COMMENTS: To whom it may concern, Please TCEQ members I beg you reconsider your decision to approve Lyondell Basell's license renewal even if it meets national and state standards it is clear we the Channelview community do not feel safe with allowing this company to burn natural gas that will release particulate matter. We really are relying on you all to represent us otherwise our elderly, children and young people will suffer greatly by contamination without even knowing that this company is intoxicating them on a daily basis. Please consider a second meeting, in addition, before

making a decision because many questions were not answered due to lack of expertise. Our community has a right to know what is being refined at Lyondell Basell at which quantities, it's toxicity and the effects of being contaminated by the products. As was mentioned in the meeting we should not be rewarding Lyondell Basell with permit renewals until they are up to date with meeting standards (state/national) and they correct any violations (chemical waste, air pollution, flares, etc.).
