COMMENTS: We, The residents of Gregory Ln and Ranchview Ln in Parker Texas, 75002 have signed the attached petition to together oppose the proposed Waste Water Treatment Facility under permit Number WQ0016003001 (EPA ID NO TX 0141381) for the following reasons: 1) We believe such a wastewater facility would depreciate the values of our homes and land. Many Gregory Ln residents have already invested multimillion dollars here. 2) Gregory Lane has residential homes with land to allow for agriculture and livestock. We believe such a waste water treatment facility and the high density development of the land would immediately change our way of life, which involves production of hay and rearing of livestock. 3) Gregory Lane and its immediate surroundings are made up of grasslands with a pond and creek running through. A wastewater treatment facility whose runoff is allowed to enter our Maxwell Creek could harm the wildlife dependent on this habitat. Those most common here include, but are not limited to: the Box turtle, night and great blue herons, catfish, bass, egrets, hawks, falcons, coyotes, bobcat, skunk, cotton tail rabbits, ect. 4) Of the Gregory Ln residents listed on the Map showing the affected area, available at the Wylie Library, only a handful received notification from the TCEQ in the mail and those that did received the letter on approximately 9/17/21, not near 8/25/21 as dated. For this reason alone, another mailing should go out by the TCEQ to the affected residents before any decisions can be made, as many have not been able to make their opinions known. Upon collecting petition signatures from Gregory Ln residents the following were completely unaware of the proposed facility and had received nothing in the mail: The Viere family, Jackson Ranch Inc., William Harvey and Katherine Calabria Joint Grantors, Valentin and Mayra Trejo, Steven and Linda Loop. 5) Zoning restrictions in Parker Texas demand a minimum of one-acre lots for all residential homes to allow for septic tanks. Thus, we oppose these high-density housing developers of Turner/Harrington who are trying to bypass this requirement by placing their own wastewater treatment facility for vast housing they plan. 6) Such a wastewater treatment facility and housing development would greatly increase traffic to Gregory lane, which is a Dead End and limited by a bridge entrance that gets flooded with heavy rains. We do not believe Gregory Lane can physically support such an influx of people.

We, The residents of Gregory Lane in Parker Texas, 75002 live directly adjacent to the proposed Waste Water Treatment Facility under permit Number WQ0016003001 (EPA ID NO TX 0141381). We oppose and ask to contest this permit.
