COMMENTS: I request a public meeting. We have very little information on this new development. It is concerning that this is one of several proposed MUDs adjacent to each other and by the same developer where the proposed multiple wastewater treatment plants' effluent will exceed 2M gpd and due to the housing density, the stormwater runoff will increase by at least 4x current, all into small receiving tributaries/creeks. The combined impact should be studied as a whole, as the flow is much greater than when looking at each development individually. Approval of this development (and the others) will result in flooding of downstream landowners that do not currently flood. I request that this permit be denied.
