BEFORE THE

TEXAS COMMISSION ON

ENVIRONMENTAL QUALITY

DEFAULT ORDER

DOCKET NO. 2024-0376-PST-E

On ______, the Texas Commission on Environmental Quality ("Commission" or "TCEQ") considered the Executive Director's First Amended Report and Petition, filed pursuant to TEX. WATER CODE chs. 7 and 26 and the rules of the TCEQ, which requests appropriate relief, including the imposition of an administrative penalty, corrective action of the respondent, and revocation of the facility's fuel delivery certificate. The respondent made the subject of this Order is OHK GLOBAL INC dba Eagle 1 ("Respondent").

The Commission makes the following Findings of Fact and Conclusions of Law:

FINDINGS OF FACT

- 1. Respondent operates, as defined in 30 TEX. ADMIN. CODE § 334.2, a underground storage tank ("UST") system and a convenience store with retail sales of gasoline located at 700 South Gulfway Drive in Port Arthur, Jefferson County, Texas (Facility ID No. 84411) (the "Facility"). The USTs at the Facility are not exempt or excluded from regulation under the Texas Water Code or the rules of the TCEQ, and contain a regulated petroleum substance as defined in the rules of the TCEQ.
- 2. During an investigation conducted on November 29, 2023, an investigator documented that Respondent:
 - a. Failed to monitor the UST installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days by using interstitial monitoring. Also, failed to monitor the piping associated with the UST system installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days. In addition, failed to conduct a test of the proper operation of the release detection equipment at least annually. Specifically, the UST was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, the piping associated with the UST system was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, and Respondent did not conduct the annual operability testing of release detection equipment, including the automatic tank gauge ("ATG") system and the probes;
 - b. Failed to test the spill prevention equipment at least once every three years to ensure the equipment is liquid tight. Also, failed to inspect overfill prevention equipment at least once every three years to ensure that overfill prevention equipment is set to activate at the correct level. In addition, failed to annually check containment sumps for damage, leaks to the containment area, for leak in the interstitial area. Specifically, Respondent had not conducted the triennial testing of the spill prevention equipment; and

- c. Failed to designate, train, and certify at least one individual for each class of operator-Class A, Class B, and Class C for the Facility. Specifically, the Facility did not have C Operator.
- 3. The Executive Director recognizes that on January 27, 2025, Respondent provided documentation demonstrating the following corrective measures at the Facility:
 - a. Implementing interstitial monitoring release detection for the USTs and associated piping at the Facility;
 - b. Conducted the annual operability testing of release detection equipment;
 - c. Conducted triennial testing of overfill and spill prevention equipment on December 7, 2023;
 - d. Conducted annual walkthrough inspection of the containment sumps; and
 - e. Trained one individual as a Class C operator for the Facility.
- 4. The Executive Director filed the "Executive Director's First Amended Report and Petition Recommending that the Texas Commission on Environmental Quality Enter an Enforcement Order Assessing an Administrative Penalty Against and Requiring Certain Actions of OHK GLOBAL INC dba Eagle 1" (the "EDFARP") in the TCEQ Chief Clerk's office on May 20, 2024.
- 5. By letter dated May 20, 2024, sent to Respondent's last known address via certified mail, return receipt requested, postage prepaid, the Executive Director served Respondent with notice of the EDFARP. According to the return receipt "green card," Respondent received notice of the EDFARP on September 24, 2024, as evidenced by the signature on the card and USPS.com "Track & Confirm" delivery confirmation records.
- 6. More than 20 days have elapsed since Respondent received notice of the EDFARP. Respondent failed to file an answer and failed to request a hearing.

CONCLUSIONS OF LAW

- 1. As evidenced by Finding of Fact No. 1, Respondent is subject to the jurisdiction of the TCEQ pursuant to TEX. WATER CODE ch. 26 and the rules of the TCEQ.
- 2. As evidenced by Finding of Fact No. 2.a., Respondent failed to monitor the UST installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days by using interstitial monitoring. Also, failed to monitor the piping associated with the UST system installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days. In addition, failed to conduct a test of the proper operation of the release detection equipment at least annually, in violation of TEX. WATER CODE § 26.3475(a) and (c)(1) and 30 TEX. ADMIN. CODE § 334.50(b)(1)(B) and (b)(2)(A)(i) and (iii).
- 3. As evidenced by Finding of Fact No. 2.b., Respondent failed to test the spill prevention equipment at least once every three years to ensure the equipment is liquid tight. Also, failed to inspect overfill prevention equipment at least once every three years to ensure that overfill prevention equipment is set to activate at the correct level. In addition, failed to annually check containment sumps for damage, leaks to the containment area, for leak in the interstitial area, in violation of TEX. WATER CODE § 26.3475(c)(2) and 30 TEX. ADMIN. CODE § 334.48(g)(1)(A)(ii), (g)(1)(B), and (h)(1)(B)(i).
- 4. As evidenced by Finding of Fact No. 2.c., Respondent failed to designate, train, and certify at least one individual for each class of operator-Class A, Class B, and Class C for the Facility, in violation of 30 TEX. ADMIN. CODE § 334.602(a).

- 5. As evidenced by Findings of Fact Nos. 4 and 5, the Executive Director timely served Respondent with proper notice of the EDFARP, as required by TEX. WATER CODE § 7.055 and 30 TEX. ADMIN. CODE § 70.104(b)(1).

WATER CODE § 7.057 and 30 Tex. ADMIN. CODE § 70.106, the Commission may enter a Default Order against Respondent and assess the penalty recommended by the Executive Director.
- 7. Pursuant to TEX. WATER CODE § 7.051, the Commission has the authority to assess an administrative penalty against Respondent for violations of state statutes within TCEQ's jurisdiction, for violations of rules adopted under such statutes, or for violations of orders or permits issued under such statutes.
- 8. An administrative penalty in the amount of \$5,956 is justified by the facts recited in this Order, and considered in light of the factors set forth in TEX. WATER CODE § 7.053.
- 9. TEX. WATER CODE §§ 5.102 and 7.002 authorize the Commission to issue orders and make determinations necessary to effectuate the purposes of the statutes within its jurisdiction.
- 10. Pursuant to 30 TEX. ADMIN. CODE § 334.8(c)(6), the Commission has authority to revoke the Facility's UST fuel delivery certificate if the Commission finds that good cause exists.
- 11. Good cause for revocation of the Facility's UST fuel delivery certificate exists as justified by Findings of Fact Nos. 2 and 4 through 6, and Conclusions of Law Nos. 2 through 6.

BEFORE THE

TEXAS COMMISSION ON

ENVIRONMENTAL QUALITY

DEFAULT AND SHUTDOWN ORDER

DOCKET NO. 2024-0376-PST-E

On _______, the Texas Commission on Environmental Quality ("Commission" or "TCEQ") considered the Executive Director's First Amended Report and Petition, filed pursuant to TEX. WATER CODE chs. 7 and 26 and the rules of the TCEQ, which requests appropriate relief, including the imposition of an administrative penalty, corrective action of the respondent, and revocation of the facility's fuel delivery certificate. The Commission also considered the Executive Director's Motion requesting the entry of an Order requiring the respondent to shut down and remove from service the underground storage tanks ("USTs") located at 700 South Gulfway Drive in Port Arthur, Jefferson County, Texas. The respondent made the subject of this Order is OHK GLOBAL INC dba Eagle 1 ("Respondent"). The Commission makes the following Findings of Fact and Conclusions of Law:

FINDINGS OF FACT

- 1. Respondent operates, as defined in 30 TEX. ADMIN. CODE § 334.2(75), a UST system and a convenience store with retail sales of gasoline located at 700 South Gulfway Drive in Port Arthur, Jefferson County, Texas (Facility ID No. 84411) (the "Facility"). The USTs at the Facility are not exempt or excluded from regulation under the Texas Water Code or the rules of the TCEQ, and contain a regulated petroleum substance as defined in the rules of the TCEQ.
- 2. During an investigation conducted on November 29, 2023, an investigator documented that Respondent:
 - a. Failed to monitor the UST installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days by using interstitial monitoring. Also, failed to monitor the piping associated with the UST system installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days. In addition, failed to conduct a test of the proper operation of the release detection equipment at least annually. Specifically, the UST was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, the piping associated with the UST system was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, the piping associated with the UST system was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, the piping associated with the UST system was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, the piping associated with the UST system was installed on July 6, 2011, and Respondent was not using interstitial monitoring as the primary release detection method, and Respondent did not conduct the annual operability testing of release detection equipment, including the automatic tank gauge ("ATG") system and the probes;
 - b. Failed to test the spill prevention equipment at least once every three years to ensure the equipment is liquid tight. Also, failed to inspect overfill prevention equipment at least once every three years to ensure that overfill prevention equipment is set to activate at the correct level. In addition, failed to annually check containment sumps for damage, leaks to the containment area, for leak in

the interstitial area. Specifically, Respondent had not conducted the triennial testing of the spill prevention equipment; and

- c. Failed to designate, train, and certify at least one individual for each class of operator-Class A, Class B, and Class C for the Facility. Specifically, the Facility did not have C Operator.
- 3. By letter dated December 14, 2023, Respondent was provided with written notice of the violations and of TCEQ's authority to shut down and remove from service USTs not in compliance with release detection, spill and/or overfill prevention, corrosion protection, and/or financial assurance requirements if the violations were not corrected.
- 4. The Executive Director filed the "Executive Director's First Amended Report and Petition Recommending that the Texas Commission on Environmental Quality Enter an Enforcement Order Assessing an Administrative Penalty Against and Requiring Certain Actions of OHK GLOBAL INC dba Eagle 1" (the "EDFARP") in the TCEQ Chief Clerk's office on September 20, 2024.
- 5. By letter dated September 20, 2024, sent to Respondent's last known address via certified mail, return receipt requested, postage prepaid, the Executive Director served Respondent with notice of the EDFARP. According to the return receipt "green card," Respondent received notice of the EDFARP on September 24, 2024, as evidenced by the signature on the card and USPS.com "Track & Confirm" delivery confirmation records.
- 6. More than 20 days have elapsed since Respondent received notice of the EDFARP. Respondent failed to file an answer and failed to request a hearing.
- 7. By letter dated October 10, 2024, the Executive Director provided Respondent with notice of TCEQ's intent to order the USTs at the Facility to be shut down and removed from service if Respondent failed to correct the release detection and spill and overfill prevention violations within 30 days after Respondent's receipt of the notice.
- 8. As of the date of entry of this Order, Respondent has not provided the Executive Director with documentation demonstrating that the release detection and spill and overfill prevention violations alleged in Findings of Fact Nos. 2.a. and 2.b. have been corrected.
- 9. The USTs at the Facility do not have release detection and spill and overfill prevention as required by Tex. WATER CODE § 26.3475(a), (c)(1), and (c)(2) and 30 Tex. ADMIN. CODE §§ 334.48(g)(1)(A)(ii), (g)(1)(B), and (h)(1)(B)(i) and 334.50(b)(1)(B) and (b)(2)(A)(i) and (iii), and may be releasing petroleum products to the environment. Therefore, conditions at the Facility constitute an imminent peril to public health, safety, and welfare.

CONCLUSIONS OF LAW

- 1. As evidenced by Finding of Fact No. 1, Respondent is subject to the jurisdiction of the TCEQ pursuant to TEX. WATER CODE ch. 26 and the rules of the TCEQ.
- 2. As evidenced by Finding of Fact No. 2.a., Respondent failed to monitor the UST installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days by using interstitial monitoring. Also, failed to monitor the piping associated with the UST system installed on or after January 1, 2009 in a manner which will detect a release at a frequency of at least once every 30 days. In addition, failed to conduct a test of the proper operation of the release detection equipment at least annually, in violation of TEX. WATER CODE § 26.3475(a) and (c)(1) and 30 TEX. ADMIN. CODE § 334.50(b)(1)(B) and (b)(2)(A)(i) and (iii).

- 3. As evidenced by Finding of Fact No. 2.b., Respondent failed to test the spill prevention equipment at least once every three years to ensure the equipment is liquid tight. Also, failed to inspect overfill prevention equipment at least once every three years to ensure that overfill prevention equipment is set to activate at the correct level. In addition, failed to annually check containment sumps for damage, leaks to the containment area, for leak in the interstitial area, in violation of TEX. WATER CODE § 26.3475(c)(2) and 30 TEX. ADMIN. CODE § 334.48(g)(1)(A)(ii), (g)(1)(B), and (h)(1)(B)(i).
- 4. As evidenced by Finding of Fact No. 2.c., Respondent failed to designate, train, and certify at least one individual for each class of operator-Class A, Class B, and Class C for the Facility, in violation of 30 Tex. ADMIN. CODE § 334.602(a).
- 5. As evidenced by Findings of Fact Nos. 4 and 5, the Executive Director timely served Respondent with proper notice of the EDFARP, as required by TEX. WATER CODE § 7.055 and 30 TEX. ADMIN. CODE § 70.104(b)(1).
- 6. As evidenced by Finding of Fact No. 6, Respondent failed to file a timely answer as required by Tex. WATER CODE § 7.056 and 30 Tex. ADMIN. CODE § 70.105. Pursuant to Tex. WATER CODE § 7.057 and 30 Tex. ADMIN. CODE § 70.106, the Commission may enter a Default Order against Respondent and assess the penalty recommended by the Executive Director.
- 7. Pursuant to TEX. WATER CODE § 7.051, the Commission has the authority to assess an administrative penalty against Respondent for violations of state statutes within TCEQ's jurisdiction, for violations of rules adopted under such statutes, or for violations of orders or permits issued under such statutes.
- 8. An administrative penalty in the amount of \$5,956 is justified by the facts recited in this Order, and considered in light of the factors set forth in Tex. WATER CODE § 7.053.
- 9. As evidenced by Findings of Fact Nos. 2.a., 2.b., 3, 7, and 8, Respondent failed to correct documented violations of TCEQ release detection and spill and overfill prevention requirements within 30 days after Respondent received notice of the violations and notice of the Executive Director's intent to shut down the USTs at the Facility.
- 10. TEX. WATER CODE §§ 26.3475(e) and 26.352(i) authorize the Commission to order a UST owner or operator to shut down a UST system if, within 30 days after receiving notice of the violations, the owner or operator fails to correct violations of TCEQ regulatory requirements relating to release detection for tanks and/or piping, spill and/or overfill prevention for tanks, corrosion protection for tanks and/or piping, and/or acceptable financial assurance.
- 11. TEX. WATER CODE §§ 5.102 and 7.002 authorize the Commission to issue orders and make determinations necessary to effectuate the purposes of the statutes within its jurisdiction.
- 12. Pursuant to 30 Tex. ADMIN. CODE § 334.8(c)(6), the Commission has authority to revoke the Facility's UST fuel delivery certificate if the Commission finds that good cause exists.
- 13. Good cause for revocation of the Facility's UST fuel delivery certificate exists as justified by Findings of Fact Nos. 2 and 4 through 6, and Conclusions of Law Nos. 2 through 6.
- 14. As evidenced by Findings of Fact Nos. 8 and 9, current conditions at the Facility constitute an imminent peril to public health, safety, and welfare. Therefore, pursuant to the Administrative Procedure Act, TEX. GOV'T CODE § 2001.144(a)(3), this Order is final and effective on the date it is signed by the Commission.
