I would like to protest permit WQ0015944-001. Adding a waste water treatment plant that runs through properties has got to be a violation of the liberties of this county. The existing flooding and the potential for life threatening floods with the addition of this development is a scary idea.

COMMENTS: Does TCEQ take into consideration the flood zones and history of flooding in the surrounding area. The area in question is surrounded on multiple sides in the 100-year flood zone and numerous properties affected through multiple flood events through the years and definitely through the 2017 Hurricane Harvey flooding events. The area is mostly in the 500-year flood plain. With hundreds of concrete pads and streets going in, the entire area will be changed regarding water flow and flooding.

To whom it may concern,

A developer is planning to build a mobile home development with water treatment center and sewage facility on-site. The developers plan is to dump their treated septic water into the creek two properties upstream from us. We own properties #17&18 on the map. We currently have 33 sheep, 2 donkeys, 1 horse, 9 ducks, about 50 chickens, 4 dogs, and 2 cats that drink out of this creek. I am extremely concerned this will not only endanger our livestock, but also our own water well. Our personal water well is less than 100 ft from the creek that the developer plans to dump septic waste into. This is a huge concern for us and our surrounding neighbors. I request an emergency meeting regarding this matter.

Sincerely,
Aubrey Fleming

COMMENTS: Bayou side partners plan to discharge their waste water from their treatment plant to the rice lease easement that is located through the back of my property and 14 other home owners who share this easement. There are roughly 14 homes that have water wells located within less than 100 feet of this rice field drainage. The bayou side partners drainage would be running very close to my shallow water well. This would be a direct violation of contaminating my drinking water source for my family and also the other homes with water wells located there. There is

a 500 radius around their well water treatment plant for a reason. I should be allowed the same respect and not have to deal with their effluent waste water coming through my property.

COMMENTS: With the removal of up to 75000 gallons of water from the water table there will be land subsidence and a greater risk for flooding. There will be long term consequences to the approval of this well with a high density development. The discharge of the waste water from the treatment plant to the surface will increase our natural ground saturation and storm water runoff. There are other options for their septic plans that need to be considered.

COMMENTS: I am requesting a meeting. I am an ag exempt property and my livestock rely on this current clean water source. The approval of sewer discharge through my property will have a great impact on my animals and family. My well (and also roughly 14 other homes) have water wells located within 100 feet of this water source. Not if, but When this waste water system fails, my family, animals, and others will suffer. This system should not be approved based off of some simple common sense and basic principles.

COMMENTS: I am requesting a meeting. I am an ag exempt property and my livestock rely on this current clean water source. The approval of sewer discharge through my property will have a great impact on my animals and family. My well (and also roughly 14 other homes) have water wells located within 100 feet of this water source. Not if, but When this waste water system fails, my family, animals, and others will suffer. This system should not be approved based off of some simple common sense and basic principles.

Thank you for your comments.

A copy of your email will be forwarded to the Texas Commission on Environmental Quality (TCEQ) staff responsible for reviewing the application. All timely filed comments will be considered by the staff prior to the final decision on the application. You will be added to the mailing list for this application. After the opportunity to submit comments ends, a copy of the formal written response to all timely filed comments will be mailed to you. If a decision is made to hold a public meeting, you will receive a hard copy of the public meeting notice in the mail.

The TCEQ appreciates your interest in environmental issues. You may track the status of matters pending before the Commission for approval or view comments and requests by visiting the following website:
<https://www14.tceq.texas.gov/epic/eCID/>. If you have any further questions, please feel free to contact the Public Education Program staff at 800-687-4040.

Sincerely,
Office of the Chief Clerk

NOTE: Please do not respond to this email; it will not be answered. If you would like to submit additional comments, please use the online eComments system at: <https://www.tceq.texas.gov/agency/decisions/cc/comments.html>

COMMENTS: This project will cripple the already battered Dickinson Bayou! The dissolved Oxygen content and Fecal Coliforms are already impacting our aquatic species. The bayou can't handle more pressure from a 75,000 gallon wastewater treatment plant. This area regularly floods, how can you allow floodwaters from a wastewater treatment plant to pollute nearby properties? This is not safe! The smell of a wastewater treatment plant will hurt neighboring owners quality of life and property values.

TCEQ,

I would like to Protest permit WQ00154954-001.

The creation of the sewage plant would cause harm to land owners and animals. It would create flooding in the area which could damage property and lives. It would also jeopardize our water wells since the developer plans to dump the treated septic waste into a creek which out drain into Dickinson Bayou.

I would like to request a emergency meeting to voice our concerns about denying this permit.

Respectfully,
Karla Klyng

COMMENTS: The unnamed tributary proposed to carry the waste water discharge to Dickinson Bayou is not recorded with the Galveston County Clerks office as this kind of easement. It's not even listed as an easement in the documents. It is a "Rice Lease" The exact wording listed on the lease concerning the easement is "It is understood and agreed that should it become necessary to construct a canal, lateral, or irrigation ditch on or across the above described tract of land, Briscoe Production Company, its heirs or assigns, is hereby granted a permanent easement for the use of such

canal, lateral or irrigation ditch for irrigation purposes" This does NOT grant permission to discharge any type of water through this unnamed tributary and I will not grant permission or any sort of easement across my property. I will provide a copy of this "Rice Lease" if requested.

COMMENTS: As resident who lives in very close proximity to the proposed development associated with this permit number, I am joining with others in my community to voice my protest of this permit for the following reasons: Serious concerns about substantially increased flooding to not only the development's property, but the neighboring properties that already experience flooding after very little rainfall. This poses serious risk of loss of not only hard-earned HOMES, possessions and livestock, but more importantly human lives in the case of a severe weather event (which is not

uncommon). The DAILY dumping of 75,000 gallons of waste water/sewage into the canals and the Bayou. The canals that current residents' livestock and domestic animals drink from. The damage that will be caused to our already decrepit two lane country roads by the increased number of vehicles from future residents and the heavy trucks that will be needed to transport hundreds of mobile homes to the development site. Not to mention the inevitable traffic flow issues with an additional 700 or so vehicles on these two lane country roads.

COMMENTS: The permit being worked on currently is with the Texas Commission on Environmental Quality. The permit being asked for is a wastewater treatment plant for the proposed 350+ mobile home park to be moved to the above address. (Less than .25 miles from our gate) If the permit is granted it will give the developer permission to release 75,000 gallons of effluent water into Dickinson bayou daily. of My concerns are as follows; More flooding in an area that

already floods Smell of the Wastewater treatment plant Safety of the Wastewater treatment plant Future water quality of Dickinson Bayou Negative effects of high density housing in a rural area Negative effects on streets and roads

COMMENTS: I would like to contest because we are worried about our well being contaminated and our children drinking waste water. Our property already floods when there is heavy rains and if they raise the property next to us to put in the treatment plant it will shed right onto our land and flood our property. I have 5 small children under 8 years old and no not want to worry about drowning or then playing in hazardous water. The bayou can be contaminated and all the aquatic and wildlife that use the bayou to survive will be at risk. I also would not like to smell waste water at my home , it will bring down property value and not be a nice place to live anymore , nobody wants to live smelling odor from sewage and waste water. What if there is a storm or the plant breaks or malfunctions and there is waste water all over our homes & properties , outside animals will just be standing in waste water ?

Thank You. This was our first bit of any information we have received in regards to the building of this project. We live in Lago Lakes Subdivision. Part of my big concern is the road traffic, as since we purchased here Cemetery has never been a smooth surface road and always needs potholes repaired.

Thank You,
Penny Pelletier

Subject: Permit WQ0015944-001

To whom it may concern,

I would like to call into protest the permit WQ0015944-001.

The creation of this sewage plant not only jeopardizes additional flooding in the area it violates our rights as land owners and the safety of our families.

As a concerned citizen I'm requesting an emergency meeting to deny the mentioned permit.

Regards,
Craig Thompson

Thank you for your comments.

A copy of your email will be forwarded to the Texas Commission on Environmental Quality (TCEQ) staff responsible for reviewing the application. All timely filed comments will be considered by the staff prior to the final decision on the application. You will be added to the mailing list for this application. After the opportunity to submit comments ends, a copy of the formal written response to all timely filed comments will be mailed to you. If a decision is made to hold a public meeting, you will receive a hard copy of the public meeting notice in the mail.

The TCEQ appreciates your interest in environmental issues. You may track the status of matters pending before the Commission for approval or view comments and requests by visiting the following website: <https://www14.tceq.texas.gov/epic/eCID/>. If you have any further questions, please feel free to contact the Public Education Program staff at 800-687-4040.

Sincerely,
Office of the Chief Clerk

NOTE: Please do not respond to this email; it will not be answered. If you would like to submit additional comments, please use the online eComments system at: <https://www.tceq.texas.gov/agency/decisions/cc/comments.html>

COMMENTS: I am writing to register my extreme objection to the proposed sewer plant for the Field Creek development off Countryside in Santa Fe. Our property is directly adjacent to this property. We moved from a home in Rosharon, Savannah Plantation, because of a sewer plant. The noise level and the smell are unacceptable! This project is not appropriate for this property. It is marsh land that easily floods. 300 trailers on this property and the attendant traffic and the concern for our individual wells is overwhelming. Please do not allow this to continue! Thank you.

COMMENTS: I live very close to this project, I fear that my well will be contaminated. I also have concern that my home and my neighbors home will be once again flooded. This is a lot of water being drained to an area that is already challenged for proper drainage.

PERMIT WQOO15944-001

My name is Cynthis Lewis Weir. I live at 13928 Doris Street, Santa Fe, Texas

I am concerned that the proposed, Construction will affect my Well which is probably 50 feet from where the creek is listed in the Permit. I am concerned that the release from the sewage plant, would affect my drinking water.

My concern also that the bayou water levels will be affected and that we will flood again. I had about 12 inches of water in my house during Harvey, and we lost all our cars, because our property slopes towards the creek that is mention in the permit. Please listen to residents around this proposed Mobile Home Site, we see water rising with every rain, we see water that covers the road after just a few hours of downfall.

Cindy Lewis Weir
