COMMENTS: I request a public hearing! This proposed concrete batch plant is too close to homes and will be too dangerous for ourselves and our children's health to breathe the air emitted. Studies have documented and confirmed the dangers of breathing both the Particulate Matter and the Volatile Organic Compounds (VOCs) from these plants. Particulate matter is linked to serious health conditions, including reduced lung development in children, higher rates of asthma, bronchitis, heart disease and cancer. VOCs can irritate the eyes and respiratory system and cause shortness of

breath, headaches, fatigue, skin problems and impair the memory. Higher concentrations of VOCs can even damage the liver, kidney and brain. My family, including my children, spend hours outside every day breathing the air. The air pollution alone from a plant this close to homes will make the simple joys of playing outside, gardening (which I do to feed my family), and even just walking, too dangerous for us to safely do. We don't deserve this. The innocent neighbors in my community don't deserve this. Please, for the health of your fellow Texans, deny this permit request. This plant has no business in our neighborhood and will absolutely destroy our quality of life and endanger our health, and is simply not how good neighbors treat each other.

COMMENTS: This proposed plant is too close to existing homes and properties. The pollution, air and noise, is not an acceptable tradeoff for convenience. Furthermore, Helms Trail was not designed nor built for the weight of concrete transit trucks. Please reconsider the location of this proposed plant.

COMMENTS: I REQUEST A PUBLIC HEARING. This concrete plant that is requesting an air quality permit is very near my home. My husband has asthma and we just moved her specifically for the air quality. He already has had to use 3 different inhalers, but since moving here he's been able to stop. We moved to this area and pay way more money with the purpose of the air quality because his lungs can't handle the poor quality.
