# DEFAULT AND SHUTDOWN ORDER

# DOCKET NO. 2024-0370-PST-E

the Texas Commission on Environmental Ouality On ("Commission" or "TCEO") considered the Executive Director's First Amended Report and Petition, filed pursuant to TEX. WATER CODE chs. 7 and 26 and the rules of the TCEO, which requests appropriate relief, including the imposition of an administrative penalty, corrective action of the respondent, and revocation of the facility's fuel delivery certificate. The Commission also considered the Executive Director's Motion requesting the entry of an Order requiring the respondent to shut down and remove from service the underground storage tanks ("USTs") located at 8194 Spid Drive in Corpus Christi, Nueces County, Texas, The respondent made the subject of this Order is OHK GLOBAL INC dba Snappy Foods 21 ("Respondent").

The Commission makes the following Findings of Fact and Conclusions of Law:

# **FINDINGS OF FACT**

- 1. Respondent operates, as defined in 30 Tex. ADMIN. CODE § 334.2(75), a UST system and a convenience store with retail sales of gasoline located at 8149 Spid Drive in Corpus Christi, Nueces County, Texas (Facility ID No. 80031) (the "Facility"). The USTs at the Facility are not exempt or excluded from regulation under the Texas Water Code or the rules of the TCEQ, and contain a regulated petroleum substance as defined in the rules of the TCEO.
- 2. During an investigation conducted on April 6, 2022, an investigator documented that Respondent:
  - Failed to monitor the UST installed on or after January 1, 2009, in a manner a. which will detect a release at a frequency of at least once every 30 days by using interstitial monitoring. Also, failed to equip each separate pressurized pipe with an automatic line leak detector. In addition, failed to monitor the piping associated with the UST system installed on or after January 1, 2009, in a manner which will detect a release at a frequency of at least once every 30 days. Specifically, the UST was installed on June 23, 2009, and Respondent was not using interstitial monitoring as the primary release detection method and the Facility did not have a line leak detector installed for the pressurized piping associated with the regular unleaded compartment, the piping associated with the UST system was installed on June 23, 2009, and Respondent was not using interstitial monitoring as the primary release detection method;
  - b. Failed to test the spill prevention equipment at least once every three years to ensure the equipment is liquid tight. Also, failed to conduct annual walkthrough inspections for regulated substance releases in the containment sump and to the environment. Specifically, Respondent had not conducted the triennial testing of the spill prevention equipment;

- c. Failed to investigate and confirm all suspected releases of regulated substances requiring reporting under 30 Tex. ADMIN. CODE § 334.72 (relating to Reporting of Suspected Releases) within 30 days. Specifically, inventory control records for the regular unleaded compartment from September 2021 through March 2022, for the super unleaded compartment from October 2021 through March 2022, and for the diesel compartment from October 2021 through March 2022 indicated suspected releases that were not investigated;
- d. Failed to report suspected releases to the agency within 24 hours of discovery. Specifically, inventory control records for the regular unleaded compartment from September 2021 through March 2022, for the super unleaded compartment from October 2021 through March 2022, and for the diesel compartment from October 2021 through March 2022 indicated suspected releases that were not reported;
- e. Failed to ensure that emergency shutoff valves (also known as shear or impact valves) are installed and securely anchored at the base of each dispenser. Specifically, the shear valves for Dispenser Nos. 1/2, 3/4, and 5/6 were not properly anchored;
- f. Failed to renew a previously issued UST delivery certificate by submitting a properly completed UST registration and self-certification form within 30 days of ownership or operator change. Specifically, the delivery certificate was not renewed after the ownership and operator change on January 27, 2022; and
- g. Failed to assure that all spill and overfill prevention devices are maintained in good operating condition. Specifically, the shear valve on Dispenser Nos. 3/4 was leaking.
- 3. By letter dated August 15, 2022, Respondent was provided with written notice of the violations and of TCEQ's authority to shut down and remove from service USTs not in compliance with release detection, spill and/or overfill prevention, corrosion protection, and/or financial assurance requirements if the violations were not corrected.
- 4. The Executive Director filed the "Executive Director's First Amended Report and Petition Recommending that the Texas Commission on Environmental Quality Enter an Enforcement Order Assessing an Administrative Penalty Against and Requiring Certain Actions of OHK GLOBAL INC dba Snappy Foods 21" (the "EDFARP") in the TCEQ Chief Clerk's office on August 2, 2024.
- 5. By letter dated August 2, 2024, sent to Respondent's last known address via certified mail, return receipt requested, postage prepaid, the Executive Director served Respondent with notice of the EDFARP. According to the return receipt "green card," Respondent received notice of the EDFARP on August 6, 2024, as evidenced by the signature on the card and USPS.com "Track & Confirm" delivery confirmation records.
- 6. More than 20 days have elapsed since Respondent received notice of the EDFARP. Respondent failed to file an answer and failed to request a hearing.
- 7. By letter dated October 16, 2024, the Executive Director provided Respondent with notice of TCEQ's intent to order the USTs at the Facility to be shut down and removed from service if Respondent failed to correct the release detection and spill and overfill prevention violations within 30 days after Respondent's receipt of the notice.
- 8. As of the date of entry of this Order, Respondent has not provided the Executive Director with documentation demonstrating that the release detection and spill and overfill prevention violations alleged in Findings of Fact Nos. 2.a., 2.b., and 2.g. have been corrected.

9. The USTs at the Facility do not have release detection and spill and overfill prevention as required by Tex. WATER CODE § 26.3475(a), (c)(1) and (c)(2) and 30 Tex. ADMIN. CODE §§ 334.48(g)(1)(A)(ii) and (h)(1)(B)(ii), 334.50(b)(1)(B) and (b)(2)(A)(i) and (iii), and 334.51(a)(6), and may be releasing petroleum products to the environment. Therefore, conditions at the Facility constitute an imminent peril to public health, safety, and welfare.

"On behalf of the Executive Director of the Texas Commission on Environmental Quality, the 'Executive Director's First Amended Report and Petition Recommending that the Texas Commission on Environmental Quality Enter an Enforcement Order Assessing an Administrative Penalty Against and Requiring Certain Actions of OHK GLOBAL INC dba Snappy Foods 21' (the "EDFARP") was filed in the TCEQ Chief Clerk's office on August 2, 2024.

The EDFARP was mailed to Respondent's last known address on August 2, 2024, via certified mail, return receipt requested, postage prepaid. According to the return receipt "green card," Respondent received notice of the EDFARP on August 6, 2024, as evidenced by the signature on the card and USPS.com "Track & Confirm" delivery confirmation records.

More than 20 days have elapsed since Respondent received notice of the EDPRP. Respondent failed to file an answer and failed to request a hearing.

By letter dated October 15, 2024, sent via first class mail and certified mail, return receipt requested article no. 7020 3160 0000 1043 9086, I provided Respondent with notice of the TCEQ's intent to order the USTs at the Facility be shut down and removed from service if the violations pertaining to release detection and spill and overfill prevention were not corrected within 30 days of Respondent's receipt of the letter. Respondent received notice on October 21, 2024, as evidenced by the signature on the card and USPS.com "Track & Confirm" delivery confirmation records.

As of the date of this declaration, I am not aware of any evidence that indicates that Respondent has corrected the release detection and spill and overfill prevention violations noted during the April 6, 2022 investigation."
