**COMMENTS:** Three Mile creek is an INTERMITTENT WATERWAY. The idea of pumping up to 80,000 gallons of treated wastewater per day into a dry creek bed is ludicrous. The "ecosystem" in and along the creek will be adversely impacted. Aerobic and anaerobic septic systems have little to no impact on wildlife/humans. I have owned 152 acres with Three Mile running through it for ten (10) years. If allowed, this sewer treatment plant will turn Three Mile creek into just that .....a sewer..THREE MILES LONG. I request a hearing and a detailed impact study to be conducted on this matter.

**COMMENTS:** I have concerned about this intended trailers park. 80,000 gallons of highly chlorinated water in the creek that is dry most of the time will have adverse impacts /effects on the ecosystem. There's no water to help dilute waste from the plant under normal circumstances , much less if the plant has problems which they often do , nor less smell and odor. Taking away wildlife. There will be a tremendous traffic. It will be one over populated area and unsafe. My husband and I moved away from the city life trying to avoid living on top of neighbors. It really hurtful now having to

deal with traffic and trailers park homes. We are so against this project. Too many odds, issues will begin soon. And I'm next door to the charades. What's wrong with building regular houses??? The builder is being greedy. Too many people will occupy one single street. My husband and I would like to request requesting a public hearing. PLEASE SAVE MACEDONIA!!!

**COMMENTS:** Sirs, As a lifelong property owner and resident of Waller County as well as a member of our six generation heritage living on our ranch, I am formally requesting a public hearing be held. We are located less than two miles from creek where planned waste water will be routed and under three miles from the planned development. While I realize development is inevitable it is extremely troubling to know local wildlife would be detrimentally affected by this. Mostly

I just want an explanation as to when our government will call a halt to development knowing agriculture and nature are requirements of healthy human life in addition to wildlife.

**COMMENTS:** Dumping effluent into the creek poses great risk to the environment and citizens that neighbor the streams. My property is next to Three Mile Creek. I have a well, and also wonder if there is up to 80,000 gallons highly chlorinated water dumped by this proposed development into a creek that is dry some of the time, have there been any studies into adverse effects on the ecosystem? What will be the load place on our stressed aquifer? How will the flora and fauna respond to highly chlorinated effluent from the development? Will there be additional water load to the

aquifer used to help dilute waste water from the waste water plant? What happens if the the plant has problems, which they often do? What level of daily monitoring will occur to protect neighbors and the environment? I request public hearings on this proposed development, and that the permit WQ0016182001 be held and not approved until a proper environmental study has been done by appropriate local, state and federal authorities to the satisfaction of citizens impacted by this proposed development.

**COMMENTS:** I am a landowner on Snow road, Hockley, & I am concerned how this sewage facility will effect the wildlife. We have several indigenous species on our wildlife exemption. Song birds, mourning doves, Whitetail deer... the 80,000 gallons of highly chlorinated water will surely have impact on the surrounding animals. I would like to request a public hearing on the matter.

**COMMENTS:** I live on Three Mile Creek south of proposed treatment facility. That Creek doesn't have enough constant water flow to accommodate 80000 gallons a day. It will lead to odor and water pollution in what is currently a beautiful natural area FULL of wildlife that depend on that Creek for clean drinking water. I request a community hearing so that current residents may be heard.

**COMMENTS:** Good Morning I am writing this comment in concern to the 300 monbile home park coming in. Would creek can con hold the 80,000 of treated water they are wanting to dump into the creek daily. This creek runs dry and would end up being nothing but waste water if this get approved. We want public hearing to voice our concerns publicly. Thank you

**COMMENTS:** Want to voice our concern about the 80,000 gallons of discharge water per day. I under this water is chlorinated and in most cases requires dilution into a creek. Three Mile Creek at this point is dry about half the year, or has very little running water. This means that most of the water in this creek after the proposed water plant will only have mainly chlorinated water. Water which is designed to kill organisms. This will greatly affect the health of the creek and surrounding wildlife that use the creek as drinking water.
