COMMENTS: I live on 30 acres just downstream of this proposed sewer treatment plant. I have heavy erosion of my property along the sides and rear from Mill Creek due to the varying amounts of water that flow through it during rains. I have photos and can provide access to anyone that would like to view. The creek flow does not need to be increased and I have cattle and children that access the creek regularly and do not want an additional flow of 55,000 gallons of

treated sewage being released into the creek and run through my property. The creek already regularly floods the lower part of my property during heavy rains that my cattle graze on as well as deer and other local wildlife. I have attached a photo showing the creek and the erosion areas I am trying to deal with. I want to speak at a hearing. I understand that they could tie into the Bells sewer system but do not want to incur the cost and would prefer to build their own sewer treatment facility discharging into Mill Creek. This is not acceptable.
