COMMENTS: I am a Requester on this permit application and would like to add the following for consideration. In addition to the previous requests, I request that TCEQ consider the environmental and community impact for the water aquifer. It is very important to ensure the local water aquifer can absorb the load from a well that supports up to 80,000 GPD wastewater. The negative impact to surrounding wells can be extraordinary. Single wells on a property that go dry are very serious to this rural area. If needed, please work with or refer this concern to the Bluebonnet Groundwater Conservation District (https://www.bluebonnetgroundwater.org/) Thank you.
