COMMENTS: I have concerns about how this will affect the flooding in this area. When we have moderate rain fall the " Red Gully " goes out of its banks. The additional discharge water would compound this problem. I would also like to know what kind of study will be done to eliminate this potential problem and what will be the environmental impact on discharging this water into a gully that flows into the East Fork of the San Jacinto River. I would like to have a public

hearing so that others in our community, and our county officials will know the potential flooding risk this poses to our community.
