COMMENTS: I moved to Parker in 2013 because of the large expansive lots and I knew the home would retain their value over time. With this MUD proposal that will add over 600 homes and a wastewater treatment plant, I feel this will decrease the home values in Parker and Murphy and add overburden both cities.

COMMENTS: Developing high-occupancy homes in an affluent multi-million dollar neighborhood could significantly undermine the community's character and quality of life. These developments often lead to increased traffic congestion, noise pollution, and strain on local infrastructure, which can degrade the serene, exclusive environment that residents have invested in. Additionally, high-density housing can negatively impact property values and may not align with the aesthetic and zoning standards of upscale

neighborhoods, leading to potential conflicts and dissatisfaction among current homeowners. Preserving the integrity and tranquility of such neighborhoods is crucial to maintaining the unique appeal and high property values that define these areas.

COMMENTS: My home is 0.6 miles of the proposed DISTRICT Boundaries as presented. I respectfully request you to deny the application by Harrington / Turner Enterprises, LP and Gregory Lane, LLC (the "Petitioner") for the creation of Collin County Municipal Utility District No. 7 with permit number D-04122021-017, customer number CN605878966, regulated entity number RN111242855 (the "District Application"). This proposed development is going to bring a lot nuisance to my neighborhood and ruin my investment value. We already see a lot of storm water flowing from the fields

to our neighborhood. With the proposed development, we are going to see a lot more. The developer and petitioner seem to be bad faith. They have not informed the affected parties, nor are they willing to work with planned cities of Parker and Murphy. Instead they appear to be hell bent on profits without any concern about effect of this ultra high density plan on pollution, nuisance and well being on existing and even the ones who are going to buy that property.

COMMENTS: I live on Aspen Court near Maxwell Creek. I'm concerned that a large housing development will negatively impact the creek. It already floods with heavy rain impacting the bridge over the creek and the dirt trail adjacent to the creek. If a water treatment plan dumps water into the creek, the flooding will become a serious ongoing issue. I'm also concerned that the water quality will suffer, disturbing the habitat of the many animals that live in the woods by the creek and negatively impacting the health of the

children that play at the Murphy playground and the high school students who attend the school just west of the creek. Additionally, even if there is no water treatment plant, dramatically building up the undeveloped land will increase runoff and impact the creek, too. As Parker does not have the same resources as Murphy, we Murphy residents will be picking up the tab for city services, a tab that will be significant given the number of planned houses. The increased traffic that Murphy Road will be forced to handle is not sustainable either.

COMMENTS: I am contesting this MUD because of the impact it will have on the city and residents of Murphy, TX. As a land-locked community surrounded on all sides by other municipalities and as a community comprised of a wide demographic of families, the location of this proposed facility will deliver not more needed infrastructure, but rather terribly extreme negative impact to the residents and this community. The proximity to an elementary school will often make any outdoor activities impossible because of the negative impact of the air that surrounds such facilities. The elder

residents, often parts of multi-generational homes, will equally be impacted by being restricted to indoor activities when the winds flow in the wrong direction. As a town that has limited tax revenue resources, the impact will be felt in diminishing the attractiveness of this family-friendly city and negatively impact the residential property values. Both will essentially destroy this city when there are many more location options that will serve as intended. With all of these factors, and far more, I strongly contest the proposed location for the MUD and do so knowing that many of my neighbors will follow suit and others who also feel the same will not take the time or understand how to file just a contesting statement. .

COMMENTS: The state-issued MUD provides for the sovereignty of the MUD from any legal action in case of any damages or violation of state or Federal laws, like NTMWD which occurs quite often by the city, ETJ, or CCN, daily. Texas Attorney General will not prosecute the MUD or even enforce or respond to the legal complaint by the state resident according to the Federal Freedom of Information Act. MUD will issue junk bonds to raise money and with that fund victimize the affected area residents individually who

pay their boards of directors which are immune from any adjudication. Evidence and historical samples can be provided upon request of the above statement/activities based on my experience living in this area for the past 40 years. I oppose this MUD with the above construct because it will lead to the Texas Republic army, skinheads, and Aryan nation militia formation again or lead to/give rise to the possibility of another mass shooting like Lubey, Allen Mall Mascara, etc in this area. I would recommend you go back to Austin and change the state laws that are based on "The British King Rules" which gives these government entities immunity before setting up another 3-letter area designation. Thanks for your time and attention.

COMMENTS: I strongly oppose the construction of a wastewater treatment facility in the ETJ or anywhere in Parker. The proposed wastewater discharge into Maxwell Creek will adversely impact the ecological environment of the creek and surrounding areas (killing fauna and flora) and potentially cause flooding, a problem that is already present. We request

that the Commission judiciously consider all factors that impact the surrounding areas before making the decision granting the permit.

COMMENTS: I live off of Dublin creek and have recently watched it fill up past capacity on several occasions this past summer and spring. Also, the only way to get to my home is through Dublin Rd. The drainage ditches along that road cannot handle the waters that come through and join the creek, which cannot handle its waters already. This makes for many days in the year that become very dangerous for homeowners to enter or leave the area. We are also seeing erosion at an accelerated rate and large trees

beginning for fall in the creek. Please consider what a high density development would do to the area, for which the infrastructure was never intended to handle. As a realtor, I also see a huge issue with surrounding home values. I also educate my buyers on MUD districts and the added costs of living in one. I believe those homes will be difficult to sell because all surrounding is lower density and higher quality homes that are not involved in a MUD. Frankly, a developer should be required to come up with development expenses, not put it back on future homeowners for the next 30 years. The devaluation of these homes will affect so many surrounding homes, and devastate our area.

COMMENTS: I would not like the waste water treatment plan near my subdivision Here are some ways in which it may affect me personally: Health and Well-being: The presence of a waste water treatment plant near my subdivision would raise concerns about potential health risks. I would worry about the odors, noise, and air pollutants emitted by the facility, which could negatively impact the air quality in my neighborhood and potentially affect my respiratory health and overall well-being. Property Value: The

proximity of a waste water treatment plant could potentially decrease property values in my subdivision. This would have financial implications if I plan to sell my property in the future, as the market desirability of the area may be reduced due to the presence of the facility. Quality of Life: The noise and/or visual pollution generated by a waste water treatment plant would significantly impact my daily life. Constant noise from the facility would disrupt the peace and tranquility of my neighborhood, making it less enjoyable to spend time outdoors or relax at home. Aesthetics: The industrial appearance of a waste water treatment plant would detract from the visual appeal of my subdivision. This would affect the overall aesthetics of the area and may not align with the residential character I value. Environmental Concerns: I would worry about the environmental consequences of the waste water treatment process and the discharge of treated water. The potential contamination of local water sources, soil, or air could have a negative impact on the surrounding ecosystems and wildlife, which is a concern for me as an environmentally conscious resident. Future Development: The presence of a waste water treatment plant near my subdivision would pose challenges for future development. Potential businesses or residents may be deterred from moving to the area due to the proximity of the facility, limiting the growth and expansion of my community.

COMMENTS: We live in a small town with limited resources. There is a MUD that bring up concerns regarding traffic (especially on Gregory Lane), flooding, noise, odors and our property values. Our Fire department resources, Parker and Murphy, are required to provide service, and those departments are small. In our Parker department emergency resources, we don't even have proper buildings for our departments much less ability to be stretched more. I am commenting against this development.

COMMENTS: I am opposed to the MUD that is being requested by the Huffines /Restore the Grasslands. The city of Parker does not have the water supply to support the density of housing proposed by the Huffines. We have a water moratorium in place currently and we do not have a water supply capacity from North Texas Municipal Water district as previously stated by the testimony of John Birkhoff. High density housing would increase the traffic significantly and it would have an impact on flooding. Maxwell

creek and Dublin Creek do not have the capability to handle the rain water runoff and the expelled sewer water from a wastewater treatment plant.

COMMENTS: I'm very concern about this project. Nearby Residential area it could be dangerous and harmful for our neighborhood. Our health is going to be affected by the odors and toxic gases produced from this treatment plant. This type of plant near household is a significant risk for symptoms like headaches, unusual tiredness and an increase in possibility for respiratory and skin diseases. I'm very concern about our kids who need to explore the creek also it could

impacts on wildlife too. Please justify all our concerns and make this project in a separate isolated area not nearby Residential area.

COMMENTS: We moved to The City of Parker because it was a way to live in a country like surrounding with the ability to work in the larger City locations. The proposed changes will dramatically change the City, disrupt the utilities, roads, traffic flow, safety and totally take away the life style we moved to Parker for. It could also devalue the property values and raise taxes. The current proposals would possibly cause us to have to abandon our future because of the proposed disruptions and cost of the proposals of the outside buyers.

COMMENTS: I have been a homeowner and resident of Murphy, Texas for 14 years. I pay my mortgage and property taxes and enjoy the home town feel of my community. With the proposed development, the investment in my home, family and community will be thrown out the window for a builder who offers no remedy. The Maxwell Creek will certainly receive spill over of waste. The air quality will certainly smell and traffic is guaranteed to increase. The property investment and taxes I've been paying for 14 years will

go to those (builder and new homeowners) who will not be paying for police protection, EMT services, public schools, or public works. The rights of hard working Murphy and Parker residents needs to be protected. I appreciate your consideration.

COMMENTS: I live a quarter mile from the proposed building project of 660 + homes. The construction of a major sewage plant close to my home, and neighbors', will cause harm to the environment and living conditions of many animals migrating/living around the creek. The added potential of 2000 or more people moving into this new area will negatively affect the city of Parker and Murphy's emergency departments. The new people living in an unincorporated area will not pay taxes for any of these

services, yet will expect/demand they are served by the emergency departments. The whole idea of building in this area is obviously a huge mistake.

COMMENTS: I live approximately one & 1/4 miles east from this proposed MUD. Currently we have flooding issues. On July 28th, 2023 Restore the Grasslands (non petitioner) filed drainage plans that state 2/3 of the drainage from the District will flow East into Maxwell Creek. On or around May 30th thru June 3rd, we have been experiencing flooding in my neighborhood. The addition of this MUD will only ADD to our problem.

COMMENTS: I live one & 1/4 miles east of this proposed MUD. If the MUD is permitted I will be affected by higher water rates and water shortage. This water shortage keeps Parker's building moratorium in place and harms Parker's ability to grow its tax base, at the expense of higher taxes on existing property owners. Parker's infrastructure (water, police, emergency services) cannot support more individuals without increasing taxes and this burden will fall on me.

COMMENTS: I am strongly against this! How could you allow such a operation to move into the middle of a million dollar neighborhood. This is criminal ! Our property values will plummet and all outside activities will be deadly with the fumes. We are all under ridiculous restrictions to keep our properties beautiful and neighbor friendly, yet these people can freely come in and contaminate the entire area without any concern for current property owners.

COMMENTS: Parker is a small city that affords me and my family the ability to have close to a country living experience with a larger plot of land. That is what makes Parker unique as we're surrounded by high density communities in adjoining cities. A high density development as proposed, that due to not being w/in city limits bypasses the City's charter for minimum build requirements and resulting in a large community that would tap into my city's services w/o contributing to those services is not realistic. We

already have seen an increase in traffic due to developments like this built east and north of us. The level of traffic noise and access out of our cul-de-sac is directly impacted by these types of developments and will grow exponentially as this proposed development would add upwards of 2000 residents w/multiple vehicles with their access in and out of Parker being Parker Rd. which is my only access road in/out of my neighborhood. The impact to the City, our roads, our quality of life, especially without the benefit of additional tax revenue would be enormous. Respectfully Rob Walther Individual Protestant, Pro Se 4113 Brookwood Dr Parker, TX 75002 972 523-0221 robertjw1959@gmail.com
