**RE: Requests for Reconsideration filed by Murphy DeShong concerning the application by Love's Travel Stops & Country Stores, Inc., for the amendment and renewal of Permit No. WQ0015618001; TCEQ Docket No. 2024-0665-MWD.**

To Whom it May Concern:

Apex Companies, LLC, on behalf of Love's Travel Stops & Country Stores, Inc., is providing this brief in response to the Request for Reconsideration filed by Murphy DeShong ("DeShong") concerning the application by Love's Travel Stops & Country Stores, Inc. ("Love's"), for the amendment and renewal of Permit No. WQ0015618001 (the "Permit"); TCEQ Docket No. 2024-0665-MWD (the "Request for Reconsideration").

Love's does not dispute that the plant identified as the Love's Travel Stop #250 Wastewater Treatment Facility (the "Facility") is located within the 150' buffer zone established by 30 TAC 309.13(e), as described in the Request for Reconsideration. The plans for construction of the of the existing Facility (attached as Exhibit A) indicate that the "Proposed WWTP" identified therein would be located 163' from the western property line. Notwithstanding, upon review of the site in connection with designing the expansion of the Facility, Love's determined that the existing Facility was actually constructed 136.02' from the western property line, as shown on Exhibit B.

Love's is exploring multiple options to mitigate the impact of the Facility being located within the 150' buffer zone. The portion of the property to the west that is adjacent to the Love's property line is currently undeveloped. Love's is currently attempting to acquire additional property to meet the buffer requirement or, in the alternative, ensuring that no structures are constructed within the 150' buffer. Love's respectfully requests that TCEQ provide it with sufficient time to evaluate and pursue these options and, if necessary, submit a nuisance abatement plan to TCEQ for evaluation, prior to amending or denying the renewal of the Permit.

Sincerely,

A handwritten signature in blue ink that reads "Amelia Jordan".

Amelia Jordan, PE  
Senior Project Engineer
