**COMMENTS:** I would like TCEQ to deny this amendment request and I am also calling for a public hearing. We have not been given enough information on the project, and this is a problem for a project that is asking to increase industrial hazardous waste storage in the community. Robstown is an environmental justice community. Residents have not been provided with opportunities to learn more about this, and the time of this meeting is inconvenient. Give us more time to

study the application. Disclose what this amendment means for the community, and do better especially with materials like industrial hazardous waste.
