wastes. Countless miles of sewer lines are placed in city and state ROW all over the nation. The Murphy Rd, Betsy Ln, or McCreary Rd ROW would be better locations. There is plenty of room to work (lane closures, moving machinery, materials staging, staging spoils, damage to vegetation / trees is minimal) Not to mention, McCreary Rd is currently falling apart anyway. They may as well place a sewer line and repair the road as they go. These paths will not bother local residents in their neighborhood in front of their homes, only traffic levels on the main roads. Sure it will cost more to build, but that is not my problem. A private developer (who does NOT live in the community) does not care about the damage this will cause to our neighborhood. All they care about is maximizing profit. The beauty of our small community will be damaged and will never be able to recover from this utility installation in our lifetime... how sad? The Maxwell Creek path is too intrusive and damaging to our community! It does not protect our natural resources by tearing it down. The only reason the sewer line is to be installed is so that a new neighborhood can be built in a neighboring town that only has septic, as the lots are larger than one acre. The developer wants to build something that does not match the rest of the community. As I said before, this does not follow guidelines of your mission statement.

COMMENTS: I am not in favor of this permit to build a waste water treatment plant. This will have a negative impact on the surrounding environment for the communities of Murphy, Sacshe, Plano and others. There are other alternatives that could be considered such as connecting to previously established municipal sewer systems. At least please allow for a public comment session where plans can be openly discussed. The creek that is proposed to dump the treated materis in runs right through my neighborhood and my kids play in.

COMMENTS: As a resident of Murphy, I am concerned about the proposed wastewater treatment facility and its impact on our community and property values. I am also concerned that residents were not fully informed of the proposal in a timely manner to be able to formerly contest the proposal. I AM AGAINST the plant being built near our city. I am worried about the pollution -- the smell, chemicals, seepage into ground water and into Maxwell Creek.

COMMENTS: I object to putting a waste water treatment plant at this location. The waste water will flow into Maxwell Creek which is attached to residential neighborhoods and recreational trails. I am concerned about waste water release harming the Eco-system of Maxwell Creek. I am also concerned about foul odors from the Waste Water Treatment plan affecting the home owners in this area. This treatment plant will reduce the quality of life of the thousands of homes in the surrounding neighborhoods.

COMMENTS: To whom it may concern, I would like to let it be known that I am opposed to the current permit application to put a neighborhood and waste water treatment plant in the land directly next to my home. The developer could go ahead and develop it now by adhering to the city of Parker's requirements but she does not want to play by the rules. She is greedy and does not care about the integrity of the two small towns this plan would devastate. The waste water treatment facility would affect home prices in an already tough economy. It would affect the quality of life of

everyone who lives nearby with the smell on windy days and flooding caused by increased water and sewage. It would affect wildlife that call that area their home and cause them to flock to area neighborhoods. We have a small town feel in these two cities on the outskirts of Dallas. The rules for building are in place to protect that. It would be a shame if someone could single handed go above both mayors and every homeowner that lives here just because she doesn't want to follow the current rules in place. Thank you for your time, Heather Wisniowski

COMMENTS: As long-term residents who own a primary home that borders the property that is being discussed to develop into a water treatment facility and multi-family homes and am both saddened and disgusted by the greed and twisting of the community and building codes of this area. Parker, Tx has long been one of the most desirable areas in the entire metroplex... it was build around the dream of having land and ownership... when we moved down from Tennessee we looked at Allen and Frisco to see overbuild, congested, and likely polluted areas.. that was what caused us

to look in this area of town.. we absolutely love everything about this place... what is being proposed is not right and will cause harm to the environment, property values, and the entire Parker way of life. This needs to be stopped!

COMMENTS: I oppose the construction of a wastewater treatment plant at this location. It is right next to our neighborhood, with the proposed discharge within a few hundred feet of my home. this will lower the air quality, subject myself and my neighborhood to offensive odors, and lower our home values significantly. The City of Murphy has capacity for this planned development's waste treatment. Rather than build their own system, the developer should work with the cities of Parker and Murphy to tie into existing infrastructure.

COMMENTS: I am writing to voice my opposition to the proposed wastewater treatment facility. I have been a resident of Murphy for 16 years and this is not something that I want in my backyard. I enjoy the beautiful nature along Maxwell Creek and fear that this treatment facility will alter and destroy the ecosystem along the creek. Who knows the full extent of the environmental impact, as Maxwell Creek feeds into Lake Ray Hubbard. I also am concerned about an

increase in trucks in the area, as well as an odor that will emanate from the facility. No one wants this in their backyard. Please don't allow this in our backyards.

COMMENTS: Please do not approve this permit! Maxwell Creek is a natural creek and wildlife area that is important to the entire area. It provides a source of water to many native animals and fish. The native vegetation also provides cover, habitat and a "highway" for those animals to flourish in our urban landscape. The proposed dumping of treated water into Maxwell creek will not only disturb this natural environment, but it will have unknown consequences on this natural area and its wildlife. As a former President of the City of Murphy Park Board, I helped lead and inform the City of

Murphy as this area was planned and developed. My family, neighbors, and friends enjoy the trails, parks and sights of the Maxwell Creek Trail System. At a minimum, an extensive environmental impact study of the proposed project should be required. Additional input from concerned and affected residents should also be encouraged. This project will NOT dump rain or storm water into the creek system. Very large amounts of treated sewage water will be released directly into Maxwell Creek. I am against this project, and I formally ask that the permit for this project be denied. Thank you!

FAX:

COMMENTS: I do Not want this. We worked hard to get here and followed rules. Now THEY want to change rules and stub their noses at us and making us live with results. Parker has 1 acre minimum for a reason. Why should we have to live with someone's GREEDY choices? Please DENY this request.
