Permit No. W00016158001 DEC 14 2022
By GCW

In response to your notice of APPLICATION AND PRELIMINARY DECISION FOR ... MUNICIPAL WASTEWATER, I hereby offer my concerns as a public comment.

TCEQ OCC
14DEC '22 9:51

What you release (37,500 gal.) will be mostly sludge and sediment since the purpose of the treatment facility is the "reuse for cooling tower make up water." However, without adequate wash water, this sludge will settle in low spots of our downtown area and corners such as the corner where I live (16th & M).

This situation can clog our city sewer system causing system failure which is a serious health hazard.

Please reconsider; and protect our city sewer system for reasons of health & safety.

Also, I request to be added to your mailing list for this application.
